LB 28 would amend sections of law relating to chemigation permits and the type of information provided to the Department of Environmental Quality by natural resources districts. There is no basis to disagree with the DEQ estimate that there will be an annual savings of \$6,000 Cash Funds as a result of diminished database requirements.

## **Explanation of Estimate:**

LB 28 amends the Nebraska Chemigation Act by eliminating the requirement that Natural Resources Districts send the Department a copy of each chemigation permit they issue. The information will be available from the NRDS upon request. Currently the Department contracts to have the permit information entered into the Department's database. Approximately \$6,000 will be saved annually. In addition, nominal cost savings will be saved in handling and processing each permit.
