The following constitutes the reasons for this bill and the purposes which are sought to be accomplished thereby:

The Tax Cuts and Jobs Act (TCJA) temporarily eliminated the factory tax by creating the immediate cost recovery for investments in business machinery and equipment. This provision expired under federal tax law beginning Jan. 1, 2023, reverting Nebraska businesses to amortizing these costs, effectively raising taxes on critical investments needed to grow Nebraska’s economy and invest in our workforce. LB1023 will keep this provision in place. This is not a tax cut or increase as it will remain in the state tax baseline. However, it will allow for Nebraska to remain competitive for new capital investments.
