**Summary of purpose and/or changes:**

Legislative Bill 527 would create the “In the Line of Duty Dependent Education Act” for the benefit of children of deceased Nebraska law enforcement officers, firefighters, and emergency medical services providers killed in the line of duty on or after the effective date of the act.

Legislative findings would state that Nebraska's law enforcement officers, firefighters, and emergency medical services providers have lost or may lose their lives in the performance of official duties to protect the citizens and property of Nebraska. The intent of the Legislature

---

would be to recognize the sacrifice by providing postsecondary educational benefits for surviving children to attend state universities, state colleges, and community colleges located in Nebraska.

Children of deceased Nebraska law enforcement officers, firefighters, or emergency medical services providers would be eligible if:

1. The child is not receiving benefits under any federal act providing for the payment of tuition and fees for children of law enforcement officers, firefighters, or emergency medical services providers killed in the line of duty;
2. The law enforcement officer or firefighter was engaged in his or her authorized law enforcement, fire suppression duties (including arson investigation), or emergency medical services duties when the fatal injury was incurred, the fatal injury occurred after the effective date of the act, and the death was not the direct and proximate result of a preexisting condition; and
3. The child is 25 or younger and meets all admission requirements of the state university, state college, or community college to which he or she is applying.

The benefit would only be provided for full-time undergraduate students pursuing an associate or baccalaureate degree. The benefit would be provided for up to 5 years based on continuing eligibility, which would cease at 26 years of age. The child would be required to apply for federal and state grants to cover tuition and fees and to provide records of such applications to the educational institution. The state university, state college, or community college would waive tuition and fees remaining after subtracting scholarships and federal and state grants.

The application would include a certified copy of the child's birth certificate or adoption record and verification of the death of the law enforcement officer or firefighter. Verification would be obtained from the Superintendent of Law Enforcement and Public Safety, State Fire Marshal, or the emergency medical service under which he or she provided emergency medical services.

The educational institution would be required to send written notice of eligibility or ineligibility within 45 days after receiving the application. Notices of ineligibility would include reasons for ineligibility and state that an appeal may be made pursuant to the Administrative Procedure Act.

Upon a determination of eligibility, the institution would be prohibited from charging tuition or fees as long as the child is a full-time student, meets the admission requirements, and complies with the requirements for continued attendance and award of an associate or baccalaureate degree. Each institution would adopt necessary procedures, rules, and regulations.

The definitions for the Act would be as follows:

1. Associate degree would mean an undergraduate degree awarded by a community college located in Nebraska;
2. Baccalaureate degree would mean an undergraduate degree awarded by a state college or state university located in Nebraska;
3. Child would mean a resident or nonresident who is the child by birth or adoption of a Nebraska law enforcement officer or firefighter killed in the line of duty;

4. Community college would mean a public postsecondary educational institution that is part of the community college system, including all branches and campuses;
5. Education benefit would mean the In the Line of Duty Dependent Education Benefit;
6. Emergency medical services provider would mean a paid or volunteer out-of-hospital emergency care provider listed in § 71-5178(2) and certified pursuant to the Emergency Medical Services Act;
7. Firefighter would mean a member of a paid or volunteer fire department, including associated rescue squad members;
8. Law enforcement officer would mean any person responsible for the prevention or detection of crime or the enforcement of the penal, traffic, or highway laws for more than 100 hours per year and who is authorized to make arrests, including county sheriffs, full and part-time employees of a county sheriff's office and city or village police departments;
9. Line of duty would mean any action that a law enforcement officer or firefighter is authorized or obligated to perform by law, rule, regulation, or condition of employment or service;
10. State college would mean a public postsecondary educational institution which is part of the Nebraska state college system, including all branches and campuses;
11. State university would mean a public postsecondary educational institution which is part of the University of Nebraska, including all branches and campuses;
12. Tuition and fees would mean charges and costs of instate tuition and fees set by the governing body of the institution; and
13. Volunteer fire department would mean a volunteer department, as defined in § 35-1303, which provides fire protection services within Nebraska.

This measure contains a severability clause.

**Explanation of amendments, if any:**

---

**Senator Ron Raikes, Chairperson**
