

could be made within the two programs working together together with the probability because some of us do not keep full-time people, or two people full time, that the reduction could be accommodated by the board. Another one that was discussed, it was one on the earlier governor's list, you may recall, but it changes the auditing as far as the state auditors concern of counties and cities. It is our belief that under the statute that the audit can be done and under the direction of the state auditor and that that general fund appropriation could be reduced. There are a number of other programs we...in the Department of Education they eliminated the Displaced Homemakers Program, this was on a couple of criteria, it is in a couple of a limited places in the....I think there are three towns in the state plus a couple satellites and in the discussion it was also discovered and pointed out that there are some additional federal programs relative to training or retraining for individuals which would have otherwise been using this service of state government in that they could then be assisted with that program as well. The Department of Education also cut out program 508 which was a curriculum counselling, we did it on a couple of basis, one of which...it probably would not, well obviously would not...failure to fund would not really affect the enforcement of statutes, but more importantly, that individual...these people help individual school districts. Most schools probably have adequate people to assist them as it is. The Department of Revenue is a straight cut, that is just a clean cut of 200,000. The Department of Agriculture, we would have eliminated the funding for predator control. It's primarily directed to individual help. There is about 1,200 requests a year according to the report on the average, that was running a thousand dollars a request. We eliminated 50,000 in the Department of Ag on export marketing. This is a vacant position. It was the feeling that that type of activity and could be concentrated through the cooperative efforts of the check-off boards as well as the Department of Economic Development that has the responsibility. We are presuming as one of the bills that would come up later, LB 460, which is on General File, that makes some adjustments in some fees affects the investigations...inspections by the Department of Agriculture which would offset about 100,000. The Department of Health we reduced in half the availability of medical student loans. The reason again for this is a couple of things, one of which it was to fit a criteria of
