LB 1001, 1072

SENATOR ABOUD: ...authorization or the use of this money is in compliance with the federal law dealing with the American Disabilities Act, the federal law.

SENATOR WARNER: Correct. The federal Americans for Disability Act, and also it deals with hazardous material abatement which could be by state statute, specifically it limits it only to the extent mandated by federal or state statute or regulations in these two areas.

SENATOR ABOUD: Okay. Are you aware of any mandating by the state in regard to this American Disabilities Act?

SENATOR WARNER: No, but there could be some in hazardous material.

SENATOR ABOUD: Okay, thank you.

SPEAKER BAACK: Thank you, Senator Abboud. Senator Wesely.

SENATOR WESELY: Thank you, Mr. Speaker. I was just looking over LB 1072, trying to quickly identify what changes are occurring here. I introduced the original bill which provided for the asbestos abatement fund which was developed and emerged eventually as a hazardous waste environmental...not hazardous waste but environmental hazard fund, and so I can see, as Senator Withem said, this is an evolution of the...of the issue. I guess, Senator Warner, is there any change to the original underlying statute? I was looking here and I see some changes in some wording but I'm...there's really no impact outside of adding another element to that fund's ability to be used for. Isn't that correct?

SENATOR WARNER: I believe that is correct. I'm reviewing this to be certain but I believe that is...yes, that is correct.

SENATOR WESELY: I mean, this amendment is essentially the bill, right? There's not (interruption).

SENATOR WARNER: Yes.

SENATOR WESELY: Okay.

SENATOR WARNER: In LB 1072?
