LB 68 relates to the Nebraska Hospital-Medical Liability Act (NHMA). The bill proposes increasing the minimum amount of proof of financial responsibility of medical malpractice liability for all healthcare providers, effective January 1, 2024. The bill proposes a loss limit increase from \$500,000 to \$1,000,000 under the Excess Liability Fund. Furthermore, the bill would increase aggregate limits for professional liability insurance from \$1,000,000 to \$3,000,000 for physicians and nurse anesthetists. The amount of aggregate liability insurance would remain the same at \$3,000,000.

DAS:

The Department of Administrative Services (DAS) makes the assumption that the increase in cost incurred by providers would be passed along to healthcare insurance consumers thus increasing the cost of the State of Nebraska's medical plan premiums. The medical plan premiums are paid by the state at 79% and the remaining 21% are paid by state employees. Due to that the cost to the healthcare providers as proposed by this bill cannot be determined until such time the healthcare contracts are renegotiated, there is an indeterminate fiscal impact.

The allocation by fund type is based on a four-year average of health insurance premium expenditures:

Fund Type	Percentage by Fund Type
General Fund	50%
Cash Fund	25%
Federal Fund	20%
Revolving Fund	5%
Total	100%

University & State College Systems:

It is further assumed that other state agencies, such as the University and State College Systems' health insurance contracts negotiated separately from State employee contracts would also expect increases in medical plan premiums but the actual costs are indeterminable until healthcare contracts are renegotiated. It is anticipated that there would be a negative fiscal impact on general funds.

University System (UNMC):

The University of Nebraska Medical Center (UNMC) is currently contributing at the 50% maximum rate as established by the Excess Liability Fund thus the University utilized their current rate to estimate the increased cost. It is anticipated that the University of Nebraska Medical Center's premium rate would increase by 12%. The University of Nebraska estimates an increase in premiums of \$301,648 for FY24 and \$339,354 for FY25.

Department of Insurance:

The Excess Liability Fund pays the difference between the insured's policy up to the Fund limit of statutorily set Fund limits. The Department of Insurance anticipates a decrease in expenditures of \$ (4,140,000) based on the average of the amount paid per occurrence by the Excess Liability Fund over the past three years.

The Department of Insurance also anticipates an increase in premiums which would result in an increase of surcharge revenue paid to the Excess Liability Fund; however, this cost is indeterminate. However, if the revenue collected exceeds the amount necessary to maintain the Fund, the surcharge must be reduced.

There is no basis to disagree with these estimates.

Explanation of Estimate:

LB 68 is a bill for an act relating to the Nebraska Hospital-Medical Liability Act to increase limits on and change provisions relating to medical malpractice liability, to change provisions relating to proof of financial responsibility and to harmonize provisions.

It is unknown what the exact financial impact will be to providers; however, it is anticipated that the cost of insurance to such medical providers will increase, and these cost increases would be passed along and increase the cost of services being provided as a result of these changes. Any increases in service costs would impact the amount of claims paid by State's Health Plans, requiring increases in premiums.

The medical plans for the State of Nebraska are self-insured. The medical plan premiums are paid by the State of Nebraska (79%) and employees (21%).

The table below summarizes the estimated impact by fund type of any premium increase. The allocation by fund type is based on a four (4) year [2019 -2022] average of health insurance premium expenditures.

Fund Type	Percentage	
	by Fund Type	
General Fund	50%	
Cash Fund	25%	
Federal Fund	20%	
Revolving Fund	5%	
Total	100%	

Any impact to a covered provider in a Dental or Vision Plan could result in increased costs and increased premiums. The Vision and Dental plan premiums are wholly paid by State of Nebraska employees.

The State of Nebraska – Employee Wellness & Benefits does not purchase malpractice liability insurance.

There is an unknown fiscal impact for LB 68 as introduced.

TOTAL FUNDS	301,648.00	0.00	339,35	4.00	0.00	

Explanation of Estimate:

It does not appear that LB68 would change the contribution rate outlined in sections 44-2829 or 44-2825. Since UNMC is already contributing at the 50% maximum rate specified in section 44-2829, we used the same rate to develop the estimated payment to the Excess Liability Fund.

It also does not appear the proposed legislation is amending the total amount recoverable under the Nebraska Hospital-Medical Liability Act from any and all healthcare providers and the Excess Liability Fund for any occurrence resulting in any injury or death of a patient outlined in section limit 44-2825. Therefore, we used our current rate to develop the estimated payment amount to the Excess Liability Fund.

As medical liability losses in Nebraska continue to rise, without being adjusted for exposures, we used a 10-15% rate range estimate for upcoming renewals. The amounts shown are the increases over the current rates being paid at an increasing percentage of 12.5%.
