LB 845 would have no fiscal impact to state agencies.

LB 845 would amend section 46-715, which governs the development of integrated management plans by natural resources districts. It would provide that if real property was acquired to develop and operate an augmentation project for streamflow enhancement, the owner or owners of the project may later sell the property and continue to pump ground water in an amount necessary for augmentation purposes.

Any impact to natural resources districts would depend upon whether the ownership of property acquired for an augmentation project was public or private. Project owners could recoup some of the original costs by selling the real property. The potential impact to county tax base would depend upon how the property was being taxed prior to the sale.
