LB 1217

proposal then comes to the Appropriations Committee again, looking for dollars to complete this program. This is not something that happened overnight, this is something that has been going on for several years now, the previous administration, now we're in the second year of this administration. We still have overcrowding, we still have a situation where we've got kids that are running through the system, through a revolving door, that are not being treated properly, there isn't time for rehabilitation. This could maybe solve part of that problem. I just ask that you think about that as we go through the rest of this process. Providers had an opportunity to take a look at this. The RFPs went out, they could have responded and they could have also said that they could have done this; that didn't happen, that's why this is here, that's why it went to the Appropriations Committee, that's why the Appropriations Committee is bring it to us. Just wanted to let the body know part of the history of this program. It's not a new program that all of a sudden appeared out of the sky that the Appropriations Committee decided to fund. With that, I'll return the rest of my time back to the Chair.

PRESIDENT MAURSTAD: Thank you, Senator Jensen. Senator Redfield, on the motion to reconsider.

SENATOR REDFIELD: Thank you, Mr. Lieutenant Governor. Members of the body, Senator Chambers should know it's very dangerous to ask a woman to speak, but he has asked that someone else might address the issue. And I've been sitting here, waiting to vote for AM2819, and I'm going to support that motion because I do have concerns about the process here and the fact that we have not had the normal consideration in hearings and the bill proposal that we would ordinarily see. But one of the things that I want to share from my perspective is that I did go see the film on the Wilderness program and, yes, it did look very appealing to me because my concern, of course, is always that you put children in a situation which helps them to grow, helps them to learn new skills, helps them to find out that there are other things in the world than their own narrow experience. And I think that helps them to look beyond themselves and to see a purpose in life and to see a future. I think that they can extrapolate that skill and take it back to wherever they go in life and then begin to apply those same kinds of learning skills
