be very much interested in this bill, and I think they should do away with it. So we are getting along real well the way it is, and we have a fellow down the road that Primrose that I think he got his electrical work in the Navy, and in probably thirty minutes he's up there and maybe fixes a fuse, and checks it out and sees what's wrong with it. We don't touch it. And if we had to go to a apprentice electrician, we'd lose 160 acres of corn in two or three days. If we had to wait a week it would be probably even lose the stocks. So I think it's a real serious situation for irrigating farmers, when..if they got a bill like this I don't think they could live under it.
