

LEGISLATIVE BILL 413

Approved by the Governor April 29, 2015

Introduced by Mello, 5.

A BILL FOR AN ACT relating to environmental protection; to amend sections 81-1504, 81-1505, 81-1532, and 81-15,153, Reissue Revised Statutes of Nebraska; to provide powers and duties for the Department of Environmental Quality and the Environmental Quality Council; to provide for an evaluation as prescribed when issuing permits to political subdivisions under the federal Clean Water Act; to create a fund; to provide for procedures, fees, and costs; to provide funding assistance under the Wastewater Treatment Facilities Construction Assistance Act; to harmonize provisions; and to repeal the original sections.

Be it enacted by the people of the State of Nebraska,

Section 1. Section 81-1504, Reissue Revised Statutes of Nebraska, is amended to read:

81-1504 The department shall have and may exercise the following powers and duties:

(1) To exercise exclusive general supervision of the administration and enforcement of the Environmental Protection Act, the Integrated Solid Waste Management Act, the Livestock Waste Management Act, and all rules and regulations and orders promulgated under such acts;

(2) To develop comprehensive programs for the prevention, control, and abatement of new or existing pollution of the air, waters, and land of the state;

(3) To advise and consult, cooperate, and contract with other agencies of the state, the federal government, and other states, with interstate agencies, and with affected groups, political subdivisions, and industries in furtherance of the purposes of the acts;

(4) To act as the state water pollution, air pollution, and solid waste pollution control agency for all purposes of the Clean Water Act, as amended, 33 U.S.C. 1251 et seq., the Clean Air Act, as amended, 42 U.S.C. 7401 et seq., the Resource Conservation and Recovery Act, as amended, 42 U.S.C. 6901 et seq., and any other federal legislation pertaining to loans or grants for environmental protection and from other sources, public or private, for carrying out any of its functions, which loans and grants shall not be expended for other than the purposes for which provided;

(5) To encourage, participate in, or conduct studies, investigations, research, and demonstrations relating to air, land, and water pollution and causes and effects, prevention, control, and abatement of such pollution as it may deem advisable and necessary for the discharge of its duties under the Environmental Protection Act, the Integrated Solid Waste Management Act, and the Livestock Waste Management Act, using its own staff or private research organizations under contract;

(6) To collect and disseminate information and conduct educational and training programs relating to air, water, and land pollution and the prevention, control, and abatement of such pollution;

(7) To issue, modify, or revoke orders (a) prohibiting or abating discharges of wastes into the air, waters, or land of the state and (b) requiring the construction of new disposal systems or any parts thereof or the modification, extension, or adoption of other remedial measures to prevent, control, or abate pollution;

(8) To administer state grants to political subdivisions for solid waste disposal facilities and for the construction of sewage treatment works and facilities to dispose of water treatment plant wastes;

(9) To (a) hold such hearings and give notice thereof, (b) issue such subpoenas requiring the attendance of such witnesses and the production of such evidence, (c) administer such oaths, and (d) take such testimony as the director deems necessary, and any of these powers may be exercised on behalf of the director by a hearing officer designated by the director;

(10) To require submission of plans, specifications, and other data relative to, and to inspect construction of, disposal systems or any part thereof prior to issuance of such permits or approvals as are required by the Environmental Protection Act, the Integrated Solid Waste Management Act, and the Livestock Waste Management Act;

(11) To issue, continue in effect, revoke, modify, or deny permits, under such conditions as the director may prescribe and consistent with the standards, rules, and regulations adopted by the council, (a) to prevent, control, or abate pollution, (b) for the discharge of wastes into the air, land, or waters of the state, and (c) for the installation, modification, or operation of disposal systems or any parts thereof;

(12) To require proper maintenance and operation of disposal systems;

(13) To exercise all incidental powers necessary to carry out the purposes of the Environmental Protection Act, the Integrated Solid Waste Management Act, and the Livestock Waste Management Act;

(14) To establish bureaus, divisions, or sections for the control of air

pollution, water pollution, mining and land quality, and solid wastes which shall be administered by full-time salaried bureau, division, or section chiefs and to delegate and assign to each such bureau, division, or section and its officers and employees the duties and powers granted to the department for the enforcement of Chapter 81, article 15, the Integrated Solid Waste Management Act, the Livestock Waste Management Act, and the standards, rules, and regulations adopted pursuant thereto;

(15)(a) To require access to existing and available records relating to (i) emissions or discharges which cause or contribute to air, land, or water pollution or (ii) the monitoring of such emissions or discharges; and

(b) To require, for purposes of developing or assisting the development of any regulation or enforcing any of the provisions of the Environmental Protection Act which pertain to hazardous waste, any person who generates, stores, treats, transports, disposes of, or otherwise handles or has handled hazardous waste, upon request of any officer, employee, or representative of the department, to furnish information relating to such waste and any permit involved. Such person shall have access at all reasonable times to a copy of all results relating to such waste;

(16) To obtain such scientific, technical, administrative, and operational services including laboratory facilities, by contract or otherwise, as the director deems necessary;

(17) To encourage voluntary cooperation by persons and affected groups to achieve the purposes of the Environmental Protection Act, the Integrated Solid Waste Management Act, and the Livestock Waste Management Act;

(18) To encourage local units of government to handle air, land, and water pollution problems within their respective jurisdictions and on a cooperative basis and to provide technical and consultative assistance therefor;

(19) To consult with any person proposing to construct, install, or otherwise acquire an air, land, or water contaminant source or a device or system for control of such source, upon request of such person, concerning the efficacy of such device or system or concerning the air, land, or water pollution problem which may be related to the source, device, or system. Nothing in any such consultation shall be construed to relieve any person from compliance with the Environmental Protection Act, the Integrated Solid Waste Management Act, the Livestock Waste Management Act, rules and regulations in force pursuant to the acts, or any other provision of law;

(20) To require all persons engaged or desiring to engage in operations which result or which may result in air, water, or land pollution to secure a permit prior to installation or operation or continued operation;

(21) To enter and inspect, during reasonable hours, any building or place, except a building designed for and used exclusively for a private residence;

(22) To receive or initiate complaints of air, water, or land pollution, hold hearings in connection with air, water, or land pollution, and institute legal proceedings in the name of the state for the control or prevention of air, water, or land pollution, and for the recovery of penalties, in accordance with the Environmental Protection Act, the Integrated Solid Waste Management Act, and the Livestock Waste Management Act;

(23) To delegate, by contract with governmental subdivisions which have adopted local air, water, or land pollution control programs approved by the council, the enforcement of state-adopted air, water, or land pollution control regulations within a specified region surrounding the jurisdictional area of the governmental subdivisions. Prosecutions commenced under such contracts shall be conducted by the Attorney General or county attorneys as provided in the Environmental Protection Act, the Integrated Solid Waste Management Act, and the Livestock Waste Management Act;

(24) To conduct tests and take samples of air, water, or land contaminants, fuel, process materials, or any other substance which affects or may affect discharges or emissions of air, water, or land contaminants from any source, giving the owner or operator a receipt for the sample obtained;

(25) To develop and enforce compliance schedules, under such conditions as the director may prescribe and consistent with the standards, rules, and regulations adopted by the council, to prevent, control, or abate pollution;

(26) To employ the Governor's Keep Nebraska Beautiful Committee for such special occasions and projects as the department may decide. Reimbursement of the committee shall be made from state and appropriate federal matching funds for each assignment of work by the department as provided in sections 81-1174 to 81-1177;

(27) To provide, to the extent determined by the council to be necessary and practicable, for areawide, selective, and periodic inspection and testing of motor vehicles to secure compliance with applicable exhaust emission standards for a fee not to exceed five dollars to offset the cost of inspection;

(28) To enforce, when it is not feasible to prescribe or enforce any emission standard for control of air pollutants, the use of a design, equipment, a work practice, an operational standard, or a combination thereof, adequate to protect the public health from such pollutant or pollutants with an ample margin of safety;

(29) To establish the position of public advocate to be located within the department to assist and educate the public on departmental programs and to carry out all duties of the ombudsman as provided in the Clean Air Act, as amended, 42 U.S.C. 7661f;

(30) Under such conditions as it may prescribe for the review, recommendations, and written approval of the director, to require the

submission of such plans, specifications, and other information as it deems necessary to carry out the Environmental Protection Act, the Integrated Solid Waste Management Act, and the Livestock Waste Management Act or to carry out the rules and regulations adopted pursuant to the acts. When deemed necessary by the director, the plans and specifications shall be prepared and submitted by a professional engineer licensed to practice in Nebraska;

(31) To carry out the provisions of the Petroleum Products and Hazardous Substances Storage and Handling Act; ~~and~~

(32) To consider the risk to human health and safety and to the environment in evaluating and approving plans for remedial action; ~~and -~~

(33) To evaluate permits proposed to be issued to any political subdivision under the National Pollutant Discharge Elimination System created by the Clean Water Act, as amended, 33 U.S.C. 1251 et seq., as provided in section 3 of this act.

Sec. 2. Section 81-1505, Reissue Revised Statutes of Nebraska, is amended to read:

81-1505 (1) In order to carry out the purposes of the Environmental Protection Act, the Integrated Solid Waste Management Act, and the Livestock Waste Management Act, the council shall adopt and promulgate rules and regulations which shall set standards of air, water, and land quality to be applicable to the air, waters, and land of this state or portions thereof. Such standards of quality shall be such as to protect the public health and welfare. The council shall classify air, water, and land contaminant sources according to levels and types of discharges, emissions, and other characteristics which relate to air, water, and land pollution and may require reporting for any such class or classes. Such classifications and standards made pursuant to this section may be made for application to the state as a whole or to any designated area of the state and shall be made with special reference to effects on health, economic and social factors, and physical effects on property. Such standards and classifications may be amended as determined necessary by the council.

(2) In adopting the classifications of waters and water quality standards, the primary purpose for such classifications and standards shall be to protect the public health and welfare and the council shall give consideration to:

(a) The size, depth, surface area, or underground area covered, the volume, direction, and rate of flow, stream gradient, and temperature of the water;

(b) The character of the area affected by such classification or standards, its peculiar suitability for particular purposes, conserving the value of the area, and encouraging the most appropriate use of lands within such area for domestic, agricultural, industrial, recreational, and aquatic life purposes;

(c) The uses which have been made, are being made, or are likely to be made, of such waters for agricultural, transportation, domestic, and industrial consumption, for fishing and aquatic culture, for the disposal of sewage, industrial waste, and other wastes, or other uses within this state and, at the discretion of the council, any such uses in another state on interstate waters flowing through or originating in this state;

(d) The extent of present pollution or contamination of such waters which has already occurred or resulted from past discharges therein; and

(e) Procedures pursuant to section 401 of the Clean Water Act, as amended, 33 U.S.C. 1251 et seq., for certification by the department of activities requiring a federal license or permit which may result in a discharge.

(3) In adopting effluent limitations or prohibitions, the council shall give consideration to the type, class, or category of discharges and the quantities, rates, and concentrations of chemical, physical, biological, and other constituents which are discharged from point sources into navigable or other waters of the state, including schedules of compliance, best practicable control technology, and best available control technology.

(4) In adopting standards of performance, the council shall give consideration to the discharge of pollutants which reflect the greatest degree of effluent reduction which the council determines to be achievable through application of the best available demonstrated control technology, processes, operating methods, or other alternatives, including, when practicable, a standard permitting no discharge of pollutants.

(5) In adopting toxic pollutant standards and limitations, the council shall give consideration to the combinations of pollutants, the toxicity of the pollutant, its persistence, degradability, the usual or potential presence of the affected organisms in any waters, the importance of the affected organisms, and the nature and extent of the effect of the toxic pollutant on such organisms.

(6) In adopting pretreatment standards, the council shall give consideration to the prohibitions or limitations to noncompatible pollutants, prohibitions against the passage through a publicly owned treatment works of pollutants which would cause interference with or obstruction to the operation of publicly owned treatment works, damage to such works, and the prevention of the discharge of pollutants therefrom which are inadequately treated.

(7) In adopting treatment standards, the council shall give consideration to providing for processes to which wastewater shall be subjected in a publicly owned wastewater treatment works in order to make such wastewater suitable for subsequent use.

(8) In adopting regulations pertaining to the disposal of domestic and industrial liquid wastes, the council shall give consideration to the minimum

amount of biochemical oxygen demand, suspended solids, or equivalent in the case of industrial wastewaters, which must be removed from the wastewaters and the degree of disinfection necessary to meet water quality standards with respect to construction, installation, change of, alterations in, or additions to any wastewater treatment works or disposal systems, including issuance of permits and proper abandonment, and requirements necessary for proper operation and maintenance thereof.

(9)(a) The council shall adopt and promulgate rules and regulations for controlling mineral exploration holes and mineral production and injection wells. The rules and regulations shall include standards for the construction, operation, and abandonment of such holes and wells. The standards shall protect the public health and welfare and air, land, water, and subsurface resources so as to control, minimize, and eliminate hazards to humans, animals, and the environment. Consideration shall be given to:

(i) Area conditions such as suitability of location, geologic formations, topography, industry, agriculture, population density, wildlife, fish and other aquatic life, sites of archeological and historical importance, mineral, land, and water resources, and the existing economic activities of the area including, but not limited to, agriculture, recreation, tourism, and industry;

(ii) A site-specific evaluation of the geologic and hydrologic suitability of the site and the injection, disposal, and production zones;

(iii) The quality of the existing ground water, the effects of exemption of the aquifer from any existing water quality standards, and requirements for restoration of the aquifer;

(iv) Standards for design and use of production facilities, which shall include, but not be limited to, all wells, pumping equipment, surface structures, and associated land required for operation of injection or production wells; and

(v) Conditions required for closure, abandonment, or restoration of mineral exploration holes, injection and production wells, and production facilities in order to protect the public health and welfare and air, land, water, and subsurface resources.

(b) The council shall establish fees for regulated activities and facilities and for permits for such activities and facilities. The fees shall be sufficient but shall not exceed the amount necessary to pay the department for the direct and indirect costs of evaluating, processing, and monitoring during and after operation of regulated facilities or performance of regulated activities.

(c) With respect to mineral production wells, the council shall adopt and promulgate rules and regulations which require restoration of air, land, water, and subsurface resources and require mineral production well permit applications to include a restoration plan for the air, land, water, and subsurface resources affected. Such rules and regulations may provide for issuance of a research and development permit which authorizes construction and operation of a pilot plant by the permittee for the purpose of demonstrating the permittee's ability to inject and restore in a manner which meets the standards required by this subsection and the rules and regulations.

The rules and regulations adopted and promulgated may also provide for issuance of a commercial permit after a finding by the department that the injection and restoration procedures authorized by the research and development permit have been successful in demonstrating the applicant's ability to inject and restore in a manner which meets the standards required by this subsection and the rules and regulations.

(d) For the purpose of this subsection, unless the context otherwise requires, restoration shall mean the employment, during and after an activity, of procedures reasonably designed to control, minimize, and eliminate hazards to humans, animals, and the environment, to protect the public health and welfare and air, land, water, and subsurface resources, and to return each resource to a quality of use consistent with the uses for which the resource was suitable prior to the activity.

(10) In adopting livestock waste control regulations, the council shall consider the discharge of livestock wastes into the waters of the state or onto land not owned by the livestock operator, conditions under which permits for such operations may be issued, including design, location, and proper management of such facilities, protection of ground water from such operations, and revocation, modification, or suspension of such permits for cause and all requirements of the Livestock Waste Management Act.

(11) In adopting regulations for the issuance of permits under the National Pollutant Discharge Elimination System created by the Clean Water Act, as amended, 33 U.S.C. 1251 et seq., the council shall consider when such permits shall be required and exemptions, application and filing requirements, terms and conditions affecting such permits, notice and public participation, duration and review of such permits, the evaluation provided for under section 3 of this act, and monitoring, recording, and reporting under the system.

(12) The council shall adopt and promulgate rules and regulations for air pollution control which shall include:

(a) A construction permit program which requires the owner or operator of an air contaminant source to obtain a permit prior to construction. Application fees shall be according to section 81-1505.06;

(b) An operating permit program consistent with requirements of the Clean Air Act, as amended, 42 U.S.C. 7401 et seq., and an operating permit program for minor sources of air pollution, which programs shall require permits for both new and existing sources;

(c) Provisions for operating permits to be issued after public notice, to be terminated, modified, or revoked for cause, and to be modified to incorporate new requirements;

(d) Provisions for applications to be on forms provided by the department and to contain information necessary to make a determination on the appropriateness of issuance or denial. The department shall make a completeness determination in a timely fashion and after such determination shall act on the application within time limits set by the council. Applications for operating permits shall include provisions for certification of compliance by the applicant;

(e) Requirements for operating permits which may include such conditions as necessary to protect public health and welfare, including, but not limited to (i) monitoring and reporting requirements on all sources subject to the permit, (ii) payment of annual fees sufficient to pay the reasonable direct and indirect costs of developing and administering the air quality permit program, (iii) retention of records, (iv) compliance with all air quality standards, (v) a permit term of no more than five years from date of issuance, (vi) any applicable schedule of compliance leading to compliance with air quality regulations, (vii) site access to the department for inspection of the facility and records, (viii) emission limits or control technology requirements, (ix) periodic compliance certification, and (x) other conditions necessary to carry out the purposes of the Environmental Protection Act. For purposes of this subsection, control technology shall mean a design, equipment, a work practice, an operational standard which may include a requirement for operator training or certification, or any combination thereof;

(f) Classification of air quality control regions;

(g) Standards for air quality that may be established based upon protection of public health and welfare, emission limitations established by the United States Environmental Protection Agency, and maximum achievable control technology standards for sources of toxic air pollutants. For purposes of this subdivision, maximum achievable control technology standards shall mean an emission limit or control technology standard which requires the maximum degree of emission reduction that the council, taking into consideration the cost of achieving such emission reduction, any health and environmental impacts not related to air quality, and energy requirements, determines is achievable for new or existing sources in the category or subcategory to which the standard applies through application of measures, processes, methods, systems, or techniques, including, but not limited to, measures which accomplish one or a combination of the following:

(i) Reduce the volume of or eliminate emissions of the pollutants through process changes, substitution of materials, or other modifications;

(ii) Enclose systems or processes to eliminate emissions; or

(iii) Collect, capture, or treat the pollutants when released from a process, stack, storage, or fugitive emission point;

(h) Restrictions on open burning and fugitive emissions;

(i) Provisions for issuance of general operating permits, after public notice, for sources with similar operating conditions and for revoking such general authority to specific permittees;

(j) Provisions for implementation of any emissions trading programs as defined by the department. Such programs shall be consistent with the Clean Air Act, as amended, 42 U.S.C. 7401 et seq., and administered through the operating permit program;

(k) A provision that operating permits will not be issued if the Environmental Protection Agency objects in a timely manner;

(l) Provisions for periodic reporting of emissions;

(m) Limitations on emissions from process operations, fuel-burning equipment, and incinerator emissions and such other restrictions on emissions as are necessary to protect the public health and welfare;

(n) Time schedules for compliance;

(o) Requirements for owner or operator testing and monitoring of emissions;

(p) Control technology requirements when it is not feasible to prescribe or enforce an emission standard; and

(q) Procedures and definitions necessary to carry out payment of the annual emission fee set in section 81-1505.04.

(13)(a) In adopting regulations for hazardous waste management, the council shall give consideration to generation of hazardous wastes, labeling practices, containers used, treatment, storage, collection, transportation including a manifest system, processing, resource recovery, and disposal of hazardous wastes. It shall consider the permitting, licensing, design and construction, and development and operational plans for hazardous waste treatment, storage, and disposal facilities, and conditions for licensing or permitting of hazardous waste treatment, storage, and disposal areas. It shall consider modification, suspension, or revocation of such licenses and permits, including requirements for waste analysis, site improvements, fire prevention, safety, security, restricted access, and covering and handling of hazardous liquids and materials. Licenses and permits for hazardous waste, treatment, storage, and disposal facilities shall not be issued until certification by the State Fire Marshal as to fire prevention and fire safety has been received by the department. The council shall further consider the need at treatment, storage, or disposal facilities for required equipment, communications and alarms, personnel training, and contingency plans for any emergencies that might arise and for a coordinator during such emergencies.

In addition the council shall give consideration to (i) ground water monitoring, (ii) use and management of containers and tanks, (iii) surface impoundments, (iv) waste piles, (v) land treatment, (vi) incinerators, (vii) chemical or biological treatment, (viii) landfills including the surveying thereof, and (ix) special requirements for ignitable, reactive, or incompatible wastes.

In considering closure and postclosure of hazardous waste treatment, storage, or disposal facilities, the council shall consider regulations that would result in the owner or operator closing his or her facility so as to minimize the need for future maintenance, and to control, minimize, or eliminate, to the extent necessary to protect humans, animals, and the environment, postclosure escape of hazardous waste, hazardous waste constituents, and leachate to the ground water or surface waters, and to control, minimize, or eliminate, to the extent necessary to protect humans, animals, and the environment, waste decomposition to the atmosphere. In considering corrective action for hazardous waste treatment, storage, or disposal facilities, the council shall consider regulations that would require the owner or operator, or any previous owner or operator with actual knowledge of the presence of hazardous waste at the facility, to undertake corrective action or such other response measures necessary to protect human health or the environment for all releases of hazardous waste or hazardous constituents from any treatment, storage, or disposal facility or any solid waste management unit at such facility regardless of the time at which waste was placed in such unit.

Such regulations adopted pursuant to this subsection shall in all respects comply with the Environmental Protection Act and the Resource Conservation and Recovery Act, as amended, 42 U.S.C. 6901 et seq.

(b) In adopting regulations for hazardous waste management, the council shall consider, in addition to criteria in subdivision (a) of this subsection, establishing criteria for (i) identifying hazardous waste including extraction procedures, toxicity, persistence, and degradability in nature, potential for accumulation in tissue, flammability or ignitability, corrosiveness, reactivity, and generation of pressure through decomposition, heat, or other means, and other hazardous characteristics, (ii) listing all materials it deems hazardous and which should be subject to regulation, and (iii) locating treatment, storage, or disposal facilities for such wastes. In adopting criteria for flammability and ignitability of wastes pursuant to subdivision (b)(i) of this subsection, no regulation shall be adopted without the approval of the State Fire Marshal.

(c) In adopting regulations for hazardous waste management, the council shall establish a schedule of fees to be paid to the director by licensees or permittees operating hazardous waste processing facilities or disposal areas on the basis of a monetary value per cubic foot or per pound of the hazardous wastes, sufficient but not exceeding the amount necessary to reimburse the department for the costs of monitoring such facilities or areas during and after operation of such facilities or areas. The licensees may assess a cost against persons using the facilities or areas. The director shall remit any money collected from fees paid to him or her to the State Treasurer who shall credit the entire amount thereof to the General Fund.

(d) In adopting regulations for solid waste disposal, the council shall consider storage, collection, transportation, processing, resource recovery, and disposal of solid waste, developmental and operational plans for solid waste disposal areas, conditions for permitting of solid waste disposal areas, modification, suspension, or revocation of such permits, regulations of operations of disposal areas, including site improvements, fire prevention, ground water protection, safety and restricted access, handling of liquid and hazardous materials, insect and rodent control, salvage operations, and the methods of disposing of accumulations of junk outside of solid waste disposal areas. Such regulations shall in all respects comply with the Environmental Protection Act, the Integrated Solid Waste Management Act, and the Resource Conservation and Recovery Act, as amended, 42 U.S.C. 6901 et seq.

(14) In adopting regulations governing discharges or emissions of oil and other hazardous materials into the waters, in the air, or upon the land of the state, the council shall consider the requirements of the Integrated Solid Waste Management Act, methods for prevention of such discharges or emissions, and the responsibility of the discharger or emitter for cleanup, toxicity, degradability, and dispersal characteristics of the substance.

(15) In adopting regulations governing composting and composting sites, the council shall give consideration to:

(a) Approval of a proposed site by the local governing body, including the zoning authority, if any, prior to issuance of a permit by the department;

(b) Issuance of permits by the department for such composting operations, with conditions if necessary;

(c) Submission of construction and operational plans by the applicant for a permit to the department, with approval of such plans before issuance of such permit;

(d) A term of up to ten years for such permits;

(e) Renewal of permits if the operation has been in substantial compliance with composting regulations adopted pursuant to this subsection, permit conditions, and operational plans;

(f) Review by the department of materials to be composted, including chemical analysis when found by the department to be necessary;

(g) Inspections of such compost sites by the department. Operations out of compliance with composting regulations, permit conditions, or operational plans

shall be given a reasonable time for voluntary compliance, and failure to do so within the specified time shall result in a hearing after notice is given, at which time the owner or operator shall appear and show cause why his or her permit should not be revoked;

(h) Special permits of the department for demonstration projects not to exceed six months;

(i) Exemptions from permits of the department; and

(j) The Integrated Solid Waste Management Act.

(16) Any person operating or responsible for the operation of air, water, or land contaminant sources of any class for which the rules and regulations of the council require reporting shall make reports containing information as may be required by the department concerning quality and quantity of discharges and emissions, location, size, and height of contaminant outlets, processes employed, fuels used, and the nature and time periods or duration of discharges and emissions, and such other information as is relevant to air, water, or land pollution and is available.

(17) Prior to adopting, amending, or repealing standards and classifications of air, water, and land quality and rules and regulations under the Integrated Solid Waste Management Act or the Livestock Waste Management Act, the council shall, after due notice, conduct public hearings thereon. Notice of public hearings shall specify the waters or the area of the state for which standards of air, water, or land are sought to be adopted, amended, or repealed and the time, date, and place of such hearing. Such hearing shall be held in the general area to be affected by such standards. Such notice shall be given in accordance with the Administrative Procedure Act.

(18) Standards of quality of the air, water, or land of the state and rules and regulations adopted under the Integrated Solid Waste Management Act or the Livestock Waste Management Act or any amendment or repeal of such standards or rules and regulations shall become effective upon adoption by the council and filing in the office of the Secretary of State. In adopting standards of air, water, and land quality or making any amendment thereof, the council shall specify a reasonable time for persons discharging wastes into the air, water, or land of the state to comply with such standards and upon the expiration of any such period of time may revoke or modify any permit previously issued which authorizes the discharge of wastes into the air, water, or land of this state which results in reducing the quality of such air, water, or land below the standards established therefor by the council.

(19) All standards of quality of air, water, or land and all rules and regulations adopted pursuant to law by the council prior to May 29, 1981, and applicable to specified air, water, or land are hereby approved and adopted as standards of quality of and rules and regulations for such air, water, or land.

(20) In addition to such standards as are heretofore authorized, the council shall adopt and promulgate rules and regulations to set standards of performance, effluent standards, pretreatment standards, treatment standards, toxic pollutant standards and limitations, effluent limitations, effluent prohibitions, and quantitative limitations or concentrations which shall in all respects conform with and meet the requirements of the National Pollutant Discharge Elimination System in the Clean Water Act, as amended, 33 U.S.C. 1251 et seq.

(21)(a) The council shall adopt and promulgate rules and regulations requiring all new or renewal permit or license applicants regulated under the Environmental Protection Act, the Integrated Solid Waste Management Act, or the Livestock Waste Management Act to establish proof of financial responsibility by providing funds in the event of abandonment, default, or other inability of the permittee or licensee to meet the requirements of its permit or license or other conditions imposed by the department pursuant to the acts. The council may exempt classes of permittees or licensees from the requirements of this subdivision when a finding is made that such exemption will not result in a significant risk to the public health and welfare.

(b) Proof of financial responsibility shall include any of the following made payable to or held in trust for the benefit of the state and approved by the department:

(i) A surety bond executed by the applicant and a corporate surety licensed to do business in this state;

(ii) A deposit of cash, negotiable bonds of the United States or the state, negotiable certificates of deposit, or an irrevocable letter of credit of any bank or other savings institution organized or transacting business in the United States in an amount or which has a market value equal to or greater than the amount of the bonds required for the bonded area under the same terms and conditions upon which surety bonds are deposited;

(iii) An established escrow account; or

(iv) A bond of the applicant without separate surety upon a satisfactory demonstration to the director that such applicant has the financial means sufficient to self-bond pursuant to bonding requirements adopted by the council consistent with the purposes of this subdivision.

(c) The director shall determine the amount of the bond, deposit, or escrow account which shall be reasonable and sufficient so the department may, if the permittee or licensee is unable or unwilling to do so and in the event of forfeiture of the bond or other financial responsibility methods, arrange to rectify any improper management technique committed during the term of the permit or license and assure the performance of duties and responsibilities required by the permit or license pursuant to law, rules, and regulations.

(d) In determining the amount of the bond or other method of financial

responsibility, the director shall consider the requirements of the permit or license or any conditions specified by the department, the probable difficulty of completing the requirements of such permit, license, or conditions due to such factors as topography, geology of the site, and hydrology, and the prior history of environmental activities of the applicant.

This subsection shall apply to hazardous waste treatment, storage, or disposal facilities which have received interim status.

(22) The council shall adopt and promulgate rules and regulations no more stringent than the provisions of section 1453 et seq. of the federal Safe Drinking Water Act, as amended, 42 U.S.C. 300j-13 et seq., for public water system source water assessment programs.

The council may adopt and promulgate rules and regulations to implement a source water petition program no more stringent than section 1454 et seq. of the federal Safe Drinking Water Act, as amended, 42 U.S.C. 300j-14 et seq.

Sec. 3. (1) In issuing permits to any political subdivision under the National Pollutant Discharge Elimination System created by the Clean Water Act, as amended, 33 U.S.C. 1251 et seq., the department may exercise all possible discretion allowed by the United States Environmental Protection Agency to enable the political subdivision to maintain environmental infrastructure while improving water quality in a manner that is sustainable and within the financial capability of the political subdivision. In exercising such discretion, the department may, when requested by a political subdivision, undertake an evaluation and make a determination of the necessity of specific permit terms and conditions to achieve water quality objectives. Such determination may affect the level of water treatment or pollution control, the length of time necessary for compliance, or both. Any political subdivision may request this evaluation and determination from the department in the issuance or reissuance of its permit.

(2) The department may include, but is not limited to, consideration of the following factors in making its evaluation and determination under subsection (1) of this section:

(a) The financial capability of a political subdivision to raise and secure necessary funding at a reasonable cost;

(b) The affordability for ratepayers for implementation of pollution control options available to a political subdivision using the most appropriate methodology and measurements for the political subdivision in making such affordability determination;

(c) The future growth potential and projections of a political subdivision and whether its infrastructure is sufficient for projected needs;

(d) The overall costs and environmental benefits of control technologies;

(e) Other environmental improvement investments made by a political subdivision; and

(f) Any other relevant economic and social concerns or environmental conditions.

Sec. 4. The Environmental Infrastructure Sustainability Fund is created. The fund shall be administered by the department. Revenue from the following sources shall be credited to the fund: (1) Application fees collected under section 5 of this act; (2) reimbursements for actual costs necessary to complete environmental infrastructure sustainability evaluations as authorized under section 3 of this act; (3) supplemental environmental projects resulting from enforcement settlements; and (4) gifts, grants, reimbursements, or appropriations from any source intended to be used for purposes of section 3 of this act. The fund shall be used by the department to offset costs related to the completion of environmental infrastructure sustainability evaluations as authorized by section 3 of this act. Any money in the fund available for investment shall be invested by the state investment officer pursuant to the Nebraska Capital Expansion Act and the Nebraska State Funds Investment Act.

Sec. 5. Any political subdivision requesting an evaluation authorized under section 3 of this act shall submit a request on a form approved by the department and provide the department with an application fee not to exceed five thousand dollars. If the costs of the department exceed the initial deposit, the department and political subdivision shall enter into an agreement establishing a schedule for the payment of additional costs by the political subdivision. After the completion of the environmental infrastructure sustainability evaluation, any balance of funds paid under this section shall be refunded to the political subdivision.

Sec. 6. The council shall adopt and promulgate rules and regulations to establish a tiered application fee schedule to be charged to political subdivisions requesting an environmental infrastructure sustainability evaluation as authorized under section 3 of this act. The rules and regulations shall take into account the population of a political subdivision and any financial hardship that may impact the ability to pay the application fee.

Sec. 7. Section 81-1532, Reissue Revised Statutes of Nebraska, is amended to read:

81-1532 Sections 81-1501 to 81-1532 and sections 3 to 6 of this act shall be known and may be cited as the Environmental Protection Act.

Sec. 8. Section 81-15,153, Reissue Revised Statutes of Nebraska, is amended to read:

81-15,153 The department shall have the following powers and duties:

(1) The power to establish a program to make loans to municipalities or to counties, individually or jointly, for construction or modification of publicly owned wastewater treatment works in accordance with the Wastewater Treatment Facilities Construction Assistance Act and the rules and regulations of the

council adopted and promulgated pursuant to such act;

(2) The power to establish a program to make loans to municipalities or to counties for construction, rehabilitation, operation, or maintenance of nonpoint source control systems in accordance with the Wastewater Treatment Facilities Construction Assistance Act and the rules and regulations of the council adopted and promulgated pursuant to such act;

(3) The power, if so authorized by the council pursuant to section 81-15,152, to execute and deliver documents obligating the Wastewater Treatment Facilities Construction Loan Fund and the assets thereof to the extent permitted by section 81-15,151 to repay, with interest, loans to or deposits into the fund and to execute and deliver documents pledging to the extent permitted by section 81-15,151 all or part of the fund and its assets to secure, directly or indirectly, the loans or deposits;

(4) The power to establish the linked deposit program to promote loans for construction, rehabilitation, operation, or maintenance of nonpoint source control systems in accordance with the Wastewater Treatment Facilities Construction Assistance Act and the rules and regulations adopted and promulgated pursuant to such act;

(5) The duty to prepare an annual report for the Governor and the Legislature containing information which shows the financial status of the program. The report submitted to the Legislature shall be submitted electronically;

(6) The duty to establish fiscal controls and accounting procedures sufficient to assure proper accounting during appropriate accounting periods, including the following:

(a) Accounting from the Nebraska Investment Finance Authority for the costs associated with the issuance of bonds pursuant to the act;

(b) Accounting for payments or deposits received by the fund;

(c) Accounting for disbursements made by the fund; and

(d) Balancing the fund at the beginning and end of the accounting period;

(7) The duty to establish financial capability requirements that assure sufficient revenue to operate and maintain a facility for its useful life and to repay the loan for such facility;

(8) The power to determine the rate of interest to be charged on a loan in accordance with the rules and regulations adopted and promulgated by the council;

(9) The power to refinance debt obligations of municipalities in accordance with the rules and regulations adopted and promulgated by the council;

(10) The power to enter into required agreements with the United States Environmental Protection Agency pursuant to the Clean Water Act;

(11) The power to enter into agreements to provide grants concurrent with loans to municipalities with populations of ten thousand inhabitants or less which demonstrate serious financial hardships. The department may authorize grants for up to one-half of the eligible project cost. Such grants shall contain a provision that payment of the amount allocated is conditional upon the availability of appropriated funds;

(12) The power to authorize emergency grants to municipalities with wastewater treatment facilities which have been damaged or destroyed by natural disaster or other unanticipated actions or circumstances. Such grants shall not be used for routine repair or maintenance of facilities;

(13) The power to provide financial assistance to municipalities with populations of ten thousand inhabitants or less for completion of engineering studies, research projects, investigating low-cost options for achieving compliance with the Clean Water Act, encouraging wastewater reuse, and conducting other studies for the purpose of enhancing the ability of communities to meet the requirements of the Clean Water Act. The department may authorize financial assistance for up to ninety percent of the eligible project cost. Such state allocation shall contain a provision that payment of the amount obligated is conditional upon the availability of appropriated funds; and

(14) The power to provide grants or an additional interest subsidy on loans for municipalities if the project contains a sustainable community feature, measurable energy-use reductions, or low-impact development or if there are any special assistance needs as determined under section 3 of this act; and

(15 14) Such other powers as may be necessary and appropriate for the exercise of the duties created under the Wastewater Treatment Facilities Construction Assistance Act.

Sec. 9. Original sections 81-1504, 81-1505, 81-1532, and 81-15,153, Reissue Revised Statutes of Nebraska, are repealed.
