GOVERNOR COCHRAN'S MESSAGE

Delivered to the Fifty-Third Session of the
Legislature of Nebraska

January 5, 1939

Mr. Chairman and Members
of the Nebraska Legislature:

In again accepting the office of Governor and in carrying out my constitutional duty in calling attention to the conditions and needs of the state, I do so with a feeling of deep responsibility, a responsibility toward supplying revenue for needed governmental services and at the same time, a responsibility for those defraying the cost of these services.

Under our state constitution, members of the legislature are elected on a non-political ballot. While there is no such provision as to the office of Governor, I assure you I shall be equally non-political, in view of which, we can approach these problems with an open mind without partisan prejudice, with but one desire and that is to do what is best for the people of Nebraska. You and I appreciate the confidence they have placed in us.

In appraising the needs of the state, we must take into account the condition of the people of the state as a whole. We must think in terms of what is best for all of Nebraska. We must think in terms of majority instead of minority interests. We must think of ability

to supply these needs. We must think of a thirty-six per cent reduction in valuation of property during the past ten years and a much greater reduction in the average income of our people. We are forced to admit we cannot maintain the standards for any of the functions of government equal to the standards of ten years ago, when the physical value of property and the total income of our people were very much above that of today. I call your attention to the fact that the value of all property for taxation purposes is \$2,033,302,482.00 today compared with \$3,167,489,300.00 in 1929. This reduction in valuation and reduction in income have made it necessary for us to reduce the costs of the long established governmental services. During the past four years the total property tax paid for governmental services in all divisions of government, including the state, county, municipality and school district, was ten per cent less as an average than during the period of four years immediately preceding. I cite this as evidence of the retrenchment that has been accomplished in the long established governmental services.

During recent years, however, we have added new governmental services. In the main these services have consisted of those activities related to relief in some form, the social security law embracing old age assistance, aid to dependent and crippled children, and to the blind. This trend toward increasing the services rendered by government extends to our local subdivisions and includes such activities as direct relief on the part of the counties and relief on the part of municipalities as well. Call it by whatever name you may, all of these activities performed by all units of government constitute in the end relief to those in distress.

A recent report of your Legislative Council discloses that almost three million dollars per month is spent by the state, local and federal governments for relief in various forms in Nebraska. This means that while we have been reducing our expenditures, for the long established governmental services, both local and state, the state has been adding new governmental services with a net result that despite these reductions, state appropriations and expenditures have increased and, of course, state taxes as a whole have increased. Note well that this increase in expenditures has come about as our capacity to pay has decreased. Does not this situation dictate to us our duty to carry out a program of at least halting any further increases in public expenditures and even accomplishing reductions wherever possible to do so? I feel sure that such a program will have the whole-hearted support of the great majority of Nebraska citizens.

Social Security

Three years ago, Nebraska adopted a social security program providing for old age assistance, aid to crippled and dependent children,

and to the blind. The first appropriation was for \$3,036,054.13 per year. The second appropriation was for \$3,750,000.00 per year. The total number on June 1st, 1936, receiving old age assistance was 20,600. The total number on June 1st, 1937, was 26,839. The total number as of June 1st, 1938, was 26,357. The total number today is 26,808.

At the time this honorable body was in session two years ago, when appropriations were made for this governmental service, the number on old age assistance was constantly increasing and it was recognized by the legislature that a closer supervision was needed to the end that the ineligible be eliminated and that those most deserving of assistance would receive more equitable benefits. As a result, the legislature directed the transfer of the administration of old age assistance and related activities to the State Board of Control with provision for the appointment of a director of Assistance by the Governor to be confirmed by the legislature. Within a very short time after the new administration of social security became effective, reductions were effected in the old age assistance rolls. Had not this closer supervision been effected, it is my opinion that more than 30,000 would be receiving old age assistance at the present time instead of 26,808. I say this because during that period, 4,808 new cases have been added to the rolls and 4,839 have been subtracted from the rolls. To a small extent the elimination of those on the rolls was due to removal from the state and some reductions were effected through death. However, large reductions were accomplished through closer scrutiny resulting in discovery and elimination of ineligible cases.

While there have been recent increases in the rolls at the rate of about 150 per month, it is felt from the experience thus far had that the upward trend can be broken and perhaps actual reductions accomplished by an extension of trained personnel selected on the basis of a merit system by which only persons of demonstrated ability and knowledge of the program may be employed on this program.

Legislation should be passed which will provide the necessary authority for the State Assistance Director to install a merit system in the Assistance Program covering both state and county personnel, retaining, however, the maximum of local control possible. I wish to advise you that such legislation will be necessary in order to insure a continuation of federal participation.

As you know, the allocation of funds for social security is now made among the various counties of the state on the basis of population. During the past two years, we have had difficulty in securing approval of this plan by the Federal Social Security Board. We have been unable to secure approval of our plan, but we have been able to receive federal funds on the promise that I recommend to this legislature that our law be corrected so as to provide that all allocations to counties

be made on the basis of need instead of on the basis of population. In passing such legislation, it is recommended that a provision be inserted stating that the Director of Assistance may use the assistance needs as shown by the records on June 1st, 1938, to determine the allotments to be made to the various counties.

House Roll No. 17 of the Special Session of 1935, which provides for old age assistance payments of \$30 per month less income, should be amended to conform with the federal law and the determination of payments on a need basis.

We see a growing tendency by which persons plan ahead for the time when they will be 65 years of age, when they feel there will be a grant for them. Some dispose of their property. In some cases, relatives who have supported indigent old people up to the time they are sixty-five years of age, refuse to do so any longer. In short, we see a tendency for the people to plan for an impoverished old age so that they can receive public assistance. We see a constantly reduced feeling of responsibility upon the part of relatives. We see an absence of thrift and an increased tendency to disregard moral and legal responsibilities toward relatives in distress.

The administration of assistance can be helped immeasurably by a proper interest on the part of our citizens generally, as well as by those in public office, by calling attention to any cases where family responsibility is being neglected or the law evaded. The carrying out of such a program will redound to greater benefits for those in actual need without other means of support, family or otherwise. I recommend the passage, by your honorable body, of legislation which will make the laws with reference to family responsibility more effective. Many of the troubles that I have described arise from a quite general misconception of our present program. What we have today is an assistance or relief program based on need, not a pension program based on inherent right.

It is felt that if first liens could be placed against property belonging to old age assistance recipients, considerable refunds would be collected and it might possibly keep some ineligible persons from applying for assistance.

Attention is called to the legislative error made at the close of the 1937 session by which one-tenth of one cent of gasoline tax, intended for social security, was in fact not appropriated for any purpose. It cannot be expended for any purpose until it has been appropriated by the legislature. It is recommended that an emergency appropriation be made by your honorable body at as early a date as possible correcting the legislative error made in 1937 and making available the proceeds from the one tenth of one cent of gasoline tax to which I

have just referred. I emphasize this matter for the reason that this appropriation will be necessary in order to make payments to the counties on January 15th. This does not contemplate any increase over the seven and one-half million dollars appropriated by the legislature of 1937 for social security, but would make available the seven and one-half million dollars as the legislature and the governor intended. Re-allocation of accumulated totals in counties where the needs are less than the present allotments also will be necessary. This will likewise require emergency legislation.

It is recommended that revenue be appropriated in order to maintain at least the present standards of old age assistance, aid to dependent and crippled children, and to the blind. As a suggestion and recommendation the following estimates may serve as a guide as to amounts and sources of revenue:

Beer and liquor taxes.....	\$1,500,000.00
Per Head Tax.....	1,000,000.00
Gas Tax from $\frac{3}{4}$ of 1c.....	1,650,000.00
Estate Tax	50,000.00
	Total.....
	\$4,200,000.00

In addition to the above, it is estimated that \$125,000.00 per year additional may be obtained in federal funds for aid to dependent children and the blind by matching same with county funds raised by levies for mother's pensions and for the blind.

The present state appropriation per year for these activities is \$3,750,000.00. It is recognized that the above sources and estimated amounts yield an amount somewhat in excess of the present three and three-quarter million of dollars expended annually. However, it is possible, if not probable, that the per head tax collections may be less than the estimated amount shown; but it is believed that legislation can be passed to make the per head tax collections more effective.

Taxation

The assessed valuation of all physical property in the state was \$3,167,489,300.00 in 1929. The assessed valuation in 1938 was \$2,033,302,482.00. This means that in order to raise the same amount of state appropriations from property taxes today, it will require 1.55 mills as compared with one mill in 1929. In other words, it requires a 55 per cent greater levy to raise the same amount of money than it did in 1929. This means that we cannot expect to maintain the same standards of governmental service, both local and state, as were main-

tained a decade ago when we were possessed of greater wealth and a correspondingly greater income.

There are two general problems to taxation: First, a wise determination of public funds to be expended; and second, provision for equalization to the end that each citizen pay his just proportion.

In 1921 the intangible tax law was passed, a measure designed to tax property in accordance with its valuation at fixed rates, very considerably below the average mill levy for the state. It is a well known fact that this law has not been effective and that millions and millions of dollars of intangible property have escaped taxation with a result that real estate and other property have had to carry a heavier burden to compensate for intangible property which has escaped taxation. The law has generally been a failure, despite the fact that the mill levy was placed low as an inducement to holders of intangible property to declare same for taxation purposes. To the end that a greater equality in taxation may be accomplished with a reduction in taxation of other property, it is recommended that legislation be passed along the following lines:

First, require all stock brokerage houses in the state to furnish a list of all common stock purchases made by their clients during the year, these to be filed in the assessor's office. This would be easier to accomplish than to demand that all national corporations furnish a list of their stockholders within the state.

Second, require state ownership certificates on all corporation bonds held by residents within the state. The national government now requires ownership certificates for income tax purposes and a similar form can be designed.

Our state inheritance tax is lower than almost any other state in the union. It is recommended that the rate of inheritance tax be raised.

For many years it has been recognized that an inequality exists in the distribution of the tax burden as between personal and real property. A report of the State Tax Commissioner for the year 1937 shows for example that there are more electric washing machines assessed in a certain county than in another county with ten times its population. This example applies likewise to other items of personal property in the same proportion.

It is recommended that a study be made to determine and enact a method to place personal property on the tax rolls on a basis of equality with real property, to the end that property of all kinds may be taxed on a more equitable basis. The facilities of the Tax Commissioner's office or any other state agency will be made available

for this study. Suggestions made with reference to taxation of intangibles and personal property are in no way to be considered as an attempt to raise more public money as a whole, but rather to obtain greater equalization among the taxpaying public.

There are two different types of legislative action which may affect the taxpayer adversely. One is increased appropriations for state purposes. The other is legislative action granting to officials of local subdivisions of the state the power to increase tax levies. It is necessary to avoid one as much as the other. At the present time it is quite natural for some people to suggest new forms of taxes as a means of relieving the taxpayer. There is, however, but one way to relieve the taxpayer and that is to spend less of public funds both as to the state and its subdivisions.

Any discussion of public finances in Nebraska would not be complete without calling attention to the two fundamental reasons for Nebraska's splendid position from the standpoint of fiscal policy.

First, constant adherence by the state to the pay-as-we-go policy with a consequent freedom from bonded indebtedness.

Second, maintenance of local self government. The great degree of local responsibility that exists has made it possible for the state to avoid new forms of taxes.

The first of these fundamental reasons springs from the state constitution. The second can be maintained by diligent watchfulness on the part of the people and their representatives.

As required by the state constitution, I shall later submit my budget of estimated expenditures necessary for the various agencies of state government.

My ideas are in harmony with the report of the Legislative Council which recommends that sufficient reductions be made in appropriations for the next biennium to absorb any delinquencies in the general fund during this biennium to the end that the state levy for the next two years may not exceed the levy for this two-year period. Legislation may be necessary to accomplish this.

State Fair

Two years ago, I recommended that the State Board of Agriculture be authorized to issue debentures for the purpose of refinancing the bonds now outstanding upon the grandstand on the state fair grounds and that the State Board of Educational Lands and Funds be authorized to invest school funds in these bonds. The legislation did not pass. The average rate of interest being received on school

fund investments at the present time is less than three per cent, but if this legislation had passed, and an investment in these bonds had been made at the rate of three per cent, \$14,720.85 would have been saved to apply on indebtedness against the grandstand during a two-year period, without impairment of our school fund.

The state fair is recognized as one of Nebraska's state institutions. Appropriations are made every two years in order to defray the cost of the fair and for the maintenance of buildings on the fair grounds; hence the taxpayers of Nebraska have a continuing financial interest in the property; they have an interest in any savings that might be effected.

It is again recommended that the legislation outlined above be passed at this session.

Elimination and Curtailment of Boards and Bureaus

New responsibilities of government, both state and national, have been responsible for the creation of new bureaus, created mainly for furnishing relief in some form. Demands for more regulation have likewise been responsible for some additions in governmental agencies. I invite your study and I pledge my cooperation to the end that we refrain from adopting any new agencies and that we abolish or curtail the activities of any bureau of government, if possible. Certainly we should halt any tendency in the direction of further increases either in the number of bureaus or in the activities of existing bureaus.

Constitutional Amendment

Nebraska has five institutions of higher learning, the State University and four State Normal Schools, the State University being administered under the Board of Regents, the Normal Schools under the Board of Education for State Normal Schools. In my judgment, there is no more excuse for two state boards of education than there is for two boards of education in any local school district. It is my opinion that the cause of education can be advanced and a saving in taxpayers' money made by having one board of education in charge of all state institutions of higher learning. It is respectfully recommended that this session of the legislature submit a constitutional amendment that the people may have an opportunity to effect this saving.

Insurance

The business of insurance is affected by a very high degree of public interest and the state has an active duty in connection with that

business for the protection of the widow and the orphan where life insurance is involved and the lawful beneficiary of any kind of insurance policy.

In the discharge of this duty the state should set up and enforce two requirements: First, every new company entering the Nebraska field should have a financial structure so adequate as to meet every foreseeable condition; second, the state through proper officers should exercise a rigid supervision over all companies and have power to control, liquidate, or rehabilitate before actual insolvency develops, and thus timely safeguard the interests of the policyholders.

Experience abundantly has demonstrated that our present requirements as to financial resources of those entering the field, whether on a mutual or stock plan, are too low. These should be increased. At least one judicial decision has interpreted our present statutes as requiring proof of insolvency before the state may take charge of a mismanaged company. This is providing for a lock after the horse is gone. I recommend such statutory changes as will enable the state to act before ruin has become an accomplished fact.

Banking

By their votes the people of Nebraska have eliminated the requirement of double liability on bank stock. This is a mandate. I recommend revision of our statutes in conformity therewith, with due care that rights accrued under the old system be not invaded.

Highways

The condition of the state and federal highway system when work now under contract is completed will be as follows:

Paving	2925 miles
Gravel	5450 miles
Earth	358 miles
Total	8733 miles

There appears to be a strong sentiment for continuing a road building program. This is reflected in many ways. Successive legislatures have passed bills providing for extension of the state highway system. These bills have had almost unanimous support. In fact, I felt it necessary to veto a bill two years ago in order to halt the extension of the state highway system, which had already been extended beyond our ability to finance with respect to construction and maintenance. It will take many years at the present rate of building to construct the

system already designated. This sentiment is reflected further by numerous delegations many of them headed by members of the legislature who have called upon the State Engineer and myself to urge construction in their respective districts. These delegations reflect the attitude of the farming and business interests of the state. Oftentimes argument made for a project is based on the fact that it will provide labor for rural areas.

The paving of the original highway system has been greatly retarded because of continual additions made by the legislature to the state highway system requiring improvement and maintenance on a constantly increasing mileage. Even moderate progress such as has been made can be maintained only in the event that the present rate of gasoline tax is continued and that an unreasonable amount not be taken therefrom for purposes other than highway use. I do not insist that the present rate of progress be continued in highway construction, but I submit that the public does insist on a rate of progress in the future at least equal to that of the past.

Available federal funds will be matched during the present biennium with the exception of approximately \$1,175,000.00. Had the program suggested two years ago been adopted by the legislature, this loss would have been avoided. This program contemplated using a small percentage of county gasoline tax funds to match federal feeder road allotments to Nebraska. In other words, failure to adopt this program in the 1937 session cost more than one million dollars to the state in federal funds during this biennium which we were unable to match otherwise.

I again recommend that provision by law be made for the counties to match federal feeder road funds, with revenue which goes to them, under existing laws, from the gasoline tax, to the end that we do not suffer another similar loss during the next biennium. This is entirely logical for the reason that the federal feeder road funds are expended generally on roads now under county supervision and county maintenance. By following this plan of having the counties match federal feeder funds from their share of the gasoline tax, the combined capacity to match federal highway funds will not be reduced even though we use one-fourth of a cent more of gasoline tax for social security.

A study of highway use is being made at the present time by the State Department of Roads and Irrigation with the idea of determining the equitable allocation of costs of highway improvement and maintenance among various classes of highway users and methods of collection. The idea behind the study is to determine who uses the roads and to determine further an equitable distribution of the cost of the

various uses. This data will be made available to the legislature and it is hoped that the legislature will make a study of it.

Highway Safety

The 1937 session of the legislature passed a law providing for a safety patrol, motor vehicle driver's license, and for mechanical inspection of motor vehicles. For the first time the upward trend of highway fatalities has been broken. The total loss of life in highway fatalities in 1937 was 322. The total loss of life for 1938 was 223. This represents a saving of 99 lives and a reduction of 31% in fatalities under 1937. In my opinion this was accomplished because of the activities of the State Safety Patrol in cooperation with local law enforcing agencies, supported by the press, radio, civic groups and the public generally. While complete statistics for the year are not now available, it is believed a proportionate reduction has been made in non-fatal accidents on the highways with attendant reductions in personal injuries and property loss.

The part of this law providing for mechanical inspection of motor vehicles has not been satisfactory. It is recommended that this provision of the act be repealed and that the function of mechanical inspection of motor vehicles be reserved to the local subdivisions of the state and left optional with them.

Labor

The unemployment compensation act passed by the 1937 session of the legislature has been in effect for a year and a half. Experience with this law, together with changes made in the federal law, necessitate certain amendments. The amendments which appear necessary have to do with the railroad unemployment insurance law, provision for merit rating of employers beginning in 1940 and provision for disposition of the \$1,300,000.00 fund collected from Nebraska employers prior to the enactment of our law.

Planning Board Report

As provided in Chapter 207, Session Laws of Nebraska, 1937, the Planning Board has submitted a report to the Governor and in accordance with said law, I am transmitting the Board's report to your honorable body. I am impressed with the great amount of work that has been performed by the members of this Board without compensation. The entire membership of the Board has been motivated by a high sense of devotion to public service.

Conclusion

I submit these recommendations and comments for your earnest consideration, recognizing our mutual desire to work together for the best interests of our state and the perpetuation of democratic government. I shall be glad to consult with you in solving the problems which confront the people of our state. I assure you that you will have my cooperation at all times.

Respectfully submitted,

REPORT OF LEGISLATIVE COUNCIL

Mr. President: I move the following report be received and placed on file as a part of the records of the Legislature:

January 5th, 1939.

To the Members of the Legislature
of the State of Nebraska:

The members of the Legislature are cordially invited to avail themselves of the research facilities of the Legislative Council. The Council was created to serve as an aid to the Legislature in the gathering of information pertaining to matters of interest to the Legislature and the State as a whole. In the furtherance of this purpose, the research department of the Council was established, and began operations January 1, 1938.

It has been the policy of the Council, during the past year, to have its research department prepare formal reports on broad subjects, such as revenues and appropriations, taxation and costs of government, public assistance, and state civil service. It is hoped that these reports will be of value to the Legislature. It is felt, however, that a more direct service can be rendered during the legislative session by having the research department prepare short factual statements upon subjects of interest to the individual members.

The members of the Council welcome the opportunity to place this service at the disposal of their colleagues in the Legislature, and hope that it will be freely used. Data can be assembled on short notice from

the existing records of the State, and from the records of other states and the National Government so far as they are available, but it is respectfully requested that allowance be made for the fact that the research staff is small, and that facilities are not available for making "audits" or investigations which require going behind the aforementioned records.

Requests for information may be submitted to the Council's office, room 1104 of the State Capitol.

The statute creating the Nebraska Legislative Council, (LB-395, 1937 Laws, 421), imposed upon the Council the following duties: (1) To collect information concerning the government and general welfare of the state. (2) To examine the effects of previously enacted statutes and recommend amendments thereto. (3) To deal with important issues of public policy and questions of state-wide interest. (4) To prepare a legislative program in the form of bills, or otherwise, as in its opinion the welfare of the state may require. (5) To investigate and study the possibilities of consolidations in state government for elimination of all unnecessary activities and of all duplication in office personnel and equipment, and of the coordination of departmental activities, or of methods of increasing efficiency and effecting economies. (6) To investigate and study the possibilities of reforming the system of local government with a view to simplifying the organization of government. (7) To study the merit system as it relates to state and local government personnel. (8) To cooperate with the administration in devising means of enforcing the law and improving the effectiveness of administrative methods. (9) To study and inquire into the financial administration of the state government and the subdivisions thereof, the problems of taxation including assessment and collection of taxes and the distribution of the tax burden.

Dear Mr. Srb:

We have just discovered that through a misunderstanding on the part of the clerk who drew the Certificate covering the report of the

State Canvassing Board, the name of Malcolm B. Wilcox was shown as having been elected a Regent of the State University for the Fifth District, whereas in fact Stanley D. Long was duly elected.

We are therefore submitting to you a corrected Certificate covering the complete list of candidates, and respectfully requesting that the Journal for the second day be corrected in conformity therewith.

Very truly yours,

BIENNIAL REPORT—Clerk of Legislature

Lincoln, Nebraska,

January 3, 1939.

To the President and Members
of the Nebraska Legislature.

Gentlemen:

I submit herewith a report of the expenditures for the 1937 session of the Nebraska Legislature, including the expense of the office of the Clerk of the Legislature during the interim.

While I do not wish to detail duties performed during the interim, I do wish to mention some of the more important matters which have received attention by our office.

At the close of the session the journal clerk and a proofreader from the engrossing room were retained to assist in the Clerk's office, in addition to the custodian provided for by the Legislature. Due to ill health of Mr. Bradley, the custodian, a part time assistant was employed and after the death of the custodian the assistant took over the duties of that office.

To compile the Session Laws it was necessary to arrange the acts consistent with the Compiled Statutes, prepare "running titles," check each law and list the sections of the Statutes, Supplement or Session Laws that had been affected by the legislation passed in the last session, and prepare the general index in conformity with the index of the Compiled Statutes. This necessarily entailed much proofreading and checking, and was completed in October. The Session Laws consisted of 856 pages, with 30 pages additional covering the numerous indices.

The Legislative Journal was proofed for the permanent volume and indexed. In addition to the general index, it contains a chronology of all bills introduced, showing the date and page of the Journal for the progress and disposition of each bill introduced.

During the summer of 1937 the Clerk supervised the cleaning of both legislative chambers, including demothing the rugs and draperies therein and renovating the walls in the rooms occupied by the Legislative Reference Bureau.

The Clerk of the Legislature was also appointed Temporary Director of Research at the organization meeting of the Legislative Council

and in addition to general office work, prepared and presented reports to the Legislative Council in December, 1937.

At the December meeting of the Legislative Council that body requested the Clerk to prepare a report, in conjunction with the Nebraska State Bar Association, concerning obsolete and conflicting provisions of the Nebraska Statutes. All county attorneys, county judges and state officers were contacted by letter in this survey and suggestions were received involving several hundred sections of the statutes. This material was checked and classified under the headings of obsolete provisions, conflicting provisions, suggestions involving a change of policy, and a detailed list concerning legislation on public welfare. Under the direction of the Legislative Council this material will be turned over to the Chairman of the Judiciary Committee of the Legislature.

The Clerk has been charged with the supervision of the Legislative chambers, cloak rooms and office rooms and with the care and custody of the legislative furniture. During the interim the different rooms have been used for various meetings of state departments for public lettings, public examinations, committee meetings and the like, and several hundred scheduled meetings have been held in the various rooms, in addition to many meetings not scheduled. Some of the legislative furniture has been used by various state departments and has been assembled, immediately previous to the session, in the legislative rooms.

In addition to the above, the Clerk has conducted the general office business and taken care of the inquiries for Legislative bills and other legislative information, retaining but one office secretary since the completion of the Permanent Journal and Session Laws.

We have attempted, in so far as possible, to carry out the wishes of the Legislature as expressed in L. B. 559 and such additional duties as we thought proper.

Respectfully submitted,

(Signed) Hugo F. Srb

Clerk of the Legislature.

SELECT COMMITTEE REPORTS

Election Contest

IN THE MATTER OF THE
ELECTION CONTEST FOR
THE SEAT IN THE FIFTH
LEGISLATIVE DISTRICT } Report of Special Committee.

Now on this 19th day of January, 1939, this matter came up for hearing before the special Committee appointed by the Lieutenant Governor to determine whether sufficient grounds exist for the Legislature to hold an extended hearing on the election contest for the seat in the Fifth Legislative District of the State of Nebraska.

All members of the Committee were present.

The Contestant, Dr. Harry Foster, appeared in person and by his attorney, Ralph Moseley. The Contestee, John Adams, Jr., appeared in person only.

Statements and evidence were taken from the Contestant and the Contestee, and from Anton Tusa, Election Commissioner of Douglas County, Nebraska, and O. M. Olsen, Deputy Election Commissioner of Douglas County Nebraska, both of whom appeared at the request of the Committee.

The Committee being fully advised in the premises and from the evidence submitted and the statements made do find and recommend to the Legislature that there is not sufficient evidence to warrant the Legislature to hold an extended hearing on the contest for the seat in the Fifth Legislative District.

The report was adopted.

LEGISLATIVE RESOLUTION NO. 2

A Memorial Resolution

To the Second Unicameral Legislature of Nebraska (1939)

For the Erection of a General John J. Pershing Memorial

Presented by Editor F. A. Scherzinger of The Nelson Gazette, of Nelson, Nebraska.

Introduced by request by Senator Daniel Garber, 32nd District.

WHEREAS: When the United States entered the World War and General John J. Pershing of Lincoln, Nebraska, was placed in command of the American forces it was the first time in history that a United States Commander led American troops on European soil. Sailing in May, 1917, at the head of 180 men, he returned in 1918 with our forces numbering 2,000,000, who followed his leadership which was in wisdom of organization matchless, in daring marvelous, in execution firm. In War Council he became the outstanding General of the allied forces.

WHEREAS: As a people we are proud of the records of American history. Throughout the world we find statues erected in honor of our outstanding soldiers and statesmen. Nebraska now claims one of the Nation's most distinguished living citizens who is known and honored the world over. Since our Commonwealth was admitted into the Union and the Star of Nebraska was given a place in the blue field of Old Glory, never has there been a Nebraskan who deserves greater credit and honor than General John J. Pershing, as soldier and statesman.

WHEREAS: This recognition has been proposed by The Nelson Gazette, a weekly newspaper of Nuckolls county, and been publicly indorsed by many men and women of distinction throughout Nebraska;

Therefore Be It Resolved. That this Legislature honor this distinguished citizen, John J. Pershing, while living, by authorizing the erection of a suitable memorial on the Capitol Grounds in Lincoln, Nebraska.

Be It Further Resolved: That this Legislature name a Board of Commissioners, consisting of one from each Congressional District of the State of Nebraska, and one at large for the State, who shall be Chairman; also three Ex-officio Members. Said Board of Commissioners to name such other officers and committees as are deemed necessary by it, to carry on this Project to a successful completion.

It is Further Resolved: That no appropriation is asked or sought from this Legislature. The Spirit of this Statue is to live in the hearts of our million and a half citizens of Nebraska, and particularly our 500,000 school children. Their voluntary contributions shall become the nucleus of the funds to finance this project, and every one should be given opportunity to contribute. It is our purpose to instill into the minds of both old and young the fact that it is a privilege to participate and cooperate in this movement to honor this grand and noble citizen of our State and nation, and to show our appreciation for all who went to foreign shores to do battle for Right, Peaceful Living, and Democratic Government.

**MOTION—To Appoint Committee to Escort the Governor

Mr. President: I move that the Chair appoint a committee of five to call upon the Governor and to escort him before the Legislature to deliver his budget message. (Signed) Ashmore.

The motion prevailed and the President appointed the following members to serve on said committee:

Brodecky, Chairman	
Ashmore	Johnston
Garber	Herrick

The committee retired and subsequently returned with the Governor.

Letter of Transmittal

Honorable R. L. Cochran, Governor,
State of Nebraska,
Lincoln, Nebraska.

Dear Governor:

I am submitting herewith tabulations carrying your budget recommendations for the biennial period beginning July 1, 1939, and ending June 30, 1941. The tabulation also carries the appropriations made for the present (1937-9) biennial period, and the expenditures therefrom for the first fiscal year.

Respectfully submitted,

Wm. H. Smith,
State Tax Commissioner
and Budget Director.

BUDGET MESSAGE

OF

R. L. COCHRAN, GOVERNOR

**Delivered to the Fifty-third Session of the Legislature
of Nebraska, January 23, 1939.**

To the Members of the Fifty-third Session of the
Legislature of Nebraska:

In accordance with the constitution, I am transmitting herewith my budget recommendations to your honorable body. My approach to the problem of preparing this budget is best explained, I believe, by quotation from my inaugural message from which I read as follows: "The assessed valuation of all physical property in the state was \$3,167,489,300.00 in 1929. The assessed valuation in 1938 was \$2,033,302,482.00. This means that in order to raise the same amount of state appropriations from property taxes today, it will require 1.55 mills as compared with one mill in 1929. In other words, it requires a 55 per cent greater levy to raise the same amount of money than it did in 1929. This means that we cannot expect to maintain

the same standards of governmental service, both local and state, as were maintained a decade ago when we were possessed of greater wealth and a correspondingly greater income . . . My ideas are in harmony with the report of the Legislative Council which recommends that sufficient reductions be made in appropriations for the next biennium to absorb any delinquencies in the general fund during this biennium to the end that the state levy for the next two years may not exceed the levy for this two-year period."

I need not tell you that in preparing a budget in harmony with this sentiment expressed by both legislative and executive agencies it was necessary to depart somewhat from the usual methods of budget making based largely on demonstrated needs. It was found necessary to apply arbitrary reduction after the budget had been prepared based on minimum needs of the various expending agencies included in the budget.

The following items explain the procedure followed, after consultation with the Chairman of your Appropriations Committee and the Chairman of your Legislative Council:

Total appropriation for the biennium 1937-39 from property tax sources exclusive of emergency appropriations	\$12,373,837.99
First budget arrived at following hearings with expending agencies	11,932,163.20*
Reduction 1939 under 1937.....	\$ 441,674.79

It was estimated that this reduction was not sufficient to absorb the estimated deficiency in the general fund (due to delinquencies in tax payments) during the present biennium, allow for the same degree of delinquency during the next biennium and still prevent the levy for the next two years from exceeding that for 1938.

It was estimated that in order to carry out the recommendations of your Legislative Council and your Governor, a further flat reduction of six per cent was necessary (except in a comparatively few cases where statutory requirements made it impossible). By applying this percentage, with the exceptions as noted, to the first budget total arrived at, \$11,932,163.20, it was reduced in the amount of \$655,081.03 to \$11,277,082.17.

Wherever possible I have further reduced departmental budgets by an amount equivalent to the anticipated unexpended balance in these appropriations on July 1, 1939. These anticipated balances

* NOTE: Does not include appropriations for legislative council, legislative reference bureau or secretary of the senate, as explained elsewhere in this message.

were arrived at by determining the rate of expenditures for the first eighteen months of the present biennium, and assuming that expenditures for the remainder of this biennium would not exceed this rate.

The final total of property tax fund appropriations recommended herein includes certain new items not reflected by the first total at which I arrived following the budget hearings.

The following is a comparison of property tax fund appropriations for the 1937-39 biennium and recommended property tax fund appropriations for the 1939-41 biennium:

Total tax fund appropriations, 1937-39.....	\$12,373,837.99
Total budget recommendations for tax fund appropriations, 1939-41	\$11,158,170.82
<hr/>	
Total recommended reduction in property tax fund appropriations for 1939-41 biennium under 1937-39 appropriations	\$ 1,215,667.17
Total federal, cash and other funds appropriated 1937-39	\$42,839,983.81
Total federal, cash and other funds recommended in this budget (including revenue from county insane tax levy, estimated \$940,526.26).....	\$40,473,079.68
<hr/>	
Recommended reduction in cash and federal fund appropriations for 1939-41 biennium under 1937-39 appropriations	\$ 2,366,904.13

Following is a comparison of the grand total of appropriations from all sources for the 1937-39 biennium with the grand total of recommended appropriations from all sources for the 1939-41 biennium:

Grand Total 1937-39.....	\$55,213,821.80
Grand Total 1939-41.....	\$51,631,250.50
<hr/>	
Grand Total Reduction.....	\$ 3,582,571.30

It should be pointed out here that the grand total of appropriations for the current biennium as shown above does not include emergency appropriations.

Wherever practical in the interest of economy as well as in the interest of equality between departments and bureaus, we expect to apply the same policy, relative to reductions, to departments and bureaus maintained by cash funds as in the case of those agencies maintained with property tax funds. The computations made here

and the results referred to are based on the assumption that present assessed property valuations will be maintained. At this juncture I again call attention to the necessity for legislation making more effective the intangible tax law and as a result affording relief to other classes of property; also to the necessity for greater equalization by improving the administration of personal property assessments.

Charitable and Penal Institutions

Explanatory of the lump sum item of \$250,000.00 recommended for repairs, remodeling, equipment, furnishings, and replacements, it is estimated that \$140,000.00 will be required to furnish and equip new buildings, now completed or under construction, at Beatrice, Kearney, Lincoln, Hastings, and Norfolk. These very much needed buildings were made possible first, because of a very wise provision enacted by the 1937 legislature whereby the Board of Control was given a lump sum appropriation without specific earmarking; second, able administration of this fund by the Board of Control; third, because of the joint efforts of the board and the Governor in obtaining a 45 per cent public works administration allotment at a time when PWA funds were almost depleted, and when we were advised that Nebraska's share of PWA funds had been allotted. This made possible a million dollar program accomplished with little more than a half million dollars of state appropriations.

It is obvious that in order to use these buildings an appropriation of \$140,000.00 for furnishing them in the next biennium is imperative.

I am including an item of \$50,000.00 for the purpose of remodeling buildings and installing fire escapes at the two Milford Institutions in order to prepare them for use by senile mental patients. Here again is presented an opportunity to accommodate the large number of mental patients who are awaiting admittance to state hospitals. This appropriation, together with consolidation at Grand Island of the two Soldiers' and Sailors' Homes will be the means of providing better care and treatment for mental patients now held in counties, and at less cost to the taxpayers.

I call your attention to the fact that after consolidation of the Milford and Grand Island Soldiers' Homes at Grand Island that institution will have room for over 200 more members than the present combined population of the two institutions at the present time. In other words the consolidation of the Milford and the Grand Island institutions can be effected and will fill the Grand Island institution to only slightly more than 50 per cent of its capacity

In the case of the other Milford Institution, the Woman's Industrial Home, the board of control and the state planning board recommend, and I concur, that this institution be discontinued as a state

maternity home, and be operated in conjunction with the Soldiers' and Sailors' Home at Milford as a hospital for senile cases from the state insane hospitals. I make this recommendation because of the fact the population of the Woman's Industrial Home is so small that the per capita cost of operation is much higher than the cost of the same service rendered in private hospitals. It is agreed that the care of such cases can and should be handled by the counties in private hospitals at much less cost to the taxpayers.

Nebraska's state penitentiary has been singularly free of outbreaks. This has been due to the alertness of the officials rather than to physical characteristics of the plant. I am advised on good authority that similar institutions in many states are protected with fences surrounding the entrances and all approaches. Indeed we have such provision at both the state reformatory for men at Lincoln and the Women's Reformatory at York. Under present conditions at the Penitentiary there is equal if not greater danger from without than from within. It is estimated that it will cost \$45,000.00 to relocate the highway in front of the Penitentiary, to build and illuminate a fence, and to construct a small building at the entrance to serve as a waiting room. This is urgently recommended as a security measure. (Plans for this proposed improvement can be seen at the office of the Board of Control).

An additional \$15,000.00 is recommended for work inside the Penitentiary including removal of transformers to the outside and the installation of steam tunnels. Removal of the transformers is likewise a security measure.

I urge that the item of \$250,000.00 recommended for the foregoing purposes be appropriated to the Board of Control in a lump sum for the reason that should PWA funds or other federal allotments be made available at a time when the legislature is not in session, the Board may take advantage of such funds and carry on much needed construction and in this way obtain the greatest returns possible during the next biennium as was done during the present biennium.

Education

As I have stated many times, I believe that one of the most important obligations of society is education of our youth. We should have as good educational institutions as we can afford; as good elementary and high school facilities as the respective school districts of the state can afford and as good institutions for higher education as the state can afford. Two years ago, a State Planning Board was created by the legislature. The Board's report is before you and contains its recommendations for a ten-year building program for

the state's higher educational institutions and charitable and penal institutions. May I quote from the report submitted by the Normal Board sub-committee of the State Planning Board:

"Whereas, your Normal Board Committee, in its study of the building requirements of the colleges under the control of the Board of Education for State Normal Schools, has found that the problem of laying out a recommended 10-year building program is complicated by the question of future educational programs and proper future functions of these colleges that it would materially effect their building needs; and

"Whereas, Studies already made indicate overlapping of activities of various educational institutions of the state and, in the opinion of the Normal Board Committee, call for a thorough study of the present educational needs and educational program of the State in order that a definite future program may be established which will serve as the factual basis upon which the future requirements of the various educational institutions may be anticipated.

"Therefore, The Normal Board Committee recommends that the Board of Regents of the University of Nebraska, the Board of Education for the state normal schools, and State Superintendent of Public Instruction, be invited to join with the Planning Board in a petition to the United States Office of Education for a survey of the Educational Program now being conducted in Nebraska and for recommendations for a sound future unified program in order that the Planning Board may thus be furnished with the basic data which this committee considers essential to the adoption of a sound building program."

This recommendation was adopted. At a meeting held since then the state university, represented by the Chancellor and the President of the Board of Regents; the state normal schools, represented by the Presidents of all four normal schools, and the Chairman of the normal school board who was represented by the comptroller of the normal board; the director of vocational education; the State Superintendent of Public Instruction and a representative of the U. S. Department of Education all have pledged cooperation in carrying out such recommended educational studies.

In connection with education, I have not recommended any appropriation for adult education under the State Superintendent. I have recommended a small increase in the appropriation for the State Library Commission with the thought that the most efficient way in which to give educational advantages to adults is by making books available to those who desire them.

Relative to the operation of the normal schools, I wish to quote further from the report of the State Planning Board as follows:

"The Planning Board has found that the revenue from the rentals collected from the students living in the dormitories at the State Teachers Colleges is applied to the amortization of the bonds sold to finance the dormitories and is not applied to the maintenance and operation of the dormitories. This means that in following this policy, when the construction of a new dormitory is authorized, state funds are, in effect, obligated to operate and maintain these dormitories. The Planning Board also found that all expenses incurred in operating and maintaining the dormitories at the University of Nebraska are met from the rentals from the dormitories. The Planning Board believes that the policy of the University of Nebraska in this matter is the correct one and that the requirements of existing statutes are met in so doing.

"A heating expert, employed by the Planning Board to study the needs of the Normal Schools, has recommended that boilers are needed at several Normal Schools. A study of his report clearly shows that the need for additional boiler capacity is required because of the heavy heating load requirements of the dormitories and in certain cases, the need for a new boiler is definitely shown to be the result of the increased heating requirements resulting from the construction of the dormitories under the current PWA programs.

"The Planning Board therefore recommends that no appropriation be made for new boilers and that the cost of any additional heating requirements caused by the construction of dormitories be met from the revenue of the dormitories. . . . It is recommended that a certain sum be designated for maintenance of buildings in the general fund appropriation for each school and that accounting be made of such expenditures on each building, on each campus. This maintenance cost item should include all costs of maintaining a building in good condition other than the cost of light, heat, janitors' wages and major replacements. Specific amounts are recommended for each college under the discussion of each college.

"This recommendation should not be interpreted as necessarily recommending an increase in the general fund appropriation for these schools. Certain portions of past general fund appropriations have no doubt been intended for repairs and maintenance and the Planning Board recommends that certain portions of the general appropriation be specifically designated for maintenance."

It appears that the policy followed by the normal schools with reference to dormitories is outside of the spirit if not the letter of the law. I most heartily concur in the recommendations of the Planning Board. I also concur in the recommendations of the Planning

Board where they state: "The Board recommends that a uniform accounting system be set up by each agency to show in the necessary detail the cost of operation and maintenance of buildings and operating equipment. Such a system would permit each institution to benefit from the experience of others and would provide subsequent legislatures with definite information as to actual cost of building maintenance and operation."

With reference to higher education generally, I renew my recommendations relative to submission of a constitutional amendment for the purpose of consolidating all of the state's institutions of higher education under one board of education.

Board of Educational Lands and Funds

The people of the state by their votes eliminated the office of Commissioner of Public Lands and Buildings. Your attention is called to the fact that the budget shows a saving of the salaries of the commissioner and a deputy, totaling \$15,280.00.

State Treasurer

I call your attention to the provision for a semi-annual audit of the office of the State Treasurer. This item is considered of equal importance to the provision for the State Treasurer's bond.

Planning Board

I have discussed some of the activities of the State Planning Board under the subject of education. I recommend that the tuberculosis survey be continued in co-operation with the state Department of Health, both in the interest of humanity and in the interest of economy. Experience thus far had with this survey shows that it will save the state money. It costs the state approximately \$500.00 per year per patient to care for and to treat each tuberculous patient at the Kearney Institution. Early diagnosis and discovery of tuberculosis will reduce the number to be hospitalized. Such a program likewise will reduce the spread of this disease. The benefits of a tuberculosis survey will be reflected in smaller appropriations for the State Tuberculosis Hospital in the future. I sincerely believe it is an expenditure of money to save money. I wish our economic conditions warranted making even greater progress in this important work.

Law Enforcement

I am recommending a slight increase in the appropriation for the State Sheriff's office for the purpose of providing a bulletin to

be sent to all law enforcement agencies, which should result in greater efficiency on the part of all such agencies.

While I am not recommending a change in our present system of law enforcement, which is carried on mainly by local officials, I do recommend that, in the interest of a better understanding, you give a hearing to any of those who believe that in an emergency the Governor should be all powerful in directing local law enforcing agencies.

Legislative Reference Bureau and Other Legislative Agencies

While I am reluctant to suggest anything affecting agencies related to the operation of the legislature, I do find it necessary in connection with my budget recommendations to call attention to the fact that there are three separate and distinct continuing legislative agencies provided by law, the Secretary of the Senate, the Legislative Council, and the Legislative Reference Bureau. It would appear that there should be a consolidation of these agencies.

Social Security

Your attention is called to the fact that the revenue from three-fourths of a cent of gasoline tax, all beer and liquor taxes, estate taxes, and the per capita tax as now collected (approximately 60% of the head tax now being collected) will produce revenue in the amount of three million seven hundred and fifty thousand dollars (\$3,750,000.00) of state funds per year. This would be equivalent to the state appropriations for the present biennium. I feel that we should devise a way to make head tax collections more effective and complete than at present. By doing so the anticipated revenue for social security might be increased by several hundred thousand dollars. In this way we should be able not only to maintain present assistance payments, but also to have a surplus with which to meet contingencies, such as increases in the number of those on the assistance rolls or to meet other conditions which might arise during a two-year period.

Highways

The status of highway improvements when work now under contract is completed will be as follows:

Paving	2,925 miles
Gravel	5,450 "
Earth	358 "
<hr style="width: 10%; margin: 0 auto;"/>	
Total	8,733 miles

Each year has seen the highway system expanded and new routes taken over for maintenance by the state. It is interesting and satisfying that despite this greatly increased mileage maintained, the total cost of highway maintenance has been kept at approximately the same level for the past five years. This has been the result of economies effected, new methods developed, together with the judicious use of higher type surfaces where traffic conditions and other factors make the cost of maintenance excessive. There is no other state activity where expansion and increased building have not resulted in increased maintenance cost.

Both as to construction and maintenance of highways Nebraska continues to get more for its tax dollar than any other state. This was confirmed by a visiting highway engineer from a foreign country sent to the United States by his government and referred to Nebraska by the U. S. Bureau of Public Roads to study our methods. I quote from comments by R. A. Farquharson, Staff Writer with the Toronto Financial Post, who had previously visited Nebraska: "Motoring through other states enroute to Nebraska, where I went to find out how that state does it, and see if there were lessons we could learn in Canada, I was told many times: 'Sure they have no debt, but have they anything else?'"

"If there is a catch I failed to find it. Statistics do not show it. The truth is that Nebraska is not a wealthy state and Nebraskans know it. It does not undertake services it cannot afford. Having no debt, it can control its expenses. When depression comes or drought dries up the taxpayers' sources of income, state expenses are slashed.

"But what about the roads? One of the first persons I met in the strikingly beautiful capitol building at Lincoln was Senor Podesta of the Argentine Highways Department, who has settled down for the summer to make a complete study of the Nebraska road building system.

"They get more roads for less money than any other state in the two Americas, he told me. Nebraska has 8,000 miles of surfaced roads in a one hundred and eleven million dollar state highway system. Its black top roads are built at a cost of \$4,000.00 a mile on a gravel base.

"Senor Podesta was only one of a number of foreign visitors. Engineers have come from South Africa, Australia, Brazil, Cuba to study the economy of Nebraska's road building. The roads are not meant for heavy traffic, such as between Toronto and Niagara Falls.

Traffic of three thousand cars a day would be the Nebraska peak. And economies in maintenance have been developed to keep pace with new construction.

"Having no debt, paying for the roads out of income as they are built, has kept Nebraska free from expensive splurges of road building."

As a state concerned with economy in government, we are desirous of matching federal highway allotments to Nebraska with a minimum of state taxation. With this thought in mind, I recommend that an amount be set aside before allocation of the gasoline tax is made to the counties for the purpose of matching federal funds for local feeder roads. Under the present authorization of federal feeder road funds for the next biennium, Nebraska's share of these funds will be approximately \$308,000.00 per year. While it will not require a full one-quarter cent of gasoline tax to match these funds, I recommend that as much as is necessary be set aside, having in mind that it is necessary not only to match them, but also to provide for right of way and other incidental costs in which the federal government will not participate. Under such a program we will have the maximum capacity to match federal funds for highways and social security without any increase in state funds.

It is a sound policy to match the federal feeder road funds with a portion of the counties' share of the gasoline tax because the improvements are generally made on roads now under county control and county maintenance. It probably will take no more than thirteen per cent of the counties' share to accomplish this.

Speaking of a highway program generally, any curtailment in the program at this time will work to the disadvantage of those sections of the state where the highways have not been brought to a final standard of construction. These sections have contributed to the building of highways in other portions of the state. To deny funds now to those sections in which highway improvements have not been made, creates a gross inequality in taxation. In preparing the budget for the Department of Roads and Irrigation, I assumed that the present rate of gasoline tax will be continued and that three-fourths of a cent of gasoline tax will be used for social security as recommended in my inaugural message.

Conclusion

In conclusion there are a number of important appropriation items which I have not discussed in this message due to the fact that I consider the figures self-explanatory. I assure the legislature and

your finance committee that I desire to work with you in providing for our institutions and agencies in the most intelligent manner possible, consistent with the ability of our people to pay.

Respectfully submitted,

(Signed) R. L. Cochran, Governor.

With his message the Governor submitted tabulations carrying his budget recommendations and two official budget bills, one to provide for the payment of the salaries of the officers of the Nebraska State Government, and one making appropriations for the state government, for the biennium ending June 30, 1941.

LEGISLATIVE RESOLUTION NO. 3

Memorializing the Committee on Ways and Means of The House of Representatives of the United States

to

Carefully Consider (and Promptly Report Out of the Said Committee) "The General Welfare Act of 1939" H. R. 2, 76th Congress, 1st Session.

Introduced by Jay Hastings, A. M. Johnston, Daniel Garber, Sam Klaver, F. A. Mueller, John Adams, Jr., George I. Craven, Wm. J. Norman, James E. Reed, Lester L. Dunn, Charles R. Herrick.

Preamble

WHEREAS, the general welfare of the United States must be provided for and promoted by supplying to the American people generally a more liberal distribution and increase of purchasing power by some means to be devised and practiced by the country as a whole, and

WHEREAS, the plan devised and put in operation should be national in scope to accomplish and attain the end sought, and

WHEREAS, a considerable number of the citizens and taxpayers of the State of Nebraska have an abiding conviction that the increase in the purchasing power of the mass of the people making up the United States of America can be realized under a national economic policy enacted into Federal statutes whereby citizens of the United States upon attaining the age of sixty years should retire from gainful employment, thereby stabilizing gainful employment for other citizens, stimulating agricultural and industrial production and general business, and alleviating the hazards and insecurity of old age and unemployment, through a system of retirement annuities to be spent each month as received for commodities and services furnished and sold by citizens of the United States, and

WHEREAS, H. R. 2, 76th Congress of the United States, now referred to the Ways and Means Committee of the House of Representatives of said Congress embodies the plan hereinbefore set forth in this preamble and is worthy of consideration, merits discussion and debate by both the lower and upper bodies of the Congress, NOW THEREFORE BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF NEBRASKA IN FIFTY-THIRD REGULAR SESSION ASSEMBLED:

1. That this Legislature respectfully petitions, memorializes and urges the Committee on Ways and Means, House of Representatives of the United States, carefully to consider in all its phases (and then immediately to report out of said committee) H. R. 2, 76th Congress, 1st Session, commonly known as "The General Welfare Act of 1939" and that said bill be placed before the House of Representatives of the United States for action by the members thereof without further delay.

2. That the Clerk of this Legislature is hereby ordered and directed forthwith to forward a copy of this resolution, properly authenticated and suitably engrossed, to the chairman, Committee on Ways and Means, House of Representatives, Washington, D. C.; to the President of the United States, to the Vice President of the United States as presiding officer of the United States Senate; to the Speaker of the House of Representatives of the United States; and to each of the United States Senators and Congressmen representing the State of Nebraska in the Congress, to the end that representatives in the government and the Congress of the United States may be advised of the sincere desire on the part of this Legislature that said H. R. 2 be given full and complete consideration and a fair hearing and discussion upon its merits at the present session of the Congress.

Under the rules the resolution was laid over one day.

LEGISLATIVE RESOLUTION NO. 4

WHEREAS, the appropriation of the Nebraska Legislative Reference Bureau for salaries, wages and maintenance for the present biennium was \$12,500.00 (see Laws of Nebraska, 1937, page 770), which amount was \$4,000.00 less than the amounts appropriated during bienniums ending June 30, 1931, June 30, 1933, June 30, 1935 and June 30, 1937, respectively, and

WHEREAS, Bureau funds available for service to this session of the Legislature will be exhausted on January 27, 1939 and must be replenished, and

WHEREAS, the Bureau conservatively estimates that it will require but one-half of the amount allotted to it during previous sessions, in view of the employment of enrollment and review counsel for bill review, to meet the demands of this Legislature with accuracy, efficiency and dispatch, NOW THEREFORE

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF NEBRASKA IN FIFTY-THIRD REGULAR SESSION ASSEMBLED:

1. That it is the sense of this Legislature that the Nebraska Legislative Reference Bureau continue to perform the regular services which the law enjoins upon it to perform (See Article 4, Chapter 50, Compiled Statutes of Nebraska, 1929) together with additional services for this Legislature as set forth in the preamble hereof.

MESSAGE FROM THE GOVERNOR

Concerning Budget Message

January 25th, 1939.

To the Members of the Fifty-Third Session of
the Nebraska Legislature

Gentlemen:

My attention has been called to the fact that there was some misunderstanding in my Budget Message with reference to the intent of applying a six percent cut to state cash funds. The figures set out in my Budget were intended to be the maximum which the departments would be permitted to spend during the coming biennium. So far as the federal grant funds were concerned, the six percent reduction could not apply. It is my desire, and no doubt yours, to obtain the maximum of federal allotments available. That money should be used.

Respectfully submitted,

(Signed) R. L. Cochran, Governor.

OPINION—Office of Attorney General

January 25, 1939

Honorable Ernest A. Adams
Building

Dear Sir:

You ask for an opinion as to whether different claims against the state, which have been presented to the claims committee for action, can be joined in one appropriation bill instead of being presented in different bills.

I am of the opinion that they may be consolidated in one bill if the legislature chooses to handle the matter in that way.

Of course, it would be entirely regular and proper to have each claim presented as the subject of a separate bill.

Respectfully submitted,

Walter R. Johnson, Attorney General.

(Signed) By George W. Ayres, Assistant Attorney General.

MESSAGE FROM THE GOVERNOR**Council of State Governments**

January 26th, 1939.

To the Members of the Fifty-Third Session
of the Nebraska Legislature

Gentlemen:

As the representative of the legislative and executive branches of our state government in attendance at the Fourth General Assembly of the Council of State Governments, of which Nebraska is a member, I desire to submit the following report:

The general theme of the Assembly and the subject that was most emphasized was state trade barriers and their adverse effect upon interstate commerce. Throughout all of the numerous discussions of this subject during the Assembly, the growing tendency to erect barriers against interstate commerce was reflected. It was pointed out that one of the major objectives of the federal department of state has been the removal of trade barriers between nations, and yet while that program has been going on between nations, as states we have gone in the opposite direction, creating trade barriers between states equally adverse to the free movement of commerce. It is pointed out that, heretofore, the absence of trade barriers in the United States was responsible to a considerable extent for our prosperity and development. There were forty-three states represented at the Assembly and it is my belief that these representatives returned to their legislative bodies, practically all of which are now in session, imbued with the conviction that certainly no additional barriers should be set up by legislative or administrative acts and that present trade barriers, wherever they exist, should be removed.

While the principal examples of trade barriers cited were cases of one state imposing a tax against the products of another state, a second important phase was the existing inequality of transportation rates. Cases were cited where truck transportation laws of one state impose hardship and restraint on commercial truck operators of other states. It was likewise pointed out that discriminatory railroad freight rates as between sections of the country also were restricting free interchange of commerce and of opportunities for industrial development. The sections adversely effected are the south, the southwest, and the middle western states.

A resolution condemning trade barriers was adopted by the Conference. It included a request to Congress to make a study of discriminatory freight rates as between sections, with a view to effecting correction of such discriminatory conditions. A large group of members of Congress representing these sections already have formed an organization in an attempt to correct these inequalities. Congressman McLaughlin of Nebraska is one of the leaders of this movement. Their efforts can be greatly aided by cooperation from the people and the legislatures of the states which they represent. I call this to your attention at this time for any action that you may desire to take.

Nebraska produces an abundance of raw materials. We have an abundance of power and of intelligent labor and widespread transportation facilities. The state is so located geographically that with these advantages, Nebraska should be developing industrially. We have a big stake in a successful solution of these problems.

The subject of conflicting taxation between levels of government was likewise discussed. It was pointed out that in some states, federal methods of taxing had been adopted by the states to such an extent that the duplication created a grave condition from the standpoint of the taxpayer. Nebraska is one of few states which has not invaded the federal field of taxation.

Other subjects discussed were those which had to do with cooperation between the states and the national government, some of the subjects being wage and hour legislation, agricultural program, also state planning and the cooperation of state planning boards with the national resources board.

I feel that the Assembly was of great value. I noted a growing interest on the part of all of the states to take part in this important movement to the end that the sovereign states may remain sovereign, and that problems which can be solved by the states be not turned over to the federal government for solution.

The complete report of the Assembly will be made available to you within a short time. Because of a regard for your time, I have merely touched upon the high spots of the Assembly. I shall welcome the opportunity to give you any additional information you might desire pending the time the complete report is made available to you.

Respectfully submitted,

(Signed) R. L. Cochran,
Governor.

For Investigation and Examination of Department of Insurance**Preamble**

WHEREAS, this Legislature has no concrete evidence before it as to the precise condition of the Department of Insurance of the State of Nebraska, and

WHEREAS, precise information concerning the past administration of said Department of Insurance is necessary, if this Legislature shall intelligently pass upon bills now before it for consideration or bills requested for presentation to this Legislature all touching the field of insurance, and

WHEREAS, many conflicting statements have been made with respect to the administration of the affairs of said Department of Insurance, and

WHEREAS, in fairness to those public officials and public employees connected with said Department of Insurance and of the citizens and taxpayers of the State of Nebraska, there should be an official finding of the facts by the Legislature at this time concerning the conduct and administration of said Department, NOW THEREFORE

Reappropriation of Unexpended Balances.

Lincoln, February 1, 1939.

Honorable Frank Brady, Senator,
Chairman Appropriations Committee,
Unicameral Legislature,
Building.

Dear Senator Brady:

With reference to the re-appropriation to the Building Fund, requested by the Board of Control, of certain funds which are not needed for the purpose originally appropriated, I wish to advise that I approve the re-appropriation of these funds, in order that the Board may construct a hospital building at the Lincoln State Hospital, using the same design as that now being constructed at the Hastings State Hospital. I also understand that if these re-appropriations are made, there is \$67,497.56 in PWA funds available to match these state funds.

Mr. Eubank advises that in order to proceed with this building at the Lincoln State Hospital, it will be necessary to make all of these emergency appropriations, with the exception of the \$25,000 from the Beatrice Clothing Fund.

Following is a list of the funds, together with the amounts to be re-appropriated.

A-518 Investigation of Water Supply Institution for Feeble Minded, Beatrice	\$ 2,000.00
D-543 Electric Wiring at Hastings State Hospital	1,392.80
J-593 Repairing Wall at the State Penitentiary	4,823.03

J-594 Mechanical Metal Detector at the State Penitentiary	2,000.00
N-633 Additional Water Supply at Norfolk State Hospital	8,418.50
N-634 Fire Pump for the Norfolk State Hospital	1,000.00
R-653 Sewage Disposal Plant at the Reformatory for Women, York	20,251.04
T-676 Revamping the Electric Wiring at the Reformatory for Men	936.18
T-679 Root Cellar at the Reformatory for Men	800.00

A-511 Clothing Fund at Institution for Feeble Minded	25,000.00
Bd-501 and 501-G Board of Control Revolving Fund	50,000.00

I would appreciate the cooperation of your Committee in handling this appropriation.

Very sincerely yours,
 (Signed) R. L. Cochran,
 Governor.

MOTION—To Suspend Rules for Introduction of Bill

MESSAGE FROM THE GOVERNOR

Assistance Payments

February 7, 1939.

To the Members of the Fifty-third Session
 of the Nebraska Legislature.

Gentlemen:

In my message to you, delivered on January 5th, with reference to old age assistance and related activities under the social security law,

attention was called to the necessity for amending the present law to provide for allocation of funds to counties on a need basis rather than on a population basis.

A little more than a year ago the Director of Assistance felt that under our present law sufficient balances had accumulated in excess of their actual needs in some counties to provide amounts which would justify larger payments during the winter months. In fact, on October 1, 1937, there was an accumulated balance of \$199,522.14. On the strength of this accumulation, the Auditor and the Governor approved a recommendation of the Director of Assistance to pay larger amounts during the winter months, December, January, February and March. The accumulated balance of \$350,848.87 in counties in excess of needs in April, 1938, justified this procedure.

On November 1, 1938, we had an accumulated balance of \$383,436.50. In view of this accumulated balance, the same policy was adopted for the winter months of '38-'39 as for '37-'38. A more recent check, however, shows that there has been a growing tendency for the counties which had these balances to increase their individual payments, which situation combined with a general increase in the number of recipients accentuated by the reduction in WPA makes it now apparent that the present rate of payments as an average throughout the state cannot be maintained between now and July 1st under the present appropriation.

An emergency law providing for allocation on the basis of need and the reallocation of the remaining balances for statewide distribution will prevent further dissipation of balances. While this should be immediately accomplished by legislative act, the remaining funds plus these balances now available will not be sufficient to permit average payments during the rest of the biennium at as high a rate as the averages maintained thus far during the biennium. The State Assistance Director estimates that it will require an additional appropriation of \$300,000.00 in order to maintain the average rate of payments during the rest of the biennium as has been maintained during the biennium thus far. This estimate takes into consideration the following factors: the prompt enactment of legislation to make available on a statewide basis the present balances; and also to provide for allocation in the future of funds to counties on a need basis. Another factor which of course cannot be closely estimated is the further influence of reduction in WPA and other federal funds. It should be pointed out further that under the present statutes the State Assistance Director does not have the authority to control the expenditure of the accumulated balances referred to. I need not call your attention again to the difficulties in estimating for any considerable period in advance. This has been well

demonstrated by the effects of two successive drouths experienced since the session of two years ago.

These facts are given you for your information and consideration. For the balance of the biennium, two courses of action remain: first, to maintain the average rates of payment at a lower level than has thus far been maintained during the biennium; the other, to make an additional appropriation. I shall be glad to discuss this problem with you and cooperate fully in its solution.

Respectfully submitted,

(Signed) R. L. Cochran,
Governor.

MOTION—To Have Message Mimeographed.

Mr. President: I move that the message of the Governor be mimeographed and placed on the desks of the members this afternoon.
(Signed) Brady.

MOTION—To Call Before Legislature

LEGISLATIVE RESOLUTION NO. 9

Respecting the Memory of

William T. "Billy" Fenton

Warden, Nebraska State Penitentiary (1913 to 1934)

He Was His Brother's Keeper

"How brief this drama of our life appears!
The good die not! Their heritage they leave—
The record of a life in virtue spent;
For our own loss, at parting we may grieve—
Lives such as theirs build their own monuments."

Truly Warden Fenton who died February 7, 1939, has built his own enduring monument in the prison system which Nebraska has today—all growing out of faithful and unostentatious public service as a trusted and beloved executive.

Farmer, implement dealer at Dawson, Nebraska, and "boy sheriff" of Richardson County for eight years, at forty-one years of age his appointment as warden brought him in 1913 as chief officer to Nebraska's prison, then rocked with rebellion against enforcement of discipline and with a convict population depraved by the use of narcotics, smuggled inside the prison walls. Through his genius for direct action against prison evils, through his uncanny judgment in the selection of proper subordinates and assistants, in a short time, he drove every drug peddler out of the prison, treated and cured prisoner addicts and began to rebuild and rehabilitate prisoners into citizens ready for return to useful and law abiding pursuits.

Warden Fenton was far ahead of his time as a prison administrator. He segregated first offenders long before the law in Nebraska recognized penal institutions for the youthful inmate who found himself sentenced to prison for the first time. He installed a merit system and made it work. While he was humane, fair, lenient and kind in his policies of prison management, he had no patience with prison reform of the sentimental type. When circumstances called for it, he was a strict disciplinarian. He was by nature a practical psychologist who had the faculty of boring in upon the thoughts and purposes of his wards and was uncanny in ripping off any masks of hypocrisy and sham they chose to wear. Devout in religion, he unconsciously influenced his charges to seek life on a higher plane; he directed, by example more than by precept. He naturally loved his fellowman, encouraged and built up the morale of his "boys" while on the inside and kept in contact with all of them with the right kind of assistance after their release. He was an intense student of prison technique, was the dean of penitentiary wardens in the United States, both in point of service and record of accomplishment. He was nationally recognized in his chosen field. He won and kept the confidence and respect throughout his public career of his immediate superiors, governors and legislatures; and his tenure was always secure, NOW THEREFORE

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF NEBRASKA IN FIFTY-THIRD REGULAR SESSION ASSEMBLED:

1. That this Legislature pause for a moment in its deliberations to pay silent tribute to a public servant who assumed the duties as warden of a demoralized and disorganized penal institution and who converted it into one conspicuous for its efficiency and humanity to the credit of our state and nation.

2. That this resolution be spread at large upon the Journal of this Legislature; and that the Clerk of the Legislature be directed and instructed forthwith to forward a copy thereof, properly authenticated and suitably engrossed to the widow and family of the deceased as a mark of the reverence of the State of Nebraska to Warden William T. Fenton's memory.

(Signed) Lester L. Dunn James E. Reed
 Joseph C. Reavis George I. Craven

The rules were suspended and the resolution adopted.

LEGISLATIVE RESOLUTION NO. 10.

Offered by Charles F. Tvrdik of Douglas.

WHEREAS, on February 12, 1809, there was born to Tom and Nancy Lincoln a baby boy who was afterwards named Abraham Lincoln and this is the anniversary of that sublime event, and

WHEREAS, it is fitting and proper that the day of the birth of Abraham Lincoln, one of the outstanding statesmen of all times, be recalled by this Legislature in the course of its deliberations, when courage, persistency, fearlessness and common sense in government should be our aspiration, NOW THEREFORE

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF NEBRASKA in FIFTY-THIRD REGULAR SESSION ASSEMBLED:

1. Paraphrasing Lincoln in his second inauguration, pausing a moment in our deliberations, may we resolve, regardless of party or personal prejudice, that here, in this Legislature, we will do our best to bind up the state's wounds, that we will do all those things which may achieve and cherish a just and lasting peace among ourselves, and with all the citizens and the officers entrusted with the administration of the public affairs of the State of Nebraska; and that as Abraham Lincoln understood the hopes, the sorrows, the needs and the aspirations of the people of the United States that, for the State of Nebraska, this Legislature do likewise.

MESSAGE FROM THE GOVERNOR

February 13, 1939.

To the Members of the Fifty-Third Session
of the Nebraska Legislature

Gentlemen:

In my message to the legislature on January 5th, I said: "My ideas are in harmony with the report of the legislative council which recommends that sufficient reductions be made in appropriations for the next biennium to absorb any delinquencies in the general fund during this biennium to the end that the state levy for the next two years may not exceed the levy for this two-year period."

In preparing my budget message, with the object in view of carrying out these recommendations, in which I concurred most heartily, I invited the chairman of the legislative council and the chairman of the appropriations committee to a conference to discuss this and to estimate what percentage of reduction in the appropriation for the present biennium would absorb, in the next biennium, the delinquencies due to non-payment of taxes, and at the same time hold the appropriation for the next biennium to a level where the state tax levy, as an average, for the next two years will not have to be raised over the average for the past two-year period.

In line with this, and guided by the best information available when the budget was prepared about a month ago, these recommendations were made. It is entirely possible that later in the session we may be able to estimate tax delinquencies more accurately. If it should develop that in the judgment of the legislature a larger delinquency will exist at the end of this biennium than was anticipated when we discussed this matter, then and in that event, the legislature should make an even greater reduction than is shown in my budget to the end that the recommendation of the legislative council, concurred in by the Governor, be carried out.

Of course in order to accomplish any such program, it will be necessary to have bills before the legislature. As provided by Section

81-313, Compiled Statutes of Nebraska for 1929, I presented bills to the clerk of the legislature at the time I delivered my budget message on January 23rd. These bills were drawn to carry out the recommendations of your legislative council with respect to total appropriations from property tax, which recommendations were, as stated above, concurred in by me and discussed by me with the chairman of the legislative council and the chairman of the appropriations committee.

I should like to call your attention to my special message to you on January 25th in which I recognized that the Tax Commissioner's office had erroneously applied a six percent reduction to the estimated receipts of federal aid and other funds. As I stated in my budget message, however, "wherever practical in the interest of economy as well as in the interest of equality between departments and bureaus, we expect to apply the same policy, relative to reductions, to departments and bureaus maintained by cash funds as in the case of those agencies maintained with property tax funds." I recommend that your appropriations committee make such corrections, in the bills that I presented with my budget, as may be necessary to conform with the above.

The purpose of the legislative council and myself is to provide for absorption of any deficiency in the general fund, due to non-payment of taxes, in an orderly manner by a reduction in expenditures rather than an increase in the state tax levy.

Respectfully submitted,

(Signed) R. L. Cochran

Governor.

MESSAGE FROM GOVERNOR

Items in Budget

February 16th, 1939.

To the Members of the Fifty-Third Session
of the Nebraska Legislature.

Gentlemen:

On January 25th, I sent to the legislature a message explanatory of the erroneous application of a six per cent reduction to certain items in the budget. Again, on February 13th, I sent a message to the legislature containing a statement of the necessity for absorbing a deficiency in the general fund by reducing expenditures rather than by increasing taxes.

However, as a result of conversations with members of your appropriations committee, request has been made for a more detailed statement which would assist the committee in their deliberations and study of the budget.

It should be recalled, as set forth in my budget message, that a reduction of six per cent in property tax fund appropriations for the next biennium was recommended in order to carry out a recommendation of the legislative council that appropriations for the next biennium be limited to a figure which would make possible the absorption, during the next biennium, of any deficiency in the general fund resulting from delinquencies in tax payments during this biennium, and at the same time keep the average state tax levy on a level with that prevailing during the present biennium.

I stated also in my budget message, that wherever practical in the interest of economy as well as in the interest of equality between departments and bureaus, we expect to apply the same policy, relative to reductions, to departments and bureaus maintained by cash funds as in the case of those agencies maintained with property tax funds. This policy was followed by the budget director in preparing the budget. However, he erroneously extended this principle to federal funds and to some cash funds where its application is not practical. For the purpose of clarity, it should be pointed out, in connection with the federal appropriation for the state employment service, that the six percent reduction as made should stand for the reason that the property tax funds used to match these federal funds are reduced by six per cent.

Those items to which the six per cent reduction was applied erroneously are listed as follows, with amounts given as they should have appeared in the budget:

Department of Health

For Benefit of Professions (cash funds)	2,447.25
Public Health Works and Personnel Training (fed.)	85,945.00
Maternal and Child Health Activities (federal) ..	48,120.00

Department of Roads and Irrigation

Salaries and Wages from Gas Tax (cash funds) ..	425,000.00
Maintenance from Gas Tax (cash funds)	125,000.00
State Highway Administration (3½% M. V. Fees)	140,000.00
Road Maintenance (30% M. V. Fees) (Cash fund) ..	1,200,000.00
Road Maintenance from Gas Tax (cash funds) ...	5,200,000.00

Board of Vocational Education

Federal Vocational Education—Smith-Hughes (federal)	164,561.08
Vocational Rehabilitation of Physically Disabled Persons (federal)	46,852.00
George Deen Fund (federal)	385,368.54

Game, Forestation and Parks Commission

Administration (sale of hunting and fishing permits) (cash funds)	320,000.00
For each Park—cash receipts (cash funds)	9,700.00

State Assistance Committee

Administration—2% (federal funds)	102,170.61
Assistance Fund (federal funds)	5,842,109.72

University of Nebraska

Bankhead-Jones Agricultural (federal)	19,000.00
Agricultural and Mechanical Arts (federal)	168,085.80

Smith Lever Fund (federal)	155,882.36
Agricultural Experiment Station (federal)	60,000.00
Purnell Fund (federal)	120,000.00
Capper-Ketchum Fund (federal)	56,506.22
Additional Federal Cooperative Fund (federal) ...	63,600.00
Bankhead-Jones Agricultural Extension (federal) ..	346,948.16

Orthopedic Hospital—Lincoln

Services for crippled children (federal)	80,000.00
--	-----------

In order to make the six per cent reduction effective on those cash items where it is desired to make such reductions, it is necessary that the appropriation bill carry a definite amount for such items, or that such items be limited by the language "not to exceed." There are, however, certain instances in which such limitation should not be imposed. These instances, and the reasons therefore, follow:

In the case of the appropriation for administration and maintenance of highways, this appropriation is already limited by a fixed percentage of funds. There is the further reason that potential emergencies, such as floods and snowstorms, create great uncertainty as to expenses, thus requiring that this appropriation be a flexible item.

In the case of the game, forestation and parks commission, it is felt that the total appropriation should not be limited, but that the expenditures for administration should be reduced by six per cent to conform with a general policy.

In my budget message I recommended that the three existing legislative agencies be combined into one agency by statute. These agencies are the office of the clerk, the legislative reference bureau and the legislative council. Due to the uncertainty of how much money would be required to operate the combined agency, the budget contained no recommendation for this purpose. As a result of conferences with members of the appropriations committee, it appears likely that legislation will be enacted to consolidate these agencies and that a substantial saving will be effected in tax funds. The total of the appropriations for the three agencies for the present biennium is \$49,850.00. As a result of conferences with members of the appropriations committee, I am recommending an appropriation of \$22,000.00 for the single agency.

At the time the budget was submitted, it was expected that the salary of the lieutenant governor would be included in the appropriation for expenses of the present legislative session. In view of the fact that

the appropriation bill for the expenses of the session already has been enacted without provision for this item, it is recommended that the sum of \$3,488.36 be inserted in the appropriation bill.

With these small additions to the property tax budget, attention is called to the fact that the total of my recommendations for appropriations from property tax revenue remains approximately ten per cent less than the total of appropriations from property tax revenue made two years ago for the present biennium.

Respectfully submitted
(Signed) R. L. Cochran
Governor

AMENDED RESOLUTION NO. 7

For Investigation and Examination of the Department of Insurance and the Bureau of Securities

Preamble

WHEREAS, this Legislature has no concrete evidence before it as to the precise condition of the Department of Insurance and Bureau of Securities of the State of Nebraska, and

WHEREAS, precise information concerning the past and present administration of said Department of Insurance and Bureau of Securities is necessary, if this Legislature shall intelligently pass upon bills now before it for consideration or bills requested for presentation to this Legislature all touching the field of insurance and securities, and

WHEREAS, it appears that various court decisions have been rendered in the courts of the State of Nebraska indicating irregularities in the conduct of a few insurance and investment companies under the supervision of these Departments; that interests of policyholders in these companies and their beneficiaries doing business in the State of Nebraska have not been properly safe-guarded by existing laws; and that a revision of the insurance and investment laws of the state should be considered; and

WHEREAS, many conflicting statements have been made with respect to the administration of the affairs of the Department of Insurance and the Bureau of Securities of the State of Nebraska and of a few companies doing business in the State of Nebraska and their relation to the Department of Insurance and the Bureau of Securities, and

WHEREAS, in fairness to those public officials and public employees connected with said Department of Insurance and bureau of Securities and of the citizens and taxpayers of the State of Nebraska, there should be an official finding of the facts with a complete investigation by the Legislature at this time concerning the conduct and administration of said Department of Insurance and Bureau of Securities, NOW THEREFORE BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF NEBRASKA IN FIFTY-THIRD REGULAR SESSION ASSEMBLED.

1. That the Committee on Committees forthwith appoint a committee of five (5) members from the body of this Legislature, one of whom shall be chairman, which committee shall be known and designated as "The Legislative Insurance Investigation Committee," which committee shall proceed to investigate and examine into the business and affairs of the insurance and investment companies doing business in the State of Nebraska and of the Department of Insurance and the Bureau of Securities. That the said committee shall have full power and authority, and it shall be its duty to prosecute its inquiries in any and every direction and by any and every means in its judgment necessary or proper to enable it to obtain information in regard to their report on matters contemplated in this resolution. That said committee be and hereby is authorized and empowered to require and enforce the attendance of witnesses, and the production of books and papers, to administer oaths, and to employ counsel, stenographers, clerks and such other means as may be necessary for the purpose of investigation; that, whenever in its judgment the public interest demands, the committee

may require any public officer, deputy, assistant or any public employee paid directly or indirectly by means of public funds, or any individual, to testify before them and to produce books, papers or other documents in obedience to the subpoena of said committee. The investigation may include the relation of the officers to their companies and investments, the relation of such companies to subsidiary corporations, transfers of surplus funds from participating life insurance business to non-participating life insurance in companies writing both participating and non-participating business, transfers and mergers of insurance and securities companies, the activity of agents, promoters, and brokers in the fields of buying and selling insurance, as to how and why these mergers and transfers occurred, the income of the Director of Insurance and his employees other than their salaries and to the regularity of all books, papers or matters now before said Departments, or heretofore disposed of by said Department of Insurance or Bureau of Securities, and any other phases of the insurance business deemed by "The Legislative Insurance Investigation Committee" to be proper, for the purpose of drafting bills and reporting to this session of the Legislature on or before the seventieth legislative day. And if such an investigation indicates that a further study of the laws regulating and relating to insurance and securities in the State of Nebraska is needed to overcome any conditions, practices or policies found to exist, then such a study and investigation may continue by order of the Legislature under the conditions and terms of this resolution and "The Legislative Insurance Investigation Committee" shall present a detailed report to the 1941 Legislature. This report shall include recommendations and proposed bills with recodification of laws if necessary to be enacted into law which will correct the present defects of the law in the Department of Insurance and the Bureau of Securities, if any.

3. That the sum of 2,000.00 dollars, or so much thereof as may be necessary, is hereby made available for the use of said committee out of the unexpended balance, identified by Acct. No. 212 in the office of the Auditor of Public Accounts, arising out of appropriation heretofore made in Section 44, Chapter 193, Session Laws of Nebraska, 1937, for salaries, maintenance and expenses of the Insurance Department and Bureau of Securities, field investigation and litigation, all filing fees, registration of agents and miscellaneous fees and unexpended balance, estimated, if and when said sum is specifically reappropriated to the uses and purposes of said investigation committee by the Fifty-third Session, Nebraska State Legislature, 1939.

MESSAGE FROM THE GOVERNOR

Bureau of Securities

March 7th, 1939.

To the Members of the Fifty-Third Session
of the Nebraska Legislature

Gentlemen:

Recent exposure of the affairs of the First Mortgage Acceptance Corporation imperatively demands that the public be safeguarded against the possibility of any further schemes or operations of this character in the state. Doubt has been raised as to the adequacy of the power, facilities, and funds of the bureau of securities under the existing

statutes to deal with such a situation. Such remedial steps should be taken by this legislature to amend and fortify the present statutes, as can leave no possible doubt as to the sufficiency of the state's machinery in such cases. One thing which I believe ought to be done is to place the bureau of securities under the department of banking and to make available the latter's examination facilities in connection with any investment or securities corporation. The problem is one which should have, and which I am sure will receive, your most earnest consideration.

Respectfully submitted,

(Signed) R. L. Cochran,
Governor.

MOTION—To Defer Action on Certain Bills

Mr. President: I move that all insurance and securities legislation and bills on General File pertaining to the same be held in abeyance until a report is made by the Insurance Investigating Committee, in accordance with the Governor's message. (Signed) Miller.

MOTION—To Amend Mr. Miller's Motion

Mr. President: I move to amend Mr. Miller's motion by making it include L. B. No. 78. (Signed) Craven.

SELECT COMMITTEE REPORT

Special Committee on Social Security Legislation

After an exchange of telegrams with Washington, the following telegram was received from Fred M. Wilcox, Regional Director at Minneapolis:

March 8, 1939.

Neil C. Vandemoer
 Dir. Public Assistance
 Lincoln, Nebraska

Following wire received March 7 from Jane M. Hoey, Director Public Assistance Bureau, Social Security Board, "Nebraska Bill 238 appears to limit scope of state agency's rulemaking authority over counties to two subjects specified and if so interpreted would not meet requirements. Extremely important Nebraska Agency have adequate authority to supervise public assistance programs in accordance with federal act. Will delay fourth quarter grant pending further report on Legislative action." In view of grants complication indicated in Hoey telegram, urge you advise us immediately of possibility of Legislature amending Bill 238 substituting for lines 31, 32 and 33 to period after word "administration" the following language, "The counties and state department shall establish and maintain a merit system for personnel in such state and county departments"

Fred M. Wilcox, Regional Director.

The committee has requested through the State Assistance Director, that a representative of the Social Security Board, at Washington, meet with the committee Monday morning, March 13, to furnish such other information relative to pending social security legislation as may seem necessary for the information of the Legislature. It is the opinion of the committee, after having received the above telegram, that it will be necessary for the Legislature to pass Legislative Bill No. 238, with the suggested amendment, if future grants will be forthcoming.

SELECT COMMITTEE REPORT

Social Security Legislation

Mr. President:

Your committee, which was appointed to confer with representatives of the Federal Social Security Board, and to endeavor to ascertain what would be required of the State of Nebraska to continue to receive federal assistance, report the following.

We have conferred on numerous occasions with Mr. Kassius, Associate Director of the Bureau of Public Assistance, of Washington, D. C.,

Miss Helen Dart, Director of the Regional Office of Assistance, Minneapolis, Minnesota, and Mr. Louis Shnieder, of the legal department of the Regional Social Security Office, Minneapolis, Minnesota.

It was clearly indicated in all our conferences that it would be necessary for this Legislature to pass Legislative Bill No. 238, with the following amendment, if it were to meet with the approval of the Social Security Board.

Strike out all the new matter in Section 1, Page 2, beginning on line 29, and ending on line 33, and insert in lieu thereof, the following clause: "The Nebraska State Board of Control shall have authority to establish a personnel merit system and to establish reasonable rules and regulations covering the administration of said merit system as well as all phases of the administration of the State Assistance program and said reasonable rules and regulations shall be binding upon the counties and state."

We were assured that with the passage of Legislative Bill 429, all requirements have been met in so far as the Social Security Board is concerned, placing Nebraska on a basis of need for the last quarter of this biennium. But it is still necessary that Legislative Bill 390 be passed in conformity with No. 429, to cover the next biennium.

In all our conversations with these representatives, we were definitely assured that unless legislation was passed that would set up the assistance program on a basis of need, and that the State Assistance Board shall have authority to establish a personnel merit system, and rules and regulations covering the administration of said merit system, that future grants for assistance from the Federal Government would not be forthcoming.

(Signed) Edwin Schultz
Chairman

J. B. Rossiter
L. B. Murphy

Resolution Memorializing the Congress of the United States to Correct Defects in Federal Statutes Relating to the Distribution of Food Commodities by Federal Relief Agencies.

Introduced by Tom Lambert of Platte.

United States Congressman
Charles F. McLaughlin
Congressman from Nebraska
Washington, D. C.

My Dear Friend: .

We are having quite a controversy in Nebraska as to whether it is a condition precedent that the Nebraska Legislature pass a Merit System or else we will not receive any more Federal Old Age Assistance funds from the government.

I understand someone from Washington appeared before a special senate committee and informed this committee that Section 2A, paragraph 5 of Public No. 271—74th Congress (H. R. 7260) (5) "provide such methods of administration (other than those relating to selection, tenure of office, and compensation of personnel) as are found by the Board to be necessary for the efficient operation of the plan", gives them this right to demand the state set up a Merit System. In my opinion only by the wildest imagination could you interpret paragraph 5 to such meaning. I can reconcile the government stepping in under Section 1102, Rules and Regulations, that is if the program wasn't handled in an efficient manner.

The Legislators are against the Bill but are being forced to pass same by this 'must' legislation from Washington.

Will you kindly contact the head of the Social Security Program and advise me at once by wire, address 1615 Harney Street, 3rd Floor, Omaha, Nebraska, whether or not Nebraska Legislature has to pass a Merit System bill as a condition precedent for Nebraska to receive any more Old Age Assistance funds.

Yours very truly,

RE LETTER OLD AGE ASSISTANCE FUND SOCIAL SECURITY BOARD ADVISES UNDER EXISTING FEDERAL LAW NEBRASKA DOES NOT HAVE TO PASS MERIT SYSTEM BILL AS CONDITION PRECEDENT TO RECEIVING OLD AGE ASSISTANCE FUNDS. BILLS NOW PENDING BEFORE CIVIL SERVICE COMMITTEE HOUSE OF REPRESENTATIVES HERE TO REQUIRE PASSAGE SUCH EXAMINATION BY STATES. THESE BILLS NOT YET ACTED UPON BY COMMITTEE AND THEREFORE NOT YET BEFORE THE HOUSE FOR CONSIDERATION -

CHARLES F McLAUGHLIN MEMBER OF CONGRESS

Letter from Congressman Carl T. Curtis:

"I have taken this matter up here in Washington, and this is what I find. I conferred with William M. Galvin, who is Chief of Field Operations in the office of the executive director of the Social Security Board. Mr. Galvin tells me that it is one of the requirements of the Federal Government, that these employees must be residents of the state in which they are employed. They hold a Civil Service status.

Mr. Galvin's office further told me that they have a regional office that is in charge of Mr. Fred M. Wilcox, whose office is in the Federal Office Building at Minneapolis. He said that Mr. Wilcox's office was required to follow the same practice and the employees in a state be residents of that state.

My information then, is to this effect, that all of these employees that are paid by the federal government are subject to the rule that they must be residents of the state of which they are employed. I was further informed that if these employees working out of our state assistance office are paid by Nebraska funds, that their selection rests entirely with the state administrator. In that case, it would be Mr.

Neil C. Vandemoer. If the information I have is correct, then it is entirely within the power of Mr. Vandemoer to confine all of his appointments for this work to residents of the state of Nebraska.

Please check this over and if I am in error, write me in detail about it, and I will again take it up with these federal offices. I am glad that you called upon me and I want you to do it often."

Yours truly,

(Signed) Carl T. Curtis

Letter from John R. Irwin, Speaker of the House of Representatives, Iowa:

"In your letter you set out one proposal, "The Board of Control shall have authority to make rules and regulations binding upon the county and State Assistance Department governing qualifications of personnel and the reporting of statistical and accounting information relative to public welfare administration."

"As far as I am able to learn no such request has come from the federal government for legislation of this sort in Iowa. To date no such bill has been introduced, and I am informed by officials on our State Board of Welfare that there has been no pressure on them to request such legislation in Iowa.

This no doubt is because Iowa in the past has been unwilling to change its law or procedure merely to meet the requests of the Federal Bureau of Public Assistance."

Very sincerely,

(Signed) John R. Irwin

Letter by Mr. Mueller to Speaker of House of Representatives of Arkansas, with answers:

"The writer would appreciate if you would advise him by air mail at once as to the following:

1. Has the Federal Social Security Board required establishment of merit system for the state and county assistance personnel? - No
2. Does your state have such a merit system now? - No

3. Has the federal government threatened to withhold federal matching of funds unless above requirements were met? - No"

Very truly yours

Letter from E. A. Briles, Speaker of House of Representatives of Kansas:

"We are not now operating under any formal merit system."

Sincerely

(Signed) E. A. Briles,
Speaker of the House

LEGISLATIVE RESOLUTION NO. 23. Republican Valley Flood Control

Introduced by Hugh B. Ashmore of Hayes, E. M. Neubauer of Harlan, Daniel Garber of Webster.

WHEREAS, The Congress of the United States, by the adoption of acts pertaining to flood control and reclamation, has recognized responsibility on the part of the federal government to control the destructive flood waters of the basins of the Mississippi and Missouri rivers; has declared this to be a national problem, and has heretofore authorized the expenditure of federal funds in considerable amounts in the area for the improvement of conditions resulting from floods and drouth, and

RESOLUTIONS

LEGISLATIVE RESOLUTION NO. 25 Interstate Transit Privileges.

Introduced by A. L. Miller of Kimball, W. H. Diers of York, W. J. Norman of Douglas, Leland R. Hall of Adams and Ernest A. Adams of Douglas.

WHEREAS, it is the sense of this Legislature that the granting of equal transit privileges as between localities where mills and other processors are located or where grain is stored, cleaned or otherwise handled, is essential to prevent discrimination and prejudice in the transportation of grain and grain products and the successful conduct of the grain and milling business, and

WHEREAS, it is the belief of the Legislature that the Interstate Commerce Act should include in Section 3 a specific inhibition against discrimination or prejudice by reason of inequality in the granting of transit privileges as among such localities,

NOW, THEREFORE, BE IT RESOLVED that the Congress of the United States is respectfully requested to amend Sub-Division (1) of Section 3 of the Interstate Commerce Act, as amended February 28, 1920, by striking the period, inserting a semicolon and adding the following language:

"The granting of transit privileges to any locality, port, port district, gateway or transit point, upon any route over which through rates have been or shall be established, and the denial of like transit privileges to any other locality, port, port district, gateway or transit point upon said route under the same through rate, shall be deemed to be an undue and unreasonable prejudice and disadvantage to the locality, port, port district, gateway or transit point denied such privilege."

LEGISLATIVE RESOLUTION NO. 26. Tariff on Brushes.

Resolution Memorializing the Congress of the United States to Revis the Tariff Laws of the United States Relating to the Classification of Brushes of the Type Used in the Application of Finger Nail Polish.

Introduced by Peter P. Gutoski, Charles F. Tvrdik, John Adams, Jr., William J. Norman, Sam Klaver and Ernest A. Adams, all of Douglas.

Preamble

WHEREAS, the United States Customs Court, First Division, in New York City, New York, has held that small brushes of the type used in the application of finger nail polish are camel hair pencils and not toilet brushes, and

WHEREAS, the tariff on camel hair brushes is only 40 per cent while the tariff on toilet brushes is one cent per brush plus fifty per cent, and

WHEREAS, under this ruling brushes of this type made in Japan can be sold in the United States at forty-six cents per gross, duty paid, while such price will not even pay for the materials and labor that go into the making of such brushes in the United States, and

WHEREAS, the amount paid for labor in such industry in the United States is approximately twenty-five times greater than that paid in Japan, and

WHEREAS, under the decision of said court, such industry in the United States will be completely ruined, and

WHEREAS, many thousands of United States citizens will be deprived of their jobs, and

WHEREAS, nearly two hundred employes of the United States Brush Company in Omaha, Nebraska, alone will lose their jobs, NOW THEREFORE

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF NEBRASKA IN FIFTY-THIRD REGULAR SESSION ASSEMBLED:

1. That this Legislature respectfully petitions, memorializes and urges the Congress of the United States to enact such measures as will correct the objections recited in the preamble of this resolution; and that the tariff laws of the United States be so revised that brushes of the type used in the application of finger nail polish shall be classified as toilet brushes rather than as camel hair pencils.

2. That this resolution be spread at large upon the journal of this Legislature; and that the Clerk of this Legislature is hereby ordered and directed forthwith to forward a copy of this resolution, properly authenticated and suitably engrossed, to the President of the United States; to the Vice President of the United States as presiding officer of the United States Senate; to the Speaker of the House of Representatives of the United States; and to each of the United States Senators and Congressmen representing the state of Nebraska in the Congress to the end that representatives in the government and in the Congress of the United States may be advised that this Legislature considers as imperative, remedial federal legislation to revise the tariff laws of the United States with respect to the classification of brushes used in the application of finger nail polish.

RESOLUTIONS

Mr. President: I move that Legislative Resolution No. 25 be amended to read as follows:

Resolution

Memorializing the Congress of the United States to take action to remove freight rate inequalities that burden the people of Nebraska and other states west of the Mississippi River, as compared with states east thereof, and authorizing the Governor of Nebraska to cooperate with the governors of other western states in preparing and prosecuting proceedings before the Interstate Commerce Commission for relief and authorizing the Governor of Nebraska to be party to such proceedings, representing the people of Nebraska and recommending appropriation of funds for purposes herein stated.

Preamble

WHEREAS, hearings recently held in Washington, D. C., before the Subcommittee on Interterritorial Freight Rates of the United States Senate and before the Committee on Interstate and Foreign Commerce of the United States House of Representatives have disclosed that the levels of freight rates on shipments by rail of class freight and commodities related thereto, and also many articles of manufactured freight and raw materials, between points in Nebraska and points in the states east of the Mississippi River, are relatively much higher, distance and cost of the transportation service considered, than the freight rates on like shipments moving wholly within the states east of the Mississippi River, and

WHEREAS, such higher freight rates constitute an unfair burden upon the commerce, the development and the prosperity of the state of Nebraska and its people, NOW THEREFORE
BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF NEBRASKA IN FIFTY-THIRD REGULAR SESSION ASSEMBLED:

1. That the Congress of the United States be urged to enact such legislation as may be necessary to remove present freight rate discriminations against commerce between Nebraska and states east of the Mississippi River, and to require the establishment and maintenance of freight rates for the future, between points in Nebraska and points east of the Mississippi River, that will be no higher, distance and cost of transportation service considered, than like rates within the territory east of the Mississippi River.

2. That this resolution be spread at large upon the Journal of this Legislature; and that the Clerk of this Legislature is hereby ordered and directed forthwith to forward a copy of this resolution, properly authenticated and suitably engrossed, to the President of the United States; to the Vice President of the United States as presiding officer of the United States Senate; to the speaker of the House of Representatives of the United States; and to each of the United States Senators and Congressmen representing the state of Nebraska in the Congress to the end that representatives in the government and in the Congress of the United States will be advised that this Legislature considers as imperative remedial federal legislation which will remove present freight rate discriminations against commerce between Nebraska and states east of the Mississippi River, as set forth in the preamble of this resolution.

3. That His Excellency, R. L. Cochran, Governor of Nebraska, be hereby authorized to confer with the governors of other states west of the Mississippi River which are suffering from like freight rate inequalities with a view to bringing jointly and in cooperation with such other interested states proceedings or complaints, and presenting evidence therein or in any investigation which may be instituted before the Interstate Commerce Commission for relief from said inequalities.

4. That the Governor of Nebraska, calling to his aid and assistance the Nebraska State Railway Commission, if he deems it advisable, is hereby authorized to act in the name of the people of Nebraska as a party complaining or intervening in any such proceeding, and, to carry out the directions herein given, to employ such counsel and expert technical assistants as he may consider necessary for such purpose, all within such specific appropriation as may be made for such purpose by the Legislature; and that this Legislature further suggests that its Committee on Appropriations consider appropriating the sum of \$5,000, or so much thereof as may be considered necessary, out of the general fund in the state treasury, not otherwise appropriated, for the use of the Governor or of the Governor and the Nebraska State Railway Commission, as may seem to them advisable, in the preparation and the prosecution of such proceedings.

Project No. 231-R - Mo. River Div.

Flood Control Project.

Mr. Hugo F. Srb, Clerk,
Legislature of Nebraska
Lincoln, Nebraska.

Dear Mr. Srb:

This will acknowledge your letter of the 29th ult., enclosing copy of a resolution adopted by the Legislature of the State of Nebraska on March 28th, 1939, relative to the Republican Valley Flood Control Project.

We are very glad indeed to have the benefit of the views and recommendations of your legislature, and I am happy to be able to advise you that on March 24th our 34th Annual Convention approved the recommendation of our Projects Committee that this project be placed in Class 2 - Meritorious.

It will be appreciated if you will convey this information to all interested parties in your Legislature.

We are, of course, anxious to be of assistance in furthering the project in every way possible.

Very truly yours,

Mr. Hugo F. Srb
Office of the Clerk
Legislature of Nebraska
Lincoln, Nebraska

My dear Mr. Srb:

This will acknowledge with thanks your letter of March 30 with which you enclose a resolution adopted by the Legislature of Nebraska regarding the Republican Valley flood control and reclamation possibilities.

The National Reclamation Association will be glad to work with such Nebraska agencies as are interested in an effort to secure the development along the Republican River which the leaders in your state desire.

So far as I have been able to learn, Nebraska has shown very little interest in development work of this kind. While Nebraska is a member of the National Reclamation Association and is represented on our Board of Directors by A. N. Mathers of Gering, most of the other states of the west have shown much keener interest in the work which this association is organized to do than has the state of Nebraska.

If the people of the Republican Valley really want to get something accomplished in line with the legislative resolution No. 23, I would suggest that the leaders of that area affiliate with the National Reclamation Association and get their problem over to us so that we can do everything within our power to help bring about the results which they desire. To that end May I suggest that the 8th annual meeting of the National Reclamation Association will convene in Denver, Colorado on October 17, 18 and 19 of this year. In my judgment this would be the opportune time for the people of the Republican Valley to come into meeting at Denver with a real show of interest and a definite program upon which they want the assistance of the other fourteen western states. The National Reclamation Association will welcome the interest of such an area in the state of Nebraska and, I am sure, through the medium of the National Reclamation Association, a great deal can be accomplished.

I hope you will convey this information to the leaders in the Republican Valley—in fact, the writer would be glad to meet with some of these leaders sometime this summer if they so desire.

Respectfully yours,

(Signed)

F. O. Hagie

SELECT COMMITTEE REPORT

Revenue Investigation

Estimates of Revenue Available for State Assistance During the Biennium of 1939-1941

We have figured the head tax on the assumption that it will be collected on the same basis as the biennium of 37-39.

The liquor tax is arrived at by computing the full two year period from March 1, 1937 to February 28, 1939. Also, we have computed the entire 33 months, so that we feel we have arrived at a very accurate estimate of the liquor tax.

The gasoline tax is estimated on the basis of the full two year period of 37-39.

The estate tax is based upon an eight year average. The eight year average is \$61,000.00 per year, with marked variations in it from year to year; so your committee have set this figure at \$60,000.00 per year.

The following table is the conclusion of your committee's recommendation:

Head tax	\$1,200,000.00
Liquor tax	2,800,000.00
Gasoline tax (1c)	4,420,000.00
Estate tax	120,000.00
Total	8,540,000.00

Approved by Governor

April 8th, 1939

To the Members of the Legislature

Gentlemen:

I am directed by His Excellency, Governor R. L. Cochran, to inform your honorable body that he has this day approved L. B. 78.

The Governor instructs me that it is his understanding that this bill was passed for the immediate benefit of one Nebraska insurance company. The principal, if not the only argument made in favor of the bill was that this legislation was necessary in order that this one company be able to do business in the state of Massachusetts, and possibly one other state. The bill accomplishes this purpose, which is in itself meritorious, and was so recognized by a preponderant majority of your honorable body, and it is for this reason that the Governor has given this measure his approval. It is, however, the Governor's judgment, after consultation with the Insurance Department, that this measure creates what might prove to be a serious fault or weakness in our insurance laws unless corrected. He would call your attention to the fact that apparently this bill tends to project assessment companies into the mutual insurance company field without providing the legal control over such assessment companies that now applies by law to mutual insurance companies. Under the operation of this bill, an assessment company may write what amounts to mutual insurance policies without being subject to governmental regulations and taxation to which mutual insurance companies are now subject.

In view of the fact that your honorable body has recognized the need for remedial legislation affecting insurance and is making a study to that end, it is the Governor's hope that this matter will be included in your study.

Respectfully submitted,

(Signed) Otho K. De Vilbiss
Secretary to the Governor.

RESOLUTIONS

MOTION—To Reconsider Action

Mr. President: I move that we reconsider our action of the Sixtieth Day in amending Legislative Resolution No. 25. Hall.

The motion prevailed with 33 ayes, 1 nay, 9 not voting.

Unanimous consent was granted to Mr. Miller to withdraw the amendment to Legislative Resolution No. 25.

LEGISLATIVE RESOLUTION NO. 29. By J. B. Rossiter of Thurston, A. L. Miller of Kimball, L. B. Murphy of Scotts Bluff.

Resolution Memorializing the Congress of the United States to Take Action to Remove Freight Rate Inequalities that Burden the People of Nebraska and Other States West of the Mississippi River, as Compared with States East thereof, and Authorizing the Governor of Nebraska to Cooperate with the Governors of Other Western States in Preparing and Prosecuting Proceedings before the Interstate Commerce Commission for Relief and Authorizing the Governor of Nebraska to be Party to Such Proceedings, Representing the People of Nebraska and Recommending Appropriation of Funds for Purposes Herein Stated.

Preamble

WHEREAS, hearings recently held in Washington, D. C., before the Subcommittee on Interterritorial Freight Rates of the United States Senate and before the Committee on Interstate and Foreign Commerce of the United States House of Representatives have disclosed that the levels of freight rates on shipments by rail of class freight and commodities related thereto, and also many articles of manufactured freight and raw materials, between points in Nebraska and points in the states east of the Mississippi River, are relatively much higher, distance and cost of the transportation service considered, than the freight rates on like shipments moving wholly within the states east of the Mississippi River, and

WHEREAS, such higher freight rates constitute an unfair burden upon the commerce, the development and the prosperity of the state of Nebraska and its people, NOW THEREFORE

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF NEBRASKA IN FIFTY-THIRD REGULAR SESSION ASSEMBLED:

1. That the Congress of the United States be urged to enact such legislation as may be necessary to remove present freight rate discriminations against commerce between Nebraska and states east of the Mississippi River, and to require the establishment and maintenance of freight rates for the future, between points in Nebraska and points east of the Mississippi River; that will be no higher, distance and cost of transportation service considered, than like rates within the territory east of the Mississippi River.
2. That this resolution be spread at large upon the Journal of this Legislature; and that the Clerk of this Legislature is hereby ordered and directed forthwith to forward a copy of this resolution, properly authenticated and suitably engrossed, to the President of the United States; to the Vice President of the United States as presiding officer of the United States Senate; to the Speaker of the House of Representatives of the United States; and to each of the United States Senators and Congressmen representing the state of Nebraska in the Congress to the end that representatives in the government and in the Congress of the United States will be advised that this Legislature considers as imperative remedial federal legislation which will remove present freight rate discriminations against commerce between Nebraska and states east of the Mississippi River, as set forth in the preamble of this resolution.
3. That His Excellency, R. L. Cochran, Governor of Nebraska, be hereby authorized to confer with the governors of other states west of the Mississippi River which are suffering from like freight rate inequali-

ties with a view to bringing jointly and in cooperation with such other interested states proceedings or complaints, and presenting evidence therein or in any investigation which may be instituted before the Interstate Commerce Commission for relief from said inequalities.

4. That the Governor of Nebraska, calling to his aid and assistance the Nebraska State Railway Commission, if he deems it advisable, is hereby authorized to act in the name of the people of Nebraska as a party complaining or intervening in any such proceeding, and, to carry out the directions herein given, to employ such counsel and expert technical assistants as he may consider necessary for such purpose, all within such specific appropriation as may be made for such purpose by the Legislature; and that this Legislature further suggests that its committee on Appropriations consider appropriating the sum of \$5,000.00, or so much thereof as may be considered necessary, out of the general fund in the state treasury, not otherwise appropriated, for the use of the Governor or of the Governor and the Nebraska State Railway Commission, as may seem to them advisable, in the preparation and the prosecution of such proceedings.

SELECT COMMITTEE REPORT

Intergovernmental Cooperation

To the members of the Nebraska Unicameral Legislature
Fifty-Third Session

I herewith submit my report, as a representative of this legislature, to the national conference on Inter-State Trade Barriers, held in Chicago, Illinois on April 5, 6 and 7, 1939. There were forty-four states represented at said conference and from one to ten representatives from each state in attendance.

In the beginning, six committees were appointed, namely: Plans and Procedure, Agriculture, Commerce and Industry, Liquor Control, Taxation and Public Relations. Your representative was assigned to the Committee on Agriculture.

While the Resolutions of the several Committees are not available at this time, I will attempt to make a report of the general findings as found by the conference in general session.

One of the main problems which confronted the conference was to determine what is a "Trade Barrier". In the opinion of the writer, and in the opinion of most of those in attendance at this conference, the simplest answer would be that "it is statute regulation or practice which operates, or tends to operate, to the disadvantage of persons, products or commodities coming from sister states, to the advantage of local residents and industries".

It is interesting to note that most all of the so called trade barrier laws have been enacted under four powers, which were delegated or reserved to the states under the federal constitution, these being:

1. The state's police power in the protection of health, which would include the power to quarantine.
2. The power of taxation on the part of the state.
3. Those measures enacted in the alleged interest of public safety and morals.
4. State proprietary powers as to conservation of natural resources and the ownership of public works.

Under the taxation powers reserved to the states, we find many so-called trade barriers being enacted. One of which has come into recent prominence, due to the enactment of the 21st amendment to the Constitution, legalizing the sale of liquor. No less than 23 states have passed preference laws as to crops grown in the respective states which go into the manufacture of liquor. This is done by levying lower license fees on manufacturers who use the local products. Alabama taxes manufacturers of alcoholic beverages \$1,000.00 annually, but wine makers using 75% or more of Alabama materials pay \$25.00 for each manufacturing plant. Other states, such as Pennsylvania have provided

that the excise tax on all liquor be refunded on exports in an amount equal to the tax levied by the state of destination on imports from Pennsylvania, if such state is in competition with them. Seven states charge a higher, or an additional fee for imports into the state than is charged for wholesale or distribution of the local product. The state of Washington has a wholesalers' annual license fee on domestic wine of \$50.00, while an importer must pay \$150.00. Massachusetts charges wholesalers of foreign beverages, a \$300.00 license fee and \$100.00 against soliciting of the local products.

In the Agricultural Committee, much discussion was given to considering the differences between the dairying states and the southern states, which produce cotton-seed oil, peanut oil and other products used in the manufacture of oleomargarine. By the use of taxation, it appears that the dairying states have protected their markets by excluding "substitute commodities". It follows, while we might hate to admit it, that when a dairy state seeks to protect butter against oleomargarine from another state, it takes on the aspect of an interstate barrier. The oleomargarine picture shows that twenty-three states have adopted excise taxes ranging from five cents per pound, on uncolored, to fifteen cents per pound on colored oleomargarine. Sixteen states require licenses to engage in the manufacture, distribution, sale, or serving of this product, and the fees for such license range from \$1.00 to \$1,000.00 per year. In the deep south, with the exception of Oklahoma and Mississippi, oleomargarine which contains cotton-seed oil, peanut oil, soybean oil, oleo, etc., have been exempt from taxation, while several of the cattle producing states, such as Minnesota, Nebraska and Wyoming, tax products not containing 50% butter fat.

All of the members of the southern states were greatly interested in the bill introduced by Senator Neubauer, known as L. B. 398, and were in hopes that this body would pass the same. As explained by the delegates from the south, the only thing the southern farmer has to sell is cottonseed oil, and unless the so-called dairy states, including Nebraska, take off the tax on oleomargarine, these states would, no doubt, enact reprisal laws against products of this section sold in the south. Also that the situation in the cotton markets was such that unless some additional market was given for cotton-seed oil, no doubt great cotton acreages would be abandoned and turned into crops such as those grown in this region.

Motor Vehicles

Perhaps there is no greater problem before the Council of Governments than the motor vehicle laws of the several states. It was the opinion of many of the members that many of the taxes imposed by the several states were perhaps justified for the use of the highways, but when said taxes are pyramided, it constitutes an accumulative bur-

den upon motor vehicles. While many states have a full reciprocity on registration fees, yet the benefit of such provisions depends upon the proximity of such states to each other. Nineteen states require registrations and payments of full fees and taxes on all trucks coming into the state. These fees are usually quite heavy, and these increase sharply with the size of the truck. Looking at the chart, I find that 5T trucks in Illinois pay \$30.00 and in Alabama and Georgia, they pay \$400.00 and \$300.00 in South Carolina. Some states require trucks to pay a mileage tax in lieu of the high license fee, but it is also noticeable that these are often higher for interstate trucks than for intrastate trucks.

Itinerant Trucks

Another so-called burden upon motor vehicle transportation falls upon what we call the itinerant trucker. Many states in the past few years have enacted statutes enlarging the scope of the old peddler laws, to cover the trucker who sells merchandise from his truck.

In Arizona a market trucker must pay a license fee of \$200.00 per year in each county, and a wholesale peddler who sells for the purpose of resale must pay a \$500.00 license fee in counties of 100,000 in population and \$300.00 in counties of less population. In addition, he must post a bond of \$5,000.00 with a surety licensed in the state.

Nine of the states exempt the farmer from taxation if he is selling his own products.

Inspection and Quarantine

The Federal Constitution specifically provides that the states may not levy import taxes on products from sister states, but may levy inspection fees. This power has been clarified by the provision that such fees can only be levied when necessary, and that the funds derived therefrom must be turned over to the federal treasury.

In addition to the general taxing powers of the state, the states have more and more restricted the method of inspection, in order to give preference to their own products and to the detriment of the foreign states. Under the power to inspect, the states usually set high standards and by this method exclude those products which cannot meet the standards of inspection, as a condition precedent to the issuance of a license to sell.

In the sale of milk, the states have used the inspection privilege to its fullest extent. Connecticut, Massachusetts and Rhode Island require registration of all dairies before they can supply milk. Pennsylvania and New Jersey provide that no permit to sell milk shall be issued unless the source of supply meets the approval of the inspection.

The State Milk Control Laws came quickly after the decision of the Supreme Court, which declared the milk industry affected the public interest and that the states were empowered to regulate it as a public utility. As a result, much out of state milk has been excluded through a failure or refusal to inspect.

The Connecticut Milk Commission, for example, does not inspect dairies beyond the established milk shed, unless there is a milk shortage or an emergency, and this is a finding of the fact within the discretion of the Milk Board. Furthermore, this milk commission has the power to fix prices for all milk sold in the state, once it is come to rest therein.

Another use of the inspection law, of interest to this state, is that pertaining to livestock and horticultural products. Such products are practically controlled, restricted and distributed by an importing state through this method. Forty-seven of the states have inspection requirements for imported nursery stock, and only six states have a provision for reciprocity. Twenty-eight states require state of origin certificates certifying to pest free and disease free condition of the stock, and in addition, all the states require an inspection after reaching their destination. The perishable nature of these commodities which would await inspection before delivery would cause the loss of much nursery stock.

In the livestock industry, neighboring states require health certificates showing freedom from infectious and contagious diseases. Several states have even used the power of an embargo. Georgia provides that if the Governor thinks the domestic products are sufficient for home demands, he may declare an embargo. Louisiana only recently enacted a retaliatory statute which forbids the sale in Louisiana of products from a state which prohibits the importation of such products from Louisiana. In the liquor industry, nine states have enacted retaliatory legislation against beverages from other states.

Ports of Entry

Some states have established ports of entry as a method of enforcing their laws, regulations, or retaliatory measures against one another. On January 1, 1939, three states had enacted ports of entry laws to enforce their liquor regulations. One state requires liquor shipped through the state to be checked in and out of its boundaries. Nine states have established some form of port of entry and highway checking stations but only four states have definite statutes authorizing such ports.

Kansas has 66, Oklahoma 58, Nebraska 31 and New Mexico 22. Some of these ports of entry not only will be ports utilized for the

collection of taxes and fees, but also for the inspection of embargoes of plants, fruits and vegetables.

Summary

The foregoing merely hits a few of the high spots showing the trend of the states in enacting trade barriers. The cause for the enactment of these trade barriers can be attributed solely to the great economic depression, and the activity of pressure groups seeking to protect their own businesses to the detriment of others.

With ten million unemployed in the country, it is natural that in striving to meet the situation, many will advocate the raising of trade barriers in various states, against the production of the other states.

State legislatures have succumbed to the superficial cry of their constituents. If the states continue to enact trade barriers against each other, in a short time the United States will cease to be the greatest area of free trade in the world, and will resemble the situation as exists in the Balkan peninsula.

It is up to the legislatures of the several states to eliminate existing trade barriers, and to see that no others are erected. If the states fail to do this, the only alternative would be for more centralized and stringent enforcement by the federal government, to eliminate the same.

MESSAGE FROM THE GOVERNOR

Assistance Funds

April 20th, 1939.

Honorable Wm. H. Diers, Speaker
State House,
Lincoln, Nebraska.

My dear Mr. Speaker:

I have before me for consideration L. B. 494. I understand the

purpose of this bill was to provide additional assistance funds for the remainder of this biennium, a supplementary appropriation to raise the biennial appropriation to not to exceed \$7,800,000. Before taking action on same, however, may I call your attention, and through you, the attention of the Legislature, to the conditions which would be created if this bill becomes a law.

1. All of the five cent gasoline tax collected until July 1, 1939, would be made available for state assistance activities.

2. No gasoline tax revenue would become available during this period for construction or maintenance of the state and federal highway system, or for county road purposes as well.

3. From the standpoint of state administration, this would require virtually complete stoppage of all highway maintenance and of the major part of highway contracts on construction. This latter feature would seem to be the more serious because failure on the part of the state to carry out its contracts would in all probability render the state liable for tens of thousands of dollars of damages for such failure to perform contracts.

Because of the emergency nature of this legislation, I am calling this matter to your attention promptly and I am deferring action on same to permit the Legislature to give this matter further consideration if so desired.

Respectfully submitted,

(Signed) R. L. Cochran
Governor

MOTION—To Request the Return of Bill

SELECT COMMITTEE REPORT**Legislative Insurance Investigation Committee on Suggested
Legislative Program****Insurance**

Most of the companies organized under the laws of this state, as well as foreign companies operating in Nebraska, enjoy a good reputation, and this is the result of years of careful management, close supervision, and the faithful following of the soundest principles in organization and growth. These good companies are a credit to insurance business and are rendering a real service to the citizens of the state. It is often this good will and high regard for sound insurance which furnishes the professional promoters with their opportunity for commercializing insurance for personal gain. We address our remarks in this report to unsound practices and policies both in insurance companies and in their supervision by the Department of Insurance. The committee has had and used many valuable suggestions made by insurance companies, attorneys, the Department of Insurance, and citizens generally who are interested in keeping the business of insurance upon a sound basis.

We find that there are operating in Nebraska 588 various types and forms of insurance companies divided as follows:

Life insurance 148, of which 123 are foreign and 25 domestic companies. In the fire insurance field, there are 299 companies of which 225 are foreign and 74 domestic. In the casualty field, there are 141 companies of which 114 are foreign and 27 domestic. The number of life insurance policies in force in Nebraska, which includes stock companies, mutual legal reserves, fraternal, and burial associations, amounts to 820,988. Of this number the domestic life insurance companies have 116,996 policies. The income from the premiums of all companies li-

censed in Nebraska in 1938 amounts to \$51,052,833.00. Of the insurance premiums paid, \$10,966,875.00 represent premiums paid for fire, tornado, and hail insurance. These companies returned to the citizens \$5,363,705.00 in the form of claims paid. The life insurance premiums represent approximately \$29,000,000.00. Casualty, health and accident, fidelity and surety companies collected \$10,207,000.00 in premiums and returned \$4,772,000.00 to policyholders. These premium payments amount to more than all the taxes on real estate in Nebraska. In addition to this, these insurance companies paid to the state \$98,220.18 in the form of agents and license fees. The companies also paid premium taxes from which the Department of Insurance turned into the state general fund, during this one-year period, \$586,942.16. The business of insurance supports and affects more people in Nebraska than any other industry or occupation except agriculture.

The problems presented in the study made by your committee are of two classes, (1) those arising out of the form of our present statutes and, (2) those arising out of the administration of the insurance laws by the insurance department.

Legislative Problems

Legislative problems are presented under nine headings:

- (1) Sale of stock in formation of companies.
- (2) Formation of assessment companies in fields other than fire and windstorm.
- (3) Operation of assessment companies without adequate resources.
- (4) Procedure in mergers and reinsurance of companies.
- (5) Absence of penalty for writing insurance without a license from the state.
- (6) Lack of financial standards for burial associations.
- (7) Unsoundness of so-called Thrift Insurance.
- (8) Inability to bring non-admitted companies into Nebraska courts.
- (9) Insufficient standards for capital requirements in organization of new mutual companies.

To meet these legislative problems your committee has recommended and introduced Legislative Bills 499 to 507, inclusive.

(1) Sales of Stock in Formation of Companies

Nebraska is one of the highest among states for number of home offices located in the state. The fact that promotions and mergers have been easy in Nebraska has encouraged the merchandising of life insurance companies. In the past, too many unscrupulous promoters have operated in Nebraska with but one purpose, and that, of obtaining funds to create a mushroom development of companies profitable to the promoters and often a source of loss to the stockholders and policyholders. Stock has been sold for three or four times its par value. It seems that in the formation of insurance companies the stockholders should control the formation of their companies in preference to the promoters. The sale of this promotional stock to the public should be discouraged.

Under our laws, promoters with little or no conscience have often fleeced our citizens out of funds with which to launch their insurance ventures. They have often wasted both the capital contributed and the trust funds accumulated for the policyholders. The same promoters then have reaped unearned profits by the sale of the business on the books. This type of manipulation and the selling down the river of insurance companies, whose assets belong to the policyholders, is not in the interest of good insurance or the citizens of this state. If all of these details concerning mergers and promotions had been given full publicity, there would be less complaint today about losses to the policyholders.

There can be no criticism in the case where companies are organized in good faith and for the primary purpose of furnishing good insurance at a reasonable cost; but the promotion of companies in a widespread scale where profit to the promoters is the main objective, should not long be permitted to go unchallenged. The public is fully aware of the evils just mentioned and they demand that corrections be made.

To correct this abuse your committee recommends the passage of L. B. No. 499. This bill will limit the sale of stock for organization purposes to one and one-fourth times its par value. This limits the promoters to a surplus margin which will keep the control of the company in the hands of those who have supplied the capital. In the opinion of your committee the effect will be to restrict company organizations to small groups which supply their own capital and end promotional stock selling to the public.

(2) Assessment Companies

In the past, it has been too easy for assessment companies of the health and accident type to organize in Nebraska. A number of com-

panies are operating whose assets are less than \$100.00. One of the difficulties in our present legislative policy is the giving of permission to enter many fields of insurance on an assessment basis. The fundamental principle of assessment insurance is that those who take policies agree to pay each other's losses. A company so organized, therefore, is never insolvent in a technical sense. Its assets consist of promises from policyholders to pay whatever is necessary to meet losses. In this field the state has experienced a generally satisfactory result in local assessment companies of a fire and windstorm type. This is typical of the farmers' mutual fire insurance organization. They are locally governed, the policyholders know each other, the officers receive little or no salary and they are operated more as a mutual aid society. In the wider field of assessment insurance a different story is told. Here the policyholders do not know each other, nor do they know those who experience claims or losses. It is doubtful if the policyholders realize that they are obligated to pay one another's claims. The promoter is not careful in underwriting. He is more anxious to get business than to pay claims. The files of these companies are full of resisted claims which will never be paid or adjusted. If companies desire to write this type of insurance, they should be willing to risk some of their own money. The importance of this is measured by the experience of assessment companies whose average life is approximately two and one-half years. The impairment of these companies makes it impossible for the people who have losses to collect their benefits.

To meet the situation presented, your committee recommends the passage of L. B. 500. Under this bill, the way is left open for further organization of farmers' mutuals over the state in the fire field; but future organizations on the assessment plan will be excluded in all other fields.

(3) Operation of Assessment Companies Without Adequate Resources

In order to further strengthen our laws with reference to existing assessment companies, your committee urges the adoption of L. B. 501. Because of their power to assess their members, such companies cannot become insolvent in the sense that the capital stock and reserves of a stock company or the reserves of a mutual company may become impaired and render it insolvent. Under the terms of the bill, the Department of Insurance may make an examination of such assessment companies; and if it finds that their assets and resources do not justify their continuance in business, it may determine what additional funds are necessary; and if the deficiency is not made good within thirty days, the company may be proceeded against as an insolvent company.

(4) Procedure in Mergers and Reinsurance of Companies

The management of an insurance company should not be permitted to barter and sell its obligations and the assets collected, which often belong to the policyholders, without a careful supervision, full publicity, and consent by the Department of Insurance and the participating policyholders.

In order to turn the spotlight on these transactions in the future and in order that full publicity and ample notice be given, your committee has introduced L. B. 502. We very earnestly stress the importance of this measure and recommend its enactment into law.

Under the present law a proposed reinsurance contract is simply submitted to the Department of Insurance and if it approves, the contract may be put through by a vote of the directors, if a stock company, or by the members at an annual meeting, if a mutual company. Only in case the matter is taken up at a special meeting of a mutual company is there any requirement that notice be given to stockholders or policyholders. This makes it too easy for those in control of a company to merge it with another company or reinsure its entire business.

In the bill it is provided that the proposed contract must first be approved by the boards of directors of both companies and submitted to and put on file with the Department of Insurance for examination and orders. If the department gives a preliminary approval, a notice must be sent to all stockholders and all participating policyholders, if a stock company, or to all policyholders, if a mutual company, giving them 60 days in which to file protest. Provision is also made for publication in a newspaper published at the place the company is located. In both the newspaper notice and the notice to be mailed to stockholders and policyholders, there must be included a full copy of the proposed contract so everyone interested can be fully informed. If any protest is filed, a hearing is to be held before the Department of Insurance within thirty days, but at least 5 days' notice must be given to those protesting. The Department must decide the matter within a reasonable time and give immediate notice of its decision to those interested so that if they wish to appeal to the courts they may do so.

With such notice and publicity provisions it would seem impossible to put over an unfair merger or reinsurance.

(5) Absence of Penalty for Writing Insurance Without a License

A bill has been introduced to correct the present defect in the law which permits agents to write insurance without proper licenses.

The committee has found that although the Nebraska statutes require that agents soliciting contracts for insurance must first obtain

an agent's license, that no provision exists to penalize persons who act as agents and sell insurance without obtaining the license. Under the present law the state can control agents who are licensed, but is powerless to control unlicensed agents. One result of this statutory defect is that our people have been exposed to an unusual type of undesirable salesmen representing financially weak foreign insurance companies unable to gain legal admission to Nebraska, and all hiding behind the good repute of legitimate insurance.

These foreign companies who have not or cannot comply with the financial structure requirements of our statutes have sent their unlicensed agents into Nebraska pretending to have the sanction of our laws and by this species of misrepresentation induced our people to place their trust in their weak or insolvent companies. Foreign companies not even able to obtain the approval of insurance departments of their own states have sent their unlicensed agents into Nebraska to ply their schemes of misrepresentation upon our citizens. Because such foreign companies were not violating the laws of their own state when they sold insurance in Nebraska, and because Nebraska had no statute by which the agent could be penalized by fine or imprisonment, both company and agent escaped through technical loopholes. The Committee urges the passage of L. B. 503 which will block the loophole through which this charlatan practice escapes the Nebraska law.

(6) Lack of Financial Standards for Burial Associations

Burial associations should be required to put up proper assets and be treated as life insurance companies. The amount of insurance they should be permitted to write should be limited to amounts sufficient to insure a decent burial.

In 1931 a burial association statute was passed by the legislature, providing a system by which certificates of membership could be issued to a named beneficiary to provide funds to cover funeral expenses. The committee finds that the practical operation of these associations is simply to engage in the business of life insurance. Because of this fact, the same safeguards as protect life insurance policyholders should be applied to burial associations. Investment of their funds should be controlled by the same laws as are applicable to life insurance companies, and they should maintain the same reserves. Sales of stock in such corporations should be surrounded with the same restrictions as the committee has found desirable in the case of life insurance stock sales. It should be made clear to the buyer that he is purchasing a burial benefit certificate, and the amount of such certificates issued to any one individual should be limited to reasonable funeral expenses.

The committee has submitted L. B. 504 to cover these objectives and recommends its passage.

(7) Unsoundness of So-called Thrift Companies

The committee feels that thrift insurance is not in the interest of the public and has suggested legislation to remove this type of insurance contracts in Nebraska.

What has come to be known as "Thrift Insurance" first became prominent about 1923. It grew out of an idea that by pooling their small monthly contributions a group who desired to accumulate some savings could better invest and manage their capital as one fund than individually. Coupled with this thought was the further idea that persistence in the saving effort could be encouraged by penalizing those who ceased making monthly contributions before the end of the agreed term and dividing these penalty charges as a bonus among the persisting members. This bonus was called "Persistency Profits."

During the twenties, a number of "thrift" companies were organized in Nebraska to promote this plan which is obviously and basically a banking or savings association function. An incidental insurance twist was given the idea by including a small life insurance benefit in the participating certificates sold in the fund. The life insurance benefit was usually in an increasing amount equal to approximately 125% of the contributions made. These certificates, which contained a more or less detailed "Participation Clause" usually set out that a separate "dividend" fund would be set up into which would be deposited all profits from lapses and surrenders as well as excess interest earnings, savings from mortality and loading (the part of the premium which is included to defray costs of administration). Salesmen employed by these companies utilized this clause and particularly the idea of "persistency profits" to paint to their prospects a rosy picture of large returns on their investment. Many "thrift" certificates were sold on the theory that the purchaser would be one of the few in the group who would persist in his contributions over the full ten (10) year term and that he would be rewarded by a large bonus or dividend accumulated from the penalties assessed against the members of the group who would fall by the wayside. Too frequently this element of speculative gain was so emphasized that the impression was left in the buyer's mind that the anticipated dividend was a guaranteed benefit. That the actual dividends accumulated and distributed have not met the buyer's expectations is a notorious fact. The "persistency profits" from charges against lapses and surrenders did not reach the size prophesied and the companies were able to set aside only relatively small amounts from the other usual sources of profit. Mortality savings were not great because the life insurance feature was an incidental.

From the standpoint of the public and the insurance buyer there are definite objections to "thrift insurance";

1. There is no economic justification for a savings plan which holds out the prospect of large speculative profits for a few to be acquired at the expense of the many who cannot make contributions for the full term.

2. The idea of "persistency profits" lends itself readily to gross misrepresentation.

3. The plan while masquerading as insurance because of an incidental insurance feature is in reality a banking or savings idea and should be considered as such.

4. Because the plan made no differentiation in the amount of the contribution because of age, the cost of the mortality feature was not fairly spread over the group.

5. Standard old line endowment insurance providing for the accumulation of a definite amount of savings and conferring a larger constant amount of death protection can be obtained at most ages for a premium relatively much lower than "thrift insurance."

We therefore recommend passage of L. B. 505, which simply prohibits "thrift insurance" plans in any life insurance policies in this state.

(8) Inability to Bring Non-admitted Companies Into Nebraska Courts

Another bill is recommended which will place unlicensed companies selling insurance by radio, mail and newspaper advertising, under the jurisdiction of the courts of Nebraska.

With the rapid growth of insurance selling by direct mail, by radio, and by newspaper advertising, the problem of obtaining jurisdiction in Nebraska courts over such insurers not admitted to do business in Nebraska, calls for new legislation.

This kind of insurance is usually provocative of much misunderstanding and claimants are put to the disadvantage of going to other states to press their claims. L. B. 506, introduced by this committee, provides that when the non-admitted companies deliver the policy in this state, the act of delivery makes the director of insurance the agent of the company for service of process. The effect of the bill will be to enable policyholders to bring the company into our state courts.

(9) Insufficient Standards for Capital Requirements in Organization of New Mutual Companies

Mutual insurance companies may be formed to transact any of the 14 classes of insurance specified under Section 44-401 of the statute. To begin business, assets of ten times the maximum single risk,

and 200 risks are required. The maximum single risk is defined by Section 44-411 as three times the average policy, or one-eighth of one per cent of the insurance in force, whichever is greater. By starting with 200 small policies, for example, 200 policies with only \$250.00 at risk, the average risk would be \$250.00, three times that would make \$750.00 the maximum single risk, and ten times that, or \$7,500.00 would be the asset requirement.

Having secured license to do business, the size of the policies could be increased. While the regular legal reserve would be required on such larger policies, the asset requirement in addition to the reserve would remain at only \$7,500.00, a sum clearly inadequate for proper protection of policyholders under many of the kinds of insurance specified in 44-401. We, therefore, recommend that a minimum of \$30,000.00 be required for each class of business to be transacted by mutual companies and L. B. 510 amending Section 44-410 has been introduced to accomplish that result.

To the Members of the Legislature:

Gentlemen:

I am directed by His Excellency, Governor R. L. Cochran, to inform your honorable body that he has this day approved the following bill:

L. B. No. 362.

Respectfully submitted,

(Signed) Otho K. De Vilbiss

RESOLUTIONS

LEGISLATIVE RESOLUTION NO. 31. Navigation on Missouri River.

Introduced by Rossiter of Thurston, Mischke of Knox

RESOLUTION

Memorializing the Congress of the United States to promote, initiate and support legislation for the purpose of facilitating the transportation of products of Nebraska and adjacent states and the development of mining, industrial and agricultural interests by making the Missouri River navigable from its mouth to Chamberlain, South Dakota, through construction of dams and other facilities.

PREAMBLE

WHEREAS, engineers of the United States Army are constructing a dam across the Missouri river at Ft. Peck, Montana, in order to control the waters of the Missouri river below said dam, to aid navigation of said river from its mouth to the location of said dam, and

WHEREAS, the Missouri river through the efforts of United States Army engineers has been, or will shortly be, made navigable from its mouth to Sioux City, Iowa, and

WHEREAS, it is believed that a survey made of the Missouri river from Sioux City, Iowa, to Chamberlain, South Dakota, by U. S. Army engineers would show that this stretch of river can also be made navigable at reasonable cost, and

WHEREAS, the establishment of a water route for Nebraska products on the inland waterways of the United States would result in greatly lowered rates for transportation thereof, and would result in immeasurable benefits to Nebraska producers and producers of adjacent states, and

WHEREAS, the establishment of such water route would necessarily result in the elimination of bank erosion on a serious scale by the river, which bank erosion, at present, destroys good Nebraska land of the value of thousands of dollars yearly, and

WHEREAS, such water route to Chamberlain, South Dakota, would render immediately available immense deposits of manganese located near Chamberlain, South Dakota, and render the United States independent of manganese deposits in Europe, which might be cut off in case of war, and

WHEREAS, would furthermore open up immense deposits of coal and many other useful and valuable minerals found in the Missouri river valley and result, by reason of the industries which would be developed, in giving employment directly or indirectly to thousands of our people, and

WHEREAS, dams placed at intervals, by U. S. Army Engineers' survey, will result in flood control, the improvement of navigation, the furtherance of irrigation, and the production of hydro-electric power, all of which will be of great benefit to the people of Nebraska and adjacent states, and

WHEREAS, the hydro-electric power so generated would be largely used in developing the manganese and other industries located along the valley of the Missouri river and contiguous territory,

NOW THEREFORE

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF NEBRASKA IN FIFTY-THIRD REGULAR SESSION ASSEMBLED:

1. That the Congress of the United States be, and hereby is petitioned and requested to enact legislation providing for progressive construction and completion of the necessary work to complete the Missouri river for navigation, flood control, and other things above mentioned, thereby providing a water route of nine foot channel depth to Chamberlain, South Dakota, and further if deemed advisable to the best interests of the United States.

2. That this resolution be spread at large upon the Journal of this Legislature; and that the Clerk of this Legislature is hereby ordered and directed forthwith to forward a copy of this resolution, properly authenticated and suitably engrossed, to the President of the United States; to the Vice President of the United States as presiding officer of the United States Senate; to the Speaker of the House of Representatives of the United States; and to each of the United States Senators and Congressmen representing the state of Nebraska in the Congress, to the end that representatives in the government and in the Congress of the United States will be advised that this Legislature considers as imperative remedial federal legislation which will make the Missouri river navigable from its mouth to Chamberlain, South Dakota, as set forth in the preamble of this resolution.

SELECT COMMITTEE REPORT**Investigation and Examination of Department of Insurance**

Your special Legislative Insurance Investigation Committee appointed on the 24th day of February, 1939 to investigate the Insurance Department and Bureau of Securities makes the following report and moves for its acceptance.

It has never been the opinion of the committee that it was created with the idea of bringing in a complete and thorough investigation of the Insurance Department and Bureau of Securities or of the companies operating under them. It was our opinion that we were to inform the Legislature as to whether a thorough investigation of these problems would be advisable. We suggest legislation to correct existing evils in the laws.

It has been our sincere purpose to give you as clear and concise a report as possible regarding the examination of the Department, portraying the facts as they have been found, backed by evidence as nearly uncontested as the findings and the time would permit. The committee has tried to set out where negligence or mismanagement exists. We have tried to be as thorough, unprejudiced, and unbiased as possible in so large an undertaking. The committee has had no desire to prosecute or persecute the Department of Insurance or any company writing insurance. Our entire attitude has been that of locating the difficulty, if any, and then applying the proper remedy.

The committee has interviewed 75 persons and has accumulated 304 pages of testimony. From these interviews and extensive data presented to us, we are forced to conclude that certain improvements

could be made in the management of the Department of Insurance and Bureau of Securities. We also feel that certain of our laws are insufficient and need clarification to be fully effective as to enforcement and to bring about the necessary investigations in connection with conversions and mergers to more adequately protect the policy holders.

The committee feels that the Department of Insurance and Bureau of Securities should represent and protect the citizens as required by law. Permitting violations will cause tremendous losses to the citizens of the state.

Health and Accident Assessment Companies

The Department testified that more than one-half of the complaints were those involving health and accident assessment insurance companies. There are a number of such companies doing business in Nebraska with little or no assets. Their policy liability is very restricted. Many losses have been sustained by the citizens through the operation of this type of assessment insurance company. The operations of these companies should be prohibited in Nebraska as previously recommended by our committee. Individuals desiring to form new companies should be willing to risk some of their own moneys.

Approval of Mergers, Reinsurances and Conversions

Section 44-414, Compiled Statutes of Nebraska, 1929, charges the Department with the duty of protecting the policyholders under any reinsurance, merger or consolidation plan. The law specifically provides that independent investigations and audits should be made by the Department of Insurance of all new companies, mergers, reinsurances, and sales of insurance companies. The law provides that the expense of such investigations shall be borne by the companies being investigated. Our auditor reports in part as follows regarding the sale and merger of three Nebraska companies with a foreign company:

"No figures or lists of assets and liabilities are on file indicating the basis of reinsurance contracts. No information relating to the disposition of the surplus and assets of such retiring company was made available to your examiner."——

"Sufficient information was not available to enable a reviewer to pass on the evidence in reaching the conclusions for approval for the reinsurance contracts so that the interests of policyholders are properly protected."——

"If all assets of the Nebraska companies were transferred to the foreign company, the examiner was unable to trace quite a number of specific assets to the foreign company. This would indicate that some assets were withheld and not trans-

ferred. All liabilities of the Nebraska companies were assumed by the foreign company, yet at the end of the year the foreign company shows no surplus to policyholders and the apportioned dividends to policyholders are less than the equivalent of the Nebraska companies at the end of the prior year. There are indications that the foreign company made a substantial profit for assuming the risks of these companies. There were apparent violations of the insurance code at the time an examination of the companies was in progress. Important records were moved out of the state and this was being done without the consent of the Department or examiners."_____

Violations of Section 44-302 and Section 44-314 are evident. Quoting further from the Auditor's report.

"The President and officers of the company who acted as agents took a 30% profit as an organization or promotion expense, and therefore, would be in violation of Section 44-302. . . . Several instances are on record where officers took a 30% promotion or organization expense. If the commissions were paid in consideration for making the loan, then a violation of Section 44-314 took place, which holds that no officer or director shall benefit for negotiating any loans. The examiners report showed the company carried as cash on hand no-fund checks of a former officer. No action seems to have been taken by the Insurance Department in this matter."

The committee feels that a careful supervision and examination should be made of all companies who have participating assets belonging to the policy-holders.

Failure to Check Value of Securities Deposited

The law requires domestic insurance companies to deposit and maintain all their assets with the Insurance Department until they reach the total of \$100,000.00 for the protection of the policyholders. The State Auditor finds that some of the assets so deposited have declined greatly in value. Many mortgages are listed from other states whose value has never been checked. We find mortgages deposited as good assets which are more than four years past due.

Some of the stocks and bonds as listed on the stock exchange have as little as 10% of their original value. The committee feels the law should be strictly enforced as to the requirement of depositing and maintaining the proper deposits by insurance companies.

Indiscreet Licensing of Agents

Officers of the Department of Insurance and Bureau of Securities stated before the committee that they issued licenses as a routine

matter without regard to the personal qualifications or history of the applicant. Our investigation disclosed the fact that one man had a license to write insurance under his own and three different assumed names. This man has a criminal record, and the Department had full knowledge of his conviction of a felony and of his use of fictitious names in securing licenses. If the licenses are to mean anything at all, they should indicate that the persons holding such licenses are honest and reputable and have a knowledge of insurance and securities. The committee can find no moral justification for the Department's action in continuing this man's license in the face of his conviction and the fraud he perpetrated upon the Department by securing licenses under fictitious names.

The Office of Director of Insurance

The writing of insurance should be a trust. Insurance companies, acting in the capacity of a trustee, should at all times protect the interests of the policyholders.

Insurance differs from other forms of business in that its chief justification for existence is the safe handling of funds for the protection of policyholders and their beneficiaries and, as such, should be surrounded with all the safeguards possible. Companies which have for their objective the insuring of lives are performing a service. Those who furnish capital are entitled to a legitimate return on the capital they have invested: but to manipulate a company in such a manner as to result in unreasonable profits to promoters or those supplying capital at the expense of thousands of policyholders has no place in insurance.

When a concern is so weak financially or so extravagantly and carelessly managed that it collapses, the resulting penalty on the betrayed policyholder is indeed heavy. The policyholder loses the stake he has put aside for the protection of his family if he dies, or for his own security in the event of disaster.

In the preservation and development of good business practices, the state has a great interest; and our legislative policy should be constructive and give encouragement to sound practices. It takes character, courage, integrity and ability to interpret and enforce laws with justice. No law can be effective unless the Department administering the law does so with courage and fairness. There must be capable and honest management of insurance companies.

The committee feels that the head of the Department of Insurance should be approved by the Legislature as provided by law. The present Director has not been so approved.

The Director should have a six year term of office, removable only by the Governor or Legislature for cause, and should be required to report to the Governor and the Legislature every two years. He should be a man of known ability, education, and experience in all lines of insurance in which he is to supervise. The salary should be such as to attract a capable man.

Securities

The administration of the Bureau of Securities prior to March 7, 1939 was not satisfactory. On March 7, a change was made in the head of this Department, and our remarks are necessarily directed to the affairs of the Bureau previous to this date.

Your committee made extended inquiries into the business of stock and bond selling as well as into the activities of the Bureau of Securities. Many witnesses and exhibits have been examined. We have had the assistance of attorneys, departmental employees, and citizens engaged in the business of selling bonds and stocks or who are interested in that subject matter. We have had the benefits of their views as to needed legislation. The committee suggests amendments to our present laws which will place greater restraint upon the activities of selling certain securities. The protection of the public will depend entirely upon the quality of service and the willingness of the Bureau to require a rigid enforcement of the laws which would protect Nebraska investors. The new director will more effectively administer the Department.

There have been many complaints in regard to fraudulent sales of securities in the State of Nebraska. Many of these complaints have been recorded with the Department of Securities. Records show that more prosecutions should have been instituted by the Department for violations of the Blue Sky Laws and that sufficient independent investigations have not been made by the Department into the validity of these complaints. The committee finds that many of our citizens have been imposed upon by unscrupulous promoters employing fraudulent schemes to profit at the expense of the thrifty and saving. The Bureau of Securities exists for the protection of the individual from fraudulent schemes. The Bureau has issued important authorizations involving large sums of money without making proper investigations.

The law fixes responsibility and endows the Bureau of Securities with the authority to cancel or suspend licenses of brokers and securities salesmen in cases where gross misrepresentations have been made or fraud has been committed against the investors of our state.

Licenses were issued by the former Director to individuals without regard to their past history or moral qualifications. Many com-

plaints were lodged against securities salesmen and were not all thoroughly investigated. The committee feels that the Department should exercise the most rigid care in making certain that the applicant is honest and reputable before granting him a license to sell securities.

During the course of the investigation by your committee, a securities scandal of an Omaha investment company was made public. It was shown to the committee that complaints had been made to the Department concerning the activities of this company, and that complainants had urged the Department to make its own investigation and to take whatever steps were necessary in order to protect the investing public. At that time, an officer of the Bureau admitted that the Department had authority to investigate all investment companies which they licensed. The former Director contended he had no authority to control the company under the existing law.

The head of the Department testified that he had personally spot-checked the securities of this Omaha concern. He reported them in good condition, and yet within a short time the company was in the hands of the courts. There will be a tremendous loss to the holders of these securities. The committee feels that had a careful investigation been made, the buyers of these securities might not have sustained such a loss.

It was the opinion of many of the witnesses heard before the committee that the securities law was not radically defective, but that our problem is one of proper policing and administration.

Your committee realized that applying the proper remedy to safeguard the purchases of certain securities is a difficult task. Every legislative protection seems destined to be undone by shrewd racketeers who often use the legislative shield to fashion a weapon. It is a legislative function to establish safeguards to prevent unscrupulous promoters applying their practices of fraud and deception upon the citizens of the state. The committee further realizes that it is impossible to legislate judgment or morality into the citizens. We realize that regardless of the law, unless there is a strict enforcement of the law the legislative safeguards we establish will be of little effect.

The committee feels that an adequate salary should be offered to the head of this Department in an effort to attract men of ability and understanding in the field of securities. From our witnesses and the evidence presented, we believe that the Bureau of Securities should be placed under the Banking Department as provided for in Legislative Bill No. 307. The Department of Banking is more adequately equipped to administer the affairs and duties of the Bureau than the Insurance Department. Bank examiners are available to make investigations, and their training and official activities suggest that their employment

would produce both efficiency and economy. The Bureau must have adequate funds to carry out to the highest degree of efficiency in the administration of the enacted laws.

It is the committee's belief that, like other states, Nebraska needs a study of the entire insurance and securities practices. Such an investigation cannot be completed during the time the legislature is in session. The members of the committee have a multitude of other problems to consider. There has been a difference of opinion among the members of the committee as to the wisdom of continuing the investigation.

Supplemental Report of A. L. Miller

TO THE MEMBERS OF THE FIFTY-THIRD SESSION OF THE NEBRASKA STATE LEGISLATURE—1939:

Since there has been a difference of opinion in the committee as to the advisability of continuing the Insurance and securities investigation, I desire, as chairman of the committee, to state frankly my views.

It is my honest opinion that a committee for investigation should be continued.

I feel that in the short time the committee has been in existence it has just scratched the surface of a very bad condition existing in the sale of unlisted securities and in certain insurance companies. The mere existence of this committee has prevented additional authorizations for the issuing of securities of doubtful value.

Continuing an interim investigating committee would give the beneficiaries of insurance a safeguard against unsound promotions, mergers and manipulations by the unscrupulous, the selfish, and the corrupt promoter. The existence of a committee would give this important watchdog of public interest, the Insurance Department, additional moral support. It seems certain that the citizens who have more than 800,000 policies representing \$1,015,921,721 and who pay \$51,082,000.00 a year in premiums are entitled to every protection and a thorough investigation of the Department of Insurance and the companies who are selling them insurance.

There are many good companies operating in the state who enjoy splendid reputations and are rendering a real service to that impersonal yet important group, the investing public.

There are certain bills recommended by the committee which if enacted into law, and then the law enforced, would correct some of the abuses.

The committee should have sufficient funds for investigating and reporting to the citizens and the legislature, giving a clear-cut, impartial picture of what is happening in the sale of securities and the various types of insurance.

I urge your careful, unbiased consideration as to the wisdom of continuing some committee for further investigation.

(Signed) A. L. Miller, Chairman.

Supplemental Report of Hugh B. Ashmore

TO THE MEMBERS OF THE FIFTY-THIRD SESSION OF THE NEBRASKA STATE LEGISLATURE—1939:

The last sentence of the report of the Legislative Insurance Investigating committee is as follows:

“There has been a difference of opinion among the members of the committee as to the wisdom of continuing the investigation.”

It was agreed that each member of the committee might submit a supplemental report of his conclusions, opinions and recommendations.

It was not my opinion that this committee was created with any idea of bringing in a thorough and complete investigation of the Insurance and Securities Department, or of the companies operating under them. Rather it was my opinion that we were to inform the Legislature as to whether a thorough investigation of these problems would be advisable. Even though all of the membership of this special committee had other duties to perform, we have interviewed a great many people, and have a very extensive amount of data and suggestions that have been presented to us. From these suggestions, I have been forced to conclude that certain irregularities have been taking place in our Insurance and Securities Departments.

The committee has checked into the affairs of some of the companies and found what seemed to me to be evidence that would indicate that the policyholders are not being properly safeguarded. It has been suggested to the committee on several occasions that if we made any criticism of insurance companies that we should be specific and name the offending parties. In the limited time at our disposal, this

would be impossible without more thorough investigations and audits. I am of the opinion that there are many sound Nebraska companies, as well as foreign companies, writing insurance in our state. I also feel that there are some in both classes that should be carefully examined.

Something like fifty-one million dollars (\$51,000,000) was spent by the people of Nebraska last year for insurance. That is a staggering sum in these times. Therefore, the subject of insurance is of tremendous importance.

The state owes its people an unusual duty to see that they get their money's worth, that their savings are protected, and that the widows and children get every cent of the "protection from poverty" that their dead husbands and fathers worked to provide for them.

The committee spent a lot of time, a little money, and listened to many witnesses. It heard about sales, mergers and consolidations of companies, approved by the Insurance Department, and later modified or upset by the courts. Lawyers were blamed for much of the trouble, but in most of the cases the lawyers started, they won in the courts for their clients and the other policyholders. There are suits pending at the present time. Apparently there are apt to be some more mergers, sales and attempts to "shuck out the surpluses and contingency reserves" for the benefit of the officers or a select few, but not for the benefit of the policyholders.

If the Legislature should decide that further investigation is advisable, the committee should be provided with adequate funds, so that complete actuarial audits can be made. It should be concerned first with documentary evidence. After having satisfied itself from such evidence, it should call in the officers of the company and give them an opportunity to be heard. If the committee still feels it is correct, then a public hearing should be held. The committee should not start on a "witch hunt" to persecute anyone or anything, but it should run down some of the things to the end. This cannot be done in a short time. This will take time and cost some money. But we collect half a million dollars in taxes every year from insurance premiums and the honest companies that pay them are entitled to protection, as well as the policyholders. I believe they would welcome a proper investigation. Many of the officers have told me so. An honest company has nothing to fear. Only those who have something to hide would oppose the interim committee.

The members of the committee have sacrificed their time. If the committee is continued some one must be willing to sacrifice some more of his time for the good of the people of Nebraska. No member of the Legislature can draw a cent of pay for serving on this committee dur-

ing the next year and a half. But the work should be done and some of our members should be willing to do it.

I have presented this supplementary report because I am opposed to any attempt to "whitewash" the situation. This investigation should be continued and not be "smothered" by any influence whatsoever.

(Signed) Hugh B. Ashmore, Vice-chairman.

Explanation of Vote

Mr. President: I am voting against this bill, (471) because it creates another bureau or commission, which, when created, will continue to grow from year to year and make further demands for money upon future Legislatures. This bill gives almost unlimited authority to a new commission to spend \$50,000.00. It will be another political organization to perpetuate itself and its party in power at public expense. Introduced by Miller of Kimball, Thomas of Douglas, Gantz of Box

Butte, Neubauer of Harlan, Howard of McPherson.

Memorializing the Honorable Henry A. Wallace, Secretary of Agriculture of the United States, to cooperate with and assist the Nebraska State Railway Commission in securing reconsideration by the full interstate commerce commission of their decision retaining present freight rate discriminations against grain growers in western Nebraska.

Preamble

WHEREAS, proof has been presented to the Nebraska Unicameral Legislature that the levels of freight rates on shipments by rail of grain between points in western Nebraska and the home market at Omaha, Nebraska are relatively much higher than the freight rates on grain shipments for equal distances between points in neighboring grain producing states and their nearest market, and

WHEREAS, a few odious examples of such discrimination are as follows:

	Rate	Distance
"Kimball, Neb. to Omaha.....	27 cts.	442 miles
Weskan, Kan. to Kansas City..	23 "	442 "
Ottman, Neb. to Omaha.....	27 "	382 "
Modoc, Kan. to Kansas City....	22 "	420 "
Sidney, Neb. to Omaha.....	27 "	407 "
Deerfield, Kan. to Kansas City.	23 "	403 "
Haugler, Neb. to Omaha.....	24 "	356 "
Brewster, Kan. to Omaha.....	22 "	365 " "

and

WHEREAS, the Nebraska State Railway Commission has complained to the Interstate Commerce Commission on two occasions, setting out the facts and demanding relief, and

WHEREAS, such complaints have been supplemented by petitions and letters from farmers' cooperative associations in such territory, and

WHEREAS, relief has been denied in each case by the Interstate Commerce Commission, and

WHEREAS, the Nebraska State Railway Commission has now made a final plea for an opportunity to be heard in oral argument before the Interstate Commerce Commission, sitting en banc, and

WHEREAS, a conservative estimate of the minimum direct loss to the Nebraska producers in such territory is two hundred thousand dollars per year, and

WHEREAS, under the provisions of Section 201 (a) of the Agricultural Adjustment Act, the Secretary of Agriculture is authorized to make complaint and to cooperate with and assist cooperative associations of farmers making complaint to the Interstate Commerce Commission with respect to rates, charges, tariffs and practices relating to the transportation of farm products, NOW THEREFORE

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF NEBRASKA IN FIFTY-THIRD REGULAR SESSION ASSEMBLED:

1. That the Nebraska Unicameral Legislature respectfully requests the Honorable Henry A. Wallace, Secretary of Agriculture of the United States, to cooperate with and assist the Nebraska State Railway Commission, acting on behalf of the cooperative associations of farmers, in securing reconsideration by the Interstate Commerce Commission, sitting en banc, of the question presented in the preamble of this resolution and to cooperate and assist in every way possible to bring about a proper and fair adjustment of the freight rates on the shipment of grain from western Nebraska to Omaha, Nebraska.

2. That this resolution be spread at large upon the Journal of this Legislature, and that the Clerk of this Legislature is hereby ordered and directed forthwith to forward a copy of this resolution, properly authenticated and suitably engrossed to the Honorable Henry A. Wallace, Secretary of Agriculture of the United States, to the President of the United States, to the Vice President of the United States as presiding officer of the United States Senate, to the Speaker of the House of Representatives of the United States; to the Interstate Commerce Commission of the United States; and to each of the United States Senators and Congressmen representing the state of Nebraska in the Congress to the end that representatives in the government and in the congress of the United States will be advised that this Legislature considers as imperative the reconsideration by the Interstate Commerce Commission, sitting en banc, of their decision retaining present freight rate discriminations against grain growers in western Nebraska, as set forth in the preamble of this resolution.

Thou canst not frown, O Death! Thy sullen brow
 Is marble-cast; thine ear is deaf and dead
 To sound; thine eyes are blind, and thou art led
 By wandering chance, nor knowest where or how;
 Nor smile nor frown can move thy visage, now,
 To fill the cup of joy, or pain. 'Tis said
 Thou hast no touch of sorrow for the bed
 Of anguish; thou dost scorn both weal and woe,
 And, merciless and pitiless, dost change
 The purposes of men, with frosted breath;
 Dost snap sweet ties and gentle bonds of love,
 And in thy prison-house—the grave—with strange,
 Relentless hand, dost bind the soul, O Death!
 And cheat the spirit of its home above.
 Yet, Death! thou art not victor. Through the gloom
 Of thy veiled face, like some dim-visions height
 In shadow, dawns the spirit's quenchless light—
 The vast reality of love—to loom
 Beyond the shuddering silence of the tomb!

WHEREAS, it is the desire of this body to render tribute to the memories of our departed friends and distinguished colleagues of other sessions, NOW THEREFORE

BE IT RESOLVED BY THE LEGISLATURE IN FIFTY-THIRD REGULAR SESSION ASSEMBLED:

1. That, when we consider the records made by our predecessors, who, at different times, have sat as members of the Nebraska State Legislature, — we are fully persuaded that their deeds and accomplishments have left a lasting mark upon our entire state; that they did their legislative tasks well; that their public service as legislators was distinguished by faithfulness and honor; that they guarded zealously their oaths of office, and, in sincerity of action first analyzed and then gave their votes for or against each measure as the welfare and happiness of the greatest number of all persons that resided in their respective districts, in their best judgment, seemed proper; that they gained no high titles nor ill gotten wealth, but true to the citizens whom they served, they built for the state which we all love—no higher tribute can we pay to these departed members, whom we pause to honor today.

2. That the Clerk of the Legislature be directed to spread at large upon the Legislative Journal, this resolution; and, that a copy of said resolution, properly authenticated and suitably engrossed, be, by said clerk, sent to each of the bereaved families of the deceased members of the Nebraska Legislature, above named, as an expression of our reverence to their memories.

Committee on Appropriations**Budget Message**

Your Committee on Appropriations, after nearly four and a half months of hearings, investigations and deliberations, has completed its labors, and transmits herewith its budget recommendations.

Our task has been an exceedingly difficult one. At times it was a distinctly unpleasant one, entailing, as it did, the rejection of pleas of worthy agencies and institutions. We were confronted by the greatest need in the state's history, and this need found both recognition and sympathy in your Committee. At the same time we were faced by the fact that the state's ability to meet its needs with adequate appropriations has declined, while the needs themselves were increasing.

In accordance with this viewpoint your Committee has found it necessary to reduce expenditures below the previous biennial requirements, because when the people are hard up it naturally follows the government must be hard up, and therefore it is necessary to apply the same principles of economy that you and I practice in our business and our home. We sincerely urge every department of state government to cooperate in this reduction in order that we may again see our general fund solvent.

Your Committee is not unaware of the needs of the state's educational, charitable and penal institutions. Some of these may be in danger of having their efficiency impaired through continued operation upon restricted budgets. Nor has your Committee ignored the plight of the aged and the unfortunate. Yet it could not ignore the fact that since 1929 the assessed valuation of all taxable property in the state has declined approximately 35%, and the income of the people has declined proportionately. Our farms are understocked, and crop and marketing conditions remain unfavorable. Tax delinquency, as a result of declining ability to pay, has increased to an alarming extent. Due to a constantly increasing demand of the people for more and better governmental services, particularly in connection with social security and highways, the cost of the state government has practically doubled since 1929. But with the present property valuation and rate of tax collection, a given mill levy will yield only about 60% as much revenue as the same levy would have yielded in 1929. Much of the increasing cost of government is being met by means other than the property tax, such as federal aid, the gasoline tax, the liquor tax, etc. We submit, however, that these costs are ultimately chargeable to the income and resources of the people just as truly as if they were borne by the property tax. We must discontinue the practice of trying to live upon what we want rather than upon what we can afford.

Your Committee, throughout its deliberations, has been conscious of its responsibility to the people of Nebraska. That responsibility, as the Committee understands it, is a dual one. The state government and its institutions exist for the sole purpose of providing certain services which the people, themselves, demand. Therefore, the first duty of the Committee was to recommend appropriations sufficient to enable the maintenance of at least minimum standards of service. At the same time, the cost of maintaining the state government and its institutions must be met by the people themselves, as the state has no resources apart from those of its people. Thus the Committee's second duty—no less important than the first—was to keep the cost of government within the reasonable ability of the people to pay.

At times the two duties of the Committee were in direct conflict with each other. If it had acceded to all the worthy requests presented to it, it would have recommended a budget far larger than any previous one in the state's history. On the other hand, if it had been guided solely by the pleas for economy, some of the essential services of the state would have been seriously crippled. But it is impossible to increase appropriations to care for expanding needs, and still reduce total costs in proportion to taxpaying ability. The perfect legislature—one which can increase appropriations and reduce the tax burden at the same time—has not yet been found.

The Committee could not accomplish the impossible, but it has, to the best of its ability, given due consideration both to the needs of the state services for funds, and to the needs of the people for economy in government. The Committee believes that the time has arrived when those who are responsible for determining the policies of the state must be guided by what the state can afford to do, as well as by what it would like to do. In accordance with this belief the Committee has found it necessary to recommend a reduction of \$1,979,583.16 in appropriations from tax funds, as compared with the appropriations for the previous biennium.

In our system of checks and balances each one of the three branches of government is expected to check the other two. Ultimately, however, the only effective check upon the excesses of government, whether in the spending of money or in the exercise of its authority in general, must come from an alert and independent citizen body. Therefore, it behooves the citizen, in his dealings with government, to become tax-conscious as well as service-conscious. He must be made to realize that when he demands a given service from the state, either he or his fellow citizen will have to pay for it, and that when one minority or pressure group is able to secure favored treatment for its interests, it will be at the expense of the public interest or of other minority groups.

Laws have been enacted conserving our natural resources, such as water, land, timber, oil, etc., but not one law has been enacted to help conserve the taxpayer by whom the ultimate cost is borne.

In making its recommendations for the state assistance program, the Committee not only recognizes, but emphasizes, the desirability of conserving the state's human resources as well as its natural resources; but in connection with the conservation of human resources it is respectfully submitted that more consideration should be given to the ordinary citizen—to the eighty to eighty-five percent of our people who are not recipients of public assistance, but who ultimately bear the cost of the public assistance program. Particularly we call attention to the plight of that portion of our people—and the number is large—who are living in extremely straitened circumstances, but who have managed to keep off the assistance rolls, and whose earnings, reduced though they are, go in part for the maintenance of the assistance program. Any additional burdens of government will inevitably operate to make life more precarious for this group.

The state, we believe, will not permit its unfortunates to suffer from cold and hunger, but there is a limit beyond which it cannot go in providing assistance. Our people are rapidly approaching the "ceiling" of their ability to support government. At the same time expenditures for public assistance and public welfare are still mounting. Many

of the older services of government, such as education, law enforcement, and the administration of justice, are either standing still or going backward because of lack of adequate funds. Your Committee, therefore, calls attention to the danger confronting the state in the immediate future—that such a great part of its funds may go into assistance and welfare, that it may not be able to maintain its other essential services. We have already reached the point at which any further expansion of expenditures for humanitarian purposes will be at the expense of other services of the state and local governments.

The Committee, in presenting its recommendations, wishes especially to call attention to the continued deficit in the state's general fund. Deficit financing, as a temporary expedient, may be justified in time of crisis or catastrophe, but as a permanent policy it is indefensible. It is merely a means of deferring the costs of government, and not a means of reducing them. Frequently, in fact, deferred costs are even more burdensome when they finally have to be met than they would have been at the time of deferment.

In order that the fiscal operations of the state may be kept on a sound basis, and the state's reputation for sound financial policy be maintained, the Committee feels it to be imperative that the deficit in the general fund be liquidated as soon as possible.

At some points our recommendations are necessarily based upon estimates. One difficulty in budget-making arises from the fact that the state's expenditures, in many phases of its operations, depend upon unpredictable contingencies. For example, the state, through its Board of Control, carries on extensive farming and dairying operations. If conditions are favorable, the fruit, vegetables, meat, poultry, eggs, milk, butter, etc., produced will materially lessen the cost of the upkeep of the state institutions. Conversely, if agricultural conditions are unfavorable the cost of upkeep will be increased. In connection with these operations the state owns some 1,200 head of cattle and a great deal of other livestock. If the state is able to produce most of the feed for its stock, its expenditure for this item will be reduced. If its feed crops are light, its expenditures will be heavier. Furthermore, feed prices are subject to great fluctuation. Whether hay sells at \$6.00 a ton, or \$16.00, will materially affect the Board's budget. Similarly with many other branches of state administration. The volume of work, and thus the necessary expenditure, may expand or contract with weather, crop, and general economic conditions.

For the reasons just named, it is impossible to estimate accurately the needs of all expending agencies. So far as possible we have limited appropriations and the manner and purpose of expenditure in such a way as to prevent extravagance and maladministration. Nevertheless, it is always necessary to leave some things to the prudence of

the expending agencies themselves. There is a well known tendency on the part of some agencies to spend all the money placed at their disposal, whether needed or not. On the other hand, some agencies have demonstrated the possibility of keeping below their estimates, so as to have an unexpended balance at the end of the biennium. We heartily commend the latter practice to the expending agencies. Any department which spends less than the amount appropriated to it, without impairing its efficiency, will have performed a distinct service to the state.

The very foundation of our state government rests upon the system of private enterprise, the right of every citizen to labor in his own interests. The support of the state must come from the earnings of our citizens through their own industry and thrift. The sooner we realize that the state itself has no wealth excepting the wealth of its individual citizens, that the state has no money to pay its bills excepting such as comes through taxation of our citizens, the sooner we will come to realize the disaster of continuing the deficit in our state fund.

The waste in government is traceable to the fact that bad systems are at the root of many of our governmental evils. With a good system, even an ordinary man can do effective work; but a bad system will tend to discourage even a good man. That criticism strikes directly at the state, the county, and the municipal government. A bad system may actually tempt men to be dishonest. We should not lend ourselves to criticizing public officials until we have first corrected the system. If we correct the system, automatically it will correct the individual.

Board of Control of State Institutions

Last session the legislature appropriated \$515,000.00 to the new buildings and equipment fund, and during the present session we have appropriated to the same fund, from unexpended balances, \$132,497.00, making a total of \$647,497.00 available for the building program which is now in process of completion. Before the last session ended, an application for PWA grants for these projects was submitted to Washington, and after the session ended, the Board of Control resubmitted its program, including small items of special construction that were recommended by the Appropriations Committee and approved by the legislature. After a great deal of delay the projects were approved on September 12, 1938, and the following construction program is now underway:

Hastings State Hospital

Ward building, 330 beds.

Hospital for Tuberculous

Men's treatment building, 76 beds.

Administration and medical surgery building, 30 beds.

Power house.

Norfolk State Hospital

Ward building, 80 beds.

Employees' building, 52 beds.

Lincoln State Hospital

Ward building, 330 beds.

Institution for Feeble Minded

Girls' dormitory, 330 beds.

The ward building at the Hastings State Hospital is nearing completion, and will be ready for occupancy within a very short time. Construction has started on all of the other buildings, and will be completed during the current calendar year. With the completion of the ward buildings at the three state hospitals they will have an additional capacity of 740 beds, relieving the crowded conditions in all three institutions. There will then be available 395 unoccupied beds, so that, for the first time in many years, the mental hospitals will be able to take care of their waiting list without crowding.

Your Committee recommends that the old center building at Hastings be continued for at least the next two years, as we do not believe this building should be abandoned at this time. The space is needed, and we do not feel that the financial conditions of the state warrant the authorization of a new building. We do, however, recommend to the Board of Control that, if other room is available, the fourth floor be evacuated.

During the last session an appropriation was made for the buying of new medical equipment for the treatment of patients in the hospitals for the insane. The use of metrozol and insulin has become a regular treatment, with very encouraging results. Fever-therapy has been introduced and is now past the experimental stage. At the present time the state owns two fever machines, and has contracted for the

rental of two additional ones. Hydrotherapy has been expanded and placed in common use in two of our hospitals for the insane, and plans are now being made to start it in the third. Occupational therapy has also been very greatly increased in each of the hospitals, and its value has been definitely proven. Through these modern treatments the time required for the rehabilitation of patients has been materially shortened.

The Board of Control has made arrangements for the creation of consulting staffs of members of the medical profession not connected with the institutions. These staffs are composed of specialists in the various branches of medicine, such as eye, ear, nose and throat, general and special surgery, neurology, etc. This will serve to bring to our institutions the most improved treatment in all of the specialties, and the institutional physicians will be able to demonstrate to the outside medical profession the latest developments in psychiatric treatment. Your Committee was privileged to witness a number of these new treatments, and was very favorably impressed by the results that are being achieved, and it is our belief that with the modern treatment and practices, many institutional cases, if taken in time, can be returned to society instead of becoming permanent charges of the state. Necessarily the cost must increase for a short period of time, as doctors and nurses must be in constant attendance while the treatment is being carried on. We feel that the increase is justified by the cases of successful rehabilitation that were pointed out to us by the superintendents of these institutions.

With the completion of the new buildings at the Hospital for the Tuberculous, much more thorough treatment of the disease will be given, and the patients will be able to remain long enough to derive more lasting benefits from their treatments. At present the institution is so crowded that patients are necessarily discharged sooner than they should be, and in many cases they have to return because the length of the first treatment was not sufficient.

With the completion of the ward building at the Institution for the Feeble-Minded, and with the reconstruction of the open porches on one of the old buildings, capacity will be increased by 420 beds. This will bring into the institution many cases that are very difficult to handle, but which have thus far been held in their own counties because of insufficient room at the institution. We are convinced that the state is making every effort to give adequate care to its wards, despite the distressing financial conditions that now prevail. Additional room in the insane hospitals should not be required for some years to come, as the new building program should take care of the many needs.

Your Committee recommended the closing of the branch institution of the Soldiers and Sailors Home at Milford for the period of

two years, transferring the members to the Grand Island home, where there is adequate room and better facilities. The legislature has now approved the transferring of the members to Grand Island, and the closing of this institution will effect a saving of \$100,263.00 covered by the request of the Board of Control under the plan for the coming biennium.

Your Committee feels that this room will not be needed during the next two-year period for senile cases, as the new buildings with the additional 740 beds will take care of the demand adequately. If these buildings were converted in any way for purposes other than the use of the Soldiers Home, it would be necessary, if the demand increased for additional room above that provided at Grand Island, to construct new buildings; therefore, we recommend that a caretaker be placed in charge of these buildings for the next two-year period, leaving the disposition of this property for the consideration of the next legislature.

At the last session we authorized the Board of Control to use the old Genoa Indian School as a penal farm. At that time it was felt that this conversion would serve a two-fold purpose of added facilities for the rehabilitation of certain classes of inmates in our penal institution, as well as economy. We regret to report that while the first purpose is being adequately served, we have found that the institution has not proved to be an economy to the state. An analysis of the cost shows that the returns from the farms and industries have not been very encouraging. We also realize that weather conditions have been very unfavorable during these two years, and that perhaps this picture can change if we have good crop years, and a lot of vegetables, etc., can be raised for the benefit of the other institutions. However, we wish to point out that at the time this institution was opened there was a very crowded condition at our state penitentiary, which unquestionably would soon have called for an additional building program at that institution. With the use of the Genoa State Farm this crowded condition at the state penitentiary does not exist, and the problem of working the remaining men has been reduced. We feel that the Board of Control should maintain this institution as it now exists, for two more years as a trial period, and at the next session of the legislature a very careful study should be made as to the success or failure of this plan, and decide whether it should be continued or abandoned for this purpose. During this two-year period we recommend that the Board make no permanent major changes in the physical plant at this institution.

The policy of the State Industrial School at Kearney has been definitely changed during this biennium from one of regimentation to that of individual treatment for each boy. A four-year vocational high school has been established at this institution, and the Board

has been assured by the office of the State Superintendent of Public Instruction that its high school will be recommended for accreditation, so that the boys graduating will have the same credits as those from any other high school in the state.

State Penitentiary

The Board of Control requested an appropriation of \$60,000.00 for construction items to increase security and safety at the penitentiary, which were to include a fence around the front of the institution, waiting room outside of the fence, lighting fence and wall, relocating the highway, changing transformers from the inside of the penitentiary to the outside, building steam tunnels for the carrying of the exposed steam pipes, and to conceal all wiring from possible tampering.

Your Committee gave this very careful consideration, and, learning from the Highway Department that No. 77 was to be rerouted parallel to the railroad tracks running northwest to 9th Street, which included construction both in the county and in the Lincoln city limits, it occurred to the Committee that this was an advantage to both the county and the city of Lincoln, and that the improvements to be made at the penitentiary would, in a way, be added improvements to the city and county. Therefore, we felt that the Lancaster County Board might be willing to assist in the construction of the new road across the state land caused by the abandoning of the road in front of the penitentiary. After having a meeting with the Lancaster County Board and the state engineer, the County Board agreed to construct this half-mile of new road without cost to the state, which effected a saving of \$14,500.00.

Your Committee is very appreciative of the fine cooperation from the Lancaster County Board in the construction of this half-mile of new road, and we now have been able to reduce the specific appropriation, through additional economies, from \$60,000.00 to \$35,500.00.

Your Committee feels that this expenditure is justified as it will eliminate a very serious hazard, and will give the Warden a much better opportunity to protect the institution from outside influences.

We recommend to the Board of Control that it guard very carefully against too much centralization of all its work in the central office, as we do not believe the state institutions can be operated from the State Capitol Building, but that every possible responsibility should be placed in the hands of the superintendents of the different institutions.

State Assistance

The adequacy of funds to meet relief needs will not be entirely determined by the funds available for that purpose, but by the honesty and efficiency of the administration of the program.

There are three factors that will materially affect the assistance program, namely, general economic conditions, relief policies of the national government, and administration of the program. Your Committee cannot predict with any certainty future economic conditions or policies of national relief. We must be guided solely by past experience. Therefore, we have used the budget request of the Director of Assistance, which is based on the month of February, 1939. This has been the peak load for the present biennium, allocated upon the following basis:

Old age recipients	\$4,927,680.00
Aid to dependent children	1,904,236.80
Blind assistance	137,125.32
State administration, county administration, certification and surplus commodities, etc.	1,257,000.00
	<hr/>
Total	\$8,226,042.12

Department of Roads and Irrigation

The principal sources of income for the Department of Roads and Irrigation are federal funds, gasoline tax funds, automobile registration fees, and motor vehicle fees.

Your Committee has recommended a new grouping of the highway funds by including the following items under one total fund, designated "Highway Cash Fund":

Salaries and wages from gas tax, 3% of the total construction fund, estimated in the amount of ..\$	315,000.00
Maintenance from gas tax, .9% of total construction, estimated in the amount of	95,000.00
Road maintenance, 30% of motor vehicle registration fees, estimated in the amount of	1,200,000.00
Road maintenance from gas tax, estimated in the amount of	5,200,000.00
Road construction from gas tax, all funds derived from gasoline tax not otherwise appropriated in the estimated amount of	5,240,000.00
	<hr/>

Making a total of the estimated amount of.....\$ 12,050,000.00

And, likewise, we have grouped under one fund designated "Motor Vehicle Cash Fund" the following:

State highway administration, 3½% of motor vehicle registration fees, and all fees collected from foreign trucks and buses, estimated in the amount of	\$ 140,000.00
--	---------------

Motor vehicle operator's license fund, estimated in the amount of	164,500.00
Highway safety and patrol administration, and enforcement of traffic control, estimated in the amount of	310,200.00

Making an estimated total of these funds, of \$ 614,700.00

In the above grouping the greatest advantage will come in the lessening of the amount of paper work, the writing of fewer vouchers, the transferring of less funds; thereby effecting greater economy and the reducing of personnel.

As a result of the passage of L. B. 235, which provides for an additional $\frac{1}{2}$ c of gasoline tax to be taken for the assistance program, the amount available for road purposes has been reduced approximately \$4,400,000.00, half being state funds, and the other half federal. This is based upon the assumption that $\frac{1}{2}$ c gasoline tax will raise \$2,200,000.00 in a two-year period. Federal matching is not exactly on a fifty-fifty basis for the reason that certain items such as right of way, preliminary engineering, preparation of plans, and incidental construction items, are not matched by the federal government. Thus the percentage of state funds to federal funds varies on individual jobs. It is our opinion that the average ratio would be approximately 53% state, and 47% federal, which becomes a rather material total sum when considered in ratio to the total amount expended for construction. It is a physical impossibility to anticipate all the factors that enter into the ability of the state to match federal aid over a two year period, in advance. The total amount of federal aid that we will be able to match will depend upon the amount of strictly state work that is necessary for the state to do, and will also depend upon the assistance that may be obtained from other federal agencies on roads that are not on the federal aid system, as well as other emergency economies that have already been instituted.

During the past five years, by taking advantage of improved methods, improved materials, and more efficient equipment, the Department of Roads and Irrigation has been able to take over from the counties 819 additional miles of highway for maintenance, while at the same time keeping the maintenance cost approximately the same. From the best obtainable information available in the Department of Roads and Irrigation, the state will be able to make use of a minimum of \$3,900,000.00 of federal aid funds during the next biennium. At the end of this biennium there will be available approximately \$1,175,000.00 of federal funds which the state has been unable to match for the lack of sufficient state funds. At the end of the next biennium, as nearly as can be estimated, there will be available approximately \$2,650,000.00 of federal funds unmatched. As

pointed out above, this will vary somewhat, depending upon the amount of strictly state construction that has to be accomplished, and the aid that may be obtained on state highways from sources other than federal aid highway funds.

At the first of the year it was estimated when work then under contract was completed, the total mileage under maintenance would be 8,733 miles, composed of the following mileages, by types:

Paving	2,925 miles
Gravel	5,450 miles
Earth	358 miles
	<hr/>
Total	8,733 miles

Of the 4c gasoline tax raised for highway purposes under L. B. 235, the revenue from 2½c will be for state use, and the revenue of 1½c will be for counties and cities.

As nearly as can be estimated the counties and townships, in addition to the funds received from the gasoline tax and motor vehicle registration fees, will receive revenue to the extent of approximately \$2,500,000.00 per year from the property tax and other sources. The total of \$2,500,000.00 for highway purposes from sources other than gasoline tax and motor vehicle registration fees is arrived at by deducting the total county revenue from gasoline tax and motor vehicle registration fees for 1937, from the total expenditure for highway purposes by counties and townships for that year. In 1937 the counties, including townships, expended for highway purposes, \$7,298,070.00. Basing the biennium upon the 1937 record, the counties and townships expend approximately \$14,600,000.00 per biennium. The total revenue for the state from its two sources of gasoline tax and motor vehicle registration fees, is approximately \$12,200,000.00 per biennium.

The revenue above outlined in both the case of the state and the counties, is exclusive of any federal funds.

The Committee calls attention to the fact that the people of the state are supporting two virtually separate highway systems—one maintained by the state, and the other by the counties and townships. It might even be said that the latter constitutes 93 distinct minor systems. We believe that more and better construction, as well as a better coordinated highway system, could be achieved if the efforts of the state and of the counties could be brought into a single unified program.

Recommendations

Wherever possible, the Committee has recommended a reduction of appropriations from tax funds. In fairness to the several expend-

ing agencies, as well as in the interest of economy, we feel that the same principle must be applied to appropriations from cash funds. Otherwise, some of the state's departments and services will be supported more generously than others, for no reason except that they happen to derive their revenues from different sources.

In making our recommendations it was impossible to apply a flat percentage reduction. There are some agencies, such as educational, charitable, and penal institutions, which are supported by both tax and cash funds. The primary purpose of making the charges represented by these cash funds is to reduce the burden of the property tax. Therefore, in such cases, we have not limited expenditures from cash funds, but have made such reductions as we felt could be made in the total appropriations for these agencies in their appropriations from tax funds.

In some cases the Governor's estimates of cash funds seem unexplainably low. The estimate of University cash receipts for the coming biennium is given as \$1,880,000.00, whereas the receipts for the present biennium will be at least \$1,000,000.00 in excess of that figure. The total shown for Kearney State Normal School for the next two years is less than the actual receipts for the last fiscal year. The figures for many other agencies are similarly underestimated. In the interest of accuracy we have substituted our own estimates, or those of the agencies themselves, for those of the Governor. These changes necessarily make our budget appear much larger than that presented by the Governor. We submit, however, that in making these changes we have not increased the budget, but have merely corrected the totals.

The legislature, if it is to function properly, must be fully informed. The citizen, if he is to criticize his government intelligently, must likewise be informed. Therefore, in order that both the legislature and the citizens of the state may be supplied with the most accurate information obtainable, the Committee urges that the Legislative Council, during the coming biennium, make exhaustive studies of the state's administrative organization and practices, as well as of its tax and budgetary problems. Specifically, we recommend that the following subjects be studied:

- (1) The advisability of placing all the revenues of the state into the General Fund, or some single fund, and of making specific or fixed appropriations therefrom for the several expending agencies.

- (2) The advisability of having all revenues of the state collected by a single department of revenue rather than, as at present, by numerous departments and agencies.

- (3) The possibility of improving the present method of preparing and submitting the state's biennial budget.

- (4) Standardization of the salaries and duties of officials and employees of the state.

(5) The travel and other expense accounts of state officials and employees.

(6) The adequacy and the cost of reports and other publications issued by the agencies of the state government.

The rapid increase in expenditures by the state government in recent years is accounted for, in large measure, by the acceptance of grants-in-aid from the national government, since both the amount granted by the national government, and the amount raised by the state for matching purposes, shows in the total of state expenditures. The growth of grants-in-aid may have been both justifiable and inevitable, but we urge that the legislature, in making future appropriations for matching purposes, give careful consideration to the following questions:

(1) Is the project, in itself, a desirable one aside from the consideration of receiving federal aid?

(2) If the project is desirable, are the people of Nebraska able to afford the necessary outlay?

(3) Will the state be able to carry on the project or service if and when the national government, in attempting to balance its budget, finds it necessary to withdraw or curtail its grants to the states?

(Signed) Frank J. Brady, Chairman
Committee on Appropriations.

STANDING COMMITTEE REPORT

Presented to Governor for Approval

Friday, May 19, 1939 at 1:50 p. m.

L. B. No. 74

L. B. No. 132

L. B. No. 389

(Signed) Craven, Chairman

Message from the Governor

May 19, 1939

To The Members of the Legislature

Gentlemen:

I am returning herewith Legislative Bill 74 without my approval.

In vetoing Legislative Bill 74, I am compelled to do so for many reasons. This type of legislation is wrong in principle as the legislature

has well recognized in rejecting all other measures of a similar character requested by special economic groups. This type of legislation is opposed to the public welfare besides being inimical to the interests of the groups requesting such legislation. In vetoing this bill I am hopeful of fortifying and strengthening the wise decisions which the legislature has made throughout this entire session in refusing to grant similar privileges to other groups. To sign this bill would be to invite all other groups refused legislation to return and to demand the same treatment.

This bill, should it become a law, will work hardship upon thousands of people of slender means and slender income in the smaller towns and cities of Nebraska. For the doubtful benefit of a few it will add to the burdens of many. For that reason I cannot approve this measure.

Nothing more wholesome can emerge from this legislative session than the knowledge that the practice, which has grown in alarming fashion in recent years, under which business calls upon government to do things for business which, if desirable, business should do for itself, has come to an end. The people of Nebraska had thought that this legislature had made its attitude unmistakably clear upon that issue. It has rejected a large number of bills, all of which would have perpetuated the practice of business loading its troubles upon government, a practice so burdensome to government, so injurious to business itself, and so harmful to public interest that the attitude of the legislature upon such measures up until the passage of this bill has met with widespread approval. I have been in the heartiest accord with the legislature's attitude toward regulatory legislation and in vetoing this bill I take this opportunity to commend it for its accomplishments previous to the passage of L. B. 74.

This bill is presented in the guise of a health measure. It contains no effective provision that is not already a part of the statutes. It contains no provision for violation save the withdrawal of a license to maintain and operate a barber shop. That raises the question whether refusal of the proprietor of a barber shop to maintain the prices which may be fixed under the provisions of the bill, or the sanitary regulations shall be the basis for a license.

This bill establishes legal price fixing in Nebraska and projects a vicious trend which in time will be utilized and must be granted to every group that seeks it. It projects a widening circle; a circle within a circle; with only the consumer and the public unrepresented. I do not believe that the people of this state will approve a precedent which, if established under the provisions of this bill, will find each following legislature called upon more and more to do for other groups what it is proposed shall be done for one group under this bill. It means, with the precedent

established as a principle of government, a departure from the sound practices which traditionally have characterized Nebraska life. It is alien to Nebraska governmental practice. It means demoralization in the normal channels of trade, an enormous increase in the burdens and responsibilities of government, and irreparable harm to the people who constitute the government of this state.

Respectfully submitted,

(Signed) R. L. Cochran,
Governor.

Message From Governor

May 22nd, 1939.

To the Members of the Legislature:

Gentlemen:

I am transmitting herewith legislative bill 517, appropriating for the payment of certain claims against the state, with my approval, except as to the specific items enumerated herewith.

I specifically disapprove the following claims for refunds of excess gasoline tax:

Consumers Oil Co., Omaha, Nebraska	\$ 767.48
Danbury Oil Co., Danbury, Nebraska	262.28
Deep Rock Oil Corp., Omaha, Nebraska	1,025.17

Gordon Oil Co., Omaha, Nebraska	655.41
Nat'l Refining Co., Omaha, Nebraska	490.82
Nebr., Iowa Oil Co., Blair, Nebraska	75.93
Texas Co., Denver, Colorado	4,719.81
U. S. Oil Works, Inc., Omaha, Nebraska	1,453.00
White Eagle Oil Corp., Omaha, Nebraska	770.90
Standard Oil Co., Omaha, Nebraska	310.48
Sinclair Refining Co., Omaha, Nebraska	957.58

It is to be noted that I found it necessary to disapprove these same items when presented to me by the legislature of 1937. My reasons for disapproval now can be set forth no better than by quoting from my message then:

"I have disapproved these claims for the reason that their allowance at this time would in effect make a state law retroactive in its application. The law of 1929 provided for refunds on gasoline for tax paid in states other than Nebraska. Between 1929 and 1931, the period for which refund is claimed, this law was in effect. The tax in Nebraska was four cents per gallon during that period. The tax in states where the gasoline was retailed was three cents per gallon. In 1931, the legislature passed an act providing that the refund should be based on the tax paid in Nebraska rather than that paid in other states, as provided in the 1929 law. In these, oil companies would obtain, if these claims were approved, the benefits of the 1931 law starting in 1929. Obviously they should not be approved. Retroactive legislation is not a good policy, particularly with reference to refunds. It is interesting to note that these claims were presented and disapproved by the legislatures meeting in 1933 and also in 1935."

There has been no change in conditions or new reasons in support of these claims that would warrant any action on my part different than that taken two years ago.

I specifically disapprove the claim of K. H. Gedney Company for architectural work in the sum of \$500.00 for the reason that the Board of Education for State Normal Schools has already expressed disapproval of this claim as shown by the following extract from the minutes of the meeting of the Board on October 24, 1938:

"CRITES (E. D. Crites, member of the board): I move that Comptroller Anderson be instructed to communicate with Mr. Gedney that the Board recognizes no indebtedness to the K. H. Gedney Company and that the Dormitory Corporation in existence at the times he mentions is now dissolved and no longer in existence. KNAPP (F. S. Knapp, member of the board) seconded and motion carried."

Inasmuch as this constitutional board is charged with the responsibility of administering all affairs in connection with the four state

normal schools and is presumed to be in full possession of all facts with reference to this claim, I do not feel that I should presume to exercise a judgment contrary to that of the board.

Respectfully submitted,

(Signed) R. L. Cochran
Governor

RESOLUTIONS

LEGISLATIVE RESOLUTION NO. 36. Purchase of Argentina Beef.

Introduced by Garber of Webster.

WHEREAS, in the confusion of depression cattle and hogs have been slain by executive planning for the purposes of reducing surpluses and raising livestock prices to the producers and meat prices to the consumers, and

WHEREAS, by this national planning the attempt is made to remove 30% of our fertile farm lands from crop production for the purposes of reducing surpluses and raising grain prices to the producers and bread prices to the consumers, and

WHEREAS, Nebraska produces more cattle than Wyoming or Colorado and one third as many as Texas; now therefore be it

RESOLVED—That the Nebraska Legislature now in 53rd Session hereby expresses disappointment in the action of the President of the United States and deplores his purchase of 24 tons of canned beef in Argentina, South America, for the navy, for the reasons he offers, viz—that Argentina beef is eight cents per pound cheaper and better quality, and be it

RESOLVED—That the Nebraska Legislature begs to be advised by the President how his purchase of Argentina beef on the bargain counter of the world can be correlated with his enacted program of planned society with social security under his revised economic laws which freezes unbalanced, inflated prices and prolongs our unparalleled national distress; and be it further

RESOLUTIONS

LEGISLATIVE RESOLUTION NO. 38. Respecting the Memory of A. Lincoln Sutton.

Introduced by Ernest A. Adams of Douglas.

"Rid of the world's injustice and his pain,
He rests at last beneath God's veil of blue.
Taken from life, when life and love were new, ***"

Preamble

A. Lincoln Sutton, Omaha, Nebraska, died May 26, 1939. He was thirty-one years of age at the time of his death and served Nebraska as a legislator during the last bicameral session in 1935. He attended the public schools of Omaha and the University of Omaha. He was the son of the late District Judge Abraham Lincoln Sutton, long a prominent figure in Omaha politics and at one time the candidate for governor of Nebraska. The deceased did not follow politically in the footsteps of his distinguished father but affiliated with the Democrat party.

Though young in years, A. Lincoln Sutton made his mark as a legislator. He was highly regarded by his legislative associates. His quiet and unassuming mien, his patient and sympathetic nature compelled all who were fortunate enough to be his associates to hold him in high esteem. As a legislator he took a deep interest in the welfare of the Omaha schools. His outstanding contribution as a legislator in 1935 was when he championed and fought doggedly until a section was inserted in the horse racing bill that made it unlawful to drug race horses on any race track in Nebraska. While others concerned themselves with horse racing as a sport, Sutton was thinking of the horse.

WHEREAS, the sudden death of A. Lincoln Sutton has brought to his many friends in Nebraska, and particularly his former associates in the Legislature, a feeling of regret and sadness, NOW THEREFORE

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF NEBRASKA IN FIFTY-THIRD REGULAR SESSION ASSEMBLED:

1. That this Legislature pause for a moment in its deliberations to do reverence and to pay tribute to the memory of A. Lincoln Sutton, a distinguished and useful public servant, high type citizen and sympathetic man, whom we remember as a capable legislator, endowed with more than ordinary intellectual attainments, keen foresight, rare judgment on public issues and questions and the heart of a real man.

2. That the deepest sympathy is hereby tendered to the bereaved family of the deceased; that a copy of this resolution be spread at large upon the Journal of this Legislature; that the Clerk of this Legislature be instructed to send a copy of this resolution, properly authenticated and suitably engrossed, to the family of A. Lincoln Sutton, as a lasting testimonial of the appreciation of this state for his service in the Legislature and as a mark of the love and esteem which he held in the hearts of his associates.

Ernest A. Adams moved that the rules be suspended and the resolution adopted.

The motion prevailed with 39 ayes, no nays, 4 not voting.

1. Amend the printed bill, page 4, by striking all of Sections 3 and 4 thereon and by inserting in lieu thereof the following:

"Sec. 3. That Sec. 77-2508, Comp. St. Supp., 1937, be amended to read as follows:

77-2508. For the security of the funds so deposited under the provisions of this article the county treasurer shall require all such depositories to give bonds for the safe keeping and payment of such deposits and the accretions thereof, which bond shall run to the people of the county, and be approved by the county board and conditioned that the depository shall, at the end of each and every month, render to the treasurer and county board a statement in duplicate, showing the several daily balances and the amounts of moneys of the county held by it during the month, and how credited; and for the payment of the deposits, when demanded by the county treasurer on his check at any time, as hereinbefore provided, and generally do and perform whatever may be required by the provisions of this article, and a faithful discharge of the trust reposed in such repository. The bond in substance shall be similar to the bond required and set forth in Section Sec. 77-2503, Comp. St. Supp., 1937, as now existing or as hereafter as amended in this section. No person in any way connected with any depository bank as officer or stockholder shall be accepted as a surety on any bond given by the bank of which he is an officer or stockholder. The treasurer shall not have on deposit in any bank at any time more than the amount insured by the Federal Deposit Insurance Corporation plus the maximum amount of the bond given by said bank in cases where the bank gives a guaranty bond, nor in any bank giving a personal bond more than the amount insured by the Federal Deposit Insurance Corporation plus one-half of the amount of the bond of such bank, and the amount so on deposit at any time with any such bank shall not in either case exceed fifty per cent of the paid up capital stock and surplus of such bank : Provided, when the amount of money which the county treasurer desires to deposit in the banks within the county exceeds fifty percent of the paid capital and surplus in all of the banks in such county, then the county treasurer may with the consent of the county board deposit an amount in excess thereof, but not exceeding the capital stock and surplus in any one bank; and provided further, bond shall be required of all banks for such excess deposit. Said bonds shall be deposited with the county clerk and approved by the county board. Where banks located in the county refuse or neglect to bid on said money, or where there are not banks in the county, or where the banks located in the county have not sufficient capital stock and surplus to receive said money under this article, then any surplus over the amount herein specified that banks in the county may receive shall be deposited in banks outside of the county having sufficient capital stock and surplus under the same conditions and terms as if in the county. In lieu of a bond as above provided, any bank making application to become a depository under the provisions of this article may deposit with the county clerk, United States Government government bonds, United States government guaranteed bonds or notes, or bonds or notes of governmental

agencies, or bonds of the State state of Nebraska or of any state whose bonds are purchased by the Board of Educational Lands and Funds of this state for investment of the permanent school fund, or warrants of the State state of Nebraska, also county bonds, municipal bonds or school district bonds of any county, city, village or school district in the state of Nebraska issued under the direction of and with the approval of the Auditor of Public Accounts, or securities issued under the authority of the Federal Farm Loan Act, or warrants of the county or any city, village or school district in the county. The depository bank furnishing securities above described shall have the right to substitute other approved securities herein provided for in lieu of securities already pledged if it so desires at any time: Provided, in counties having a population of ~~200,000~~ two hundred thousand inhabitants or more the county board may by resolution authorize the County Treasurer county treasurer to accept the substitution of other approved securities in lieu of securities already pledged and report such action at the next meeting of the county board. If the action of the treasurer in accepting such substitution shall not be approved by the board at such first meeting, then the bank shall be required to deposit securities satisfactory to the board, or the treasurer shall withdraw the deposit within three days. Such securities substituted must, however, be those provided for in this article, and approved by the members of the county board, the total value of which in the case of bonds alone shall at all times equal ten percent more than the maximum amount of the deposit to which the bank is entitled. Any bank which has deposited securities under the provisions of this article, may withdraw the same by paying over to the County Treasurer county treasurer all funds for which such securities are deposited as surety, and the certificate of the county treasurer shall be sufficient evidence of such fact. When such certificate is filed with the county clerk he is empowered to assign such securities to the owner thereof. All interest coupons attached to securities named in this article shall be detached by the holder or trustee thirty days before maturity and returned to the depository bank pledging the security. Any treasurer, or any officer of a bank, who shall directly or indirectly violate or knowingly permit to be violated the provisions of the within section so far as it relates to the deposit of public money in a bank, shall be guilty of a felony, and, upon conviction thereof, shall be fined in any sum not less than One Hundred Dollars one hundred dollars nor more than One Thousand Dollars one thousand dollars or shall be imprisoned in the penitentiary for not less than one year and not more than three years.

Sec. 4. That said original Secs. 77-2534, 77-2535 and 77-2508, Comp. St. Supp., 1937, are hereby repealed.

L. B. No. 124

L. B. No. 300

Respectfully submitted,

(Signed) Otho K. De Vilbiss,
Secretary to the Governor.

Message from Governor

May 31st, 1939.

To the Members of the Legislature

Gentlemen:

I am returning herewith legislative bill 495 without my approval for the following reasons:

I consider the method adopted in this bill of allocating highway funds to be a bad policy and the establishment of a precedent which would lead to much confusion and prevent the development of an orderly highway program.

It is entirely possible that the carrying out of this policy in the future would seriously handicap the Highway Department in the matching of federal aid for the reason that the legislature might select a route or routes for preferential construction which would not be approved by the U. S. Bureau of Public Roads.

Respectfully submitted,

(Signed) R. L. Cochran,
Governor.

The amount which may be so certified, assessed and collected shall not exceed five mills on the dollar of actual valuation of all taxable property within the corporate limits of such city or village to defray its general and its incidental expenses, together with any special assessments or special taxes, or amounts assessed as taxes under the provisions of this chapter, and such sum as may be authorized by law for the payment of outstanding bonds and debts: **Provided**, that a further appropriation not to exceed one mill on the dollar of actual valuation of all the property within the city, may be levied, for the purpose of establishing the sinking fund or sinking funds authorized by Legislative Bill No. 207, Fifty-third Session, Nebraska State Legislature, 1939; and provided further, that the above provisions of this section shall be subject to the provisions of Secs. 77-1963 and 77-1959, Comp. said beyond three mills on the dollar of actual valuation of all the taxable property within the corporate limits of such city or village in any one year; but said additional levy shall be continued only for as many years as may be necessary to raise the total amount required for such purpose. Such assessments shall be refunded out of the proceeds arising from the three mill special levy, as aforesaid, upon proper claims filed by persons entitled to reimbursement, and the same shall be audited, allowed and ordered paid, as other claims against such city or village, and all such reimbursements shall be made *pro rata*, if there is not sufficient money on hand to repay them all at one time. Such special three mill levy shall be included in the annual estimate and annual appropriation ordinance, as provided by law, *Provided*; and *provided further*, that a further appropriation not to exceed one-fourth mill upon the dollar of actual valuation of all the property within the city, may be levied, for the purpose of establishing a recreation fund to be used for the purchase, establishment, management, equipment and maintenance of playgrounds and recreation centers, including the construction of necessary buildings therefor, said fund to be disbursed under the direction and supervision of the local governing body of said city in conjunction with the local governing body of any other governmental subdivision wholly or partially within its corporate limits when a plan has been submitted and approved by the electors, as hereinafter provided; and *provided further*, that if the school district, situated wholly or partially within such city, submits a plan and makes a levy for a similar purpose, said city shall not submit a plan or proposal for such a levy as long as said plan is in operation; and *provided further*, that no levy shall be made for such purposes unless the proposition to make such levy and the plan to dispose of such fund be sanctioned by sixty per cent or more of the legal voters of the city either by petition signed by them or by sixty per cent or more of the votes cast on the proposal submitted on the ballot at a general municipal election: *Provided*, that the above provisions of this section shall be subject to the provisions of Sections 1 and 2 of Legislative Bill No. 14, Fifty-third Session, Nebraska State Legislature, 1939.

LETTER—From E and R Committee

The following letter was read:

"Office of

Committee on Enrollment and Review

June 1, 1939.

Senator Sam Klaver,
Senate Chamber,
State House,

Dear Senator:

Your attention is directed to your amendment to Section 50 of L. B. No. 521, appearing on page 1301 of the Journal. The figures \$365,612.40 should be \$252,000.00, which is 3% of your assistance fund allocation of \$8,400,000.00. The figures "\$8,034,387.60" appearing in the 15th line from the bottom of page 1301 should be \$8,148,000.00. This represents the balance of the assistance allocation after the administration expense is deducted.

While it is perhaps true that L. B. No. 390 limits to 3% all administration costs and therefore the first erroneous figure may not be serious, yet it is definitely true that not more than the sum of \$8,034,387.60 could be used for other purposes than administration unless the change is made to the correct figures.

Very truly yours,

(Signed) Francis V. Robinson,
For E and R Committee."

FVR:NvD

"Section 1. When used in this Act, to read as follows: (1) The term "person" includes one or more individuals, partnerships, associations, corporations, legal representatives, trustees, trustees in bankruptcy, or receivers. (2) The term "employer" includes any person acting in the interest of an employer, directly or indirectly, but shall not include the United States, the state of Nebraska, or any political subdivision thereof, or any person subject to the Railway Labor Act, or any person subject to the jurisdiction of the National Labor Relations Board, or any labor organization (other than when acting as an employer), or anyone acting in the capacity of officer or agent of such labor organization, or any duly licensed attorney at law acting for and in behalf of such employer in any matter which has, or is contemplated to, result in litigation. (3) The term "employee" shall include any employee, and shall include any individual whose work has ceased as a consequence of, or in connection with, any current labor dispute, or because of any unfair labor practice, and who has not obtained any other regular or substantially equivalent employment, but shall not include any individ-

ual employed as an agricultural or ranch laborer, or in the domestic service of any family or person at his home, or any individual employed by his parent or spouse. (4) The term "employee representative" means any bona fide labor organization having in its membership a majority of the employees, of any employer, following the same trade or occupation. (5) The term "labor organization" means any organization of any kind, or any agency or employee representation committee or plan in which employees participate and which exists for the purpose, in whole or in part, of dealing with employers concerning grievances, labor disputes, wages, rates of pay, hours of employment, or conditions of work. (6) The term "unfair labor practice" means any unfair labor practice as described in Section 7 of this Act. (7) The term "labor dispute" includes any controversy concerning terms, tenure or conditions of employment, or concerning the association or representation of persons in negotiating, fixing, maintaining, changing, or seeking to arrange terms or conditions of employment, regardless of whether the disputants stand in the proximate relation of employer and employee.

Sec. 2. Employees shall have the right of self-organization, and, of their own free will to form, join or assist labor organizations, to bargain collectively through representatives of their own voluntary choosing, and to engage in lawful activities for the purpose of collective bargaining or other mutual aid or protection, free from coercion from any source whatsoever.

Sec. 3. When any employee, or groups of employees, shall feel aggrieved, or shall desire to bargain collectively with any employer, by or through an employee representative, notice thereof, together with written specifications of the grievance or proposals of the employees, shall be served upon the employer. Such notice shall fix a time for meeting with the employer, at his place of business, not less than three days from date of service thereof. It shall be the duty of the employee representative and the employer to meet at the time and place specified in the notice, and to make a bona fide attempt to equitably settle the grievances of the employees: **Provided**, that if a settlement is not agreed to, then and in that event the employer shall receive the written proposals of the employee representative and make return thereof in writing to the employee representative within ten days, at which time the employer shall submit counter proposals as a part of said return; **and provided further**, that either party may, at any time within ten days thereafter, require the other party to meet with him in a good faith attempt to agree upon a settlement of said proposals; **and provided further**, that all agreements made under the provision of this section shall be reduced to writing and shall be binding upon all of the parties thereto, and may be enforced as civil contracts in the courts of the state of Nebraska.

Sec. 4. All controversies, which are the subject of collective bargaining, within the meaning of the preceding section of this Act, may be submitted to the decision of arbitrators, as hereinafter provided, upon the written demand of either the employer or the employee representative, served upon the commissioner of labor for the Department of Labor, hereinafter called "commissioner", at his office in Lincoln, Nebraska, within ten days after a disagreement has been reached.

Sec. 5. The party demanding arbitration, shall, in the notice thereof, name one arbitrator, and shall forthwith transmit to the commissioner true copies of the written specifications of the grievances and proposals, counter proposals and amended proposals, all duly certified to by a notary public. Upon receipt of such demand it shall be the duty of the commissioner to request the other party in behalf of the state of Nebraska, to submit such dispute to arbitrators; said party shall, within five days thereafter, accept or reject said offer to arbitrate. Upon acceptance, the other party shall submit to the commissioner the name of an arbitrator. The arbitrator named by the employer, and the arbitrator named by employee representative, and the third arbitrator to be selected by them, shall constitute a board of arbitration. In the event that the two arbitrators are unable to agree upon a third arbitrator then the governor shall appoint a disinterested party to serve as the third member of said board of arbitration: **Provided**, said member selected by the governor shall be a resident of the state of Nebraska and shall act as the chairman of said board of arbitration. Said board of arbitration shall meet at the call of the commissioner, within ten days, in the county in which the controversy originated, and shall proceed to hear and determine the issues as are set forth in said proposals and counter proposals, and make findings of fact and an award. The findings and award of said board of arbitrators shall be reduced to writing and be filed in the office of the commissioner, and all such findings, orders or awards of said board of arbitration shall be binding upon all parties in interest unless reversed or modified upon appeal as hereinafter provided. An appeal may be taken from any such finding, order or award of said board of arbitration by means of the same procedure employed in the taking of appeals from final orders of the state railway commission as provided in Article 5, Chapter 75, Compiled Statutes of Nebraska, 1929, as amended.

Sec. 6. Sec. 7. It shall be unlawful for any employer to do any of the following acts, which are hereby declared to be unfair labor practices:

(1) To interfere with, restrain, or coerce employees in the exercise of the rights guaranteed in Sections 2, 3, 4, and 5 of this Act. (2) To dominate or interfere with the formation or administration of any labor organization or contribute financial or other support to it: **Provided**, that an employer may confer with employees during working hours at his election. (3) By discrimination in regard to hire or tenure of employment or any term or condition of employment to encourage or discourage membership in any labor organization: **Provided**, that nothing in this Act shall preclude an employer from making an agreement with a labor organization (not established, maintained, or assisted by an action defined in this Act as unlawful) to require as a condition of employment membership therein, if such labor organization is the representative of the employees of such employer. (4) To discharge or otherwise discriminate against an employee because he has filed charges or given testimony under this Act.

Sec. 8. Any employer who violates the provisions of Section 2 of this Act shall be liable to any employee who might be aggrieved by such violation, in an amount equal to any salary or wages that might be lost, together with a reasonable amount for attorney's fees, to be determined by the court.

Sec. 9. Any person who shall knowingly fail or refuse to comply with the provisions of this Act shall be deemed guilty of a misdemeanor, and, upon conviction thereof, shall be fined in any sum not less than ten dollars nor more than two hundred dollars.

Sec. 10. When it shall appear by the petition of the plaintiff that any employer, employee, or employee representative is violating any of the provisions of this Act, or any contract, or any award of arbitrators, duly made under the provisions of this Act, an injunction may be granted to restrain such Act, or a mandamus shall be granted to compel compliance with the provisions of this Act, or any contracts or awards made thereunder, in the manner prescribed in Chapter 20, Compiled Statutes of Nebraska, 1929, as amended, for relief by injunction and writ of mandamus."

Approved by Governor

June 2, 1939

To the Members of the Legislature:

Gentlemen:

I am directed by His Excellency, Governor R. L. Cochran, to inform your honorable body that he has this day approved the following bill:
L. B. No. 44.

Respectfully submitted,

(Signed) Otho K. De Vilbiss,
Secretary to the Governor.

Message from Governor

June 3rd, 1939

To the Members of the Legislature:

Gentlemen:

I am returning herewith legislative bill No. 133 without my approval for the following reasons:

This measure would repeal the present requirement that the price of gasoline, including tax, be posted by dealers in figures not less than three inches high. It would require dealers to post the gasoline tax separately from the "actual price" of gasoline, in figures of equal size, but with no minimum height prescribed.

I see no good whatsoever that can come from this legislation. The public is interested in knowing the total cost of any commodity purchased. Under the present law, gasoline dealers now post uniformly the total price of gasoline as an inducement to trade, and to avoid confusion and misunderstanding in making settlement for purchases after the motor fuel is delivered to a vehicle.

There are other taxes making up the total retail cost of gasoline. There would seem to be no good reason, therefore, for posting the excise tax only, and not these other taxes. Furthermore, there would seem to be no more reason for posting the taxes, direct or indirect, going to make up the selling price of gasoline, than in the case of any other commodity.

In addition to the confusion and misunderstanding this bill would cause with respect to the dealers and the public, it also would create an administrative problem in the matter of enforcement.

Respectfully submitted,

(Signed) R. L. Cochran,
Governor.

President Johnson presiding.

LEGISLATIVE RESOLUTION NO. 44. Vacancies Legislative Council.

Introduced by Doyle of Greeley

Resolution

Pertaining to the Declaration of the Existence of Vacancies in the Office of Members of the Legislative Council in Certain Cases

Preamble

WHEREAS, the spirit and intent of Article 5, Chapter 50, Comp. St. Supp., 1937, as amended, which establishes a Legislative Council for this Legislature and regulates its activities and functions, contemplates that Council's fact-finding, program-shaping and policy-making duties and responsibilities shall at all times be carried on by legislators solely from the standpoint of legislators, and

WHEREAS, it will prove fatal to any constructive legislative program which said Council expects to formulate for the next Legislature if candidates for state or national offices be permitted or allowed to

project their said candidacies for state or national offices while sitting as legislative councilmen, and

WHEREAS, any legislative councilman who becomes a "lame duck" member of the council by virtue of his defeat at the April, 1940 primaries for the office of member of the Legislature should, in the interest of good government, withdraw from any participation whatsoever in the work of the Legislative Council, since said "lame ducks" can never become legislators at the next regular legislative session, and

WHEREAS, the Legislative Council has been granted full power to fill vacancies which may occur in its membership in proper cases,

NOW THEREFORE BE IT RESOLVED BY THE FIFTY-THIRD SESSION OF THE NEBRASKA STATE LEGISLATURE IN REGULAR SESSION ASSEMBLED:

1. That it is the sense of this Legislature that its Legislative Council adopt the policy of declaring automatically and forthwith the existence of a vacancy in the office of any legislative councilman if and when either of the following conditions with respect to the political status of said councilman shall happen or occur:

a. If said councilman shall become a candidate for any state or national office, except for the office of member of the Nebraska State Legislature; or

b. If said councilman shall become a "lame duck" member of said legislative council by reason of the fact that, as a candidate for the office of member of the Nebraska State Legislature, he shall have been defeated as a candidate therefor at the April, 1940 primary election.

2. That this resolution be spread at large upon the Journal of this Legislature; and that the Clerk of the Legislature be directed forthwith to forward a copy thereof, properly authenticated and suitably engrossed, to the secretary of the Legislative Council for its guidance during the 1939-1941 biennium.

Respectfully submitted,

(Signed) Otho K. De Vilbiss

Secretary to the Governor

Message from the Governor

June 6th, 1939

To the Members of the Legislature:

Gentlemen:

I am returning herewith legislative bill 282 without my approval for the following reasons:

This bill seeks to take authority from the executive branch of the government, directly responsible to the people, and vest it in an independent board removed from the control of the people.

This bill has to do with a long established activity, the bureau of animal industry. In case it became a law, it would be a step toward the conditions that prevailed a quarter of a century ago when our state government was administered almost entirely by a multiplicity of boards and bureaus.

In my message to your honorable body on January 5th, I said: "I invite your study and I pledge my cooperation to the end that we refrain from adopting any new agencies and that we abolish or curtail

the activities of any bureau of government, if possible. Certainly we should halt any tendency in the direction of further increases either in the number of bureaus or in the activities of existing bureaus."

Criticism of the growth of governmental bureaus is unanimous and such criticism is sound. It is unfortunately true, however, that many people, while condemning a practice in general, find it difficult to give this principal practical application when it involves an activity in which they are interested. I cannot approve the practice of condemning bureaus and boards by individuals who insist upon their own bureaus and boards.

The general purposes of this bill can be accomplished under existing law, unless defeated by the restrictive provisions written into the general appropriation bill with respect to the bureau of animal industry. In this connection, it would have been well had the legislature shown consideration for our livestock industry equal to that shown the commercial aviation interests.

As another example of inconsistency in policy, the legislature has imposed a limitation in the general appropriation bill which may seriously interfere with the efficient operation of the bureau of animal industry by placing a considerably reduced limitation on the salary of the state veterinarian, a salary on a scale lower than that fixed by the legislature for its own employees. On the other hand, this bill would give a board not responsible directly to the people the power to fix the salary of the state veterinarian without limitation.

The fundamental objective of this measure is to promote the interest of our livestock industry through control and eradication of animal diseases. I am in hearty accord with this aim and it is the intention of the administration to accomplish this insofar as appropriations permit.

Respectfully submitted,

Message from the Governor

June 6th, 1939.

To the Members of the Legislature:

Gentlemen:

I am returning herewith legislative bill No. 86 without my approval for the following reasons:

This measure is referred to by its own terms as the unfair trades practice act. While it purports to be in the public welfare and for the protection of the public, its effect is directly to the contrary. The act is not designed to protect competition but to protect those who compete. The test applied by this act is not whether sale below cost plus six per cent injures the public but whether it is "unfair" to competitors.

The Junkin Act passed in 1905 had been on the statute books thirty-two years when it was repealed two years ago. During this time it provided for prosecution of those who entered into any contract, combination or conspiracy for the purpose of driving out of business a competitor by selling an article or product at less than its fair market value. This act provided that anyone guilty of violating it would be liable to a maximum fine of \$5000 or a year's imprisonment, or both. It seems to me that under this act, competitors in business were given all of the legal protection necessary, having in mind the general welfare, without setting up a definite formula for doing business under which a merchant might be harrassed while serving the public welfare. This was the settled public policy of the state for many years, and I believe it points a satisfactory course for the future.

Many proposals have been made to this legislature for government control or regulation of various lines of business. All of these measures are alike fundamentally. It is merely a question of degree of control sought to be exercised. With but two exceptions, the legislature defeated all such proposals. This measure is the second of its

kind to meet legislative approval and executive disapproval. In addition to the reasons I have given, this disapproval is based on a firm belief that there should be equality before the law and that privilege denied one group should not be granted to another.

When I disapproved of the so-called barber bill, I was standing for a sound principle of government, applicable to all, and which the legislature abandoned in the passage of these two measures. This principle calls for freedom of enterprise, unhampered by governmental control as much as possible consistent with the public welfare.

Respectfully submitted,

(Signed) R. L. Cochran
Governor

VETO MESSAGE

The following message from the Governor was delivered to the Secretary of State after adjournment of the Legislature:

LEGISLATIVE BILL NO. 352

June 10th, 1939.

Honorable Harry R. Swanson
Secretary of State,
State House,
Lincoln, Nebraska.

Dear Mr. Swanson:

I am transmitting herewith legislative bill 352 without my approval for the following reasons.

This bill provides for raising from one hundred thousand dollars to three hundred thousand dollars the limitation on bond issues that can be voted for the purpose of constructing city halls, jails, auditorium buildings in the cities between five thousand and twenty-five thousand population.

In my opinion we should not make it easier to create bonded indebtedness on the part of the local subdivisions of government, rather we should make it more difficult. Particularly is this true when due to reduced valuation of property, increased levies are necessary to finance existing bond issues as well as increased levies in many cases for operating expenses of municipal government.

This course is in keeping with the trend the local subdivisions of government have been pursuing in reducing their bonded indebtedness to keep within the ability of the taxpayers to pay.

Respectfully submitted,

(Signed) R. L. COCHRAN,
Governor.

BECAME LAW WITHOUT APPROVAL

The following message from the Governor was delivered to the Secretary of State after adjournment of the Legislature:

LEGISLATIVE BILL NO. 350

June 14th, 1939.

Honorable Harry R. Swanson
Secretary of State,
State House,
Lincoln, Nebraska.

Dear Mr. Swanson:

I am transmitting herewith L. B. 350 which I have permitted to become a law without my signature.

It provides for an increase from 32,000 pounds to 40,000 pounds in the weight limit for trucks and semi-trailers. It likewise permits a twenty per cent increase in the length of trucks and semi-trailers from thirty-five feet to forty-two feet.

With reference to the increase in the weight limitation, there is considerable merit in this provision, which corrects an inconsistency in our present law. The present law provides for a 16,000 pounds gross load limit on each axle, with, however, a limit of 32,000 pounds on the total weight of vehicles, including load, these provisions being for a tractor and semi-trailer as well as for a truck. In the case of tractor and semi-trailer the inconsistency is obvious because the law makes no allowance for the weight of the tractor.

With reference to the increase in the length limitation from thirty-five to forty-two feet, I question the wisdom of so great an increase from the standpoint of highway safety. I take this opportunity to suggest the subject of limitation of truck lengths for study and recommendations by the legislative council. I wish to call attention to the tendency toward increasing the maximum length of motor vehicles. It is entirely possible that the next session of the legislature may wish to give this problem further study and attention.

BECAME LAW WITHOUT APPROVAL

1441

This bill contains desirable features, as well as features of questionable value. It is for this reason, therefore, that I am permitting it to become a law without my signature.

Respectfully submitted,

(Signed) R. L. COCHRAN,
Governor.
