Summary of purpose and/or changes:

LR 288 urges Congress and the United States Army Corps of Engineers to prioritize flood control as a top priority for the management of water systems under their authority in the Missouri River Mainstem Reservoir System Master Water Control Manual. Currently, flood control is not prioritized over fish and wildlife protection. This resolution urges the Corps to prioritize flood control over fish and wildlife when creating a future Missouri River Mainstem Reservoir System Master Water Control Manual. LR 288 requests that a copy of this resolution be sent to each member of Nebraska's congressional delegation and the United States Army Corps of Engineers.

Dan Hughes, Chairperson
