

March 7, 1980

LB 873

SENATOR KAHLE: ...and through that program where they have that extra funding and the county now maintains it.

SENATOR WARNER: One of the amendments that Senator Hoagland has strikes Section 1 which did tap that recreational road fund and that is the kind of road you are talking about but that whole provision is stricken from or will be stricken from the act with the amendments that he will propose on Select File.

SENATOR KAHLE: So this has nothing to do with that funding?

SENATOR WARNER: Will not, no.

SENATOR KAHLE: How can you separate it?

SENATOR WARNER: How do you separate what?

SENATOR KAHLE: Well, you are going to have the road in a scenic area...

SENATOR WARNER: As I understand Senator Hoagland's bill I should have Senator Hoagland answering part of this but as I understand it it only would apply here where it was a state highway...and the functional classification system was on the state highway system.

SENATOR KAHLE: Well I will not throw a roadblock in here now but I think you should find out exactly where that park money comes in and where the state money comes in and then who is going to maintain and keep these roads up after they are finished because I am not objecting to the county doing it. We do it after they are maintained but I think you better not deceive the public in any way, so I think we ought to find out about that.

SENATOR WARNER: Yes. Senator Kahle, I can answer that specifically. I am sure that Senator Hoagland will confirm that with the amendment that he is going to offer which will take all of Section 1 totally out of the bill. Then this will in no way be mixed in with or associated with the recreational road fund which is a fifty cents per registration and that is not affected by the legislation in any way as I understand.

SENATOR KAHLE: Well I guess what I was wondering about, if you are going to make a scenic highway or road and you are going to use part of the road that is already there that was built by the Games and Parks Commission with these funds, how are you going to tell then who maintains it? I guess that is my question because you could have a mix. Part of it would
