## Background

Neb. Rev. Stat. § 83-104, passed by the Nebraska Legislature in July 2020, requires the Office of Public Counsel/Ombudsman (OPC) to conduct an annual physical review of the following state institutions within the Nebraska Department of Health and Human Services (DHHS):

1. The Youth Rehabilitation and Treatment Center – Geneva;<sup>1</sup>
2. The Youth Rehabilitation and Treatment Center – Kearney;
3. Any other facility operated and utilized as Youth Rehabilitation and Treatment Center under state law;
4. The Hastings Regional Center;
5. The Lincoln Regional Center;
6. The Norfolk Regional Center; and
7. The Beatrice State Development Center.

Neb. Rev. Stat. § 83-104(2) further requires the OPC to report to the Legislature on the conditions of the facilities on or before December 15 each year beginning in 2021, for the period beginning with December 1 of the prior year through November 30 of the current year. Neb. Rev. Stat. § 83-104(2) continues by requiring that each report shall, for each institution, include findings and observations from the annual physical review; recent inspection reports regarding the facility; staffing information; reports received by the OPC; and any systemic issues identified.

Prior to Neb. Rev. Stat. § 83-104's requirements in 2021, OPC staff generally visited state institutions as a result of individual complaints or reports to the OPC or identification of specific systems issues. The statutory reporting requirement was part of the Legislature's response to the crisis at Youth Rehabilitation and Treatment Center (YRTC) at Geneva in August 2019, in which the female youth there suddenly needed to be relocated to YRTC-Kearney, due to the unsafe conditions at YRTC-Geneva.<sup>2</sup> In the year leading up to the crisis, the OPC received a total of three complaints regarding YRTC-Geneva, and none were about the facility's conditions.

In January 2020, the Legislature's Health and Human Services Committee issued a report with several recommendations, including requiring an annual facilities review and subsequent report to the Legislature by the OPC.<sup>3</sup> Legislative Bill 1144 was introduced with such requirements in January 2020, passed by the Legislature on July 31, 2020, and signed by Governor Pete Ricketts

---

<sup>1</sup> YRTC-G campus was closed by DHHS, and the girl's program moved to the Hastings campus in 2021, previously used by the Hastings Regional Center program and the Hastings Juvenile Chemical Dependency Program.

<sup>2</sup> State of Nebraska, Office of Public Counsel/Ombudsman and Office of Inspector General of Nebraska Child Welfare, "The Deterioration and Closure of Geneva Youth Rehabilitation and Treatment Center, Special Report of Investigation," January 5, 2021, [https://nebraskalegislature.gov/pdf/reports/public\\_counsel/Geneva\\_Special\\_Report\\_2021.pdf](https://nebraskalegislature.gov/pdf/reports/public_counsel/Geneva_Special_Report_2021.pdf).

<sup>3</sup> Nebraska Legislature Health and Human Services Committee, "Report to the Nebraska Legislature on the Youth Rehabilitation and Treatment Centers," Jan. 22, 2020, p. 47, [https://nebraskalegislature.gov/pdf/reports/committee/health/yrtc\\_2020.pdf](https://nebraskalegislature.gov/pdf/reports/committee/health/yrtc_2020.pdf).

on August 11, 2020. This report aims to assist the Legislature in improving state institutions, including YRTCs, through highlighting current conditions, efforts towards improvement, and opportunities for improvement.

This report is organized by grouping institutions under the headings “Adult Facilities,” which includes the DHHS adult behavioral health hospitals and other licensed facilities, and “Juvenile Facilities,” which includes the YRTCs in Hastings, Kearney, and Lincoln, and Whitehall. Behavioral Health facilities statutorily<sup>4</sup> fall within the DHHS Division of Developmental Disabilities and the DHHS Division of Behavioral Health. Beatrice State Development Center (BSDC) falls under the DHHS Division of Developmental Disabilities, and Lincoln Regional Center (LRC) and Norfolk Regional Center (NRC) are under the DHHS Division of Behavioral Health. Within LRC’s organization is the adolescent Psychiatric Residential Treatment Facility (PRTF) at Whitehall. The Office of Juvenile Services (OJS) is statutorily within the DHHS Division of Children and Family Services. The YRTC Facilities fall under OJS.

This report provides summaries of observations and documentation review related to the internal and external conditions of each of the state institutions. The attachments include inspection reports and compliance and licensing documentation for each institution as required by Neb. Rev. Stat. § 83-104.

It should be noted that this report will also include data from the 2022-2023 reporting period, as the data requests made to DHHS for that reporting year regarding aspects of the facilities such as staffing, construction projects, assaults, and capacity, were not received by this office until June of 2024. The reasons for this include explanations in the 2022-2023 Annual Facilities Report. This report also provides a summary of particular data points going back to the initial 2021 Annual Facilities Report in order to exhibit longevity trends.

### **Annual Physical Review & Report Process**

The Deputy for Institutions and other OPC staff visited each required state institution and requested and reviewed information, including staff assault data, capacity and staffing data, information related to major projects and improvements, and facility inspections reports. The OPC also reviewed reports/complaints received by its office for each institution for the reporting period. Residents of the facilities, their loved ones, staff, and members of the public may file complaints with the OPC throughout the year.

In addition to other visits throughout the year, each of the facilities were visited on the following respective days for the purpose of a thorough facility inspection.

### Facility Overview

**Table 1** provides a general facility program description overview. The information provided is summarized from information available at the DHHS website.<sup>5</sup>

**Table 1**

Facility	Location	Program Description
LRC	Lincoln	LRC serves people who need very specialized psychiatric services and provides services to people who, because of mental illness, require a highly structured treatment setting. The patients served at the Lincoln Regional Center are limited to people who meet involuntary admission criteria and are referred by either the courts or Mental Health Boards.
NRC	Norfolk	NRC was created by an act of the Nebraska Legislature in 1885. NRC is a 120-bed Sex Offender Treatment Center providing Phase I services in the Nebraska Sex Offender Treatment Program. The Nebraska Sex Offender Treatment Program is a three-phase treatment program meant to reduce dangerousness and risk of re-offense for patients involved in treatment
BSDC	Beatrice	BSDC is a 24-hour state and federally funded residential treatment facility dedicated to the provision of specialized psychological, medical and developmental supports to people with intellectual and developmental disabilities. BSDC is a campus-like setting with 188 acres.
YRTC-Kearney	Kearney	YRTC-Kearney serves adolescent males who are committed to the care and custody of the OJS.
YRTC-Lincoln	Lincoln	YRTC-Lincoln opened in February 2020 in Lincoln, Nebraska. The program is located within the Lancaster County Youth Services Center operating as a separate program from the county, which also provides services to other youth. The program was established to provide services to both male and female youth ranging in age from 14 to 18 years who are securely housed separately by gender. Youth of higher behavior

<sup>5</sup> <https://dhhs.ne.gov/Pages/default.aspx>

		acuity needing more individualized care due to behavioral and mental health needs are typically transferred from either the Kearney or the Hastings YRTCs to YRTC-Lincoln for that treatment.
YRTC-Hastings	Hastings	YRTC-Hastings serves adolescent females who are committed to the care and custody of the OJS.
Whitehall	Lincoln	Whitehall provides two treatment programs for male adolescents. A residential substance use treatment program began at Whitehall in 2020. Another program addresses the treatment needs of male adolescents who have offended sexually.

**Capacity And Occupancy**

**Table 2** illustrates the total licensed capacity as reported by DHHS for each facility, and the census on the last reporting day of this report, October 31, 2024 and last year’s report, October 31, 2023. Monthly census information will be shared in each facility’s respective reporting section later in this report.

**Table 2**

Facility	CAPCITY Oct. 31, 2023	CENSUS Oct. 31, 2023	CAPCITY Oct. 31, 2024	CENSUS Oct. 31, 2024
LRC	242	199	242	226
NRC	114	80	114	88
BSDC	168	79	168	78
YRTC-Kearney	142	57	142	73
YRTC-Lincoln	20	11	20	14
YRTC-Hastings	24	9	24	15
Whitehall	24	17	24	15

**Complaints Involving Facilities to OPC**

Residents of the facilities, their loved ones, staff, and members of the public may file complaints with the OPC throughout the year. For the period of December 1, 2023 through November 30, 2024, the OPC received 93 complaints regarding DHHS institutions. The following table demonstrates the number of complaints received for each facility for this period, as well as the four prior years. **(See Table 3.)**

**Table 3**

<b>Complaints to OPC regarding DHHS Facilities in Neb. Rev. Stat. § 83-104</b>					
<b>Facility</b>	<b>Number of Complaints</b>				
	<b>2020</b>	<b>2021</b>	<b>2022</b>	<b>2023</b>	<b>2024</b>
LRC	73	44	54	65	38
NRC	64	71	39	26	33
BSDC	2	3	1	2	4
YRTC-Kearney	14	4	5	1	8
YRTC-Hastings / Geneva	9	8	1	1	5
YRTC-Lincoln	2	2	3	3	4
Whitehall	1	1	0	0	1
<b>Total Complaints</b>	<b>165</b>	<b>133</b>	<b>104</b>	<b>98</b>	<b>93</b>

A summary of 2024 complaints is included in each respective facility’s report section. The number of reports received in 2024 were slightly lower as exhibited in **Table 3**, which may be due to the limited access the OPC was given to the facilities and the investigation capabilities prior to an MOU being established between the Executive Branch and Legislative Branch regarding information access in the Spring of 2024. Prior to that, the OPC received little to no information or communication regarding complaints from DHHS in 2024.

### **Reported Staff Assaults**

**Table 4** shows the number of assaults on staff as provided by DHHS in each respective year. (See Table 4.)

**Table 4**

<b>Total Number of Reported Staff Assaults between November 1<sup>st</sup> and October 31<sup>st</sup></b>		
<b>Facility</b>	<b>2023</b>	<b>2024</b>
LRC	97	161
NRC	9	6
BSDC	25	25
YRTC-Kearney	80	98
YRTC-Hastings / Geneva	45	53
YRTC-Lincoln	34	60
Whitehall	0	0
<b>Total Reported Assaults</b>	<b>290</b>	<b>403</b>

## General Facility Observations

Through OPC's site inspections, information reviews, and review of complaints to its office, the OPC has identified a number of positive observations as well as some challenges facing the facilities.

**Regional Hospital Administrator-** The 2022 Annual Facilities Report provided a description of the newly created Regional Hospital Administrator position within the DHHS Division of Behavioral Health. This position provided a level of increased administration and oversight for the adult facilities – BSDC, NRC, and LRC – and paralleled the Office of Juvenile Services Administrator position for the youth facilities. In the Spring of 2024, the position was vacated by the former Administrator. Since that time, the Office of Juvenile Service Administrator has assumed the oversight of all adult facilities in addition to the youth facilities.

**Staffing-** Staffing remains a challenge for most facilities across Nebraska, including in key areas such as nursing and behavioral health positions. Vacancies remain at each facility, and according to the numbers provided by DHHS, it appears that turnover is an issue in most facilities. As a result of the staffing shortage, overtime rates appear to remain high, resulting in high staff stress and little time off from work to recharge. A more detailed view of staffing needs appears later in this report in the more detailed facility description sections.

**Aging Facilities-** Several of the facilities, serving both youth and adults, are aging and in dire need of improvements, particularly in the bathrooms and sleeping quarters. The facilities with the most concerning conditions are LRC, parts of BSDC, YRTC-Kearney, and Whitehall. The pictures provided in each respective facility section will assist in providing a visual perspective on the facilities in need of improvements.

As mentioned above, each of the facilities appeared to be maintained as well as possible considering the age of several of the structures. However, the conditions and age of some of the buildings make it difficult to maintain a high level of cleanliness, regardless of staff efforts. Factors such as poor ventilation in the bathrooms and flooring in the sleeping units that are nearly impossible to clean create challenges in maintaining cleanliness at a level that is sufficient.

In addition, OPC staff observed that some of the furniture is very dated, particularly the beds and mattresses. Some of the mattresses are very old and thin, likely making sleeping conditions difficult. Some of the beds were old wooden platforms. The pictures of the Whitehall campus show these beds, although Whitehall does have recently updated furniture in common areas.

**Grounds-** While each of the campuses appeared to be regularly mowed with some degree of landscaping upheld, all of the campuses lacked green lawns for residents to enjoy when spending time outdoors. Unlike what may be seen at Nebraska Veteran's Homes, the grounds appeared to not have consistent watering. While it is understandable that the campuses are large and the cost

of watering the entire area may not be feasible, finding key areas to water where individuals spend time outdoors could lend to overall better care.

**Lincoln Regional Center-** Each building operates as if it were a separate facility, resulting in a sense of discontinuity. The structures vary in age but are uniformly old, outdated, and deteriorating. Ideally, LRC would be one building like a modern hospital with all considerations for mental health treatment.

The ongoing staffing shortage seems to be most prevalent at LRC, as compared to the other DHHS facilities and appears to be playing a significant factor into staff assaults and overall staff and patient safety on campus. It should be noted that DHHS leadership reported some recent updates to the patient census, waitlist for services, and staffing that appear to be trending in a positive direction. In August 2021 the Average Patient Census was 140; however, in September 2024, the average census was 225. On January 3, 2022, the waitlist for court-involved individuals was 63 males, and 17 females, for a total of 80. However, on November 20, 2024 the waitlist had reduced to a total of 32 court-involved individuals: 18 males and 14 females.

In addition, the waitlist for civilly committed individuals reduced from 16 on January 2, 2023 to 3 total by November 20, 2024: 0 males, and 3 females.

The overall wait time for services has reduced from 115 days in October 2023 to 26 days in September 2024.

The waitlist reduction is due in part to a recently reopened unit on the campus and the addition of 130 new positions which LRC reports success in filling. These additional positions include 60 Mental Health Specialists, 30 Registered Nurses, 20 Licensed Practical Nurses, and 20 on-call Mental Health Specialists.

Recently LRC established a policy requiring staff working directly on the unit with patients to wear uniforms supplied by LRC. While the OPC did receive some complaints from staff regarding the new policy, DHHS leadership explained that the uniform policy assisted in the overall professional appearance of staff and better matched staff attire typically found in a hospital setting. Staff were supplied the uniforms by LRC.

**Norfolk Regional Center-** NRC is generally in good condition and the facilities are set up well to serve the population. On-going and regular maintenance is apparent.

Staffing trends are typically fairly stable at NRC, and assaults are very low in comparison to other facilities.

**Beatrice State Developmental Center-** In the past year, BSDC came under new leadership, as the previous Facility Administrator left the position, and a new Interim Facility Administrator was appointed. It is unclear at this time how long the interim administrator will fill that position or what a long-term plan is. From complaints received by the OPC during this reporting period,

including from a number of BSDC staff, it is clear that changes have been made under the new leadership; however, such staff believe it will take time to determine if the changes will have a positive or less than favorable effect. It should be noted that many other staff had only very positive reviews of the change in leadership.

The buildings and facilities were in generally good condition upon the OPC staff tours, and updates to the facilities were in progress.

OPC staff attended the annual 2024 BSDC Fall Festival and had the opportunity to talk to a number of family members of the residents, and while some cited concerns with the facility in the past, all of the family members spoken to had very positive things to report regarding their loved one's current care at BSDC. However, staff at BSDC reported their number one concern is lack of staff and how that impacts staff overtime rates. Staff also reported concerns regarding the ability to do some of the extra programming that was once offered for residents, such as off-site activities. However, staff also reported their opinion that even with the reduction in programming, residents continue to receive overall good care.

**YRTC-Hastings-** This campus is new, in very good overall condition, and seems to be conducive for programming and educational needs. It does lack recreation facilities for the youth, particularly when compared to YRTC-Kearney that serves boys. YRTC-Hastings does have a space utilized for recreation; however, it is the space originally intended as a chapel.

**YRTC-Lincoln-** The facility is generally well kept and maintained. As mentioned in previous reports, it is worth considering the long-term goals of YRTC-Lincoln and whether the detention setting best serves the youth who reside there for a longer period of time than what detention is intended to be.

**Whitehall-** This campus is very aged and appears to be difficult to maintain due to its age. In addition, there are concerns with the facilities not being Americans with Disabilities Act compliant, which will likely require a large amount of funding to update. New structures at this site, or another site, should be considered for this facility.

When OPC staff talked with youth on campus, the feedback regarding the programming and their experience with staff was very positive.

**YRTC-Kearney-** The planned construction at YRTC-Kearney has begun and was in the surveying and dirt moving stage when the OPC toured the facility in early October 2024. Completion of the construction is projected to be in the spring of 2026. This construction project will allow youth housed within the new structure to have private sleeping rooms and bathroom facilities, as opposed to barrack style sleeping quarters and communal showers. This will be a very positive addition for the well-being of the youth served.

However, if the original units remain in use for any youth not served in the new living space, the existing buildings need updates as well, particularly in the bathrooms, sleeping areas, and common areas within the units.

Facility staff have made visible efforts to try to make the existing buildings more youth-friendly with updated paint colors and newer furniture, particularly in the sleeping areas and classrooms.

## **ADULT BEHAVIORAL HEALTH FACILITIES**

### **LINCOLN REGIONAL CENTER (LRC)**

LRC is a 242-bed hospital licensed as a Mental Health Substance Use (MHSU) Treatment Center and Psychiatric Hospital and accredited by the Joint Commission, the accreditation body for the Center for Medicare and Medicaid Services (CMS). LRC provides general and forensic psychiatric services and sex offender treatment for individuals in need of specialized psychiatric services in a highly structured setting. Psychiatric services are conducted with the goal of helping individuals achieve stability and transition back to the community. Patients at LRC must meet involuntary admission criteria and are referred by the Mental Health Boards or courts. LRC provides treatment for convicted sex offenders and those committed under an inpatient mental health board order for sex offender treatment. A transition program works towards successful reentry to the community with appropriate safeguards

LRC, which originally opened in 1870, sits on a 107-acre campus. The campus is comprised of several different buildings to meet individuals' housing, dining, medical services, administrative services, religious functions, and recreation needs. Buildings 3, 5, 10, and 14 serve as the main buildings where patients reside and receive treatment.

Building 3 currently houses female patients in need of acute care or forensic services and competency restoration. Building 5 is a forensic unit for male patients suspected of having mental illness that affects their competency and who have pending criminal court cases. Most of Building 5's patients have been deemed by the courts as "not competent to stand trial" and have been admitted to LRC for competency restoration treatment. Building 5 also houses some patients who have been referred by the State Mental Health Boards and newly admitted male patients being evaluated for placement. Building 10 houses males receiving acute psychological care, the on-site dental office, the main library, and cafeteria.

Building 14 is divided into four units, each with a different programming focus: one program for patients who have sexually offended, one designed for individuals transitioning from general psychological care, one for patients who have completed treatment in Building 5, and one for acute individuals who need extra assistance in making connections in the community.

## Capacity and Census

The licensed capacity total for LRC is 242. For the current reporting period, the average monthly census in 2022/23 was 150 and 207 in 2023/24. **Chart 1** illustrates the licensed capacity and combined monthly census for all units during the periods of November 1, 2022 until October 31, 2024.

**Chart 1**

## Complaints to OPC regarding LRC

For the period of December 1, 2023 through November 30, 2024, the OPC received 38 complaints regarding LRC. While there was no evidence to support all complaints, the complaints involved concerns about medical treatment, programming and treatment plans, patient requests for outside psychological evaluations facility cleanliness, evaluations, the patient grievance process, and issues with staff regarding overtime, staff assaults and safety concerns.

## Facility Inspection

**Table 5** provides any highlights observed by OPC staff during the facility inspection.

**Table 5**

<b>Facility Description</b>	<b>General Observations</b>	<b>Areas of Concern</b>
Grounds	<p>Campus is large, with expansive yard space and trees.</p> <p>Older buildings that are no longer in use outside of storage remain on the campus and may need attention at some point.</p>	<p>Parking near some units seemed to be lacking, particularly near Building 5.</p> <p>While the grounds were all mowed and free of debris, they do not appear to be watered or manicured on a regular basis.</p>
Administration Building	<p>No major destruction or structural issues identified.</p> <p>The reception area is attractive with updated furniture.</p> <p>Staff offices seem to be sufficient size and condition for their purpose.</p>	<p>The building smells musty or of mildew. When the facility administrator was asked about the smell, he reported that there is no mold, but there is water damage and several dehumidifiers are kept running at all times due to the moisture.</p>
Building 3	<p>No major destruction or structural issues identified.</p> <p>Generally, Building 3 has a much better appearance and atmosphere as compared to some of the other buildings. However, it is starting to show its age.</p> <p>Dayrooms have new counters surrounding the area where staff sit.</p> <p>Restroom on main floor close to entrance was recently remodeled to be ADA accessible.</p>	<p>Caution tape is only on the very bottom step in stairwells and missing on some landings.</p> <p>Restroom on one of the units had some standing water from the shower, and lighting isn't bright.</p> <p>A net on the basketball hoop in the lower unit was torn apart and hanging down which could present a ligature hazard.</p> <p>Refrigerator in staff break room (also the AED room) does not close completely.</p>
Building 5	<p>No major destruction or structural issues identified.</p> <p>Badge readers have been installed to enter onto the units, which allows for quick access in the case of emergency when</p>	<p>This building is very old and is in need of updating in order to best serve the population and to maintain a clean environment.</p>

	<p>staff from other floors need to respond. Medication rooms have physical key access only.</p> <p>This unit has large yards for the patients to have outdoor time but no outdoor furniture for the patients to utilize.</p> <p>The gym space is large and appeared to in good condition and equipped for patient use.</p>	<p>The glass within the main security sliding door was cracked at the entrance to the foyer.</p> <p>The atmosphere feels similar to a prison setting, and has poor lighting in some of the hallways.</p> <p>The patient restrooms had a strong smell of urine, showers with standing water which presents a fall hazard, mildew on the shower curtains and floor and wall tile near urinals, mold in some cracks around the shower and on floor and wall tiles near urinals, weak water pressure, and some faucets on sinks that overshot the sink bowl causing water to get on the floor. Several urinals were slow to flush and drain. The toilets were dirty, and trash was overflowing. Many of the soap dispensers were empty or close to empty. It should be noted that during an unannounced visit earlier in this reporting year, the condition of the restrooms was slightly better, with no evidence of mold at that time.</p> <p>On the living unit, OPC staff observed some peeling paint on walls, stained carpet, and water fountains that did not drain properly.</p> <p>In patient bedrooms, the tile was removed in some rooms due to bodily fluids seeping into the cracks, making the tiles difficult to clean. The floors are painted as an alternative. The painted floors are less welcoming for patients and will likely not hold up to foot traffic.</p> <p>The mattresses are thin and many have vinyl peeling from the cover.</p> <p>The phone placed near the outdoor entrance of the building for guests to use upon arriving is in poor condition and does not appear to be functional.</p>
--	--	--

		One of the outdoor yards had a large pile of what resembled bat feces located near the door onto the unit, which appeared to be tracked into the unit on patients' shoes.
Building 10	<p>No major destruction or structural issues identified.</p> <p>Ground floor has a more appealing appearance with clean carpet and updated furniture</p> <p>The canteen area located in the basement is in progress, though the progress is slow and appears not to be recent.</p> <p>Patients in this area have own bathrooms in their rooms.</p> <p>Dining areas are clean.</p>	<p>The library ceiling recently leaked due to remodel of medication room upstairs.</p> <p>Stains on carpet.</p> <p>Some restrooms have tiled benches in the shower area, similar to those in building 3, which could pose a trip hazard on wet floors.</p>
Building 14	<p>No major destruction or structural issues identified.</p> <p>The appearance and functionality of the building is much more conducive for serving the population's needs than some of the other buildings on campus.</p> <p>Patient rooms much bigger and overall nicer, with wooden doors and desks. Patients are able to have more personal items.</p> <p>Cafeteria area is dated but appeared to be clean.</p>	<p>Concrete floors in basement are very scuffed and could use paint.</p> <p>This building has 2 fenced yards. One yard has large trees with limbs that stretch over the fence, creating a potential elopement risk.</p>

## Major Projects/Improvements

<b>In Progress Projects</b>	<b>Projected Completion Date</b>
Medication rooms in all buildings will be updated to some degree, as they currently do not meet regulatory standards for running water.	June/July 2025
Small restroom remodel in Building 3 by reception area	October 2024
Staff break room remodel in Building 10	October 2024
Installation of brighter lights in the hallways of Building 5	Unknown
Improvements to the canteen area in the basement of Building 10	Unknown
<b>Pending</b>	<b>Projected Completion Date</b>
Yards are under evaluation for improved fencing and securing all yard furniture.	Unknown
Updated handrails on the exterior of Building 5	Unknown
Tech improvements in the conference rooms are being discussed.	Unknown
<b>Completed Projects During the Current Reporting Year</b>	
Addition of badge readers in Building 5 Staff breakroom remodels in Buildings 3, 5, and 10 Mother's Rooms additions in Buildings 3 and 14 Mother's Rooms updates in Buildings 5 and 10 Conference room technology update in Building 9 Patient furniture updates in Building 3, 5 and 10 Staff office desk updates in Buildings 9, 10, and 14 Addition of windows in some doors in Buildings 3, 5, 10, and 14 Concrete pads in yard Buildings 3, 5, 10, and 14 New A/C unit in Building 5 Windows installed in patient doors in Building 10 Window installed in designated offices & doors across campus Metal safety phones for patients in Building 3 Badge readers added to all units Building 5 Badge reader added to unit door entrance Building 3	

### LRC Staffing

The table below shows the staffing numbers provided by DHHS for the past 5 reporting years. (See Table 6.)

Table 6

<b>LRC Staffing – Permanent and Temporary Staff on October 31<sup>st</sup> of each Respective Year</b>					
	<b>2020</b>	<b>2021</b>	<b>2022</b>	<b>2023</b>	<b>2024</b>
<b>Number of Positions Needed in HR Staffing Plan</b>	626 for FY21	609 for FY22	624 for FY23	613 for FY24	706 for FY25
<b>Number of Positions Filled</b>	505	422	533	455 Perm 47 Temp	532 Perm 73 Temp
<b>Number of Positions Vacant</b>	121	187	91	111	101
<b>Monthly Turnover Rate</b>	N/A	2%	1.5%	1.6%	1.8%
<b>Aggregate Turnover Rate</b>	19%	26%	18%	19%	22%

Chart 2 illustrates the total combined monthly staff overtime for the periods of November 1, 2022 until October 31, 2024.

**Chart 2**

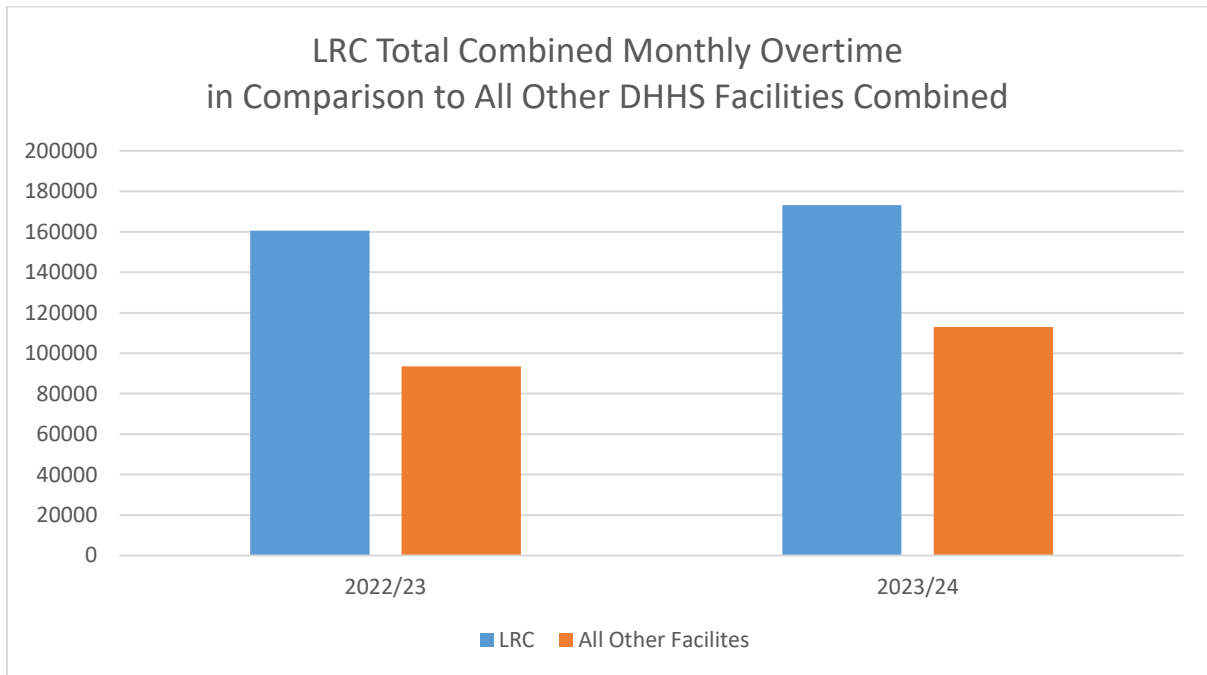

The LRC overtime rates are significantly higher than all other facilities combined at 160,583 hours, or 63% of the total combined for all facilities for the 2022/23 reporting period, while LRC serves 46% of the total average population. The combined total from the other six facilities are 93,575 with 54% of the total DHHS facilities population served by those facilities.

During the 2023/24 reporting period, LRC had a combined total overtime hours of 173,240. This is 61% of the total combined overtime hours for all facilities, yet serving only 43% of the total DHHS facilities population. All other facilities totaled 113,025 of overtime hours while serving 57% of the population. (See **Chart 3**.)

**Chart 3**

**Vacancies by Position**

The table below illustrates the positions in which vacancies exist and what percentage by position type was filled on October 31, 2024. While the percentage of filled positions reported was at an overall rate of 86%, there were key positions that have a high vacancy rate such as Registered Nurses at 36% and Licensed Practical Nurses at 59%, as shown in the **Table 7**.

**Table 7**

### **Recent Licensure and Inspection Reports**

The annual inspection reports are attached to this report. There were no significant concerns identified in those reports.

The LRC Certification of Licensure is active at the time of this report.<sup>6</sup>

### **NORFOLK REGIONAL CENTER (NRC)**

NRC is a 120-bed, Joint Commission-accredited state psychiatric hospital. Established in 1885, NRC currently provides the first phase of the Nebraska Sex Offender Treatment Program, a three-phase program designed to reduce dangerousness and risk of re-offense. The treatment received at NRC prepares individuals for the final phases of the program, which is provided at LRC.

The NRC campus is secure and enclosed within a fence. The main building on campus, a three-story brick structure, houses all patient services. This main building has spaces for patients' dining, housing, medical, religious, recreation, and programming needs, as well as space for administrative services. There is also a maintenance building, basketball court, picnic/shelter area, and a courtyard/garden area.

---

<sup>6</sup> Licensure information was found at this website link: <https://www.nebraska.gov/LISSearch/search.cgi>

## Capacity and Census

The licensed capacity total for NRC is 114. For the current reporting period, the average monthly census in 2022/23 was 82 and 86 in 2023/24. **Chart 4** illustrates the licensed capacity and combined monthly census for all units during the periods of November 1, 2022 until October 31, 2024.

**Chart 4**

## Complaints to OPC regarding NRC

For the period of December 1, 2023 through November 30, 2024, the OPC received 33 complaints regarding NRC. While there was no evidence to support findings in all complaints, the complaints dealt with numerous topics, including treatment plans, medical treatment, levels of restrictions, lack of time allowed outside, property issues, patient’s access to making legal copies, concerns with the Mental Health Board process and the length of stay at the facility, concerns with the programming offered at NRC, the patient grievance process, and staff concerns.

## Facility Inspection

**Table 8** provides any highlights observed by OPC staff during the facility inspection.

**Table 8**

<b>Facility Description</b>	<b>General Observations</b>	<b>Areas of Concern</b>
Grounds	<p>Campus is large, with expansive yard space and trees.</p> <p>Sidewalks and driveways appeared to be in good condition.</p> <p>The entrance of the facility is well groomed with well-kept landscaping.</p> <p>The facility is lined with a tall fence enclosing the property.</p>	<p>While the remaining grounds were all mowed and free of debris, they do not appear to be watered or manicured on a regular basis.</p>
Main Building (which includes the administration office, as well as all patient living units and recreation areas)	<p>No major destruction or structural issues identified.</p> <p>Overall, this campus is in very good condition and that on-going maintenance is occurring is apparent. This includes fresh paint to walls and updated carpet in many areas. The single building design of NRC appears advantageous compared to campuses with numerous buildings to maintain and allows staff to all work within one space as opposed to being spread out.</p> <p>Staff offices seem to be sufficient size and condition for their purpose.</p> <p>The facility is equipped with good conference room space, an extensive library, a large fitness room, a rec room with older pool tables, large hallways on the units, and larger sleeping areas for patients.</p>	<p>An exterior wall in one of the conference rooms had peeling paint and plaster. Restrooms overall seemed to be clean, and OPC staff witnessed cleaning by NRC staff throughout the tour. However, showers and restrooms in some of the units show signs of aging that may be difficult to maintain.</p>

## Major Projects/Improvements

In Progress Projects	Projected Completion Date
None known	
Pending	Projected Completion Date
Pending approval of building a storage room in kitchen area	Unknown
Pending legislative approval of funding to update key locked doors to badge reader access doors	Unknown
Pending approval of building a shelter house outside on our grounds	Unknown
Pending legislative approval on funding for updating our fire escapes	Unknown
Completed Projects During the Current Reporting Year	
Installed a new range hood in the kitchen area. Installed a stats system to the boiler system. Installed an isolation valve for the fire sprinkler shut off in the Safety and Security Center. Updated the fire sprinkler heads in the Safety and Security Center with a more tamper proof sprinkler head.	

## NRC Staffing

The table below shows the staffing numbers provided by DHHS for the past 5 reporting years. (See **Table 9.**)

**Table 9**

<b>NRC Staffing – Permanent and Temporary Staff on October 31<sup>st</sup> of Each Respective Year</b>					
	<b>2020</b>	<b>2021</b>	<b>2022</b>	<b>2023</b>	<b>2024</b>

### Recent Licensure and Inspection Reports

The annual inspection reports are attached to this report. There were no significant concerns identified in those reports.

The NRC Certification of Licensure is active at the time of this report.<sup>7</sup>

### **BEATRICE STATE DEVELOPMENT CENTER (BSDC)**

BSDC is an intermediate care facility for individuals with intellectual or developmental disabilities (ICF-IDD). It is a 24-hour state and federally-funded residential treatment institution divided into individually-licensed ICF-IDDs within a larger, 130-year-old campus. BSDC falls under the DHHS Division of Developmental Disabilities.

BSDC provides comprehensive, specialized medical, psychological, and developmental services to adults. The campus is comprised of many buildings, including structures to meet individuals' housing, medical, dining, religious, and recreation needs, as well as administrative services. Individuals residing at BSDC generally live in one of the ten cottages, which have a home-like feel. Most units have separate bedrooms, bathrooms, a kitchen, a common area, and a laundry room. BSDC also has a Crisis Stabilization and Community Reintegration Program, in which

<sup>7</sup> Licensure information was found at this website link: <https://www.nebraska.gov/LISSearch/search.cgi>

individuals stay in one of four designated apartments for a temporary period between 30 and 180 days. This program aims to intake individuals from the community, provide them with treatment, habilitation, and stabilization, and then prepare them for transitioning back to the community stabilized.

### Capacity and Census

The licensed capacity total for BSDC is 168. For the current reporting period, the average monthly census in 2022/23 was 78 and 80 in 2023/24. **Chart 6** illustrates the licensed capacity and combined monthly census for all units during the periods of November 1, 2022 until October 31, 2024.

**Chart 6**

### Complaints to OPC regarding BSDC

For the period of December 1, 2023 through November 30, 2024, the OPC received 4 complaints regarding BSDC. The complaints received involved resident care, facility cleanliness, and staff concerns regarding the leadership staff and human resources practices, staff overtime, and reduced programming due to staff shortages.

### Facility Inspection

**Table 11** provides any highlights observed by OPC staff during the facility inspection.

**Table 11**

<b>Facility Description</b>	<b>General Observations</b>	<b>Areas of Concern</b>
Grounds	<p>Campus is large and fairly spread-out, with expansive green space and trees.</p> <p>Due to recent demolition of a few aged buildings on the ground and ongoing clear up efforts, the campus has become more open.</p> <p>There is a decent number of wide sidewalks for residents to be able to take a walk or ride their bikes on.</p>	<p>While the grounds were all mowed and free of debris, they do not appear to be watered or manicured on a regular basis.</p>
Administration Building	<p>No major destruction or structural issues identified.</p> <p>Staff offices seem to be sufficient size and condition for their purpose.</p>	
Solar Cottages	<p>No major destruction or structural issues identified.</p> <p>The cottages designed for long-term care are very home-like, with separate bedrooms and bathrooms for each individual. Within the bedrooms, individuals have traditional bedroom furniture and are able to enjoy many of their own personal items.</p> <p>The living rooms have traditional furniture and a TV viewing area with newly mounted large flat-screen TV's.</p> <p>Each cottage has its own kitchen and dining area typical to a family home.</p>	

	<p>The cottages were generally very clean, with minor clutter particularly in the kitchen areas, likely due to lack of storage space.</p>	
400 State Buildings	<p>No major destruction or structural issues identified.</p> <p>Work was being completed when OPC staff toured to repaint this interior space and provide new curtains and other items to promote a more welcoming environment.</p>	<p>The spaces are large, with large hallways, but do not have the home-like feeling of the on-campus cottages.</p>
Chapel	<p>No major destruction or structural issues identified.</p> <p>Chapel is beautiful and inviting.</p>	
Carsten Center	<p>No major destruction or structural issues identified.</p> <p>The gym is very large, in good condition, and appears to be well equipped.</p> <p>The swimming pool has been recently repaired following a period of time it was unusable due to a missing part.</p> <p>The cafeteria area appeared to be clean and in good condition.</p>	
Bear Creek Craft Shop	<p>No major destruction or structural issues identified.</p> <p>This area houses a workshop where residents make craft items to sell in the open-to-the-public store within this space.</p>	

### Major Projects/Improvements

In Progress Projects	Projected Completion Date
Concrete repair on Carstens Drive directly to the south of Carstens Center.	November 2024
Updating the cable system to digital cable	Unknown
Updating the paint and interior design in the Crisis Building	Unknown
New roof on food service building	Unknown
Pending	Projected Completion Date
Demolition of additional old building	Unknown
Upgrading the water system	Unknown

**Completed Projects During the Current Reporting Year**

Demolition of Buildings B, C, and T

**BSDC Staffing**

The table below shows the staffing numbers provided by DHHS for the past 5 reporting years. (See Table 12.)

**Table 12**

<b>BSDC Staffing – Permanent and Temporary Staff on October 31<sup>st</sup> of Each Respective Year</b>					
	2020	2021	2022	2023	2024

### Recent Licensure and Inspection Reports

The annual inspection reports are attached to this report. Concerns identified in the reports included lack of staffing to provide sufficient interactions/supervision, rude and disrespectful comments of a client, unlocked medication cabinets, and fire extinguishers in need of service.

The BSDC Certification of Licensure is active at the time of this report.<sup>8</sup>

### OFFICE OF JUVENILE SERVICES AND JUVENILE BEHAVIORAL HEALTH FACILITIES

The Office of Juvenile Services within the DHHS Division of Children and Families operates the YRTCs, which are 24-hour state institutions to serve youth within Nebraska’s juvenile justice system. There are currently YRTCs in Hastings, Lincoln, and Kearney; there is no longer a YRTC in Geneva. The mission of the YRTCs “is to help youth live better lives through effective services, giving youth the chance to become law abiding citizens.”

On August 19, 2019, female youth from former YRTC-Geneva were relocated to YRTC-Kearney after conditions on the Geneva campus were deemed insufficient, and the youth could no longer be cared for there. YRTC-Kearney was never intended to be home to the girls’ YRTC program. Instead, the former HRC has been repurposed to operate as YRTC-Hastings for female youth.

### YRTC-KEARNEY

YRTC-Kearney serves male youth committed to DHHS Office of Juvenile Services. Youth receive evidence-based behavioral and skill-building programming and individual therapy for mental health, behavioral health, and substance use needs. YRTC-Kearney also operates an on-campus junior/senior high school where youth may earn their high school diploma. YRTC-Kearney sits on a large, fenced-in campus with a number of buildings. These buildings include an administration building, Dixon Building (which houses newly-admitted youth, youth in seclusion/room confinement, and the transitional living unit), the Bryant, Lincoln, and

---

<sup>8</sup> Licensure information was found at this website link: <https://www.nebraska.gov/LISSearch/search.cgi>

Washington cottages (living units), the Creighton cottage (which includes the medical office), a woodworking building, a dining hall, a chapel, and a school building that includes a gym, weight room, and pool. Each cottage has a similar interior layout with a game/recreation area, bathroom/showers, and a TV/multi-purpose room on the first floor and barrack-style living quarters and a congregate restroom on the second floor.

YRTC-Kearney has a long history of ACA accreditation and is a member of the PbS Project.

### Capacity and Census

The licensed capacity total for YRTC-Kearney is 142. For the current reporting period, the average monthly census in 2022/23 was 57 and 66 in 2023/24. **Chart 8** illustrates the licensed capacity and combined monthly census for all units during the periods of November 1, 2022 until October 31, 2024.

**Chart 8**

### Complaints to OPC regarding YRTC-Kearney

For the period of December 1, 2023 through November 30, 2024, the OPC received 8 complaint regarding YRTC-Kearney. While there was not supporting evidence in support of findings in all complaints, those received involved concerns with the food, facility cleanliness, the presence of bugs in the units, communication between staff and parents, and concerns with the communal showers and bathrooms.

## Facility Inspection

Table 14 provides any highlights observed by OPC staff during the facility inspection.

Table 14

Facility Description	General Observations	Areas of Concern
Grounds	Campus is large, with expansive yard space for recreation and equipped with a baseball/kickball field.	While the grounds were all mowed and free of debris, they do not appear to be watered or manicured on a regular basis, although they appeared to be in slightly better shape than some of the other campuses.
Administration Building	No major destruction or structural issues identified.  Staff offices seem to be sufficient size and condition for their purpose.	
Bryant	No major destruction or structural issues identified.  The units no longer have bunkbeds due to the lower census, and the wall décor is much more youth friendly than in previous years.  Canteen area is small and a bit cramped but nice	The sleeping unit is a barrack style room design that offers little or no privacy for youth.  Carpets were in need of updating or cleaning.  Bathrooms are outdated and very worn.
Creighton	No major destruction or structural issues identified.  The units no longer have bunk style beds due to the lower census, and the wall décor is much more youth friendly than in previous years.	Bathrooms are outdated and very worn. Carpets were in need of updating or cleaning.  Dayroom is outdated and carpets were in need of updating or cleaning. Showers are communal style, which youth often report they feel uncomfortable with. Tiles are very old and stained by water and mildew.
Lincoln	No major destruction or structural issues identified. The units no longer have bunk style beds due to the lower census, and the wall décor is much more	Mattresses are thin and vinyl covered.

	youth friendly than in previous years.	
Washington	No major destruction or structural issues identified.  The units no longer have bunk style beds due to the lower census, and the wall décor is much more youth friendly than in previous years.	
Dickson	No major destruction or structural issues identified.  Newer blue painted walls.	This unit has long hallways and large metal locking doors. The newly painted blue area is softer to the eye than the previous color, but overall, the environment is of a detention setting and feels unsuitable for youth for extended lengths of time.
Dining Hall	No major destruction or structural issues identified.  Appeared clean and in good condition.	
Chapel	No major destruction or structural issues identified.  Inviting setting.	
Gym	No major destruction or structural issues identified.  Gym is spacious and well equipped for recreation. The swimming pool is large and appears to be in good condition. The weight room is also well equipped and in good condition.	
Classrooms	No major destruction or structural issues identified.  Layout feels like a typical school and offers an excellent media center.	Most classrooms look somewhat aged and outdated with mismatched furniture and flooring types and were in need of new whiteboards. The space does not offer much natural light.
New Construction Building	No major destruction or structural issues identified.	

	<p>This area is currently securely fenced off from youth access during construction with smaller than normal fence links to make it more secure and harder to enter.</p> <p>New building will have badge entry, more natural light, individual rooms, and private showers.</p>	
Laundry Warehouse	<p>No major destruction or structural issues identified.</p> <p>Laundry room is well organized.</p>	
Vocational Building	<p>No major destruction or structural issues identified.</p> <p>This building is well equipped with tools for wood working and art supplies, offering extensive learning and programming opportunities.</p>	

### Major Projects/Improvements

<b>In Progress Projects</b>	<b>Projected Completion Date</b>
Construction of new living unit <ul style="list-style-type: none"> <li>• Will have 48 beds (12x4 pods)</li> <li>• All case managers, unit managers, and therapists will be in offices within the building</li> <li>• Vision is for rooms to feel like apartments</li> </ul>	Feb 2026
<b>Pending</b>	<b>Projected Completion Date</b>
New fire sprinkler system throughout campus	Unknown
<b>Completed Projects During the Current Reporting Year</b>	
Morton Living Unit fully demolished	

## YRTC-Kearney Staffing

The table below shows the staffing numbers provided by DHHS for the past 5 reporting years. (See Table 15.)

**Table 15**

### Recent Inspection Reports

The annual inspection reports are attached to this report. There were no significant concerns identified in those reports.

## YRTC-HASTINGS

YRTC-Hastings serves female youth by providing evidence-based cognitive behavioral and skill-building programming, as well as individual therapy for mental health, behavioral health, and substance use needs. YRTC-Hastings includes educational programming as part of a youth’s treatment plan and an on-campus junior/senior high school.

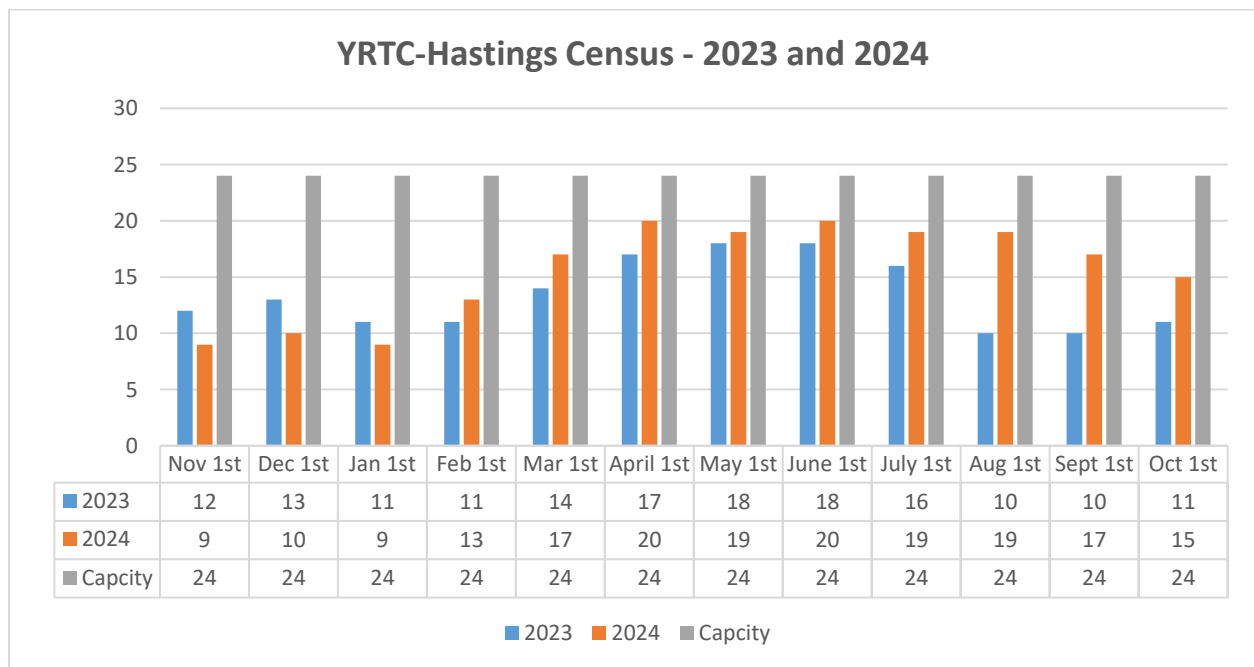

YRTC-Hastings sits on a large, open campus comprised of a number of buildings, including an administration building, a chapel used as a gym/recreation area, a school building that includes a kitchen and dining area, and two living units/cottages. Youth are not allowed to have any contact with the youth living in the unit other from the one in which they live.

YRTC-Hastings is accredited with the ACA and is also a member of the Council for Juvenile Correctional Administrators’ Performance-Based Standards (PbS) Project, a model which utilizes national standards and performance outcome measures to improve conditions of confinement and treatment in residential facilities.

### Capacity and Census

The licensed capacity total for YRTC-Hastings is 24. For the current reporting period, the average monthly census in 2022/23 was 13 and 16 in 2023/24. **Chart 10** illustrates the licensed capacity and combined monthly census for all units during the periods of November 1, 2022 until October 31, 2024.

**Chart 10**

## Complaints to OPC regarding YRTC-Hastings

For the period of December 1, 2023 through November 30, 2024, the OPC received 5 complaints regarding YRTC-Hastings. While there was not evidence to support findings in all complaints, those received involved concerns with the food, the presence of bugs in the units, medial responsiveness, lack of programming, and concerns regarding some staff members.

## Facility Inspection

Table 17 provides any highlights observed by OPC staff during the facility inspection.

Table 17

Facility Description	General Observations	Areas of Concern
Grounds	<p>No major destruction or structural issues identified.</p> <p>Campus is large, with expansive yard space and trees.</p>	<p>While the grounds were all mowed and free of debris, they do not appear to watered or manicured on a regular basis.</p> <p>A small solar powered greenhouse has been added for the youth to enjoy gardening.</p>
Administration Building	<p>No major destruction or structural issues identified.</p> <p>The reception area is attractive with updated furniture.</p> <p>Staff offices seem to be sufficient size and condition for their purpose.</p>	
Unit A	<p>No major destruction or structural issues identified.</p> <p>These buildings are new in the past 5 years; therefore, the units have a fresh design and newer furniture, the flooring is all in good condition, and overall, they appear very clean.</p>	<p>Some of the bedrooms have large strips of wallpaper youth have removed from the walls. The facility administrator reported that the wallpaper stripping by the youth has been problematic for some time, and they are exploring other alternatives to avoid this in the future.</p> <p>Much of the trim around the windows and door casings has been replaced with trim that is less destructible due prior damage by the youth.</p>
Unit B		

		Due to the layout of the buildings and being placed parallel to one another, the facility reports concerns with youth antagonizing each other through the windows. Therefore, the primary windows and doors have been frosted to eliminate this behavior, reducing the amount of natural sunlight onto the units.
School and Cafeteria	<p>No major destruction or structural issues identified.</p> <p>The classrooms have sufficient space, fresh design, newer furniture, and flooring is all in good condition. Overall, they appear very clean.</p> <p>The cafeteria and kitchen are in new condition and well kept.</p>	
Chapel	The chapel has been transformed into a gym area. The space works for this use but is not ideal. It would be beneficial for the youth to have more recreation and programming areas like at YRTC-Kearney.	

**Major Projects/Improvements**

<b>In Progress Projects</b>	<b>Projected Completion Date</b>
None known	
<b>Pending</b>	<b>Projected Completion Date</b>
None known	
<b>Completed Projects During the Current Reporting Year</b>	
Repair to broken trim pieces within the living units.	
Construction of a small green house for the youth to utilize in growing plants.	

## YRTC-Hastings Staffing

The table below shows the staffing numbers provided by DHHS for the past 5 reporting years. (See Table 18.)

**Table 18**

<b>YRTC-Hastings Staffing – Permanent and Temporary Staff on October 31<sup>st</sup> of Each Respective Year</b>

<b>Total</b>	<b>100</b>	<b>73</b>	<b>73%</b>

### Recent Inspection Reports

The annual inspection reports are attached to this report. There were no significant concerns identified in those reports.

### YRTC- LINCOLN

YRTC-Lincoln serves high-acuity male and female youth who require more intensive and individualized interventions, such as targeted behavioral and trauma-based programming. Established in 2020, it is a newer facility. Youth enter the YRTC system through either YRTC-Hastings or YRTC-Kearney. YRTC-Lincoln provides a different, more secure physical structure than YRTC-Hastings or YRTC-Kearney.

At YRTC-Lincoln's start, DHHS entered into a 5-year contract with Lancaster County to lease space within the Lancaster County Youth Services Center (LCYSC). LCYSC provides for detention of youth being processed through the juvenile justice system or youth adjudicated or

ordered by an adult criminal court to serve a specified time frame. Food and maintenance are also sourced through LCYSC. However, the youth populations of each facility do not mix.

YRTC-Lincoln consists of one main building on a closed campus with a fence. This building is comprised of a secure living area for male youth, a secure living area for female youth, a day room, a school room, a library, a medical room, a group/kitchen room, a gym, a visitation room, and an outside fenced in, grassy area.

### Capacity and Census

The licensed capacity total for YRTC-Lincoln is 20. For the current reporting period, the average monthly census in 2022/23 was 8 and 13 in 2023/24. **Chart 12** illustrates the licensed capacity and combined monthly census for all units during the periods of November 1<sup>st</sup>, 2022 until October 31<sup>st</sup>, 2024.

**Chart 12**

### Complaints to OPC regarding YRTC-Lincoln

For the period of December 1, 2023 through November 30, 2024, the OPC received 4 complaints regarding YRTC-Lincoln. While there was not evidence to support findings in all complaints, the complaints received were in regard to child safety and the manner in which physical restraints were utilized.

## Facility Inspection

Table 20 provides any highlights observed by OPC staff during the facility inspection.

Table 20

Facility Description	General Observations	Areas of Concern
Grounds	The facility is well-kept on the exterior, although OPC staff observed the back area designed for an outdoor space to be overgrown in the summer, making it difficult for the youth to use.	YRTC-Lincoln is a leased space shared with LCYSC. It is constructed as a traditional detention facility with locking doors at unit entrance and in the individual sleeping areas, limiting movement of the individuals served, as well as fenced yards outdoors.
Administration Office	No major destruction or structural issues identified.  This is a shared space with the LCYSC Administrative Staff.  The reception area is attractive with updated furniture.  Staff offices seem to be sufficient size and condition for their purpose.	This is a shared space with the LCYSC Administrative Staff.
Echo Pod	No major destruction or structural issues identified.  The two pods each have 10 private cells lining the exterior walls. One pod houses the female youth, and the other houses the male youth. The pods are joined by one common area.	Mice have been found in the building on occasion.  Carpets were stained.  Although the mattresses and pillows were selected to reduce potential hazards from self-harming behavior, the sleeping areas are constructed of a hard cement surface, and the mattresses do not extend to the full length of the slab. A larger youth may not fit well on the space provided. The pillows are very thin and covered with plastic.
Foxtrot Pod		
J Pod	This unit once housed programming and educational space for youth. However, it is temporarily closed due to a	

	broken window on the unit, caused by youth, that is in progress of being repaired.	
Gym	<p>No major destruction or structural issues identified.</p> <p>The gym space is spacious and in good condition.</p> <p>This is a shared space with the LCYSC, although YRTC youth do not utilize the gym while LCYSC youth are present.</p>	
Classrooms	<p>No major destruction or structural issues identified.</p> <p>Overall, classroom space is somewhat limited due to the space being shared with the LCYSC.</p> <p>This is a shared space with the LCYSC, although youth committed to the YRTC do not utilize while LCYSC youth are present.</p>

### Recent Inspection Reports

The annual inspection reports are attached to this report. There were no significant concerns identified in those reports.

### WHITEHALL

Whitehall helps adolescents manage their mental health challenges through person-centered care. Until recently, Whitehall focused on treating male adolescents who have sexually offended. However, in the fall of 2020, the Hastings Juvenile Chemical Dependency Program was relocated from the former Hastings Regional Center (HRC) to Whitehall. There are now currently two distinct programming offerings on the Whitehall campus: treatment for youth who sexually harm and the substance use program.

Youth are referred to Whitehall by the Courts and Juvenile Probation, DHHS, or self-referred by a family member. An interdisciplinary team that includes mental health and medical practitioners, social workers, substance use counselors, and other professionals, diagnoses and plans treatment for the youth.

The Whitehall campus is comprised of several different buildings and areas to meet youth's housing, educational, recreation, and dining needs. Youth are housed according to the program in which they participate.

Whitehall is a PRTF licensed and accredited as part of LRC, and is considered an extension of LRC, which is a Joint Commission-accredited state psychiatric hospital. Whitehall is licensed

and meets statutory requirements as a MHSU Treatment Center and is licensed by the DHHS Division of Public Health as a residential child-caring agency.

### Capacity and Census

The licensed capacity total for Whitehall is 24. For the current reporting period, the average monthly census in 2022/23 was 17 and 15 in 2023/24. **Chart 14** illustrates the licensed capacity and combined monthly census for all units during the periods of November 1, 2022 until October 31, 2024.

**Chart 14**

### Complaints to OPC regarding Whitehall

For the period of December 1, 2023 through November 30, 2024, the OPC received one complaint regarding Whitehall. The complaint was in regard to campus-wide ADA accessibility.

### Facility Inspection

**Table 23** provides any highlights observed by OPC staff during the facility inspection.

Table 23

Facility Description	General Observations	Areas of Concern
Grounds	<p>Campus is large, with expansive yard space and trees. Several buildings on campus are either abandoned due to age or utilized by other state agencies.</p> <p>Sidewalks leading to and from buildings are badly cracked. Some sidewalks have abrupt drops and steep grades that are not marked. A few sidewalks have small drainage ditches alongside, which are not separated by any safety features.</p>	<p>While the grounds were all mowed and free of debris, they do not appear to be watered or manicured on a regular basis.</p> <p>The grounds lack dedicated recreation space for outdoor activities.</p>
Administration Building	No major destruction or structural issues identified.	<p>The Whitehall Campus is generally outdated in terms of design, layout, and structure and not the most conducive for the care of youth.</p> <p>The carpet is old, worn, stained in most buildings.</p> <p>Bathrooms smell very musty with an overtone of cleaning chemicals. Ventilation in some bathrooms is aging and does not appear to sufficiently help reduce mold and mildew growth.</p> <p>Some bedroom floors are bare and are only painted concrete. Others are tile with artificial wood grain, which looks nice but does not feel home-like.</p> <p>Wooden platforms for beds are old and worn. Mattresses are thin and worn, and some have cracks.</p> <p>Bedrooms are not equal in size - those on the corner are larger.</p> <p>Unit basements are not in use because of leaking from exterior sources.</p>
Warner Cottage	No major destruction or structural issues identified.	
Community Life Center	No major destruction or structural issues identified.	
Family Life Center	No major destruction or structural issues identified.	

		Unit kitchen areas are mostly unused and take up space that could be used for therapy rooms or other uses.
School	No major destruction or structural issues identified.	This are is also old and not enough space to allow for learning.
Gym and Weight room	No major destruction or structural issues identified.	The gym and weight room spaces have been adapted for the purposes they serve but have poor lighting, no air conditioning, and a painted concrete floor.

**Major Projects/Improvements**

<b>In Progress Projects</b>	<b>Projected Completion Date</b>
None known	
<b>Pending</b>	<b>Projected Completion Date</b>
ADA campus improvement response project, which has involved an architect surveying the campus to assess what the needs are to bring campus within compliance with ADA regulations. An estimated completion date has not been given at this time.	Unknown
Cottage basements will be repaired to fix leaking issues from the outdoors.	Spring 2025
<b>Completed Projects During the Current Reporting Year</b>	

Fire alarm system in the Training and Administration Building was updated to include a visual alarm system.  
 Several dead trees were removed from campus.

### Whitehall Staffing

**EC 02.03.05 EP 09**

Annual test of main drains at system low point or at all system risers. NFPA 25–2011: 13.2.5

A main drain test shall be conducted annually at each water-based fire protection system riser to determine whether there has been a change in the condition of the water supply piping and control valves. In systems where the sole water supply is through a backflow preventer, and/or pressure reducing valves, the main drain test of at least one system downstream of the device shall be conducted on a quarterly basis. When there is a 10 percent reduction in full flow pressure when compared to the original acceptance test or previously performed tests, the cause of the reduction shall be identified and corrected if necessary. Auxiliary and low-point drains in preaction or deluge systems shall be operated after each system operation and before the onset of freezing conditions (and thereafter as needed). (2011 ed.) (NFPA 25 13.2.5; 13.2.5.1; 13.2.5.2; 13.4.4.3.2)

5 year internal inspection of branch line, main, fdc check valve and gauges and sprinkler heads				

# Sprinkler Inspection, Testing and/or Maintenance Certificate

*For*

Lincoln regional center B 14  
801 west prospector  
Lincoln, Ne 68522

This inspection was performed in accordance with NFPA 101, EDITION 2012, LIFE SAFETY CODE, NFPA 72, EDITION 2010, FIRE ALARM SYSTEMS, NFPA 25, EDITION 2011, WATER-BASED FIRE PROTECTION SYSTEMS and other regulatory standards applicable to this inspection.

*This Inspection was performed in accordance with applicable NFPA Standards. The subsequent pages of this report provide performance measurements, listed ranges of acceptable results, and complete documentation of the inspection. Whenever discrepancies exist between acceptable performance standards and actual test results, notes and/or recommended solutions have been proposed or provided for immediate review and approval.*

**EC 02.03.05 EP 09**

Annual test of main drains at system low point or at all system risers. NFPA 25–2011: 13.2.5

A main drain test shall be conducted annually at each water-based fire protection system riser to determine whether there has been a change in the condition of the water supply piping and control valves. In systems where the sole water supply is through a backflow preventer, and/or pressure reducing valves, the main drain test of at least one system downstream of the device shall be conducted on a quarterly basis. When there is a 10 percent reduction in full flow pressure when compared to the original acceptance test or previously performed tests, the cause of the reduction shall be identified and corrected if necessary. Auxiliary and low-point drains in preaction or deluge systems shall be operated after each system operation and before the onset of freezing conditions (and thereafter as needed). (2011 ed.) (NFPA 25 13.2.5; 13.2.5.1; 13.2.5.2; 13.4.4.3.2)

# Sprinkler Inspection, Testing and/or Maintenance Certificate

*For*

Lincoln regional center B 3  
801 west prospector  
Lincoln, Ne 68522

This inspection was performed in accordance with NFPA 101, EDITION 2012, LIFE SAFETY CODE, NFPA 72, EDITION 2010, FIRE ALARM SYSTEMS, NFPA 25, EDITION 2011, WATER-BASED FIRE PROTECTION SYSTEMS and other regulatory standards applicable to this inspection.

*This Inspection was performed in accordance with applicable NFPA Standards. The subsequent pages of this report provide performance measurements, listed ranges of acceptable results, and complete documentation of the inspection. Whenever discrepancies exist between acceptable performance standards and actual test results, notes and/or recommended solutions have been proposed or provided for immediate review and approval.*

# Inspection & Testing

Generated by: [BuildingReports.com](http://BuildingReports.com)

## Building: Lincoln regional center B 3

The Inspection & Testing section lists all of the items inspected in your building, which are then categorized by the applicable code reference. The most recent inspection is listed in the far right column and is based on the Finish Date of that inspection. The latest inspection uploaded in each previous quarter appears in the four columns to the left.  
Passed=P, Failed=F, Replaced=R

### EC 02.03.05 EP 01

The organization tests supervisory signal devices on the inventory with the following time frames: Quarterly for pressure supervisory indicating devices (including both high- and low-air pressure switches), water level supervisory indicating devices, water temperature supervisory indicating devices, room temperature supervisory indicating devices, and other suppression system supervisory initiating devices. Semiannually for valve supervisory switches. Annually for other supervisory initiating devices. NFPA 72-2010 Table 14.4.5

Alarm conditions shall be simulated by activating alarm circuits at alarm sensor locations and all such local or remote alarm indicating devices (visual and audible) shall be observed for operation. (2011 ed.) (NFPA 25 8.3.3.5)

**EC 02.03.05 EP 09**

Annual test of main drains at system low point or at all system risers. NFPA 25–2011: 13.2.5

A main drain test shall be conducted annually at each water-based fire protection system riser to determine whether there has been a change in the condition of the water supply piping and control valves. In systems where the sole water supply is through a backflow preventer, and/or pressure reducing valves, the main drain test of at least one system downstream of the device shall be conducted on a quarterly basis. When there is a 10 percent reduction in full flow pressure when compared to the original acceptance test or previously performed tests, the cause of the reduction shall be identified and corrected if necessary. Auxiliary and low-point drains in preaction or deluge systems shall be operated after each system operation and before the onset of freezing conditions (and thereafter as needed). (2011 ed.) (NFPA 25 13.2.5; 13.2.5.1; 13.25.2; 13.4.4.3.2)

**EC 02.03.05 EP 09**

Annual test of main drains at system low point or at all system risers. NFPA 25–2011: 13.2.5

A main drain test shall be conducted annually at each water-based fire protection system riser to determine whether there has been a change in the condition of the water supply piping and control valves. In systems where the sole water supply is through a backflow preventer, and/or pressure reducing valves, the main drain test of at least one system downstream of the device shall be conducted on a quarterly basis. When there is a 10 percent reduction in full flow pressure when compared to the original acceptance test or previously performed tests, the cause of the reduction shall be identified and corrected if necessary. Auxiliary and low-point drains in preaction or deluge systems shall be operated after each system operation and before the onset of freezing conditions (and thereafter as needed). (2011 ed.) (NFPA 25 13.2.5; 13.2.5.1; 13.2.5.2; 13.4.4.3.2)

Quarterly inspection of all fire department water supply connections. NFPA 25-2011: 13.7

Fire department connections shall be inspected quarterly to verify the following: Connections are visible and accessible, couplings or swivels are not damaged and rotate smoothly, plugs or caps are in place and undamaged, gaskets are in place and in good condition, identification signs are in place, the check valve is not leaking, the automatic drain valve is in place and operating properly and the clapper is in place and operating properly. (2011 ed.) (NFPA 25 13.7.1)

**EC 02.03.05 EP 09**

Annual test of main drains at system low point or at all system risers. NFPA 25–2011: 13.2.5

A main drain test shall be conducted annually at each water-based fire protection system riser to determine whether there has been a change in the condition of the water supply piping and control valves. In systems where the sole water supply is through a backflow preventer, and/or pressure reducing valves, the main drain test of at least one system downstream of the device shall be conducted on a quarterly basis. When there is a 10 percent reduction in full flow pressure when compared to the original acceptance test or previously performed tests, the cause of the reduction shall be identified and corrected if necessary. Auxiliary and low-point drains in preaction or deluge systems shall be operated after each system operation and before the onset of freezing conditions (and thereafter as needed). (2011 ed.) (NFPA 25 13.2.5; 13.2.5.1; 13.2.5.2; 13.4.4.3.2)

Quarterly inspection of all fire department water supply connections. NFPA 25-2011: 13.7

Fire department connections shall be inspected quarterly to verify the following: Connections are visible and accessible, couplings or swivels are not damaged and rotate smoothly, plugs or caps are in place and undamaged, gaskets are in place and in good condition, identification signs are in place, the check valve is not leaking, the automatic drain valve is in place and operating properly and the clapper is in place and operating properly. (2011 ed.) (NFPA 25 13.7.1)

# Sprinkler Inspection, Testing and/or Maintenance Certificate

*For*

Lincoln regional center B 5  
801 west prospector pl  
lincoln, ne 68522

This inspection was performed in accordance with NFPA 101, EDITION 2012, LIFE SAFETY CODE, NFPA 72, EDITION 2010, FIRE ALARM SYSTEMS, NFPA 25, EDITION 2011, WATER-BASED FIRE PROTECTION SYSTEMS and other regulatory standards applicable to this inspection.

*This Inspection was performed in accordance with applicable NFPA Standards. The subsequent pages of this report provide performance measurements, listed ranges of acceptable results, and complete documentation of the inspection. Whenever discrepancies exist between acceptable performance standards and actual test results, notes and/or recommended solutions have been proposed or provided for immediate review and approval.*

**EC 02.03.05 EP 09**

Annual test of main drains at system low point or at all system risers. NFPA 25–2011: 13.2.5

A main drain test shall be conducted annually at each water-based fire protection system riser to determine whether there has been a change in the condition of the water supply piping and control valves. In systems where the sole water supply is through a backflow preventer, and/or pressure reducing valves, the main drain test of at least one system downstream of the device shall be conducted on a quarterly basis. When there is a 10 percent reduction in full flow pressure when compared to the original acceptance test or previously performed tests, the cause of the reduction shall be identified and corrected if necessary. Auxiliary and low-point drains in preaction or deluge systems shall be operated after each system operation and before the onset of freezing conditions (and thereafter as needed). (2011 ed.) (NFPA 25 13.2.5; 13.2.5.1; 13.2.5.2; 13.4.4.3.2)

Did not perform tampers or water flows due to fire panel being out of service				

# Sprinkler Inspection, Testing and/or Maintenance Certificate

*For*

Lincoln regional center B 10  
801 west prospector  
Lincoln, Ne 68522

This inspection was performed in accordance with NFPA 101, EDITION 2012, LIFE SAFETY CODE, NFPA 72, EDITION 2010, FIRE ALARM SYSTEMS, NFPA 25, EDITION 2011, WATER-BASED FIRE PROTECTION SYSTEMS and other regulatory standards applicable to this inspection.

*This Inspection was performed in accordance with applicable NFPA Standards. The subsequent pages of this report provide performance measurements, listed ranges of acceptable results, and complete documentation of the inspection. Whenever discrepancies exist between acceptable performance standards and actual test results, notes and/or recommended solutions have been proposed or provided for immediate review and approval.*

<b>Device Total: 3</b>								

**EC 02.03.05 EP 09**

Annual test of main drains at system low point or at all system risers. NFPA 25–2011: 13.2.5

A main drain test shall be conducted annually at each water-based fire protection system riser to determine whether there has been a change in the condition of the water supply piping and control valves. In systems where the sole water supply is through a backflow preventer, and/or pressure reducing valves, the main drain test of at least one system downstream of the device shall be conducted on a quarterly basis. When there is a 10 percent reduction in full flow pressure when compared to the original acceptance test or previously performed tests, the cause of the reduction shall be identified and corrected if necessary. Auxiliary and low-point drains in preaction or deluge systems shall be operated after each system operation and before the onset of freezing conditions (and thereafter as needed). (2011 ed.) (NFPA 25 13.2.5; 13.2.5.1; 13.2.5.2; 13.4.4.3.2)

# Sprinkler Inspection, Testing and/or Maintenance Certificate

*For*

Lincoln regional center B 14  
801 west prospector  
Lincoln, Ne 68522

This inspection was performed in accordance with NFPA 101, EDITION 2012, LIFE SAFETY CODE, NFPA 72, EDITION 2010, FIRE ALARM SYSTEMS, NFPA 25, EDITION 2011, WATER-BASED FIRE PROTECTION SYSTEMS and other regulatory standards applicable to this inspection.

*This Inspection was performed in accordance with applicable NFPA Standards. The subsequent pages of this report provide performance measurements, listed ranges of acceptable results, and complete documentation of the inspection. Whenever discrepancies exist between acceptable performance standards and actual test results, notes and/or recommended solutions have been proposed or provided for immediate review and approval.*

*Quarterly Inspection  
Inspection Completion Date  
Jun 29, 2023*

<b>Device Total: 5</b>								

**EC 02.03.05 EP 09**

Annual test of main drains at system low point or at all system risers. NFPA 25–2011: 13.2.5

A main drain test shall be conducted annually at each water-based fire protection system riser to determine whether there has been a change in the condition of the water supply piping and control valves. In systems where the sole water supply is through a backflow preventer, and/or pressure reducing valves, the main drain test of at least one system downstream of the device shall be conducted on a quarterly basis. When there is a 10 percent reduction in full flow pressure when compared to the original acceptance test or previously performed tests, the cause of the reduction shall be identified and corrected if necessary. Auxiliary and low-point drains in preaction or deluge systems shall be operated after each system operation and before the onset of freezing conditions (and thereafter as needed). (2011 ed.) (NFPA 25 13.2.5; 13.2.5.1; 13.2.5.2; 13.4.4.3.2)

# Sprinkler Inspection Certificate

*For*

Lincoln regional center B 14  
801 west prospector  
Lincoln, Ne 68522

Tested to NFPA 25 Standards

*This Inspection was performed in accordance with applicable NFPA Standards. The subsequent pages of this report provide performance measurements, listed ranges of acceptable results, and complete documentation of the inspection. Whenever discrepancies exist between acceptable performance standards and actual test results, notes and/or recommended solutions have been proposed or provided for immediate review and approval.*

*Semi-Annual Inspection*

*Inspection Date*

*Sep 29, 2023*

## Form for Inspection, Testing and Maintenance of Fire Alarms and Signaling Systems

Separate forms are available for inspection, testing, and maintenance of the rest of the fire protection system of which the fire alarms and signaling systems are a part. More frequent inspection, testing, and maintenance may be necessary depending on the conditions of the occupancy and the water supply.

Notes:

1. All questions are to be answered *Yes, No, or Not Applicable*. All "No" answers are to be explained in the *Comments* for this form.
2. Refer to NFPA-72 for specific inspection frequency requirements for the different components.

The work covered on this form is (select one): \_\_\_\_\_ Annual

Date of Work \_\_\_\_\_ 2/24/2023

All responses refer to the current work (inspection, testing and maintenance) performed on this date.

### 1. Property Information

Owner: \_\_\_\_\_

Bevan flynn

Owner's Phone Number: \_\_\_\_\_

(402) 479-5453

Owner's Address: \_\_\_\_\_

Building 14 - 801 West Prospector Place, Lincoln, NE, 68522

Property Being Evaluated: \_\_\_\_\_

Lincoln Regional Center - Building 14 (Detention/Correctional)

Property Address: \_\_\_\_\_

Building 14 - 801 West Prospector Place, Lincoln, NE, 68522

Assembly Description: \_\_\_\_\_

Fire Alarm (FORM)

### 2. Owner's Section

A. Are the fire alarms and signaling systems in service?  Yes  No

B. Have fire alarms and signaling systems remained in service since the last inspection?  Yes  No

C. Was the system (of which the fire alarm and signaling systems are a part) free of actuation of devices or alarms since the last inspection?  Yes  No

D. The required record documents are available and include the current revisions of all fire alarm software and the revisions of software of any systems with which the fire alarm software interfaces?  Yes  No

### 3. Monitoring Information

Monitoring organization: \_\_\_\_\_ PERMAR

Address: \_\_\_\_\_

Phone: \_\_\_\_\_

Fax: \_\_\_\_\_

Email: \_\_\_\_\_

Account number: \_\_\_\_\_

Phone line 1: \_\_\_\_\_

Phone line 2: \_\_\_\_\_

Means of transmission: \_\_\_\_\_ POTS

Entity to which alarms are retransmitted: \_\_\_\_\_

Phone: \_\_\_\_\_

### 4. System Information

4.1 Control Unit: \_\_\_\_\_

Manufacturer: \_\_\_\_\_ NOTIFIER

Model number: \_\_\_\_\_ NFS2-3030

4.2 Software and Firmware Revision number: \_\_\_\_\_ 26

4.3 System Power: \_\_\_\_\_

4.3.1 Primary (Main) Power: \_\_\_\_\_

Nominal voltage: \_\_\_\_\_ 120VAC

Amps: \_\_\_\_\_ NA

Location: \_\_\_\_\_ BSMT ELECTRICAL

Overcurrent protection type: \_\_\_\_\_ BREAKER

Amps: \_\_\_\_\_ NA

Disconnecting means location: \_\_\_\_\_ BSMT ELECTRICAL

4.3.2 Secondary Power: \_\_\_\_\_

Type: \_\_\_\_\_ BATTERIES

Location: \_\_\_\_\_ FACP

Battery type (if applicable):  Lead-acid  Nickel-cadmium

Primary (dry cell)

Sealed lead-acid

Calculated capacity of batteries to drive the system:

In standby mode (hours): \_\_\_\_\_ 24

In alarm mode (minutes): \_\_\_\_\_ 15

### 5. Notifications Made Prior To Testing

	Contact	Time

## General Comments

There are no general comments for this submission

## Form for Inspection, Testing and Maintenance of Fire Alarms and Signaling Systems

Separate forms are available for inspection, testing, and maintenance of the rest of the fire protection system of which the fire alarms and signaling systems are a part. More frequent inspection, testing, and maintenance may be necessary depending on the conditions of the occupancy and the water supply.

**Notes:**

1. All questions are to be answered *Yes, No, or Not Applicable*. All "No" answers are to be explained in the *Comments* for this form.
2. Refer to NFPA-72 for specific inspection frequency requirements for the different components.

The work covered on this form is (select one): \_\_\_\_\_ Annual

Date of Work \_\_\_\_\_ 2/22/2023

*All responses refer to the current work (inspection, testing and maintenance) performed on this date.*

**1. Property Information**

Owner: \_\_\_\_\_

Kurt Anderson

Owner's Phone Number: \_\_\_\_\_

(402) 479-5453

Owner's Address: \_\_\_\_\_

Building 9 - 801 West Prospector Place, Lincoln, NE, 68522

Property Being Evaluated: \_\_\_\_\_

Lincoln Regional Center - Building 9 (Detention/Correctional)

Property Address: \_\_\_\_\_

Building 9 - 801 West Prospector Place, Lincoln, NE, 68522

Assembly Description: \_\_\_\_\_

Fire Alarm (TJC - Fire Alarm)

**2. Owner's Section**

A. Are the fire alarms and signaling systems in service?  Yes  No

B. Have fire alarms and signaling systems remained in service since the last inspection?  Yes  No

C. Was the system (of which the fire alarm and signaling systems are a part) free of actuation of devices or alarms since the last inspection?  Yes  No

D. The required record documents are available and include the current revisions of all fire alarm software and the revisions of software of any systems with which the fire alarm software interfaces?  Yes  No

**3. Monitoring Information**

Monitoring organization: \_\_\_\_\_ Per Mar

Address: \_\_\_\_\_ NA

Phone: \_\_\_\_\_ NA

Fax: \_\_\_\_\_ NA

Email: \_\_\_\_\_ NA

Account number: \_\_\_\_\_ NA

Phone line 1: \_\_\_\_\_ NA

Phone line 2: \_\_\_\_\_ NA

Means of transmission: \_\_\_\_\_ NA

Entity to which alarms are retransmitted: \_\_\_\_\_ NA

Phone: \_\_\_\_\_ NA

**4. System Information**

4.1 Control Unit: \_\_\_\_\_

Manufacturer: \_\_\_\_\_ Notifier

Model number: \_\_\_\_\_ NFS-320

4.2 Software and Firmware Revision number: \_\_\_\_\_ 27

4.3 System Power: \_\_\_\_\_

4.3.1 Primary (Main) Power: \_\_\_\_\_

Nominal voltage: \_\_\_\_\_ 120v

Amps: \_\_\_\_\_ NA

Location: \_\_\_\_\_ FACP

Overcurrent protection type: \_\_\_\_\_ NA

Amps: \_\_\_\_\_ NA

Disconnecting means location: \_\_\_\_\_ Breaker

4.3.2 Secondary Power: \_\_\_\_\_

Type: \_\_\_\_\_ 12v 26amp

Location: \_\_\_\_\_ FACP

Battery type (if applicable):  Lead-acid  Nickel-cadmium

Primary (dry cell)

Sealed lead-acid

Calculated capacity of batteries to drive the system: \_\_\_\_\_

In standby mode (hours): \_\_\_\_\_ 24

In alarm mode (minutes): \_\_\_\_\_ 15

# Form for Inspection, Testing and Maintenance of Fire Alarms and Signaling Systems

**Location Code:** URVENHG

**Contact:** Bevan Flynn

**Contact Address:** Building 3 - 801 West Prospector Place  
Lincoln, NE 68522

**Phone:** (402) 479-5451

**Email:** bevan.flynn@nebraska.gov

**Property Evaluated:** Lincoln Regional Center - Building 3  
(Detention/Correctional)  
Building 3 - 801 West Prospector Place  
Lincoln, NE 68522

**Description:** Fire Alarm (TJC - Fire Alarm)

**Company:** Omaha Office

**Address:** 6775 South 118th Street  
Omaha, NE 68137

**Company Phone:** 402-592-8225

**Inspector:** Keith Allen Benne  
J13

**Date of Work:** 2/24/2023

**Frequency:** Annual

---

## Deficiency Summary

Please refer to the Deficiency Summary located on applicable Fire Alarm Supplementary Forms for additional deficiency details.

---

## General Comments

There are no general comments for this submission

# Form for Inspection, Testing and Maintenance of Fire Alarms and Signaling Systems

Separate forms are available for inspection, testing, and maintenance of the rest of the fire protection system of which the fire alarms and signaling systems are a part. More frequent inspection, testing, and maintenance may be necessary depending on the conditions of the occupancy and the water supply.

Notes:

1. All questions are to be answered *Yes, No, or Not Applicable*. All "No" answers are to be explained in the *Comments* for this form.
2. Refer to NFPA-72 for specific inspection frequency requirements for the different components.

The work covered on this form is (select one): \_\_\_\_\_ Annual

Date of Work \_\_\_\_\_ 2/24/2023

*All responses refer to the current work (inspection, testing and maintenance) performed on this date.*

### 1. Property Information

Owner: \_\_\_\_\_

Bevan Flynn

Owner's Phone Number: \_\_\_\_\_

(402) 479-5451

Owner's Address: \_\_\_\_\_

Building 3 - 801 West Prospector Place, Lincoln, NE, 68522

Property Being Evaluated: \_\_\_\_\_

Lincoln Regional Center - Building 3 (Detention/Correctional)

Property Address: \_\_\_\_\_

Building 3 - 801 West Prospector Place, Lincoln, NE, 68522

Assembly Description: \_\_\_\_\_

Fire Alarm (TJC - Fire Alarm)

### 2. Owner's Section

A. Are the fire alarms and signaling systems in service?  Yes  No

B. Have fire alarms and signaling systems remained in service since the last inspection?  Yes  No

C. Was the system (of which the fire alarm and signaling systems are a part) free of actuation of devices or alarms since the last inspection?  Yes  No

D. The required record documents are available and include the current revisions of all fire alarm software and the revisions of software of any systems with which the fire alarm software interfaces?  Yes  No

### 3. Monitoring Information

Monitoring organization: \_\_\_\_\_ Per Mar

Address: \_\_\_\_\_

Phone: \_\_\_\_\_

Fax: \_\_\_\_\_

Email: \_\_\_\_\_

Account number: \_\_\_\_\_

Phone line 1: \_\_\_\_\_

Phone line 2: \_\_\_\_\_

Means of transmission: \_\_\_\_\_

Entity to which alarms are retransmitted: \_\_\_\_\_

Phone: \_\_\_\_\_

### 4. System Information

4.1 Control Unit: \_\_\_\_\_

Manufacturer: \_\_\_\_\_ Notifier

Model number: \_\_\_\_\_ 3030

4.2 Software and Firmware Revision number: \_\_\_\_\_ 27

4.3 System Power: \_\_\_\_\_

4.3.1 Primary (Main) Power: \_\_\_\_\_

Nominal voltage: \_\_\_\_\_ 120v

Amps: \_\_\_\_\_ NA

Location: \_\_\_\_\_ FACP

Overcurrent protection type: \_\_\_\_\_ NA

Amps: \_\_\_\_\_ NA

Disconnecting means location: \_\_\_\_\_ Breaker

4.3.2 Secondary Power: \_\_\_\_\_

Type: \_\_\_\_\_ 12v 26amp

Location: \_\_\_\_\_ IN FACP

Battery type (if applicable):  Lead-acid  Nickel-cadmium

Primary (dry cell)

Sealed lead-acid

Calculated capacity of batteries to drive the system:

In standby mode (hours): \_\_\_\_\_ 24

In alarm mode (minutes): \_\_\_\_\_ 15

### 5. Notifications Made Prior To Testing

	Contact	Time
Monitoring organization:	Per Mar	8am
Building management:	Boiler Rm	8am
Building occupants:	Na	Na
Authority Having Jurisdiction:	Na	Na
Other, if required:		

**6. Testing Results**

**6.1 Control Unit and Related Equipment**

Description	Visual Inspection	Functional Test	Results
Control unit	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	<input checked="" type="checkbox"/> Pass <input type="checkbox"/> Fail <input type="checkbox"/> N/A

**6.3 Alarm and Supervisory Alarm Initiating Device**

Complete supplementary device test form for all initiating devices.

**6.4 Notification Appliances**

Complete supplementary appliance test form for all notification appliances.

**6.5 Interface Equipment**

Complete supplementary interface component test form for all interface components.  
*Circuit Interface / Signaling Line Circuit Interface / Fire Alarm Control Interface*

**6.6 Supervising Station Monitoring**

Description	Yes/No	Time (sec)	Results
Alarm signal	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No		<input checked="" type="checkbox"/> Pass <input type="checkbox"/> Fail <input type="checkbox"/> N/A
Alarm restoration	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No		<input checked="" type="checkbox"/> Pass <input type="checkbox"/> Fail <input type="checkbox"/> N/A
Trouble signal	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No		<input checked="" type="checkbox"/> Pass <input type="checkbox"/> Fail <input type="checkbox"/> N/A
Trouble restoration	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No		<input checked="" type="checkbox"/> Pass <input type="checkbox"/> Fail <input type="checkbox"/> N/A
Supervisory signal	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No		<input checked="" type="checkbox"/> Pass <input type="checkbox"/> Fail <input type="checkbox"/> N/A
Supervisory restoration	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No		<input checked="" type="checkbox"/> Pass <input type="checkbox"/> Fail <input type="checkbox"/> N/A

**6.7 Public Emergency Alarm Reporting System**

Description	Yes/No	Time (seconds)	Results
Alarm signal	<input type="checkbox"/> Yes <input type="checkbox"/> No		<input type="checkbox"/> Pass <input type="checkbox"/> Fail <input checked="" type="checkbox"/> N/A
Alarm restoration	<input type="checkbox"/> Yes <input type="checkbox"/> No		<input type="checkbox"/> Pass <input type="checkbox"/> Fail <input checked="" type="checkbox"/> N/A
Trouble signal	<input type="checkbox"/> Yes <input type="checkbox"/> No		<input type="checkbox"/> Pass <input type="checkbox"/> Fail <input checked="" type="checkbox"/> N/A
Trouble restoration	<input type="checkbox"/> Yes <input type="checkbox"/> No		<input type="checkbox"/> Pass <input type="checkbox"/> Fail <input checked="" type="checkbox"/> N/A
Supervisory signal	<input type="checkbox"/> Yes <input type="checkbox"/> No		<input type="checkbox"/> Pass <input type="checkbox"/> Fail <input checked="" type="checkbox"/> N/A
Supervisory restoration	<input type="checkbox"/> Yes <input type="checkbox"/> No		<input type="checkbox"/> Pass <input type="checkbox"/> Fail <input checked="" type="checkbox"/> N/A

**7. Notifications That Testing Is Complete**

	Contact	Time
Monitoring organization:	Per Mar	3pm
Building management:	Boiler Rm	3pm
Building occupants:	Na	Na
Authority Having Jurisdiction:	Na	Na
Other, if required:		

**8. System Restored To Normal Operation**

Date: 2/24/2023  
 Time: 3pm

**9. Comments**

*Any "No" answers, test failures or other problems found with the fire alarm system must be explained using the comment specific for each question. Additional comments can be added here.*

Please see the summary section at the top of the form for the comments.

**10. Inspector's Information**

Inspected By: Keith Allen Benne  
 Inspector License: J13

I state that the information on this form is correct at the time and place of my inspection, and that all equipment tested at this time was left in operating condition upon completion of this inspection except as noted in the *Comments*. This system as specified herein has been inspected and tested according to NFPA 72, 2013 edition, Chapter 14.

# Form for Inspection, Testing and Maintenance of Fire Alarms and Signaling Systems

Separate forms are available for inspection, testing, and maintenance of the rest of the fire protection system of which the fire alarms and signaling systems are a part. More frequent inspection, testing, and maintenance may be necessary depending on the conditions of the occupancy and the water supply.

Notes:

1. All questions are to be answered *Yes, No, or Not Applicable*. All "No" answers are to be explained in the *Comments* for this form.
2. Refer to NFPA-72 for specific inspection frequency requirements for the different components.

The work covered on this form is (select one): \_\_\_\_\_ Annual

Date of Work \_\_\_\_\_ 2/24/2023

All responses refer to the current work (inspection, testing and maintenance) performed on this date.

### 1. Property Information

Owner: \_\_\_\_\_

Bevan Flynn

Owner's Phone Number: \_\_\_\_\_

(402) 479-5453

Owner's Address: \_\_\_\_\_

Building 5 - 801 West Prospector Place, Lincoln, NE, 68522

Property Being Evaluated: \_\_\_\_\_

Lincoln Regional Center - Building 5 (Detention/Correctional)

Property Address: \_\_\_\_\_

Building 5 - 801 West Prospector Place, Lincoln, NE, 68522

Assembly Description: \_\_\_\_\_

Fire Alarm (Panel/Batteries)

### 2. Owner's Section

A. Are the fire alarms and signaling systems in service?  Yes  No

B. Have fire alarms and signaling systems remained in service since the last inspection?  Yes  No

C. Was the system (of which the fire alarm and signaling systems are a part) free of actuation of devices or alarms since the last inspection?  Yes  No

D. The required record documents are available and include the current revisions of all fire alarm software and the revisions of software of any systems with which the fire alarm software interfaces?  Yes  No

### 3. Monitoring Information

Monitoring organization: \_\_\_\_\_ PERMAR

Address: \_\_\_\_\_

Phone: \_\_\_\_\_

Fax: \_\_\_\_\_

Email: \_\_\_\_\_

Account number: \_\_\_\_\_

Phone line 1: \_\_\_\_\_

Phone line 2: \_\_\_\_\_

Means of transmission: \_\_\_\_\_

Entity to which alarms are retransmitted: \_\_\_\_\_

Phone: \_\_\_\_\_

### 4. System Information

4.1 Control Unit: \_\_\_\_\_

Manufacturer: \_\_\_\_\_ NOTIFER

Model number: \_\_\_\_\_ NFS2-3030

4.2 Software and Firmware Revision number: \_\_\_\_\_ 26

4.3 System Power: \_\_\_\_\_

4.3.1 Primary (Main) Power: \_\_\_\_\_

Nominal voltage: \_\_\_\_\_ 120VAC

Amps: \_\_\_\_\_ NA

Location: \_\_\_\_\_ CONTROL RM

Overcurrent protection type: \_\_\_\_\_ BREAKER

Amps: \_\_\_\_\_ NA

Disconnecting means location: \_\_\_\_\_ ELECTRICAL

4.3.2 Secondary Power: \_\_\_\_\_

Type: \_\_\_\_\_ BATTERIES

Location: \_\_\_\_\_ FACP

Battery type (if applicable):  Lead-acid  Nickel-cadmium

Primary (dry cell)

Sealed lead-acid

Calculated capacity of batteries to drive the system:

In standby mode (hours): \_\_\_\_\_ 24

In alarm mode (minutes): \_\_\_\_\_ 5

# Form for Inspection, Testing and Maintenance of Fire Alarms and Signaling Systems

Separate forms are available for inspection, testing, and maintenance of the rest of the fire protection system of which the fire alarms and signaling systems are a part. More frequent inspection, testing, and maintenance may be necessary depending on the conditions of the occupancy and the water supply.

Notes:

1. All questions are to be answered *Yes, No, or Not Applicable*. All "No" answers are to be explained in the *Comments* for this form.
2. Refer to NFPA-72 for specific inspection frequency requirements for the different components.

The work covered on this form is (select one): \_\_\_\_\_ Annual

Date of Work \_\_\_\_\_ 2/20/2023

*All responses refer to the current work (inspection, testing and maintenance) performed on this date.*

### 1. Property Information

Owner: \_\_\_\_\_

Bevan flynn

Owner's Phone Number: \_\_\_\_\_

(402) 479-5453

Owner's Address: \_\_\_\_\_

Building 11 - 801 West Prospector Place, Lincoln, NE, 68522

Property Being Evaluated: \_\_\_\_\_

Lincoln Regional Center - Building 11 (Detention/Correctional)

Property Address: \_\_\_\_\_

Building 11 - 801 West Prospector Place, Lincoln, NE, 68522

Assembly Description: \_\_\_\_\_

Fire Alarm (FORM)

### 2. Owner's Section

A. Are the fire alarms and signaling systems in service?  Yes  No

B. Have fire alarms and signaling systems remained in service since the last inspection?  Yes  No

C. Was the system (of which the fire alarm and signaling systems are a part) free of actuation of devices or alarms since the last inspection?  Yes  No

D. The required record documents are available and include the current revisions of all fire alarm software and the revisions of software of any systems with which the fire alarm software interfaces?  Yes  No

### 3. Monitoring Information

Monitoring organization: \_\_\_\_\_ PERMAR

Address: \_\_\_\_\_

Phone: \_\_\_\_\_

Fax: \_\_\_\_\_

Email: \_\_\_\_\_

Account number: \_\_\_\_\_

Phone line 1: \_\_\_\_\_

Phone line 2: \_\_\_\_\_

Means of transmission: \_\_\_\_\_ POTS

Entity to which alarms are retransmitted: \_\_\_\_\_

Phone: \_\_\_\_\_

### 4. System Information

4.1 Control Unit: \_\_\_\_\_

Manufacturer: \_\_\_\_\_ NOTIFIER

Model number: \_\_\_\_\_ NFS2-3030

4.2 Software and Firmware Revision number: \_\_\_\_\_ 27

4.3 System Power: \_\_\_\_\_

4.3.1 Primary (Main) Power: \_\_\_\_\_

Nominal voltage: \_\_\_\_\_ 120VAC

Amps: \_\_\_\_\_ NA

Location: \_\_\_\_\_ OFFICE

Overcurrent protection type: \_\_\_\_\_ BREAKER

Amps: \_\_\_\_\_ NA

Disconnecting means location: \_\_\_\_\_ ELECTRICAL

4.3.2 Secondary Power: \_\_\_\_\_

Type: \_\_\_\_\_ BATTERIES

Location: \_\_\_\_\_ FACP

Battery type (if applicable):  Lead-acid  Nickel-cadmium

Primary (dry cell)

Sealed lead-acid

Calculated capacity of batteries to drive the system:

In standby mode (hours): \_\_\_\_\_ 24

In alarm mode (minutes): \_\_\_\_\_ 5

### 5. Notifications Made Prior To Testing

### 4. System Information

4.1 Control Unit: \_\_\_\_\_

Manufacturer: NOTIFIER

Model number: NFS2-640

4.2 Software and Firmware Revision number: 26

4.3 System Power: \_\_\_\_\_

4.3.1 Primary (Main) Power: \_\_\_\_\_

Nominal voltage: 120 VAC

Amps: NA

Location: ENTRY

Overcurrent protection type: BREAKER

Amps: NA

Disconnecting means location: ELECTRICAL

4.3.2 Secondary Power: \_\_\_\_\_

Type: BATTERIES

Location: FACP

Battery type (if applicable):  Lead-acid  Nickel-cadmium

Primary (dry cell)

Sealed lead-acid

Calculated capacity of batteries to drive the system:

In standby mode (hours): 24

In alarm mode (minutes): 15

 Phone: 402-592-8225

## Form for Inspection, Testing and Maintenance of Fire Alarms and Signaling Systems

Separate forms are available for inspection, testing, and maintenance of the rest of the fire protection system of which the fire alarms and signaling systems are a part. More frequent inspection, testing, and maintenance may be necessary depending on the conditions of the occupancy and the water supply.

**Notes:**

1. All questions are to be answered *Yes, No, or Not Applicable*. All "No" answers are to be explained in the *Comments* for this form.
2. Refer to NFPA-72 for specific inspection frequency requirements for the different components.

The work covered on this form is (select one): Semi-Annual

Date of Work 10/17/2023

*All responses refer to the current work (inspection, testing and maintenance) performed on this date.*

### 1. Property Information

Owner: Kris Hoover

Owner's Phone Number: (402) 479-5451

Owner's Address: Building 3 - 801 West Prospector Place, Lincoln, NE, 68522

Property Being Evaluated: Lincoln Regional Center - Building 3 (Detention/Correctional)

Property Address: Building 3 - 801 West Prospector Place, Lincoln, NE, 68522

Assembly Description: Fire Alarm (TJC - Fire Alarm)

### 2. Owner's Section

A. Are the fire alarms and signaling systems in service?  Yes  No

B. Have fire alarms and signaling systems remained in service since the last inspection?  Yes  No

C. Was the system (of which the fire alarm and signaling systems are a part) free of actuation of devices or alarms since the last inspection?  Yes  No

D. The required record documents are available and include the current revisions of all fire alarm software and the revisions of software of any systems with which the fire alarm software interfaces?  Yes  No

### 3. Monitoring Information

Monitoring organization: Per Mar

Address: \_\_\_\_\_

Phone: \_\_\_\_\_

## Form for Inspection, Testing and Maintenance of Fire Alarms and Signaling Systems

Separate forms are available for inspection, testing, and maintenance of the rest of the fire protection system of which the fire alarms and signaling systems are a part. More frequent inspection, testing, and maintenance may be necessary depending on the conditions of the occupancy and the water supply.

**Notes:**

1. All questions are to be answered *Yes, No, or Not Applicable*. All "No" answers are to be explained in the *Comments* for this form.
2. Refer to NFPA-72 for specific inspection frequency requirements for the different components.

The work covered on this form is (select one): Semi-Annual

Date of Work 10/17/2023

*All responses refer to the current work (inspection, testing and maintenance) performed on this date.*

### 1. Property Information

Owner: Kris Hoover

Owner's Phone Number: (402) 479-5453

Owner's Address: Building 5 - 801 West Prospector Place, Lincoln, NE, 68522

Property Being Evaluated: Lincoln Regional Center - Building 5 (Detention/Correctional)

Property Address: Building 5 - 801 West Prospector Place, Lincoln, NE, 68522

Assembly Description: Fire Alarm (Panel/Batteries)

### 2. Owner's Section

A. Are the fire alarms and signaling systems in service?  Yes  No

B. Have fire alarms and signaling systems remained in service since the last inspection?  Yes  No

C. Was the system (of which the fire alarm and signaling systems are a part) free of actuation of devices or alarms since the last inspection?  Yes  No

D. The required record documents are available and include the current revisions of all fire alarm software and the revisions of software of any systems with which the fire alarm software interfaces?  Yes  No

### 3. Monitoring Information

Monitoring organization: PERMAR

Address: \_\_\_\_\_

Phone: \_\_\_\_\_

Fax: \_\_\_\_\_

Email: \_\_\_\_\_

Account number: \_\_\_\_\_

Phone line 1: \_\_\_\_\_

Phone line 2: \_\_\_\_\_

# Form for Inspection, Testing and Maintenance of Fire Alarms and Signaling Systems

Separate forms are available for inspection, testing, and maintenance of the rest of the fire protection system of which the fire alarms and signaling systems are a part. More frequent inspection, testing, and maintenance may be necessary depending on the conditions of the occupancy and the water supply.

Notes:

1. All questions are to be answered *Yes, No, or Not Applicable*. All "No" answers are to be explained in the *Comments* for this form.
2. Refer to NFPA-72 for specific inspection frequency requirements for the different components.

The work covered on this form is (select one): Semi-Annual

Date of Work 10/17/2023

*All responses refer to the current work (inspection, testing and maintenance) performed on this date.*

### 1. Property Information

Owner: Kris Hoover

Owner's Phone Number: (402) 479-5453

Owner's Address: Building 9 - 801 West Prospector Place, Lincoln, NE, 68522

Property Being Evaluated: Lincoln Regional Center - Building 9 (Detention/Correctional)

Property Address: Building 9 - 801 West Prospector Place, Lincoln, NE, 68522

Assembly Description: Fire Alarm (TJC - Fire Alarm)

### 2. Owner's Section

A. Are the fire alarms and signaling systems in service?  Yes  No

B. Have fire alarms and signaling systems remained in service since the last inspection?  Yes  No

C. Was the system (of which the fire alarm and signaling systems are a part) free of actuation of devices or alarms since the last inspection?  Yes  No

D. The required record documents are available and include the current revisions of all fire alarm software and the revisions of software of any systems with which the fire alarm software interfaces?  Yes  No

### 3. Monitoring Information

Monitoring organization: Per Mar

Address: NA

Phone: NA

Fax: NA

Email: NA

Account number: NA

Phone line 1: NA

Phone line 2: NA

Means of transmission: RADIO

Entity to which alarms are retransmitted: NA

Phone: NA

### 4. System Information

4.1 Control Unit: Notifier

Manufacturer: NFS2-640

Model number: 27

4.2 Software and Firmware Revision number: 27

4.3 System Power: 120v

4.3.1 Primary (Main) Power: NA

Nominal voltage: FACP

Amps: NA

Location: NA

Overcurrent protection type: NA

Amps: Breaker

Disconnecting means location: BATTERY

4.3.2 Secondary Power: FACP

Type: Lead-acid

Location: Nickel-cadmium

Battery type (if applicable):  Lead-acid  Nickel-cadmium

Primary (dry cell)

Sealed lead-acid

Calculated capacity of batteries to drive the system:

In standby mode (hours): 24

In alarm mode (minutes): 15

**Suppression Questionnaire**

Is system connected to Main Fire Alarm System?  Yes  No  N/A

Is the protected room properly sealed?  Yes  No  N/A

Is there a door sweep?  Yes  No  N/A

Do the trouble signals operate correctly from releasing panel and sub panels (if any)?  Yes  No  N/A

Did alarm signals operate correctly for releasing panel and associated devices when tested?  Yes  No  N/A

Is all wiring installed correctly, terminated and in a serviceable working order?  Yes  No  N/A

Are all switches, indicators, meters, and gauges in good working order both physically and functionally?  Pass  Fail  N/A

Do all shutdown function relays and devices work as intended? Air handlers, fans, dampers, computer systems.  Yes  No  N/A

Will system operate on batteries for 24 hours in standby and 5 minutes in alarm?  Yes  No  N/A

# Form for Inspection, Testing and Maintenance of Fire Alarms and Signaling Systems

Separate forms are available for inspection, testing, and maintenance of the rest of the fire protection system of which the fire alarms and signaling systems are a part. More frequent inspection, testing, and maintenance may be necessary depending on the conditions of the occupancy and the water supply.

Notes:

1. All questions are to be answered *Yes, No, or Not Applicable*. All "No" answers are to be explained in the *Comments* for this form.
2. Refer to NFPA-72 for specific inspection frequency requirements for the different components.

The work covered on this form is (select one): Semi-Annual

Date of Work 10/17/2023

*All responses refer to the current work (inspection, testing and maintenance) performed on this date.*

### 1. Property Information

Owner: Kris Hoover

Owner's Phone Number: (402) 479-5453

Owner's Address: Building 11 - 801 West Prospector Place, Lincoln, NE, 68522

Property Being Evaluated: Lincoln Regional Center - Building 11 (Detention/Correctional)

Property Address: Building 11 - 801 West Prospector Place, Lincoln, NE, 68522

Assembly Description: Fire Alarm (FORM)

### 2. Owner's Section

A. Are the fire alarms and signaling systems in service?  Yes  No

B. Have fire alarms and signaling systems remained in service since the last inspection?  Yes  No

C. Was the system (of which the fire alarm and signaling systems are a part) free of actuation of devices or alarms since the last inspection?  Yes  No

D. The required record documents are available and include the current revisions of all fire alarm software and the revisions of software of any systems with which the fire alarm software interfaces?  Yes  No

### 3. Monitoring Information

Monitoring organization: PERMAR

Address: \_\_\_\_\_

Phone: \_\_\_\_\_

Fax: \_\_\_\_\_

Email: \_\_\_\_\_

Account number: \_\_\_\_\_

Phone line 1: \_\_\_\_\_

Phone line 2: \_\_\_\_\_

Means of transmission: RADIO

Entity to which alarms are retransmitted: \_\_\_\_\_

Phone: \_\_\_\_\_

### 4. System Information

4.1 Control Unit: Manufacturer: NOTIFIER

Model number: NFS2-640

4.2 Software and Firmware Revision number: 27

4.3 System Power: 4.3.1 Primary (Main) Power: Nominal voltage: 120VAC

Amps: NA

Location: OFFICE

Overcurrent protection type: BREAKER

Amps: NA

Disconnecting means location: ELECTRICAL

4.3.2 Secondary Power: Type: BATTERIES

Location: FACP

Battery type (if applicable):  Lead-acid  Nickel-cadmium

Primary (dry cell)

Sealed lead-acid

Calculated capacity of batteries to drive the system:

In standby mode (hours): 24

In alarm mode (minutes): 5

### 5. Notifications Made Prior To Testing

# Form for Inspection, Testing and Maintenance of Fire Alarms and Signaling Systems

**Location Code:** HOLOAIZ

**Contact:** Kris Hoover

**Contact Address:** Building 14 - 801 West Prospector Place  
Lincoln, NE 68522

**Phone:** (402) 479-5453

**Email:** kris.hoover@nebraska.gov

**Property Evaluated:** Lincoln Regional Center - Building 14  
(Detention/Correctional)  
Building 14 - 801 West Prospector Place  
Lincoln, NE 68522

**Description:** Fire Alarm (FORM)

**Company:** Omaha Office

**Address:** 6775 South 118th Street  
Omaha, NE 68137

**Company Phone:** 402-592-8225

**Inspector:** Conner Lynn Holsclaw  
O30

**Date of Work:** 10/17/2023

**Frequency:** Semi-Annual

---

## Deficiency Summary

Please refer to the Deficiency Summary located on applicable Fire Alarm Supplementary Forms for additional deficiency details.

# Form for Inspection, Testing and Maintenance of Fire Alarms and Signaling Systems

Separate forms are available for inspection, testing, and maintenance of the rest of the fire protection system of which the fire alarms and signaling systems are a part. More frequent inspection, testing, and maintenance may be necessary depending on the conditions of the occupancy and the water supply.

Notes:

1. All questions are to be answered *Yes, No, or Not Applicable*. All "No" answers are to be explained in the *Comments* for this form.
2. Refer to NFPA-72 for specific inspection frequency requirements for the different components.

The work covered on this form is (select one): Semi-Annual

Date of Work 10/17/2023

*All responses refer to the current work (inspection, testing and maintenance) performed on this date.*

### 1. Property Information

Owner: Kris Hoover

Owner's Phone Number: (402) 479-5453

Owner's Address: Building 14 - 801 West Prospector Place, Lincoln, NE, 68522

Property Being Evaluated: Lincoln Regional Center - Building 14 (Detention/Correctional)

Property Address: Building 14 - 801 West Prospector Place, Lincoln, NE, 68522

Assembly Description: Fire Alarm (FORM)

### 2. Owner's Section

A. Are the fire alarms and signaling systems in service?  Yes  No

B. Have fire alarms and signaling systems remained in service since the last inspection?  Yes  No

C. Was the system (of which the fire alarm and signaling systems are a part) free of actuation of devices or alarms since the last inspection?  Yes  No

D. The required record documents are available and include the current revisions of all fire alarm software and the revisions of software of any systems with which the fire alarm software interfaces?  Yes  No

### 3. Monitoring Information

Monitoring organization: PERMAR

Address: \_\_\_\_\_

Phone: \_\_\_\_\_

Fax: \_\_\_\_\_

Email: \_\_\_\_\_

Account number: \_\_\_\_\_

Phone line 1: \_\_\_\_\_

Phone line 2: \_\_\_\_\_

Means of transmission: RADIO

Entity to which alarms are retransmitted: \_\_\_\_\_

Phone: \_\_\_\_\_

### 4. System Information

4.1 Control Unit: Manufacturer: NOTIFIER

Model number: NFS2-3030

4.2 Software and Firmware Revision number: 26

4.3 System Power: 4.3.1 Primary (Main) Power: Nominal voltage: 120VAC

Amps: NA

Location: BSMT ELECTRICAL

Overcurrent protection type: BREAKER

Amps: NA

Disconnecting means location: BSMT ELECTRICAL

4.3.2 Secondary Power: Type: BATTERIES

Location: FACP

Battery type (if applicable):  Lead-acid  Nickel-cadmium

Primary (dry cell)

Sealed lead-acid

Calculated capacity of batteries to drive the system:

In standby mode (hours): 24

In alarm mode (minutes): 15

## Form for Inspection, Testing and Maintenance of Fire Alarms and Signaling Systems

Separate forms are available for inspection, testing, and maintenance of the rest of the fire protection system of which the fire alarms and signaling systems are a part. More frequent inspection, testing, and maintenance may be necessary depending on the conditions of the occupancy and the water supply.

Notes:

1. All questions are to be answered *Yes, No, or Not Applicable*. All "No" answers are to be explained in the *Comments* for this form.
2. Refer to NFPA-72 for specific inspection frequency requirements for the different components.

The work covered on this form is (select one): Semi-Annual

Date of Work 2/26/2024

*All responses refer to the current work (inspection, testing and maintenance) performed on this date.*

### 1. Property Information

Owner: Kris Hoover

Owner's Phone Number: (402) 479-5453

Owner's Address: 801 West Prospector Place, Lincoln, NE, 68522

Property Being Evaluated: Lincoln Regional Center - Annex 5 (Detention/Correctional)

Property Address: 801 West Prospector Place, Lincoln, NE, 68522

Assembly Description: Fire Alarm (FORM)

### 2. Owner's Section

A. Are the fire alarms and signaling systems in service?  Yes  No

B. Have fire alarms and signaling systems remained in service since the last inspection?  Yes  No

C. Was the system (of which the fire alarm and signaling systems are a part) free of actuation of devices or alarms since the last inspection?  Yes  No

D. The required record documents are available and include the current revisions of all fire alarm software and the revisions of software of any systems with which the fire alarm software interfaces?  Yes  No

### 3. Monitoring Information

Monitoring organization: PERMAR

Address: \_\_\_\_\_

Phone: \_\_\_\_\_

Fax: \_\_\_\_\_

# Form for Inspection, Testing and Maintenance of Fire Alarms and Signaling Systems

Separate forms are available for inspection, testing, and maintenance of the rest of the fire protection system of which the fire alarms and signaling systems are a part. More frequent inspection, testing, and maintenance may be necessary depending on the conditions of the occupancy and the water supply.

Notes:

1. All questions are to be answered *Yes, No, or Not Applicable*. All "No" answers are to be explained in the *Comments* for this form.
2. Refer to NFPA-72 for specific inspection frequency requirements for the different components.

### 1. Property Information

Owner:

Kris Hoover

Owner's Phone Number:

(402) 479-5453

Owner's Address:

801 West Prospector Place, Lincoln, NE, 68522

Property Being Evaluated:

Lincoln Regional Center - Annex 5 (Detention/Correctional)

Property Address:

801 West Prospector Place, Lincoln, NE, 68522

Assembly Description:

Fire Alarm (FORM)

### 2. Owner's Section

A. Are the fire alarms and signaling systems in service?  Yes  No

B. Have fire alarms and signaling systems remained in service since the last inspection?  Yes  No

C. Was the system (of which the fire alarm and signaling systems are a part) free of actuation of devices or alarms since the last inspection?  Yes  No

D. The required record documents are available and include the current revisions of all fire alarm software and the revisions of software of any systems with which the fire alarm software interfaces?  Yes  No

**7. Notifications That Testing Is Complete**

	Contact	Time
Monitoring organization:	NA	NA
Building management:	BOILER BLDG	3PM
Building occupants:	NA	NA
Authority Having Jurisdiction:	NA	NA
Other, if required:	NA	NA

**8. System Restored To Normal Operation**

Date: 8/22/2024  
 Time: 3PM

**9. Comments**

*Any "No" answers, test failures or other problems found with the fire alarm system must be explained using the comment specific for each question. Additional comments can be added here.*

Please see the summary section at the top of the form for the comments.

**10. Inspector's Information**

Inspected By: Keith Allen Benne  
 Inspector License: J13

I state that the information on this form is correct at the time and place of my inspection, and that all equipment tested at this time was left in operating condition upon completion of this inspection except as noted in the *Comments*. This system as specified herein has been inspected and tested according to NFPA 72, 2013 edition, Chapter 14.

**Omaha Office**

# Form for Inspection, Testing and Maintenance of Fire Alarms and Signaling Systems

**Location Code:** URVENHG

**Contact:** Kris Hoover

**Contact Address:** Building 3 - 801 West Prospector Place  
Lincoln, NE 68522

**Phone:** (402) 479-5451

**Email:** kris.hoover@nebraska.gov

**Property Evaluated:** Lincoln Regional Center - Building 3  
(Detention/Correctional)  
Building 3 - 801 West Prospector Place  
Lincoln, NE 68522

**Description:** Fire Alarm (TJC - Fire Alarm)

**Company:** Omaha Office

**Address:** 6775 South 118th Street  
Omaha, NE 68137

**Company Phone:** 402-592-8225

**Inspector:** Keith Allen Benne  
J13

**Date of Work:** 8/22/2024

**Frequency:** Semi-Annual

---

## Deficiency Summary

Please refer to the Deficiency Summary located on applicable Fire Alarm Supplementary Forms for additional deficiency details.

---

## General Comments

There are no general comments for this submission

# Form for Inspection, Testing and Maintenance of Fire Alarms and Signaling Systems

Separate forms are available for inspection, testing, and maintenance of the rest of the fire protection system of which the fire alarms and signaling systems are a part. More frequent inspection, testing, and maintenance may be necessary depending on the conditions of the occupancy and the water supply.

**Notes:**

1. All questions are to be answered *Yes, No, or Not Applicable*. All "No" answers are to be explained in the *Comments* for this form.
2. Refer to NFPA-72 for specific inspection frequency requirements for the different components.

**1. Property Information**

Owner: Kris Hoover  
 Owner's Phone Number: (402) 479-5451  
 Owner's Address: Building 3 - 801 West Prospector Place, Lincoln, NE, 68522  
 Property Being Evaluated: Lincoln Regional Center - Building 3 (Detention/Correctional)  
 Property Address: Building 3 - 801 West Prospector Place, Lincoln, NE, 68522  
 Assembly Description: Fire Alarm (TJC - Fire Alarm)

**2. Owner's Section**

- A. Are the fire alarms and signaling systems in service?  Yes  No
- B. Have fire alarms and signaling systems remained in service since the last inspection?  Yes  No
- C. Was the system (of which the fire alarm and signaling systems are a part) free of actuation of devices or alarms since the last inspection?  Yes  No
- D. The required record documents are available and include the current revisions of all fire alarm software and the revisions of software of any systems with which the fire alarm software interfaces?  Yes  No

**3. Monitoring Information**

Monitoring organization: Per Mar  
 Address: \_\_\_\_\_  
 Phone: \_\_\_\_\_  
 Fax: \_\_\_\_\_  
 Email: \_\_\_\_\_  
 Account number: \_\_\_\_\_  
 Phone line 1: \_\_\_\_\_  
 Phone line 2: \_\_\_\_\_  
 Means of transmission: RADIO  
 Entity to which alarms are retransmitted: \_\_\_\_\_  
 Phone: \_\_\_\_\_

**4. System Information**

4.1 Control Unit:  
 Manufacturer: Notifier  
 Model number: 3030  
 4.2 Software and Firmware Revision number: 27  
 4.3 System Power:  
 4.3.1 Primary (Main) Power:  
 Nominal voltage: 120v  
 Amps: NA  
 Location: FACP  
 Overcurrent protection type: NA  
 Amps: NA  
 Disconnecting means location: Breaker  
 4.3.2 Secondary Power:  
 Type: BATTERY  
 Location: IN FACP  
 Battery type (if applicable):  Lead-acid  Nickel-cadmium  Primary (dry cell)  Sealed lead-acid

Calculated capacity of batteries to drive the system:

In standby mode (hours): 24  
 In alarm mode (minutes): 15

Supervisory restoration	<input type="checkbox"/> Yes <input type="checkbox"/> No		<input type="checkbox"/> Pass <input type="checkbox"/> Fail <input checked="" type="checkbox"/> N/A

**6.7 Public Emergency Alarm Reporting System**

Description	Yes/No	Time (seconds)	Results
Alarm signal	<input type="checkbox"/> Yes <input type="checkbox"/> No		<input type="checkbox"/> Pass <input type="checkbox"/> Fail <input checked="" type="checkbox"/> N/A
Alarm restoration	<input type="checkbox"/> Yes <input type="checkbox"/> No		<input type="checkbox"/> Pass <input type="checkbox"/> Fail <input checked="" type="checkbox"/> N/A
Trouble signal	<input type="checkbox"/> Yes <input type="checkbox"/> No		<input type="checkbox"/> Pass <input type="checkbox"/> Fail <input checked="" type="checkbox"/> N/A
Trouble restoration	<input type="checkbox"/> Yes <input type="checkbox"/> No		<input type="checkbox"/> Pass <input type="checkbox"/> Fail <input checked="" type="checkbox"/> N/A
Supervisory signal	<input type="checkbox"/> Yes <input type="checkbox"/> No		<input type="checkbox"/> Pass <input type="checkbox"/> Fail <input checked="" type="checkbox"/> N/A
Supervisory restoration	<input type="checkbox"/> Yes <input type="checkbox"/> No		<input type="checkbox"/> Pass <input type="checkbox"/> Fail <input checked="" type="checkbox"/> N/A

**7. Notifications That Testing Is Complete**

	Contact	Time
Monitoring organization:	NA	NA
Building management:	BOILER BLDG	3PM
Building occupants:	NA	NA
Authority Having Jurisdiction:	NA	NA
Other, if required:	NA	NA

**8. System Restored To Normal Operation**

Date: 8/22/2024  
 Time: 3PM

**9. Comments**

*Any "No" answers, test failures or other problems found with the fire alarm system must be explained using the comment specific for each question. Additional comments can be added here.*

Please see the summary section at the top of the form for the comments.

**10. Inspector's Information**

Inspected By: Keith Allen Benne  
 Inspector License: J13

I state that the information on this form is correct at the time and place of my inspection, and that all equipment tested at this time was left in operating condition upon completion of this inspection except as noted in the *Comments*. This system as specified herein has been inspected and tested according to NFPA 72, 2013 edition, Chapter 14.

# Form for Inspection, Testing and Maintenance of Fire Alarms and Signaling Systems

**Location Code:** URVENHG

**Contact:** Kris Hoover

**Contact Address:** Building 3 - 801 West Prospector Place  
Lincoln, NE 68522

**Phone:** (402) 479-5451

**Email:** kris.hoover@nebraska.gov

**Property Evaluated:** Lincoln Regional Center - Building 3  
(Detention/Correctional)  
Building 3 - 801 West Prospector Place  
Lincoln, NE 68522

**Description:** Fire Alarm (TJC - Fire Alarm)

**Company:** Omaha Office

**Address:** 6775 South 118th Street  
Omaha, NE 68137

**Company Phone:** 402-592-8225

**Inspector:** Conner Lynn Holsclaw  
O30

**Date of Work:** 2/26/2024

**Frequency:** Semi-Annual

---

## Deficiency Summary

Please refer to the Deficiency Summary located on applicable Fire Alarm Supplementary Forms for additional deficiency details.

# Form for Inspection, Testing and Maintenance of Fire Alarms and Signaling Systems

Separate forms are available for inspection, testing, and maintenance of the rest of the fire protection system of which the fire alarms and signaling systems are a part. More frequent inspection, testing, and maintenance may be necessary depending on the conditions of the occupancy and the water supply.

Notes:

1. All questions are to be answered *Yes, No, or Not Applicable*. All "No" answers are to be explained in the *Comments* for this form.
2. Refer to NFPA-72 for specific inspection frequency requirements for the different components.

The work covered on this form is (select one): Semi-Annual

Date of Work 2/26/2024

*All responses refer to the current work (inspection, testing and maintenance) performed on this date.*

### 1. Property Information

Owner: Kris Hoover

Owner's Phone Number: (402) 479-5451

Owner's Address: Building 3 - 801 West Prospector Place, Lincoln, NE, 68522

Property Being Evaluated: Lincoln Regional Center - Building 3 (Detention/Correctional)

Property Address: Building 3 - 801 West Prospector Place, Lincoln, NE, 68522

Assembly Description: Fire Alarm (TJC - Fire Alarm)

### 2. Owner's Section

A. Are the fire alarms and signaling systems in service?  Yes  No

B. Have fire alarms and signaling systems remained in service since the last inspection?  Yes  No

C. Was the system (of which the fire alarm and signaling systems are a part) free of actuation of devices or alarms since the last inspection?  Yes  No

D. The required record documents are available and include the current revisions of all fire alarm software and the revisions of software of any systems with which the fire alarm software interfaces?  Yes  No

### 3. Monitoring Information

Monitoring organization: Per Mar

Address: \_\_\_\_\_

Phone: \_\_\_\_\_

Fax: \_\_\_\_\_

Email: \_\_\_\_\_

Account number: \_\_\_\_\_

Phone line 1: \_\_\_\_\_

Phone line 2: \_\_\_\_\_

Means of transmission: RADIO

Entity to which alarms are retransmitted: \_\_\_\_\_

Phone: \_\_\_\_\_

### 4. System Information

4.1 Control Unit:  
 Manufacturer: Notifier

Model number: 3030

4.2 Software and Firmware Revision number: 27

4.3 System Power:

4.3.1 Primary (Main) Power:

Nominal voltage: 120v

Amps: NA

Location: FACP

Overcurrent protection type: NA

Amps: NA

Disconnecting means location: Breaker

4.3.2 Secondary Power:

Type: BATTERY

Location: IN FACP

Battery type (if applicable):

Lead-acid  Nickel-cadmium

Primary (dry cell)

Sealed lead-acid

Calculated capacity of batteries to drive the system:

In standby mode (hours): 24

In alarm mode (minutes): 15

### 5. Notifications Made Prior To Testing

**Notification Devices**

**Suppression Questionnaire**

Is system connected to Main Fire Alarm System?  Yes  No  N/A

Is the protected room properly sealed?  Yes  No  N/A

Is there a door sweep?  Yes  No  N/A

Do the trouble signals operate correctly from releasing panel and sub panels (if any)?  Yes  No  N/A

Did alarm signals operate correctly for releasing panel and associated devices when tested?  Yes  No  N/A

Is all wiring installed correctly, terminated and in a serviceable working order?  Yes  No  N/A

Are all switches, indicators, meters, and gauges in good working order both physically and functionally?  Pass  Fail  N/A

Do all shutdown function relays and devices work as intended? Air handlers, fans, dampers, computer systems.  Yes  No  N/A

Will system operate on batteries for 24 hours in standby and 5 minutes in alarm?  Yes  No  N/A

# Form for Inspection, Testing and Maintenance of Fire Alarms and Signaling Systems

Separate forms are available for inspection, testing, and maintenance of the rest of the fire protection system of which the fire alarms and signaling systems are a part. More frequent inspection, testing, and maintenance may be necessary depending on the conditions of the occupancy and the water supply.

Notes:

1. All questions are to be answered *Yes, No, or Not Applicable*. All "No" answers are to be explained in the *Comments* for this form.
2. Refer to NFPA-72 for specific inspection frequency requirements for the different components.

The work covered on this form is (select one): Semi-Annual

Date of Work 2/26/2024

*All responses refer to the current work (inspection, testing and maintenance) performed on this date.*

### 1. Property Information

Owner: Kris Hoover

Owner's Phone Number: (402) 479-5453

Owner's Address: Building 5 - 801 West Prospector Place, Lincoln, NE, 68522

Property Being Evaluated: Lincoln Regional Center - Building 5 (Detention/Correctional)

Property Address: Building 5 - 801 West Prospector Place, Lincoln, NE, 68522

Assembly Description: Fire Alarm (Panel/Batteries)

### 2. Owner's Section

A. Are the fire alarms and signaling systems in service?  Yes  No

B. Have fire alarms and signaling systems remained in service since the last inspection?  Yes  No

C. Was the system (of which the fire alarm and signaling systems are a part) free of actuation of devices or alarms since the last inspection?  Yes  No

D. The required record documents are available and include the current revisions of all fire alarm software and the revisions of software of any systems with which the fire alarm software interfaces?  Yes  No

### 3. Monitoring Information

Monitoring organization: PERMAR

Address: \_\_\_\_\_

Phone: \_\_\_\_\_

Fax: \_\_\_\_\_

Email: \_\_\_\_\_

Account number: \_\_\_\_\_

Phone line 1: \_\_\_\_\_

Phone line 2: \_\_\_\_\_

Means of transmission: RADIO

Entity to which alarms are retransmitted: \_\_\_\_\_

# Form for Inspection, Testing and Maintenance of Fire Alarms and Signaling Systems

**Location Code:** IGEKQEV

**Contact:** Kris Hoover

**Contact Address:** Building 5 - 801 West Prospector Place  
Lincoln, NE 68522

**Phone:** (402) 479-5453

**Email:** kris.hoover@nebraska.gov

**Property Evaluated:** Lincoln Regional Center - Building 5  
(Detention/Correctional)  
Building 5 - 801 West Prospector Place  
Lincoln, NE 68522

**Description:** Fire Alarm (Panel/Batteries)

**Company:** Omaha Office

**Address:** 6775 South 118th Street  
Omaha, NE 68137

**Company Phone:** 402-592-8225

**Inspector:** Keith Allen Benne  
J13

**Date of Work:** 8/22/2024

**Frequency:** Semi-Annual

# Form for Inspection, Testing and Maintenance of Fire Alarms and Signaling Systems

Separate forms are available for inspection, testing, and maintenance of the rest of the fire protection system of which the fire alarms and signaling systems are a part. More frequent inspection, testing, and maintenance may be necessary depending on the conditions of the occupancy and the water supply.

Notes:

1. All questions are to be answered *Yes, No, or Not Applicable*. All "No" answers are to be explained in the *Comments* for this form.
2. Refer to NFPA-72 for specific inspection frequency requirements for the different components.

### 1. Property Information

Owner:

Kris Hoover

Owner's Phone Number:

(402) 479-5453

Owner's Address:

Building 5 - 801 West Prospector Place, Lincoln, NE, 68522

Property Being Evaluated:

Lincoln Regional Center - Building 5 (Detention/Correctional)

Property Address:

Building 5 - 801 West Prospector Place, Lincoln, NE, 68522

Assembly Description:

Fire Alarm (Panel/Batteries)

### 2. Owner's Section

A. Are the fire alarms and signaling systems in service?  Yes  No

B. Have fire alarms and signaling systems remained in service since the last inspection?  Yes  No

C. Was the system (of which the fire alarm and signaling systems are a part) free of actuation of devices or alarms since the last inspection?  Yes  No

D. The required record documents are available and include the current revisions of all fire alarm software and the revisions of software of any systems with which the fire alarm software interfaces?  Yes  No

### 3. Monitoring Information

Monitoring organization: PERMAR

Address: \_\_\_\_\_

Phone: \_\_\_\_\_

Fax: \_\_\_\_\_

Email: \_\_\_\_\_

Account number: \_\_\_\_\_

Phone line 1: \_\_\_\_\_

Phone line 2: \_\_\_\_\_

Means of transmission: RADIO

Entity to which alarms are retransmitted: \_\_\_\_\_

Phone: \_\_\_\_\_

### 4. System Information

4.1 Control Unit:

Manufacturer: NOTIFER

Model number: NFS2-3030

4.2 Software and Firmware Revision number: 26

4.3 System Power:

4.3.1 Primary (Main) Power:

Nominal voltage: 120VAC

Amps: NA

Location: CONTROL RM

Overcurrent protection type: BREAKER

Amps: NA

Disconnecting means location: ELECTRICAL

4.3.2 Secondary Power:

Type: BATTERIES

Location: FACP

Battery type (if applicable):  
 Lead-acid  Nickel-cadmium  
 Primary (dry cell)  
 Sealed lead-acid

Calculated capacity of batteries to drive the system:

In standby mode (hours): 24

In alarm mode (minutes): 5

### 5. Notifications Made Prior To Testing

	Contact	Time
Monitoring organization:	NA	NA
Building management:	BOILER BUILDING	8AM
Building occupants:	NA	NA
Authority Having Jurisdiction:	NA	NA
Other, if required:	NA	NA

**6. Testing Results**

# Form for Inspection, Testing and Maintenance of Fire Alarms and Signaling Systems

Separate forms are available for inspection, testing, and maintenance of the rest of the fire protection system of which the fire alarms and signaling systems are a part. More frequent inspection, testing, and maintenance may be necessary depending on the conditions of the occupancy and the water supply.

Notes:

1. All questions are to be answered *Yes, No, or Not Applicable*. All "No" answers are to be explained in the *Comments* for this form.
2. Refer to NFPA-72 for specific inspection frequency requirements for the different components.

The work covered on this form is (select one): Semi-Annual

Date of Work 2/26/2024

*All responses refer to the current work (inspection, testing and maintenance) performed on this date.*

### 1. Property Information

Owner: Kris Hoover

Owner's Phone Number: (402) 479-5453

Owner's Address: Building 9 - 801 West Prospector Place, Lincoln, NE, 68522

Property Being Evaluated: Lincoln Regional Center - Building 9 (Detention/Correctional)

Property Address: Building 9 - 801 West Prospector Place, Lincoln, NE, 68522

Assembly Description: Fire Alarm (TJC - Fire Alarm)

### 2. Owner's Section

A. Are the fire alarms and signaling systems in service?  Yes  No

B. Have fire alarms and signaling systems remained in service since the last inspection?  Yes  No

C. Was the system (of which the fire alarm and signaling systems are a part) free of actuation of devices or alarms since the last inspection?  Yes  No

D. The required record documents are available and include the current revisions of all fire alarm software and the revisions of software of any systems with which the fire alarm software interfaces?  Yes  No

### 3. Monitoring Information

Monitoring organization: Per Mar

Address: NA

Phone: NA

Fax: NA

Email: NA

Account number: NA

Phone line 1: NA

Phone line 2: NA

Means of transmission: RADIO

Entity to which alarms are retransmitted: NA

Phone: NA

### 4. System Information

4.1 Control Unit: Notifier

Manufacturer: Notifier

Model number: NFS2-640

4.2 Software and Firmware Revision number: 27

4.3 System Power:

4.3.1 Primary (Main) Power: 120v

Nominal voltage: 120v

Amps: NA

Location: FACP

Overcurrent protection type: NA

Amps: NA

Disconnecting means location: Breaker

4.3.2 Secondary Power: BATTERY

Type: BATTERY

Location: FACP

Battery type (if applicable):  Lead-acid  Nickel-cadmium

Primary (dry cell)

Sealed lead-acid

Calculated capacity of batteries to drive the system:

In standby mode (hours): 24

In alarm mode (minutes): 15

### 5. Notifications Made Prior To Testing

## Deficiency Summary

Please refer to the Deficiency Summary located on applicable Fire Alarm Supplementary Forms for additional deficiency details.

---

## General Comments

There are no general comments for this submission

# Form for Inspection, Testing and Maintenance of Fire Alarms and Signaling Systems

Separate forms are available for inspection, testing, and maintenance of the rest of the fire protection system of which the fire alarms and signaling systems are a part. More frequent inspection, testing, and maintenance may be necessary depending on the conditions of the occupancy and the water supply.

**Notes:**

1. All questions are to be answered *Yes, No, or Not Applicable*. All "No" answers are to be explained in the *Comments* for this form.
2. Refer to NFPA-72 for specific inspection frequency requirements for the different components.

**1. Property Information**

Owner: Kris Hoover  
 Owner's Phone Number: (402) 479-5453  
 Owner's Address: Building 9 - 801 West Prospector Place, Lincoln, NE, 68522  
 Property Being Evaluated: Lincoln Regional Center - Building 9 (Detention/Correctional)  
 Property Address: Building 9 - 801 West Prospector Place, Lincoln, NE, 68522  
 Assembly Description: Fire Alarm (TJC - Fire Alarm)

**2. Owner's Section**

- A. Are the fire alarms and signaling systems in service?  Yes  No
- B. Have fire alarms and signaling systems remained in service since the last inspection?  Yes  No
- C. Was the system (of which the fire alarm and signaling systems are a part) free of actuation of devices or alarms since the last inspection?  Yes  No
- D. The required record documents are available and include the current revisions of all fire alarm software and the revisions of software of any systems with which the fire alarm software interfaces?  Yes  No

**3. Monitoring Information**

Monitoring organization: Per Mar  
 Address: NA  
 Phone: NA  
 Fax: NA  
 Email: NA  
 Account number: NA  
 Phone line 1: NA  
 Phone line 2: NA  
 Means of transmission: RADIO  
 Entity to which alarms are retransmitted: NA  
 Phone: NA

**4. System Information**

4.1 Control Unit:  
 Manufacturer: Notifier  
 Model number: NFS2-640  
 4.2 Software and Firmware Revision number: 27  
 4.3 System Power:  
 4.3.1 Primary (Main) Power:  
 Nominal voltage: 120v  
 Amps: NA  
 Location: FACP  
 Overcurrent protection type: NA  
 Amps: NA  
 Disconnecting means location: Breaker  
 4.3.2 Secondary Power:  
 Type: BATTERY  
 Location: FACP  
 Battery type (if applicable):  Lead-acid  Nickel-cadmium  Primary (dry cell)  Sealed lead-acid

Calculated capacity of batteries to drive the system:

In standby mode (hours): 24  
 In alarm mode (minutes): 15

## Form for Inspection, Testing and Maintenance of Fire Alarms and Signaling Systems

Separate forms are available for inspection, testing, and maintenance of the rest of the fire protection system of which the fire alarms and signaling systems are a part. More frequent inspection, testing, and maintenance may be necessary depending on the conditions of the occupancy and the water supply.

Notes:

1. All questions are to be answered *Yes, No, or Not Applicable*. All "No" answers are to be explained in the *Comments* for this form.
2. Refer to NFPA-72 for specific inspection frequency requirements for the different components.

The work covered on this form is (select one): Semi-Annual

Date of Work 2/26/2024

*All responses refer to the current work (inspection, testing and maintenance) performed on this date.*

### 1. Property Information

Owner: Kris Hoover

Owner's Phone Number: (402) 309-3231

Owner's Address: Building 10 - 801 West Prospector Place, Lincoln, NE, 68522

Property Being Evaluated: Lincoln Regional Center - Building 10 (Detention/Correctional)

Property Address: Building 10 - 801 West Prospector Place, Lincoln, NE, 68522

Assembly Description: Fire Alarm (TJC - Fire Alarm)

### 2. Owner's Section

A. Are the fire alarms and signaling systems in service?  Yes  No

B. Have fire alarms and signaling systems remained in service since the last inspection?  Yes  No

C. Was the system (of which the fire alarm and signaling systems are a part) free of actuation of devices or alarms since the last inspection?  Yes  No

D. The required record documents are available and include the current revisions of all fire alarm software and the revisions of software of any systems with which the fire alarm software interfaces?  Yes  No

### 3. Monitoring Information

Monitoring organization: Per Mar

Address: NA

Phone: NA

Fax: NA

Email: NA

Account number: NA

Phone line 1: NA

Phone line 2: NA

Means of transmission: RADIO

Entity to which alarms are retransmitted: NA

Phone: NA

### 4. System Information

4.1 Control Unit: Notifier

Manufacturer: NFS2-3030

Model number: 27

4.2 Software and Firmware Revision number: 27

4.3 System Power: 120v

4.3.1 Primary (Main) Power: 120v

Nominal voltage: NA

Amps: FACP

Location: NA

Overcurrent protection type: NA

Amps: Breaker

Disconnecting means location: BATTERY

4.3.2 Secondary Power: FACP

Type: NA

Location: NA

Battery type (if applicable):  Lead-acid  Nickel-cadmium

Primary (dry cell)

Sealed lead-acid

Calculated capacity of batteries to drive the system:

In standby mode (hours): 24

In alarm mode (minutes): 15

### 5. Notifications Made Prior To Testing

# Form for Inspection, Testing and Maintenance of Fire Alarms and Signaling Systems

**Location Code:** FOPQBAH

**Contact:** Kris Hoover

**Contact Address:** Building 10 - 801 West Prospector Place  
Lincoln, NE 68522

**Phone:** (402) 309-3231

**Email:** kris.hoover@nebraska.gov

**Property Evaluated:** Lincoln Regional Center - Building 10  
(Detention/Correctional)  
Building 10 - 801 West Prospector Place  
Lincoln, NE 68522

**Description:** Fire Alarm (TJC - Fire Alarm)

**Company:** Omaha Office

**Address:** 6775 South 118th Street  
Omaha, NE 68137

**Company Phone:** 402-592-8225

**Inspector:** Keith Allen Benne  
J13

**Date of Work:** 8/21/2024

**Frequency:** Semi-Annual

---

## Deficiency Summary

Please refer to the Deficiency Summary located on applicable Fire Alarm Supplementary Forms for additional deficiency details.

---

## General Comments

There are no general comments for this submission

# Form for Inspection, Testing and Maintenance of Fire Alarms and Signaling Systems

Separate forms are available for inspection, testing, and maintenance of the rest of the fire protection system of which the fire alarms and signaling systems are a part. More frequent inspection, testing, and maintenance may be necessary depending on the conditions of the occupancy and the water supply.

**Notes:**

1. All questions are to be answered *Yes, No, or Not Applicable*. All "No" answers are to be explained in the *Comments* for this form.
2. Refer to NFPA-72 for specific inspection frequency requirements for the different components.

**1. Property Information**

Owner:

Kris Hoover

Owner's Phone Number:

(402) 309-3231

Owner's Address:

Building 10 - 801 West Prospector Place, Lincoln, NE, 68522

Property Being Evaluated:

Lincoln Regional Center - Building 10 (Detention/Correctional)

Property Address:

Building 10 - 801 West Prospector Place, Lincoln, NE, 68522

Assembly Description:

Fire Alarm (TJC - Fire Alarm)

**2. Owner's Section**

A. Are the fire alarms and signaling systems in service?  Yes  No

B. Have fire alarms and signaling systems remained in service since the last inspection?  Yes  No

C. Was the system (of which the fire alarm and signaling systems are a part) free of actuation of devices or alarms since the last inspection?  Yes  No

D. The required record documents are available and include the current revisions of all fire alarm software and the revisions of software of any systems with which the fire alarm software interfaces?  Yes  No

**3. Monitoring Information**

Monitoring organization: Per Mar

Address: NA

Phone: NA

Fax: NA

Email: NA

Account number: NA

Phone line 1: NA

Phone line 2: NA

Means of transmission: RADIO

Entity to which alarms are retransmitted: NA

Phone: NA

**4. System Information**

4.1 Control Unit:

Manufacturer: Notifier

Model number: NFS2-3030

4.2 Software and Firmware Revision number: 27

4.3 System Power:

4.3.1 Primary (Main) Power:

Nominal voltage: 120v

Amps: NA

Location: FACP

Overcurrent protection type: NA

Amps: NA

Disconnecting means location: Breaker

4.3.2 Secondary Power:

Type: BATTERY

Location: FACP

Battery type (if applicable):  Lead-acid  Nickel-cadmium

Primary (dry cell)

Sealed lead-acid

Calculated capacity of batteries to drive the system:

In standby mode (hours): 24

In alarm mode (minutes): 15

**5. Notifications Made Prior To Testing**

**Suppression Questionnaire**

Is system connected to Main Fire Alarm System?  Yes  No  N/A

Is the protected room properly sealed?  Yes  No  N/A

Is there a door sweep?  Yes  No  N/A

Do the trouble signals operate correctly from releasing panel and sub panels (if any)?  Yes  No  N/A

Did alarm signals operate correctly for releasing panel and associated devices when tested?  Yes  No  N/A

Is all wiring installed correctly, terminated and in a serviceable working order?  Yes  No  N/A

Are all switches, indicators, meters, and gauges in good working order both physically and functionally?  Pass  Fail  N/A

Do all shutdown function relays and devices work as intended? Air handlers, fans, dampers, computer systems.  Yes  No  N/A

Will system operate on batteries for 24 hours in standby and 5 minutes in alarm?  Yes  No  N/A

# Form for Inspection, Testing and Maintenance of Fire Alarms and Signaling Systems

**Location Code:** BFBKVTY

**Contact:** Kris Hoover

**Contact Address:** Building 9 - 801 West Prospector Place  
Lincoln, NE 68522

**Phone:** (402) 479-5453

**Email:** kris.hoover@nebraska.gov

**Property Evaluated:** Lincoln Regional Center - Building 9  
(Detention/Correctional)  
Building 9 - 801 West Prospector Place  
Lincoln, NE 68522

**Description:** Fire Alarm (TJC - Fire Alarm)

**Company:** Omaha Office

**Address:** 6775 South 118th Street  
Omaha, NE 68137

**Company Phone:** 402-592-8225

**Inspector:** Conner Lynn Holsclaw  
O30

**Date of Work:** 2/26/2024

**Frequency:** Semi-Annual

---

## Deficiency Summary

Please refer to the Deficiency Summary located on applicable Fire Alarm Supplementary Forms for additional deficiency details.

## Form for Inspection, Testing and Maintenance of Fire Alarms and Signaling Systems

Separate forms are available for inspection, testing, and maintenance of the rest of the fire protection system of which the fire alarms and signaling systems are a part. More frequent inspection, testing, and maintenance may be necessary depending on the conditions of the occupancy and the water supply.

Notes:

1. All questions are to be answered *Yes, No, or Not Applicable*. All "No" answers are to be explained in the *Comments* for this form.
2. Refer to NFPA-72 for specific inspection frequency requirements for the different components.

The work covered on this form is (select one): Semi-Annual

Date of Work 2/26/2024

*All responses refer to the current work (inspection, testing and maintenance) performed on this date.*

### 1. Property Information

Owner: Kris Hoover

Owner's Phone Number: (402) 479-5453

Owner's Address: Building 9 - 801 West Prospector Place, Lincoln, NE, 68522

Property Being Evaluated: Lincoln Regional Center - Building 9 (Detention/Correctional)

Property Address: Building 9 - 801 West Prospector Place, Lincoln, NE, 68522

Assembly Description: Fire Alarm (TJC - Fire Alarm)

### 2. Owner's Section

A. Are the fire alarms and signaling systems in service?  Yes  No

B. Have fire alarms and signaling systems remained in service since the last inspection?  Yes  No

C. Was the system (of which the fire alarm and signaling systems are a part) free of actuation of devices or alarms since the last inspection?  Yes  No

D. The required record documents are available and include the current revisions of all fire alarm software and the revisions of software of any systems with which the fire alarm software interfaces?  Yes  No

### 3. Monitoring Information

Monitoring organization: Per Mar

Address: NA

Phone: NA

Fax: NA

Email: NA

Account number: NA

Phone line 1: NA

Phone line 2: NA

Means of transmission: RADIO

Entity to which alarms are retransmitted: NA

Phone: NA

### 4. System Information

4.1 Control Unit: Notifier

Manufacturer: NFS2-640

Model number: 27

4.2 Software and Firmware Revision number: 27

4.3 System Power: 120v

4.3.1 Primary (Main) Power: 120v

Nominal voltage: NA

Amps: FACP

Location: NA

Overcurrent protection type: NA

Amps: Breaker

Disconnecting means location: BATTERY

4.3.2 Secondary Power: FACP

Type: Lead-acid

Location: Nickel-cadmium

Battery type (if applicable):  Lead-acid  Nickel-cadmium

Primary (dry cell)

Sealed lead-acid

Calculated capacity of batteries to drive the system:

In standby mode (hours): 24

In alarm mode (minutes): 15

### 5. Notifications Made Prior To Testing

	Contact	Time
Monitoring organization:	PERMAR	7:00
Building management:	NA	NA
Building occupants:	NA	NA
Authority Having Jurisdiction:	NA	NA
Other, if required:

## Deficiency Summary

Please refer to the Deficiency Summary located on applicable Fire Alarm Supplementary Forms for additional deficiency details.

---

## General Comments

There are no general comments for this submission

# Form for Inspection, Testing and Maintenance of Fire Alarms and Signaling Systems

Separate forms are available for inspection, testing, and maintenance of the rest of the fire protection system of which the fire alarms and signaling systems are a part. More frequent inspection, testing, and maintenance may be necessary depending on the conditions of the occupancy and the water supply.

**Notes:**

1. All questions are to be answered *Yes, No, or Not Applicable*. All "No" answers are to be explained in the *Comments* for this form.
2. Refer to NFPA-72 for specific inspection frequency requirements for the different components.

**1. Property Information**

Owner: Kris Hoover  
 Owner's Phone Number: (402) 479-5453  
 Owner's Address: Building 9 - 801 West Prospector Place, Lincoln, NE, 68522  
 Property Being Evaluated: Lincoln Regional Center - Building 9 (Detention/Correctional)  
 Property Address: Building 9 - 801 West Prospector Place, Lincoln, NE, 68522  
 Assembly Description: Fire Alarm (TJC - Fire Alarm)

**2. Owner's Section**

- A. Are the fire alarms and signaling systems in service?  Yes  No
- B. Have fire alarms and signaling systems remained in service since the last inspection?  Yes  No
- C. Was the system (of which the fire alarm and signaling systems are a part) free of actuation of devices or alarms since the last inspection?  Yes  No
- D. The required record documents are available and include the current revisions of all fire alarm software and the revisions of software of any systems with which the fire alarm software interfaces?  Yes  No

**3. Monitoring Information**

Monitoring organization: Per Mar  
 Address: NA  
 Phone: NA  
 Fax: NA  
 Email: NA  
 Account number: NA  
 Phone line 1: NA  
 Phone line 2: NA  
 Means of transmission: RADIO  
 Entity to which alarms are retransmitted: NA  
 Phone: NA

**4. System Information**

4.1 Control Unit:  
 Manufacturer: Notifier  
 Model number: NFS2-640  
 4.2 Software and Firmware Revision number: 27  
 4.3 System Power:  
 4.3.1 Primary (Main) Power:  
 Nominal voltage: 120v  
 Amps: NA  
 Location: FACP  
 Overcurrent protection type: NA  
 Amps: NA  
 Disconnecting means location: Breaker  
 4.3.2 Secondary Power:  
 Type: BATTERY  
 Location: FACP  
 Battery type (if applicable):  Lead-acid  Nickel-cadmium  Primary (dry cell)  Sealed lead-acid

Calculated capacity of batteries to drive the system:

In standby mode (hours): 24  
 In alarm mode (minutes): 15

# Form for Inspection, Testing and Maintenance of Fire Alarms and Signaling Systems

Separate forms are available for inspection, testing, and maintenance of the rest of the fire protection system of which the fire alarms and signaling systems are a part. More frequent inspection, testing, and maintenance may be necessary depending on the conditions of the occupancy and the water supply.

Notes:

1. All questions are to be answered *Yes, No, or Not Applicable*. All "No" answers are to be explained in the *Comments* for this form.
2. Refer to NFPA-72 for specific inspection frequency requirements for the different components.

The work covered on this form is (select one): Semi-Annual

Date of Work 2/26/2024

*All responses refer to the current work (inspection, testing and maintenance) performed on this date.*

### 1. Property Information

Owner: Kris Hoover

Owner's Phone Number: (402) 309-3231

Owner's Address: Building 10 - 801 West Prospector Place, Lincoln, NE, 68522

Property Being Evaluated: Lincoln Regional Center - Building 10 (Detention/Correctional)

Property Address: Building 10 - 801 West Prospector Place, Lincoln, NE, 68522

Assembly Description: Fire Alarm (TJC - Fire Alarm)

### 2. Owner's Section

A. Are the fire alarms and signaling systems in service?  Yes  No

B. Have fire alarms and signaling systems remained in service since the last inspection?  Yes  No

C. Was the system (of which the fire alarm and signaling systems are a part) free of actuation of devices or alarms since the last inspection?  Yes  No

D. The required record documents are available and include the current revisions of all fire alarm software and the revisions of software of any systems with which the fire alarm software interfaces?  Yes  No

### 3. Monitoring Information

Monitoring organization: Per Mar

Address: NA

Phone: NA

Fax: NA

Email: NA

Account number: NA

Phone line 1: NA

Phone line 2: NA

Means of transmission: RADIO

Entity to which alarms are retransmitted: NA

Phone: NA

### 4. System Information

4.1 Control Unit: Notifier

Manufacturer: NFS2-3030

Model number: 27

4.2 Software and Firmware Revision number: 27

4.3 System Power: 120v

4.3.1 Primary (Main) Power: NA

Nominal voltage: FACP

Amps: NA

Location: NA

Overcurrent protection type: NA

Amps: Breaker

Disconnecting means location: BATTERY

4.3.2 Secondary Power: FACP

Type: Lead-acid

Location: Nickel-cadmium

Battery type (if applicable):  Lead-acid  Nickel-cadmium

Primary (dry cell)

Sealed lead-acid

Calculated capacity of batteries to drive the system:

In standby mode (hours): 24

In alarm mode (minutes): 15

### 5. Notifications Made Prior To Testing

# Form for Inspection, Testing and Maintenance of Fire Alarms and Signaling Systems

**Location Code:** FOPQBAH

**Contact:** Kris Hoover

**Contact Address:** Building 10 - 801 West Prospector Place  
Lincoln, NE 68522

**Phone:** (402) 309-3231

**Email:** kris.hoover@nebraska.gov

**Property Evaluated:** Lincoln Regional Center - Building 10  
(Detention/Correctional)  
Building 10 - 801 West Prospector Place  
Lincoln, NE 68522

**Description:** Fire Alarm (TJC - Fire Alarm)

**Company:** Omaha Office

**Address:** 6775 South 118th Street  
Omaha, NE 68137

**Company Phone:** 402-592-8225

**Inspector:** Keith Allen Benne  
J13

**Date of Work:** 8/21/2024

**Frequency:** Semi-Annual

---

## Deficiency Summary

Please refer to the Deficiency Summary located on applicable Fire Alarm Supplementary Forms for additional deficiency details.

# Form for Inspection, Testing and Maintenance of Fire Alarms and Signaling Systems

Separate forms are available for inspection, testing, and maintenance of the rest of the fire protection system of which the fire alarms and signaling systems are a part. More frequent inspection, testing, and maintenance may be necessary depending on the conditions of the occupancy and the water supply.

Notes:

1. All questions are to be answered *Yes, No, or Not Applicable*. All "No" answers are to be explained in the *Comments* for this form.
2. Refer to NFPA-72 for specific inspection frequency requirements for the different components.

### 1. Property Information

Owner:

Kris Hoover

Owner's Phone Number:

(402) 309-3231

Owner's Address:

Building 10 - 801 West Prospector Place, Lincoln, NE, 68522

Property Being Evaluated:

Lincoln Regional Center - Building 10 (Detention/Correctional)

Property Address:

Building 10 - 801 West Prospector Place, Lincoln, NE, 68522

Assembly Description:

Fire Alarm (TJC - Fire Alarm)

### 2. Owner's Section

A. Are the fire alarms and signaling systems in service?  Yes  No

B. Have fire alarms and signaling systems remained in service since the last inspection?  Yes  No

C. Was the system (of which the fire alarm and signaling systems are a part) free of actuation of devices or alarms since the last inspection?  Yes  No

D. The required record documents are available and include the current revisions of all fire alarm software and the revisions of software of any systems with which the fire alarm software interfaces?  Yes  No

### 3. Monitoring Information

Monitoring organization: Per Mar

Address: NA

Phone: NA

Fax: NA

Email: NA

Account number: NA

Phone line 1: NA

Phone line 2: NA

Means of transmission: RADIO

Entity to which alarms are retransmitted: NA

Phone: NA

### 4. System Information

4.1 Control Unit: Notifier

Manufacturer: NFS2-3030

Model number: 27

4.2 Software and Firmware Revision number: 27

4.3 System Power: 120v

4.3.1 Primary (Main) Power: NA

Nominal voltage: FACP

Amps: NA

Location: NA

Overcurrent protection type: NA

Amps: Breaker

Disconnecting means location: BATTERY

4.3.2 Secondary Power: FACP

Type: Lead-acid  Nickel-cadmium

Location: Primary (dry cell)

Battery type (if applicable):  Sealed lead-acid

Calculated capacity of batteries to drive the system:

In standby mode (hours): 24

In alarm mode (minutes): 15

### 5. Notifications Made Prior To Testing

	Contact	Time
Monitoring organization:	NA	NA
Building management:	BOILER BUILDING	8AM
Building occupants:	NA	NA
Authority Having Jurisdiction:	NA	NA
Other, if required:	NA	NA

**6. Testing Results**

**6.1 Control Unit and Related Equipment**

Description	Visual Inspection	Functional Test	Results
Control unit	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<input checked="" type="checkbox"/> Pass <input type="checkbox"/> Fail <input type="checkbox"/> N/A
Lamps/LEDs/L CDs	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<input checked="" type="checkbox"/> Pass <input type="checkbox"/> Fail <input type="checkbox"/> N/A
Fuses	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<input checked="" type="checkbox"/> Pass <input type="checkbox"/> Fail <input type="checkbox"/> N/A
Trouble signals	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	<input checked="" type="checkbox"/> Pass <input type="checkbox"/> Fail <input type="checkbox"/> N/A
Disconnect switches	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<input type="checkbox"/> Pass <input type="checkbox"/> Fail <input checked="" type="checkbox"/> N/A
Ground-fault monitoring	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<input type="checkbox"/> Pass <input type="checkbox"/> Fail <input checked="" type="checkbox"/> N/A
Supervision	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<input type="checkbox"/> Pass <input type="checkbox"/> Fail <input checked="" type="checkbox"/> N/A
Local annunciator	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<input type="checkbox"/> Pass <input type="checkbox"/> Fail <input checked="" type="checkbox"/> N/A
Remote annunciators	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<input checked="" type="checkbox"/> Pass <input type="checkbox"/> Fail <input type="checkbox"/> N/A
Remote power panels	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<input checked="" type="checkbox"/> Pass <input type="checkbox"/> Fail <input type="checkbox"/> N/A
Other:	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Pass <input type="checkbox"/> Fail <input type="checkbox"/> N/A

**6.2 Secondary Power**

Description	Visual Inspection	Functional Test	Results
Battery condition	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	<input checked="" type="checkbox"/> Pass <input type="checkbox"/> Fail <input type="checkbox"/> N/A
Load voltage	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	<input checked="" type="checkbox"/> Pass <input type="checkbox"/> Fail <input type="checkbox"/> N/A
Discharge test	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	<input checked="" type="checkbox"/> Pass <input type="checkbox"/> Fail <input type="checkbox"/> N/A
Charger test	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	<input checked="" type="checkbox"/> Pass <input type="checkbox"/> Fail <input type="checkbox"/> N/A
Remote panel batteries	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	<input checked="" type="checkbox"/> Pass <input type="checkbox"/> Fail <input type="checkbox"/> N/A

**6.3 Alarm and Supervisory Alarm Initiating Device**

Complete supplementary device test form for all initiating devices.

**6.4 Notification Appliances**

Complete supplementary appliance test form for all notification appliances.

**6.5 Interface Equipment**

Complete supplementary interface component test form for all interface components.  
*Circuit Interface / Signaling Line Circuit Interface / Fire Alarm Control Interface*

**6.6 Supervising Station Monitoring**

Description	Yes/No	Time (sec)	Results
Alarm signal	<input type="checkbox"/> Yes <input type="checkbox"/> No		<input type="checkbox"/> Pass <input type="checkbox"/> Fail <input checked="" type="checkbox"/> N/A
Alarm restoration	<input type="checkbox"/> Yes <input type="checkbox"/> No		<input type="checkbox"/> Pass <input type="checkbox"/> Fail <input checked="" type="checkbox"/> N/A
Trouble signal	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No		<input checked="" type="checkbox"/> Pass <input type="checkbox"/> Fail <input type="checkbox"/> N/A
Trouble restoration	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No		<input checked="" type="checkbox"/> Pass <input type="checkbox"/> Fail <input type="checkbox"/> N/A
Supervisory signal	<input type="checkbox"/> Yes <input type="checkbox"/> No		<input type="checkbox"/> Pass <input type="checkbox"/> Fail <input checked="" type="checkbox"/> N/A
Supervisory restoration	<input type="checkbox"/> Yes <input type="checkbox"/> No		<input type="checkbox"/> Pass <input type="checkbox"/> Fail <input checked="" type="checkbox"/> N/A

**6.7 Public Emergency Alarm Reporting System**

Description	Yes/No	Time (seconds)	Results
Alarm signal	<input type="checkbox"/> Yes <input type="checkbox"/> No		<input type="checkbox"/> Pass <input type="checkbox"/> Fail <input checked="" type="checkbox"/> N/A
Alarm restoration	<input type="checkbox"/> Yes <input type="checkbox"/> No		<input type="checkbox"/> Pass <input type="checkbox"/> Fail <input checked="" type="checkbox"/> N/A
Trouble signal	<input type="checkbox"/> Yes <input type="checkbox"/> No		<input type="checkbox"/> Pass <input type="checkbox"/> Fail <input checked="" type="checkbox"/> N/A
Trouble restoration	<input type="checkbox"/> Yes <input type="checkbox"/> No		<input type="checkbox"/> Pass <input type="checkbox"/> Fail <input checked="" type="checkbox"/> N/A
Supervisory signal	<input type="checkbox"/> Yes <input type="checkbox"/> No		<input type="checkbox"/> Pass <input type="checkbox"/> Fail <input checked="" type="checkbox"/> N/A
Supervisory restoration	<input type="checkbox"/> Yes <input type="checkbox"/> No		<input type="checkbox"/> Pass <input type="checkbox"/> Fail <input checked="" type="checkbox"/> N/A

**7. Notifications That Testing Is Complete**

	Contact	Time
Monitoring organization:	NA	NA
Building management:	BOILER BLDG	1PM
Building occupants:	NA	NA
Authority Having Jurisdiction:	NA	NA
Other, if required:	NA	NA

**8. System Restored To Normal Operation**

Date: 8/21/2024

Time: 1PM

**9. Comments**

*Any "No" answers, test failures or other problems found with the fire alarm system must be explained using the comment specific for each question. Additional comments can be added here.*

Please see the summary section at the top of the form for the comments.

**10. Inspector's Information**

Inspected By: Keith Allen Benne

Inspector License: J13

I state that the information on this form is correct at the time and place of my inspection, and that all equipment tested at this time was left in operating condition upon completion of this inspection except as noted in the *Comments*. This system as specified herein has been inspected and tested according to NFPA 72, 2013 edition, Chapter 14.

**Notification Devices**

**Suppression Questionnaire**

Is system connected to Main Fire Alarm System?  Yes  No  N/A

Is the protected room properly sealed?  Yes  No  N/A

Is there a door sweep?  Yes  No  N/A

Do the trouble signals operate correctly from releasing panel and sub panels (if any)?  Yes  No  N/A

Did alarm signals operate correctly for releasing panel and associated devices when tested?  Yes  No  N/A

Is all wiring installed correctly, terminated and in a serviceable working order?  Yes  No  N/A

Are all switches, indicators, meters, and gauges in good working order both physically and functionally?  Pass  Fail  N/A

Do all shutdown function relays and devices work as intended? Air handlers, fans, dampers, computer systems.  Yes  No  N/A

Will system operate on batteries for 24 hours in standby and 5 minutes in alarm?  Yes  No  N/A

# Form for Inspection, Testing and Maintenance of Fire Alarms and Signaling Systems

Separate forms are available for inspection, testing, and maintenance of the rest of the fire protection system of which the fire alarms and signaling systems are a part. More frequent inspection, testing, and maintenance may be necessary depending on the conditions of the occupancy and the water supply.

Notes:

1. All questions are to be answered *Yes, No, or Not Applicable*. All "No" answers are to be explained in the *Comments* for this form.
2. Refer to NFPA-72 for specific inspection frequency requirements for the different components.

The work covered on this form is (select one): Semi-Annual

Date of Work 2/26/2024

*All responses refer to the current work (inspection, testing and maintenance) performed on this date.*

### 1. Property Information

Owner: Kris Hoover

Owner's Phone Number: (402) 479-5453

Owner's Address: Building 11 - 801 West Prospector Place, Lincoln, NE, 68522

Property Being Evaluated: Lincoln Regional Center - Building 11 (Detention/Correctional)

Property Address: Building 11 - 801 West Prospector Place, Lincoln, NE, 68522

Assembly Description: Fire Alarm (FORM)

### 2. Owner's Section

A. Are the fire alarms and signaling systems in service?  Yes  No

B. Have fire alarms and signaling systems remained in service since the last inspection?  Yes  No

C. Was the system (of which the fire alarm and signaling systems are a part) free of actuation of devices or alarms since the last inspection?  Yes  No

D. The required record documents are available and include the current revisions of all fire alarm software and the revisions of software of any systems with which the fire alarm software interfaces?  Yes  No

### 3. Monitoring Information

Monitoring organization: PERMAR

Address: \_\_\_\_\_

Phone: \_\_\_\_\_

Fax: \_\_\_\_\_

Email: \_\_\_\_\_

Account number: \_\_\_\_\_

Phone line 1: \_\_\_\_\_

Phone line 2: \_\_\_\_\_

Means of transmission: RADIO

Entity to which alarms are retransmitted: \_\_\_\_\_

Phone: \_\_\_\_\_

### 4. System Information

4.1 Control Unit: Manufacturer: NOTIFIER

Model number: NFS2-640

4.2 Software and Firmware Revision number: 27

4.3 System Power: 4.3.1 Primary (Main) Power: Nominal voltage: 120VAC

Amps: NA

Location: OFFICE

Overcurrent protection type: BREAKER

Amps: NA

Disconnecting means location: ELECTRICAL

4.3.2 Secondary Power: Type: BATTERIES

Location: FACP

Battery type (if applicable):  Lead-acid  Nickel-cadmium

Primary (dry cell)

Sealed lead-acid

Calculated capacity of batteries to drive the system:

In standby mode (hours): 24

In alarm mode (minutes): 5

# Form for Inspection, Testing and Maintenance of Fire Alarms and Signaling Systems

Separate forms are available for inspection, testing, and maintenance of the rest of the fire protection system of which the fire alarms and signaling systems are a part. More frequent inspection, testing, and maintenance may be necessary depending on the conditions of the occupancy and the water supply.

Notes:

1. All questions are to be answered *Yes, No, or Not Applicable*. All "No" answers are to be explained in the *Comments* for this form.
2. Refer to NFPA-72 for specific inspection frequency requirements for the different components.

### 1. Property Information

Owner:

Kris Hoover

Owner's Phone Number:

(402) 479-5453

Owner's Address:

Building 11 - 801 West Prospector Place, Lincoln, NE, 68522

Property Being Evaluated:

Lincoln Regional Center - Building 11 (Detention/Correctional)

Property Address:

Building 11 - 801 West Prospector Place, Lincoln, NE, 68522

Assembly Description:

Fire Alarm (FORM)

### 2. Owner's Section

A. Are the fire alarms and signaling systems in service?  Yes  No

B. Have fire alarms and signaling systems remained in service since the last inspection?  Yes  No

C. Was the system (of which the fire alarm and signaling systems are a part) free of actuation of devices or alarms since the last inspection?  Yes  No

D. The required record documents are available and include the current revisions of all fire alarm software and the revisions of software of any systems with which the fire alarm software interfaces?  Yes  No

### 3. Monitoring Information

Monitoring organization: PERMAR

Address: \_\_\_\_\_

Phone: \_\_\_\_\_

Fax: \_\_\_\_\_

Email: \_\_\_\_\_

Account number: \_\_\_\_\_

Phone line 1: \_\_\_\_\_

Phone line 2: \_\_\_\_\_

Means of transmission: RADIO

Entity to which alarms are retransmitted: \_\_\_\_\_

Phone: \_\_\_\_\_

### 4. System Information

4.1 Control Unit:

Manufacturer: NOTIFIER

Model number: NFS2-640

4.2 Software and Firmware Revision number: 27

4.3 System Power:

4.3.1 Primary (Main) Power:

Nominal voltage: 120VAC

Amps: NA

Location: OFFICE

Overcurrent protection type: BREAKER

Amps: NA

Disconnecting means location: ELECTRICAL

4.3.2 Secondary Power:

Type: BATTERIES

Location: FACP

Battery type (if applicable):  
 Lead-acid  Nickel-cadmium  
 Primary (dry cell)  
 Sealed lead-acid

Calculated capacity of batteries to drive the system:

In standby mode (hours): 24

In alarm mode (minutes): 5

# Form for Inspection, Testing and Maintenance of Fire Alarms and Signaling Systems

Separate forms are available for inspection, testing, and maintenance of the rest of the fire protection system of which the fire alarms and signaling systems are a part. More frequent inspection, testing, and maintenance may be necessary depending on the conditions of the occupancy and the water supply.

Notes:

1. All questions are to be answered *Yes, No, or Not Applicable*. All "No" answers are to be explained in the *Comments* for this form.
2. Refer to NFPA-72 for specific inspection frequency requirements for the different components.

The work covered on this form is (select one): Semi-Annual

Date of Work 2/26/2024

*All responses refer to the current work (inspection, testing and maintenance) performed on this date.*

### 1. Property Information

Owner: Kris Hoover

Owner's Phone Number: (402) 479-5453

Owner's Address: Building 14 - 801 West Prospector Place, Lincoln, NE, 68522

Property Being Evaluated: Lincoln Regional Center - Building 14 (Detention/Correctional)

Property Address: Building 14 - 801 West Prospector Place, Lincoln, NE, 68522

Assembly Description: Fire Alarm (FORM)

### 2. Owner's Section

A. Are the fire alarms and signaling systems in service?  Yes  No

B. Have fire alarms and signaling systems remained in service since the last inspection?  Yes  No

C. Was the system (of which the fire alarm and signaling systems are a part) free of actuation of devices or alarms since the last inspection?  Yes  No

D. The required record documents are available and include the current revisions of all fire alarm software and the revisions of software of any systems with which the fire alarm software interfaces?  Yes  No

### 3. Monitoring Information

Monitoring organization: PERMAR

Address: \_\_\_\_\_

Phone: \_\_\_\_\_

Fax: \_\_\_\_\_

Email: \_\_\_\_\_

Account number: \_\_\_\_\_

Phone line 1: \_\_\_\_\_

Phone line 2: \_\_\_\_\_

Means of transmission: RADIO

Entity to which alarms are retransmitted: \_\_\_\_\_

### 4. System Information

4.1 Control Unit: Manufacturer: NOTIFIER

Model number: NFS2-3030

4.2 Software and Firmware Revision number: 26

4.3 System Power: 4.3.1 Primary (Main) Power: Nominal voltage: 120VAC

Amps: NA

Location: BSMT ELECTRICAL

Overcurrent protection type: BREAKER

Amps: NA

Disconnecting means location: BSMT ELECTRICAL

4.3.2 Secondary Power: Type: BATTERIES

Location: FACP

Battery type (if applicable):  Lead-acid  Nickel-cadmium

Primary (dry cell)

Sealed lead-acid

Calculated capacity of batteries to drive the system:

In standby mode (hours): 24

In alarm mode (minutes): 15

**8. System Restored To Normal Operation**

Date: 2/26/2024

Time: 3:00

**9. Comments**

*Any "No" answers, test failures or other problems found with the fire alarm system must be explained using the comment specific for each question. Additional comments can be added here.*

Please see the summary section at the top of the form for the comments.

**10. Inspector's Information**

Inspected By: Conner Lynn Holsclaw  
 Inspector License: O30

I state that the information on this form is correct at the time and place of my inspection, and that all equipment tested at this time was left in operating condition upon completion of this inspection except as noted in the *Comments*. This system as specified herein has been inspected and tested according to NFPA 72, 2013 edition, Chapter 14.

## General Comments

There are no general comments for this submission

## Form for Inspection, Testing and Maintenance of Fire Alarms and Signaling Systems

Separate forms are available for inspection, testing, and maintenance of the rest of the fire protection system of which the fire alarms and signaling systems are a part. More frequent inspection, testing, and maintenance may be necessary depending on the conditions of the occupancy and the water supply.

**Notes:**

1. All questions are to be answered *Yes, No, or Not Applicable*. All "No" answers are to be explained in the *Comments* for this form.
2. Refer to NFPA-72 for specific inspection frequency requirements for the different components.

**1. Property Information**

Owner: Kris Hoover  
 Owner's Phone Number: (402) 479-5453  
 Owner's Address: Building 14 - 801 West Prospector Place, Lincoln, NE, 68522  
 Property Being Evaluated: Lincoln Regional Center - Building 14 (Detention/Correctional)  
 Property Address: Building 14 - 801 West Prospector Place, Lincoln, NE, 68522  
 Assembly Description: Fire Alarm (FORM)

**2. Owner's Section**

- A. Are the fire alarms and signaling systems in service?  Yes  No
- B. Have fire alarms and signaling systems remained in service since the last inspection?  Yes  No
- C. Was the system (of which the fire alarm and signaling systems are a part) free of actuation of devices or alarms since the last inspection?  Yes  No
- D. The required record documents are available and include the current revisions of all fire alarm software and the revisions of software of any systems with which the fire alarm software interfaces?  Yes  No

**3. Monitoring Information**

Monitoring organization: PERMAR  
 Address: \_\_\_\_\_  
 Phone: \_\_\_\_\_  
 Fax: \_\_\_\_\_  
 Email: \_\_\_\_\_  
 Account number: \_\_\_\_\_  
 Phone line 1: \_\_\_\_\_  
 Phone line 2: \_\_\_\_\_  
 Means of transmission: RADIO  
 Entity to which alarms are retransmitted: \_\_\_\_\_  
 Phone: \_\_\_\_\_

**4. System Information**

4.1 Control Unit:  
 Manufacturer: NOTIFIER  
 Model number: NFS2-3030  
 4.2 Software and Firmware Revision number: 26  
 4.3 System Power:  
 4.3.1 Primary (Main) Power:  
 Nominal voltage: 120VAC  
 Amps: NA  
 Location: BSMT ELECTRICAL  
 Overcurrent protection type: BREAKER  
 Amps: NA  
 Disconnecting means location: BSMT ELECTRICAL  
 4.3.2 Secondary Power:  
 Type: BATTERIES  
 Location: FACP  
 Battery type (if applicable):  Lead-acid  Nickel-cadmium  Primary (dry cell)  Sealed lead-acid

Calculated capacity of batteries to drive the system:

In standby mode (hours): 24  
 In alarm mode (minutes): 15

Likelihood: Moderate Scope: WideSpread

Standard Text: The nurse executive directs the implementation of nursing policies and procedures, nursing standards, and a nurse staffing plan(s).

EP Text: A registered nurse provides or supervises the nursing services 24 hours a day, 7 days a week. Note: For hospitals that use Joint Commission accreditation for deemed status purposes: A registered nurse is immediately available for the provision of care of any patient.

Finding(s): 1) Observed in Individual Tracer at State of Nebraska Department of Admin Services (801 West Prospector Place, Lincoln, NE) site .

NON-DEEMED Unit/Building 5. In review of staffing for the month of July, the HCO demonstrated 42% compliance with their license staffing grid. In discussion with the DON, the HCO pulls nursing supervisors or other administrative nurses to provide direct care services when needed, although this still did not consistently meet staffing requirements. Note: the HCO has a full compliment of mental health techs/specialist and has active recruitment processes in place to secure more license nurses. Agency nurses are in use at the facility. This was confirmed with the DON.

## Assigning Accountability

The Director of Nursing is ultimately responsible for all corrective actions and ongoing compliance associated with this element of performance.

Q. Which member(s) of leadership have been involved in the corrective action and are maintaining ongoing involvement with this change? (select one or more)

Chief Operating Officer

Medical Director

Director of Nursing/Nurse Administrator

Facilities Director/Manager

Q. Please describe how the above leadership involvement is helping to support compliance with this element of performance in the future?

The leadership involved in supporting compliance with this element of performance has developed the following.

1. A plan to deploy an aggressive recruitment strategy and plan to fill vacant permanent positions.
2. Increasing frequency for releasing bids to stabilize the time between off boarding and onboarding agency nurse contracts.
3. Modified nurse schedules to meet patient needs and support recruitment and retention preferences for work schedules.

4. Added 26-week contracts to reduce turnover time for agency nurses.

### **Correcting Non - Compliance**

Q. What analysis was completed to ensure not only the noncompliant issue was corrected (surface/high level resolution), but also any underlying reasons for the failure were addressed as well? What analysis was completed to determine the extent to which the noncompliant issue(s) impacted patient care, to ensure that the noncompliant issue(s) were corrected (surface/high level resolution), and that any underlying reasons for the failure(s) were addressed as well? If subsequent analysis of the survey finding identifies additional factors impacting patient care, describe what was identified, what actions were taken to correct the issue(s), and whether follow-up with affected patients was needed and what the follow-up consisted of.

In December 2023, LRC was allocated an additional 25 RN and 20 LPN positions. At the time, a new staffing plan was developed and implementation was initiated. At the time of TJC survey, full implementation of the new staffing plan was still ongoing. After TJC survey, a comparative analysis of licensed nursing staff actual worked hours versus the staffing plan at the time of the survey was completed.

There were no patient care concerns related to the staffing plan. After the analysis, the staffing plan was revised based on current identified needs. Based on the patient census, the average need for all nurses is twenty-three on first and second shifts and sixteen on the third shift. The results for August 2024 were 21 on the first and second shifts, and nineteen on the third shift. In September 2024 to date, the average is twenty-four on the first shift, twenty-two on the second shift and twenty on the third shift. These numbers do not include RN Supervisors scheduled on each shift, which supports nursing ratios across the hospital. With the RN Supervisors included, we would be at twenty-three on the second shift. Therefore, meeting compliance with the current staffing plan.

Q. All corrective actions identified below must be completed prior to submission

1. Comparative Analysis was completed on August 13, 2024.
2. Recruiting and Retention plan was completed on August 14, 2024.
3. Agency Nurse contract management activities were completed on August 16, 2024.

Q. All corrective actions described above were completed by

Sep 09, 2024

### **Ensuring Sustained Compliance**

Q. Describe how the organization will identify issues of non-compliance in a timely manner and

monitor/audit the effectiveness of the corrective action put in place to ensure it is working and sustained. Example: auditing medical records, conducting observations, coding changes in systems, etc.

1. The Staffing office and the Associate Directors of Nursing are in daily communication around the clock for immediate intervention and stabilization. This includes house supervisors, RN supervisors and Manger on Call (RN). This includes addressing absences and calling in additional staff to support patient care and compliance with the staffing plan.
2. Auditing is performed daily with Nursing Administration and weekly with Hospital Leadership.
3. Weekly meetings with HR Talent Acquisition to evaluate progress of recruitment.
4. Weekly meetings with Contract Management team to review agency contract needs and release new bids.

Q.  
Indicate how often the auditing/monitoring will occur (e.g. daily, weekly, monthly).  
Note:

- To ensure sustained compliance, monitoring should be ongoing periodically and not stop after a period of time.
- We encourage organizations to be aggressive in setting 100% compliance goals and monitoring to achieve 100% compliance.

Auditing and monitoring will occur daily and weekly for the first 90 days to support 100% compliance with identified strategies.

Q. Describe the exact data that is being collected from the monitoring/audit as it relates to the appropriate findings.

The data being collected is listed below;

1. Actual hours worked for both LPNs and RNs.
2. Number of interviews scheduled and completed.
3. Number of new nursing staff hired.
4. Number of agency nurses under contract and end date of contract.
5. Number of new bids released for agency nurses.

Q. Describe who will receive the results of the data collected and how often that data will be reported.

Data is reported to Hospital Administration (Hospital Administration, Director of Nursing, Medical Director and Compliance Administrator) weekly during the Administration meeting.

### Report Section Information

#### SAFER™ Matrix Description

All Requirements for Improvement (RFIs) are plotted on the SAFER matrix according to the likelihood the issue could cause harm to patient(s), staff, and/or visitor(s), and the scope at which the RFI is observed. Combined, these characteristics identify a risk level for each RFI, which in turn will determine the level of required post-survey follow up. As the risk level of an RFI increases, the placement of the standard and Element of Performance moves from the bottom left corner to the upper right. The definitions for the Likelihood to Harm a Patient/Staff/Visitor and Scope are as follows:

**Likelihood to Harm a Patient/Staff/Visitor:**

- Low: harm could happen, but would be rare
- Moderate: harm could happen occasionally
- High: harm could happen any time

**Scope:**

- Limited: unique occurrence that is not representative of routine/regular practice
- Pattern: multiple occurrences with potential to impact few/some patients, staff, visitors and/or settings
- Widespread: multiple occurrences with potential to impact most/all patients, staff, visitors and/or settings

The Evidence of Standards Compliance (ESC) or Plan of Correction (POC) forms with findings of a higher risk will require two additional fields within the ESC or POC. The organization will provide a more detailed description of Leadership Involvement and Preventive Analysis to assist in sustainment of the compliance plan. Additionally, these higher risk findings will be provided to surveyors for possible review or onsite validation during any subsequent onsite surveys, up until the next full survey occurs. The below legend illustrates the follow-up activity associated with each level of risk.

SAFER™ Matrix Placement	Required Follow-Up Activity
HIGH/LIMITED HIGH/PATTERN HIGH/WIDESPREAD	<ul style="list-style-type: none"> <li>Two additional areas surrounding Leadership Involvement and Preventive Analysis will be included in the ESC or POC</li> <li>Finding will be highlighted for potential review by surveyors on subsequent onsite surveys up to and including the next full survey or review</li> </ul>
MODERATE/PATTERN MODERATE/WIDESPREAD	
MODERATE/LIMITED LOW/PATTERN LOW/WIDESPREAD	<ul style="list-style-type: none"> <li>ESC or POC will not include Leadership Involvement and Preventive Analysis</li> </ul>
LOW/LIMITED

### Report Section Information

#### **CMS Summary Description**

For organizations that utilize The Joint Commission for deeming purposes, observations noted within the Requirements for Improvement (RFI) section that are crosswalked to a CMS Condition of Participation (CoP)/Condition for Coverage (CfC) are highlighted in this section. The table included within this section incorporates, from a Centers for Medicare and Medicaid Services (CMS) perspective, the CoPs/CfCs that were noted as noncompliant during the survey, the Joint Commission standard and element of performance the CoP/CfC is associated with, the CMS score (either Standard or Condition Level), and if the standard and EP will be included in an upcoming Medicare Deficiency Survey (MEDDEF) if applicable.

#### **Requirements for Improvement Description**

Observations noted within the Requirements for Improvement (RFI) section require follow-up through the Evidence of Standards Compliance (ESC) process. The identified timeframes for submission for each observation are found in the Executive Summary section of the Final Report. If a follow-up survey is required, the unannounced visit will focus on the requirements for improvement although other areas, if observed, could still become findings. The time frame to perform the unannounced follow-up visit is dependent on the scope and severity of the issue identified within Requirements for Improvement.

# The Joint Commission

## Appendix

### Report Section Information

#### Clarification Instructions

##### Documents not available at the time of survey

Any required documents that are not available at the time of survey will no longer be eligible for the clarification process. These RFIs will become action items in the post-survey ESC process.

##### Clerical Errors

Clerical errors in the report will no longer be eligible for the clarification process. The Joint Commission will work with the organization to correct the clerical error, so that the report is accurate. The corrected RFIs will become action items in the post-survey process.

##### Audit Option

There will no longer be an audit option as part of the clarification process. With the implementation of the SAFER™ matrix, the "C" Element of Performance (EP) category is eliminated. The "C" EPs were the subject of Clarification Audits.

The clarification process provides an organization the opportunity to demonstrate compliance with standards that were scored “not compliant” at the time of the survey. The organization has 10 business days from the date the report is published on the extranet site to submit the clarification. *The Evidence of Standards Compliance (ESC) due dates will remain the same whether or not the organization submits a clarification and/or is successful in the clarification process.*

Clarifications may take either of the following forms:

- An organization believes it had adequate evidence available to the surveyor(s) and was in compliance **at the time of the survey**. (Please note that actions taken during or immediately after the survey will not be considered.) The organization must use the clarification form to support their contention.
- The organization has detailed evidence that was not immediately available **at the time of the survey**. The clarification must include an explanation as to why the surveyor(s) did not have access to the information or why it was not provided to the surveyor(s) at the time of the survey. However, any required documents that are not available at the time of survey are not eligible for the Clarification Process. These RFIs will become action items in the post-survey ESC process.
- Please do not submit supplemental documentation unless requested by The Joint Commission. If additional information is requested, the organization will be required to highlight the relevance to the standards in the documentation.

Manufacturer: Hurst  
Year Built: 2016  
Print Date: 07/09/2024  
Next Internal Due Date: 10/03/2024  
Serial Number: S2500-150-133  
Owner's Equip ID:**

This is to certify that the described unit may be operated at a pressure not to exceed the "Pressure Allowed" as shown. This certificate is valid until the expiration date, another inspection is made, or is withdrawn for cause. Issuance of this certificate does not create liability nor guarantee personal safety. If you have any questions regarding the operation or safety of this unit, contact the owner or the State Chief Boiler Inspector.

Chief Boiler Inspector

# NEBRASKA STATE FIRE MARSHAL

## OCCUPANCY PERMIT

Certificate Number: 14938

Name of Facility: **Lincoln Regional Center Bldg #10 Psych Rehab**

Type of Facility: **Hospital**

Location: **801 W Prospector Pl Lincoln**

Maximum  
Occupancy: **45 Beds**

Date Issued: **5/2/2023**

Inspected By: **Monica Ellis**  
**Deputy State Fire Marshal**

Approved By:   
**State Fire Marshal**

### POST IN PROMINENT PLACE

Change in occupancy classification or failure to meet State Fire Marshal codes  
shall invalidate this occupancy permit.

LEAVE NO FIELD BLANK

Jim Pillen, Governor

October 5, 2023

Mitchell Bruening, Administrator  
Lincoln Regional Center  
Folsom & Prospector, Building 14  
Lincoln, NE 68509

Dear Mr. Bruening:

An unannounced visit was made to Lincoln Regional Center on October 2, 2023-October 4, 2023, by representatives of this Department. The purpose of the visit was to investigate a complaint on non-compliance with regulatory requirements received by our office.

The following are the general allegation(s) of non-compliance and conclusions:

**ALLEGATION:**

The facility fails to ensure adequate supplies for patient care.

**FINDINGS:**

Based on record review, observation, and interview. The facility had systems in place to keep all emergency medical supplies stocked and available.

Sincerely,

A handwritten signature in cursive script that reads "Mark Luger".

Dear Mr. Bruening:

After reviewing the findings of the survey conducted at your Mental Health Substance Use Treatment Center on October 4, 2023 by representatives of this Department, we are pleased to inform you that your facility is in substantial compliance with the Regulations Governing Licensure of Mental Health Substance Use Facilities .

The attached form indicates the survey results. Please retain for your files.

The surveyor wishes to thank you and your staff for the courtesy and assistance during the survey. If you have any questions, please contact this office.

Sincerely,

A handwritten signature in cursive script that reads "Mark Luger".

RE: Lincoln Regional Center, 284003

Dear Ms. Russell:

### IMPORTANT NOTICE – PLEASE READ CAREFULLY

On July 31, 2023 - August 8, 2023, DHHS representatives conducted a licensure survey and complaints investigation to determine whether your facility was in compliance with State Licensure regulations for Psychiatric Hospitals. Enclosed you will find the State Form documenting the results of that survey. All references to regulatory requirements contained in this letter are found in Title 17 NAC 9 Regulations Governing Licensure of Hospitals.

### **STATEMENT OF COMPLIANCE (SOC)**

A SOC for each deficiency cited must be submitted to [DHHS.AcuteCareFacilities@nebraska.gov](mailto:DHHS.AcuteCareFacilities@nebraska.gov) **NO LATER THAN 10 calendar days after receipt of the CMS-2567's**. Failure to submit an acceptable SOC timely may result in the imposition of Disciplinary Action.

### **An acceptable SOC must include:**

- 1) The plan of correcting the specific deficiency. The plan should address the processes that lead to the deficiencies cited;
  - 2) The procedure for implementing the acceptable statement of compliance for the specific deficiency cited;
  - 3) The monitoring procedure to ensure that the statement of compliance is effective, and that specific deficiency cited remains corrected and/or in compliance with the regulatory requirements;
  - 4) The title of the person responsible for implementing the acceptable plan of correction;
- **PROVIDE THE DATE WHEN CORRECTION ACTION WILL BE COMPLETED.** Correction dates should be no later than forty-five calendar days from the exit date of the survey or **September 22, 2023**.

**NOTE:** Remember to attach copies of any auditing tools; education; revised or new policies/processes.

**SIGNATURE ON FIRST PAGE OF THE State Form:** The first page must be signed by the provider/supplier representative and faxed to 402-742-8319.

Lincoln Regional Center  
Page 2  
August 18, 2023

We will notify you whether your plan of correction is or is not acceptable via email. Subsequently, if your statement of compliance is **not accepted, you must submit an addendum to your statement of compliance within ten (10) calendar days of the notification.**

We thank you and your staff for your cooperation and assistance during the survey. If you have any questions regarding this correspondence, please contact this office.

Sincerely,

Billye Jo Knoell BS, RN, LNC, C.L.S.S.Y.B. – Program Manager RN

I 000	Initial Comments  On 8/1/2023 - 8/8/2023, DHHS Public Health representatives conducted a licensure survey and complaint investigation to determine compliance with 175 NAC 9, Licensure Regulations for Hospitals. The facility was out of compliance with the regulations identified below at the time of survey:	I 000		
I 190	9-006.04A Grievances  Each hospital must establish and implement a written process that promptly addresses grievances filed by patients or their representatives. The process includes, but is not limited to: <ol style="list-style-type: none"> <li>1. A procedure for submission of grievances which is made available to patients or representatives;</li> <li>2. Time frames and procedures for review of grievances and provision of a response; and</li> <li>3. How information from grievances and responses are utilized to improve the quality of patient care and treatment.</li> </ol> This Standard is not met as evidenced by: Based on staff interview, review of concerns and grievances and review of policy and procedures the Hospital failed to implement their policy for informing the complainant of the resolution of 2 of 2 patient (Patient 36 and Patient 37)grievances reviewed. This failure has the potential to effect all patients with concerns or grievances.  Findings are:  A. A review of Patient 37's 5/7/23 grievance revealed, Patient 37 felt "threatened" by one of the staff. Patient 37 documented that the staff member told them, "I am not the person to f____"	I 190

I 190	<p>Continued From page 1</p> <p>with if you want to stay safe." Patient 37 also documented that the staff would point their finger at (Patient 37) when monitoring the area. A review of the grievance resolution documented by the program manager on 5/9/23 "An abuse/neglect was initiated on the situation and will be investigated by Risk Management Dept. I gave (Patient 37) a copy. The patient signed off on 5/11/23 and checked, I agree with resolution. The resolution lacked how (Patient 37) would be protected or if there was a plan to prevent recurrence.</p> <p>B. A review of Patient 36's 5/9/23 grievance revealed, Patient 36 requested to make a phone call to (gender) children's between 7:00 AM - 7:30 AM. "The staff will not make the call for Patient 36, no matter who is working." A review of the grievance resolution documented on 5/18/23 by Mental Health Specialist Supervisor (MHSS) H, "Patient stated "I already know what it is , I don't want to go over the grievance." The patient refused to sign off on the resolution form. The resolution lacked how the facility would address (Patient 36's) grievance to assist in phoning children.</p> <p>C. An interview with the Interim Administrator on 8/2/23 at 12:15 PM and review of Patient 37's 5/7/23 grievance and Patient 36's 5/9/23 grievance resolution form and the review of the facility grievance policy and procedure. The Interim Administrator verified that the 2 grievances lacked a clear resolution of the grievance. "The intent is to provide a resolution note on the forms."</p> <p>D. Review of the "Grievance/Complaint" policy and procedure with the last revision date of 9/2021 included:</p>	I 190

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (EACH DEFICIENCY MUST BE PRECEDED BY FULL REGULATORY OR LSC IDENTIFYING INFORMATION)	ID PREFIX TAG	PROVIDER'S PLAN OF CORRECTION (EACH CORRECTIVE ACTION SHOULD BE CROSS-REFERENCED TO THE APPROPRIATE DEFICIENCY)	(X5) COMPLETE DATE
I 730	<p>Continued From page 11</p> <p>wash these again, they still stink." ADON D and this surveyor was present when MHSS-I opened the washer and verified that the clothes still smelled unclean. MHSS-I added 2 scoops of detergent and restarted the washer.</p> <p>C. A review of the Ecolab Royal Brite Plus product information page, identified the product as a "Powder enzyme laundry detergent with color-safe oxygen bleach. Quadruple enzyme system ensures powerful cleaning and stain removal. The information sheet indicated a light load use 1 oz detergent, medium load use 2 oz detergent and heavy loads use 4 oz of detergent."</p> <p>D. A phone interview on 8/8/23 at 9:30 AM, with the Ecolab Territory Representative stated, "I am unsure if there is any sanitizing/disinfecting properties to this product (Royal Bright Plus Detergent)."</p>	I 730

<b>Notes:</b> Gus 2/27/24 Traveled to customers site. Met with customer and gained access to generator and ATS's. Performed inspection on unit. Found batteries were over 3 years old and out of spec due to age. No other issues found. Drained oil and replaced fuel and oil filters, filled with new oil. Ran generator up to temperature. Took readings when unit was running. Shut down and returned to auto. Cleaned up and departed site.  Battery: 2x 4d (10/2019) Recommend replacing due to age.

 Serial Number: 16822  
 Owner's Equip ID:

This is to certify that the described unit may be operated at a pressure not to exceed the "Pressure Allowed" as shown. This certificate is valid until the expiration date, another inspection is made, or is withdrawn for cause. Issuance of this certificate does not create liability nor guarantee personal safety. If you have any questions regarding the operation or safety of this unit, contact the owner or the State Chief Boiler Inspector.

Chief Boiler Inspector

DEPT. OF HEALTH AND HUMAN SERVICES

Jim Pillen, Governor

September 19, 2023

Don Whitmire  
Administrator  
Norfolk Regional Center  
P O Box 1209, 1700 North Victory Rd  
Norfolk, NE 68701-1209

Dear Mr. Whitmire:

An investigative survey was conducted by representatives of the Department on September 7-13, 2023 at Norfolk Regional Center. We are pleased to inform you that your facility is in substantial compliance with Title 175 NAC – Regulations Governing Licensure of Hospitals.

The enclosed form indicates the survey results. Please retain for your files.

The surveyors wish to thank you and your staff for the courtesy and assistance during the survey. If you have any questions, please contact this office.

Sincerely,

Billye Jo Knoell BS, RN, LNC, C.L.S.S.Y.B. – Program Manager RN

## REPORT OF INSPECTION

Inspection Report No. 237  
Conferred With \_\_\_\_\_

Inspection Contract No. \_\_\_\_\_  
Phone No. \_\_\_\_\_

REPORT TO Norfolk Reg Center BUILDING OR LOCATION \_\_\_\_\_  
STREET 1700 N. Victoria Lane INSPECTOR S. Tracy  
CITY & STATE Norfolk, VA DATE 1-25-23

### Owner's Section (To be answered by Owner or Occupant)

- A. Explain any occupancy hazard changes since the previous inspection. NONE
  - B. Describe fire protection modifications made since last inspection. NONE
  - C. Describe any fires since last inspection. NONE
  - D. When was the system piping last checked for stoppage, corrosion or foreign material? 5-2022
  - E. When was the dry-piping system last checked for proper pitch? NA
  - F. Are dry valves adequately protected from freezing? NA
- Signature Tom Palmer Title Inspector Date 1-25-23

### Inspector's Section (All responses reference current inspection) NA = NOT APPLICABLE

- 1. General
  - a. Is the building occupied?  Yes  No Is occupancy same as previous inspection?  yes  no  NA
  - b. Are all systems in service?  Yes  No
  - c. Is there a minimum of 18 in. (457 mm) clearance between the top of the storage and the sprinkler deflectors?  Yes  No
  - d. Does all electrical heat tape appear to be satisfactory?  Yes  No  NA
  - e. Does the hand hose on the sprinkler system(s) appear to be satisfactory?  Yes  No  NA
- 2. Control Valves (See Item 15.)
  - a. Are all sprinkler system control valves and all other valves in the appropriate open or closed position?  Yes  No
  - b. Are all control valves in the open position locked, sealed or equipped with a tamper switch?  Yes  No
- 3. Water Supplies (See Item 16.)
  - a. Was a water flow test of main drain made at the sprinkler riser(s)?  Yes  No
- 4. Tanks, Pumps, Fire Department Connections
  - a. Are fire pumps, gravity tanks, reservoirs and pressure tanks in good condition and properly maintained?  Yes  No  NA
  - b. Are fire department connections in satisfactory condition, couplings free, caps in place, and check valves tight?  Yes  No  NA  
Are they accessible and visible?  Yes  No  NA
- 5. Wet Systems
  - a. Are cold weather valves (O.S. & Y.) in the appropriate open or closed position?  Yes  No  NA
  - b. Have antifreeze system solutions been tested?  Yes  No  NA
  - c. Were the antifreeze test results satisfactory?  Yes  No  NA
  - d. In areas protected by wet system(s), does the building appear to be properly heated in all areas, including blind attics and perimeter areas where accessible?  Yes  No  NA Do all exterior openings appear to be protected against freezing?  Yes  No  NA
- 6. Dry Systems (See Items 11 to 13.)
  - a. Are dry valve(s) in service?  Yes  No  NA
  - b. Are the air pressures and priming water levels in accordance with the manufacturer's instructions?  Yes  No  NA
  - c. Has the operation of the air or nitrogen supplies been tested?  Yes  No  NA Are they in service?  Yes  No  NA
  - d. Were low points drained during this inspection?  Yes  No  NA
  - e. Did quick-opening devices operate satisfactorily?  Yes  No  NA
  - f. Did the dry valve(s) trip properly during the trip pressure test?  Yes  No  NA
  - g. Did the heating equipment in the dry-pipe valve room(s) operate at the time of inspection?  Yes  No  NA
- 7. Special Systems (See Item 14.)
  - a. Did the deluge or pre-action valves operate properly during testing?  Yes  No  NA
  - b. Did the heat-responsive devices operate properly during testing?  Yes  No  NA
  - c. Did the supervisory devices operate during testing?  Yes  No  NA
- 8. Alarms
  - a. Did water motor(s) and gong(s) test satisfactorily?  Yes  No  NA
  - b. Did electric alarm(s) test satisfactorily?  Yes  No  NA
  - c. Did supervisory alarm service test satisfactorily?  Yes  No  NA

"Flow Switch"  
Time: \_\_\_\_\_ min \_\_\_\_\_ sec.
- 9. Sprinklers
  - a. Are all sprinklers free from corrosion, loading or obstruction to spray discharge?  Yes  No
  - b. Are sprinklers less than 50 years old? (Older sprinklers require sample testing)  Yes  No
  - c. Are quick response and residential sprinklers less than 20 years old? (Older sprinklers require sample testing)  Yes  No
  - d. Is stock of spare sprinklers available?  Yes  No
  - e. Does the exterior condition of sprinkler system appear to be satisfactory?  Yes  No
  - f. Are sprinklers of proper temperature ratings for their locations?  Yes  No

Are all new additions and building changes property protected?  yes  no  NA

## REPORT OF INSPECTION

Inspection Report No. 891  
Conferred With \_\_\_\_\_

Inspection Contract No. \_\_\_\_\_  
Phone No. \_\_\_\_\_

REPORT TO Norfolk Reentrying Plant BUILDING OR LOCATION \_\_\_\_\_  
STREET 1700 No. Victoria Lane INSPECTOR S. Tracy  
CITY & STATE Norfolk, VA DATE 1-25-24

### Owner's Section (To be answered by Owner or Occupant)

- A. Explain any occupancy hazard changes since the previous inspection. None
  - B. Describe fire protection modifications made since last inspection. None
  - C. Describe any fires since last inspection. \_\_\_\_\_
  - D. When was the system piping last checked for stoppage, corrosion or foreign material? 5-2022
  - E. When was the dry-piping system last checked for proper pitch? NA
  - F. Are dry valves adequately protected from freezing? \_\_\_\_\_
- Signature [Signature] Title [Title] Date 1-25-24

### Inspector's Section (All responses reference current inspection) NA = NOT APPLICABLE

- 1. General
  - a. Is the building occupied?  Yes  No Is occupancy same as previous inspection?  yes  no  NA
  - b. Are all systems in service?  Yes  No
  - c. Is there a minimum of 18 in. (457 mm) clearance between the top of the storage and the sprinkler deflectors?  Yes  No
  - d. Does all electrical heat tape appear to be satisfactory?  Yes  No  NA
  - e. Does the hand hose on the sprinkler system(s) appear to be satisfactory?  Yes  No  NA
- 2. Control Valves (See Item 15.)
  - a. Are all sprinkler system control valves and all other valves in the appropriate open or closed position?  Yes  No
  - b. Are all control valves in the open position locked, sealed or equipped with a tamper switch?  Yes  No
- 3. Water Supplies (See Item 16.)
  - a. Was a water flow test of main drain made at the sprinkler riser(s)?  Yes  No
- 4. Tanks, Pumps, Fire Department Connections
  - a. Are fire pumps, gravity tanks, reservoirs and pressure tanks in good condition and properly maintained?  Yes  No  NA
  - b. Are fire department connections in satisfactory condition, couplings free, caps in place, and check valves tight?  Yes  No  NA
  - Are they accessible and visible?  Yes  No  NA
- 5. Wet Systems
  - a. Are cold weather valves (O.S. & Y.) in the appropriate open or closed position?  Yes  No  NA
  - b. Have antifreeze system solutions been tested?  Yes  No  NA
  - c. Were the antifreeze test results satisfactory?  Yes  No  NA
  - d. In areas protected by wet system(s), does the building appear to be properly heated in all areas, including blind attics and perimeter areas where accessible?  Yes  No  NA Do all exterior openings appear to be protected against freezing?  Yes  No  NA
- 6. Dry Systems (See Items 11 to 13.)
  - a. Are dry valve(s) in service?  Yes  No  NA
  - b. Are the air pressures and priming water levels in accordance with the manufacturer's instructions?  Yes  No  NA
  - c. Has the operation of the air or nitrogen supplies been tested?  Yes  No  NA Are they in service?  Yes  No  NA
  - d. Were low points drained during this inspection?  Yes  No  NA
  - e. Did quick-opening devices operate satisfactorily?  Yes  No  NA
  - f. Did the dry valve(s) trip properly during the trip pressure test?  Yes  No  NA
  - g. Did the heating equipment in the dry-pipe valve room(s) operate at the time of inspection?  Yes  No  NA
- 7. Special Systems (See Item 14.)
  - a. Did the deluge or pre-action valves operate properly during testing?  Yes  No  NA
  - b. Did the heat-responsive devices operate properly during testing?  Yes  No  NA
  - c. Did the supervisory devices operate during testing?  Yes  No  NA
- 8. Alarms
  - a. Did water motor(s) and gong(s) test satisfactorily?  Yes  No  NA
  - b. Did electric alarm(s) test satisfactorily?  Yes  No  NA
  - c. Did supervisory alarm service test satisfactorily?  Yes  No  NA

"Flow Switch"  
Time: \_\_\_\_\_ min 00 sec.
- 9. Sprinklers
  - a. Are all sprinklers free from corrosion, loading or obstruction to spray discharge?  Yes  No
  - b. Are sprinklers less than 50 years old? (Older sprinklers require sample testing)  Yes  No
  - c. Are quick response and residential sprinklers less than 20 years old? (Older sprinklers require sample testing)  Yes  No
  - d. Is stock of spare sprinklers available?  Yes  No
  - e. Does the exterior condition of sprinkler system appear to be satisfactory?  Yes  No
  - f. Are sprinklers of proper temperature ratings for their locations?  Yes  No

Are all new additions and building changes property protected?  yes  no  NA

Inspection Report No. \_\_\_\_\_

11. Date dry-pipe valve trip tested (control valve partially open) NA (See Trip Test Table which follows.)  
 12. Date dry-pipe valve trip tested (control valve fully open) \_\_\_\_\_ (See Trip Test Table which follows.)  
 13. Date quick-opening device tested NA (See Trip Test Table which follows.)

DRY PIPE OPERATING TEST		DRY VALVE TRIP TEST TABLE						C.O.D.	
		MAKE	MODEL	SERIAL NO.	MAKE	MODEL	SERIAL NO.	MIN.	SEC.
Without Q.O.D.	Time to Trip Thru Test Pipe	Water Pressure		Air Pressure	Trip Point Air Pressure	Time Water Reached Test Outlet	Alarm Operated Properly		
	MIN.	SEC.	PSI	PSI	PSI	MIN.	SEC.	YES	NO
With Q.O.D.									

14. Date deluge or preaction valve tested NA (See Trip Test Table which follows.)

DELUGE & PREACTION VALVES	TRIP TEST TABLE								
	Operation	<input type="checkbox"/> PNEUMATIC		<input type="checkbox"/> ELECTRIC		<input type="checkbox"/> HYDRAULIC			
	Piping Supervised	<input type="checkbox"/> YES		<input type="checkbox"/> NO		Detecting media supervised		<input type="checkbox"/> YES	<input type="checkbox"/> NO
	Does valve operate from the manual trip and/or remote control stations							<input type="checkbox"/> YES	<input type="checkbox"/> NO
Is there an accessible facility in each circuit for testing					Method of testing circuits				
<input type="checkbox"/> YES <input type="checkbox"/> NO									
MAKE	MODEL	Does each circuit operate supervision loss alarm		Does each circuit operate valve release		Maximum time to operate release			
		YES	NO	YES	NO	YES	NO		

15. See Control Valve Maintenance Table.

Control Valve Maintenance Table							Explain Abnormal Condition
Control Valves	Number	Type	Open	Secured	Closed	Signs	
City Connection Control Valve	1	Piv	yes	yes	NO	yes	
Tank Control Valves							
Pump Control Valves							
Sectional Control Valves							
System Control Valves	2	Bly	yes	yes	NO	yes	DLVA
Other Control Valves							

16. Water Flow Test at Sprinkler Riser  
 Water Supply Source: \_\_\_\_\_

	Date	City	Tank	Static Pressure	Pump
		Test Pipe Location	Size of Test Pipe		
Last Water Flow Test	11-26-22	Riser	2"	70	60
This Water Flow Test	1-25-23	Riser	2"	70	60

17. Explain any "No" answers and comments: NONE

18. Adjustments or corrections made during this inspection: NONE

19. Although these comments are not the result of an engineering review, the following desirable improvements are recommended: NONE

# NRC GENERATOR TESTING

DATE: ~~1~~-25-24 START: 1:15 PM END: 2:23 PM

1. Generator should operate at 30 minutes minimum under operating temperature.
2. Initiating transfer switch ATS5. There are (6) transfer switches at NRC. Each month rotate (1) transfer switch to the right.

Transfer Switch exercised: LS \_\_\_\_\_ EQ3 \_\_\_\_\_ CB1 \_\_\_\_\_ EQ4 \_\_\_\_\_ SB \_\_\_\_\_ LS2 \_\_\_\_\_ ATS1 ATS5

3. Time test started 1:15 PM Transfer time in seconds 8.42
4. Time transfer switch transfer back to normal power 1:20 PM
5. Total time the generator and switches were tested on emergency power 34 minutes
6. Time generator shuts down after cooling 2:23 PM
7. Did outside air and exhaust louvers open? Yes
8. AC Volts PH. A-B 480 AC Amps PH. A 306  
B-C 481 B 308  
A-C 481 C 307
9. Hertz 60.1 Oil Pressure 70 Water Temperature 169
10. Exhaust temperature (right before retransfer) 561°
11. Did outside air and exhaust louvers return to normal position? \_\_\_\_\_
12. Is there evidence of wet stacking (continuous black smoke during run)? No

Signature Rich Klunck

Load Bank Test Start Time 1:40 PM Stop Time 2:15 PM Total Time 34 Minutes

Date 2-22-2024 Start 2:23 PM End 2:25 PM

1. Generator should operate at least 30 minutes minimum under operating temperature.
2. Initiating transfer switch LS. There's (8) transfer switches at NRC. Each month rotate (1) transfer switch.

Transfer switch exercised:

LS  EQ3 \_\_\_\_\_ CB1 \_\_\_\_\_ EQ4 \_\_\_\_\_ SB \_\_\_\_\_ LS2 \_\_\_\_\_ ATS1 \_\_\_\_\_ ATS5 \_\_\_\_\_

3. Time test started 2:23 Transfer time in seconds 8.5
4. Time transfer switch transfers back to normal power 2:25 PM
5. Total time the generator and switches were tested on emergency power 35 minutes
6. Time generator shuts down after cooling 3:16 PM
7. Did outside air and exhaust louvers open? Yes
8. AC Volts PH. A-B 480 AC Amps PH. A 313

Indicator	Yes	No	NA	Comments	Corrective Action	Date Corrected
<b>Safety</b>						
Area clean, including Pt rooms. Showers/bathrooms free of mold/mildew	✓					
Area well lit/no lights out	✓					
Area free of slip/trip hazards and excess staples	✓					
Unit Restraints accounted for.	✓			Belt was on different unit		
Outlet covers are intact.	✓					
All employees are wearing ID badge in plain sight and carrying radios.	✓					
Electrical panel unobstructed	✓					
<b>Security</b>						
All doors secured	✓					
Window Integrity checked	✓					
Badge Readers are working properly	✓					
Sensitive areas are maintained secure/No unusual activity	✓			South Bathroom stalls could use better lighting or light placement		
Code Green Buttons Accessible	✓			possible cover for one by time clock in unit office		
Other Security Deficiencies		✓		Not aware of any		
<b>Hazardous Mat.</b>						
EVS utility rooms locked.	✓					
All chemicals are stored properly with appropriate labeling.	✓			would recommend better labeling than just Blue/green tape		
Only hospital approved cleaning supplies in the patient areas.	✓					
<b>Fire</b>						
Fire door/Alarms operable and not obstructed	✓			Has fire pull been tested since being relocated.		
No "daisy-chaining" of electrical items.	✓					

Due to Quality Assurance Department by the 15<sup>th</sup> of each month

Corridors and exits are clear and unobstructed. No items are hung from ceiling or impacting 8' clearance in hallways. Exit signs functioning and pointed in correct direction.	✓				
Fire extinguisher pin in place	✓				
Magnetic doors (in patient area) are latching correctly	✓		could use slight adjustment on unit door		
Electrical Panel in staff office is not blocked	✓				
No objects blocking sprinklers	✓				
All seasonal combustible decorations have been treated with fire retardant and are tagged.	✓				
<b>Facility Safety</b>					
Gates are operable and no issues with perimeter fence.	✓				
Exterior doors are locked and working properly	✓				
Exterior lights are working	✓				

**Additional Comments:**

Missing craft cabinet handle (south dayhall) Red top table laminate needs redone, grievance box a little loose on wall (North dayhall)  
 puddling still on felony warning sign along top  
 handles on toilets slight leak when pressed (North bathroom)  
 Kitchen paint peeling in food area
