LB 704 amends Nebraska Revised Statutes Section 77-27,235, dealing with renewable energy credits.

The bill changes the electricity generation facility name from “zero-emission facility” to renewable electric generation facility.” It also strikes language requiring the Department of Environmental Quality to certify a facility emits no pollution that may be harmful to the environment. The bill also removes a sunset date for the credits.

The Department of Environmental Quality estimates no fiscal impact.

The Department of Revenue estimates the fiscal impact and the cost to implement to be minimal.

There is no basis to disagree with either department’s estimate of fiscal impact.
