

March 4, 1976

to the fact that they were altogether evil, but that you hear this one day, and you hear that the next, and that you too are confused. Well I think maybe I should try to help to untangle your confusion and say, Senator, that we happen, in Omaha, to have picked up your race track this year for some extra days for what reason I don't know but I think we have to go until August so that you can build your own race track here on your own county fair. I think you're interested in county fair. I think I read your biography. I think you said that one of your high points and one of your strong points is county fairs.

I know, Mr. Speaker, but it's all a part of the general gambling trend. Now Senator Chambers should join with me on this occasion. He eludes many times and gets off the track. I think I should be allowed to talk about county fairs, talk about gambling, talk about the great interest that Senator Warner has. This is a dollar ticket, a 50¢ ticket, it's a lottery. This is small, this is not the \$50 windows, this is not Omaha taking over ninety some days, making a race track all the way through. We're doing a service for Lincoln, Senator Warner. We're doing a service for county fairs.

I'll end, Mr. President, and I'll get back and I'll come back to the track. The track is do not be swayed by the Chambers-Warner elocution this afternoon, do not do something here that maybe your own communities would be interested in maybe in the next year.

PRESIDENT: Senator Frank Lewis.

SENATOR F. LEWIS: Mr. Chairman, I rise to support Senator DeCamp in his efforts in terms of the lottery. I've listened with a great deal of interest over the last two days. As we've talked about the virtues and vices of gambling and where we spend our money I assume those who have expounded so well in terms of the vices of gambling are prepared to support an amendment to take care that we have no gambling in the State of Nebraska. We can end the pari-mutuel tax, we can end the gambling if they'd like.

It always reminds me of my friends in Oklahoma during prohibition. Used to have a political friend there who used to claim that he was publicly dry and personally wet. That's similar to the sound here.

Those local communities want to use this device, our local associations want to, then I think it's legitimate. Some of us sometimes get tired of the two standards that we try to exhibit in this body. There is nothing wrong with the system that we had in terms of that. Senator DeCamp,... and I say this, Senator DeCamp, and it doesn't come very often. I compliment you for your courage and your bringing this issue before to allow the local government to determine what they want to. I'd like to ask you a question so that I understand it well and so the membership understands your bill.
