Research Report 2019-4

# INTRODUCTION

This edition of Districts At-a-Glance ranks Nebraska legislative districts in a variety of metrics – from economics to health to education. While other publications in our "At-a-Glance" series focused on state-by-state comparisons and county-level analysis, Districts At-a-Glance focuses exclusively on ranking legislative districts. It is a statistical snapshot of Nebraska, designed to give policymakers and the public a glimpse of the challenges and opportunities facing different districts across the state. All of the data in this report comes from the Census Bureau's American Community Survey (ACS), which was conducted over five years, from 2014 to 2018. The ACS represents the gold standard in domestic demographic and statistical data.

# **METHODOLOGY**

The tables, graphs, and maps in Districts at-a-Glance use the most current data available for all 49 legislative districts. Districts are always ranked from highest to lowest value, without regard to subject matter, so a higher ranking is not always preferable to a lower ranking.

The rankings in this report were determined using multiple decimal places of precision. However, for the tables on each page, values are rounded to a single decimal place. Thus, two districts can appear equal in their numerical measure, but still have different rankings.

Every ranking also includes a color-coded map and a bar graph comparing the highest and lowest ranked districts. Source information is located at the bottom of each page, including a link to the raw data. Text in each header includes supplemental information about the subject, including definitions, additional rankings, and more detailed data.

# **MEDIAN AGE**

Median age is the age that divides a population into two numerically equal groups - that is, half the people are younger than this age and half are older. It is a single index that summarizes the age distribution of a population.

#### Births per 1,000 teens

# MINORITIES

Race data in the census is based on self-identification. Respondents choose the race with which they most closely identify, and indicate whether they are of Hispanic or Latino origin. This ranking is based on the inverse of total respondents who self-identify as white.

#### PERCENT OF RESIDENTS THAT IDENTIFY AS "NON-WHITE"

# STEM

STEM stands for "Science, Technology, Engineering, and Math." This ranking is based on STEM degrees as a percent of all bachelor's degrees attained, including degrees in computer science, mathematics, statistics, biology, psychology, engineering, agricultural science, environmental science, physical sciences, and social sciences.

### STEM DEGREES AS A PERCENT OF ALL BACHELOR'S DEGREES

#### STEM degrees as a percent of all bachelor's degrees attained

### **STEM DEGREES AS A PERCENT OF ALL BACHELOR'S DEGREES**

# INCOME

Median household income is the midpoint of all incomes in a district — half of households made more than the median, and half made less. This ranking is based on the five-year estimate of inflation-adjusted income for the years 2014 through 2018.
