Any Fiscal Notes received from state agencies and political subdivisions are attached following the Legislative Fiscal Analyst Estimate.

LB31 would require the State Board of Education to develop a model policy relating to the use of student surveillance, monitoring, & tracking technology by school districts; & require each school board to adopt a policy consistent with the model policy.

On or before December 1, 2025, the State Board of Education will develop & distribute a model policy relating to the use by school districts of student surveillance, monitoring, & tracking technology.

At a minimum, the policy will require school districts to:

- Specifically identify & inventory the type of surveillance tools or student surveys which gather personal information considered for use or actually used in the district, including:
 - the name & contact information for each private company, vendor, or governmental entity, providing the technology
 - the cost of each surveillance, monitoring, & tracking technology tool to purchase & maintain o a description of each student surveillance, monitoring, & tracking technology tool, including a description of privacy protection measures for each tool, data collection & sharing, & usage activities
 - whether or not parents may opt their student out of being subjected to a student surveillance, monitoring, & tracking tool o if & how the data from a student surveillance monitoring, & tracking technology tool will be shared with law enforcement or implicate punitive actions under the Student Discipline Act
 - how student surveillance monitoring, & tracking technology tools ensure proper accommodations for students with disabilities or individualized education programs o how biometric or personally identifiable information is stored, shared, or sold with the private companies, vendors, or governmental entities providing the tools o clearly delineate what remedies are available to students & parents for violations of personal privacy related to the surveillance, monitoring, & tracking technology tools, including, but not limited to, under the Consumer Protection Act, the Political Subdivisions Tort Claims Act & §79-2,104
- Post the inventory & information related to surveillance, monitoring, & tracking technology tools considered for use or actually utilized by the district on the district's website & ensure the inventory & information are available in hard copy upon request

Beginning May 1, 2026, each school board will adopt a written policy to be implemented by the school district at the start of the 2026-27 school year which provides for standards & guidelines for the purchase & use of tools of mass surveillance. This policy will include procedures & provisions in conformance with the minimum standards set forth in the model policy developed by the State Board of Education & may include any other procedures & provisions that the school board deems necessary to conform with the spirit & intent of LB31.

NO FISCAL IMPACT.

Note: For purposes of this fiscal note, LFO assumes the deadline for NDE to create the model policy will be amended to a future date.

ADMINISTRATIVE SERVICES STATE BUDGET DIVISION: REVIEW OF AGENCY & POLT. SUB. RESPONSE

LB: 31	AM:	AGENCY/POLT. SUB: Department of Education
---------------	-----	--

REVIEWED BY: Kimberly Burns	DATE: 12/10/2025	PHONE: (402) 471-4171
-----------------------------	------------------	-----------------------

COMMENTS: Concur with the Department of Education's assessment of no fiscal impact to the agency from LB 31.

"	"	"	"	"

Explanation of Estimate:

There would be no cost to review and pass a new policy modeled after the NDE model policy that would be created.

There would be cost and staff hours (which comes with cost) that would be needed to carry out the policy as LB31 as currently written. I would like to draw attention item [a.iv](#) in the bill...the opt out provision. If we have cameras on entries and exit points of the buildings, this would mean that it would need to be 'turned off' when a student whose family opted out of camera surveillance entered school? Or, we would need to create and supervise a separate entrance that would not have a camera?
