MESSAGE TO THE LEGISLATURE

August 1, 1960

MR. PRESIDENT, MR. SPEAKER and MEMBERS OF THE
LEGISLATURE:

I do not like this any better than you do. When this Legislature adjourned, I didn't have the slightest idea that I would be calling you into extraordinary session. One event has caused me to do this. As you know, it was the announcement of Nebraska's standing in the 1960 census, the fact that now our population has lagged so far behind the national increase as to threaten us with disaster. While the national rate of increase was nearly 20 per cent and Nebraska's rate was less than 6 per cent, we find that Nebraska is over 60 per cent behind the national increase. This amazing failure to keep pace with the population of the United States in an era of the greatest population increase in the history of the world causes us to consider the factors which contribute to this result. We lost 6,183 farms in the last ten years. Our farm labor force declined 40,000 workers since 1950. Without corresponding industrial opportunities to replace the farm, these people have sought and are seeking employment in other states.

According to the Nebraska Department of Labor, to stand still Nebraska will need to create 56,000 new jobs in the next ten years and if we are to stem the tide of out-migration, Nebraska needs 146,000 new job opportunities. I call your attention to the fact that we have lost 60,000 workers and their families in the last

ten years. If we continue at this rate for the next ten, we will lose 90,000 more workers which means 150,000 people.

Let me call your attention to a rather staggering statistic. One million people born in Nebraska from 1890 to 1960 left Nebraska. If this were the Great American Desert this might be understandable. But, according to John Guenther in his book "Inside U.S.A." Nebraska is sixth among the states in the production of food products. We have some great manufacturing and industrial plants in this state. We do not have enough. We need industry to finish our raw products and retain for our people the golden stream continually pouring into the laps of distant communities. If a few manufacturing and industrial concerns can be successful in Nebraska, so can others.

I want to return for a moment to those one million native Nebraskans who left the state in the last 70 years. I can tell you where some of them are. S. S. Vischer of the Social Science Magazine, away back in June 1930, made an analysis. This analysis showed that in proportion to population among the names appearing in "Who's Who in America" Nebraska ranked third among the then 48 states in the Union. Only a few of those names belong to residents of Nebraska. So we have not only lost our material wealth, but we have failed to hold our share of the best brains and talent in the world.

You are aware of the fact, not only that scores of our towns have become mere whistling posts but that some of our outstanding flourishing cities have lost population.

I do not think that these two proposals before you are a complete solution to our problem, but I think they are the first step in a long-range program to help our small towns and to promote industry all over the state. The Division of Nebraska Resources tells me that they have lost industries for the specific reasons that this amendment will cure. Twenty-nine different states now participate in a total of 43 programs of this nature. In nine of these states revenue and general obligation bonds are authorized. In twenty states the creation of state development corporations and authorities is permitted and thirteen states have private development credit corporations. Nebraska is not listed in any of these categories. Today industry is on the move seeking additional locations and new outlets.

My first reaction to this set of circumstances was that all of this could be dealt with by the next Legislature and not by me, but then I realized that if we were to wait until the next session of the Legislature this constitutional amendment could not be brought before the people of Nebraska for another two years. The

implementing legislation under that amendment could not be called into being until 1963. Thus, time being of the essence, I have called you into special session so that you have the opportunity to place this amendment on the ballot this coming November.

You have a copy of this amendment. You know that it is very similar and almost identical to the previous one submitted and voted down by the people in 1958. The submitted bill will be the same as the one which the Legislature passed in 1957. As to the attitude of the people to this amendment now, as compared to 1958, I know that Chambers of Commerce all over Nebraska and community leaders from many walks of life are demonstrating not only their interest in the success of this amendment, but also their determination to see that it will pass in November.

These are the two circumstances which compel me to call this special session, the population lag and the time lag.

The second proposal put before you is to provide increased funds for the Division of Nebraska Resources to enable them to step up and dramatize Nebraska's opportunities to the world. The Division of Nebraska Resources has outlined a program for expanded activity during the next twelve months which would require an additional expenditure of \$113,000. My proposal referred to \$100,000. Assuming that this program be initiated on September 1, 1960, there would be but ten remaining months in this biennium and accordingly, its requirements would be five-sixths of that amount or approximately \$94,000. This money would include \$15,000 for expanding our own Resources Department, \$10,000 for research by independent agencies, \$14,500 for personal contacts with prospects, \$8,000 for additional advertising, \$5,000 for special market studies, \$10,000 for the preparation of promotional materials, \$13,500 for community surveys, \$20,000 for community planning and betterment, \$5,000 for the exploration of new ideas and approaches to a broadened industrial horizon and \$12,000 for additional overhead expenses. Complete details of all of these estimates will be furnished through legislative hearings with the Division of Nebraska Resources. I have stated that this money is available without additional expense to the taxpayers. As to how it is to be provided is entirely up to the Legislature. It could be appropriated from unexpended funds in the General Fund or transferred from one of the several funds in the Department of Agriculture. I call your attention only to the availability of the money and the need for its use.

It may be of interest to you to know that Nebraska ranks thirty-sixth in the field of anticipated state agency expenditures for industry alone, and lags behind all midwestern competitors.

Nebraska is tied with Rhode Island for forty-sixth place having increased its budget 33 per cent in the last eight years. The combined promotional budgets for the nation exclusive of special industrial production promotions has increased 131 per cent in the past eight years.

This work needs to begin now. If the past legislative session is any criterion, our Resources Division will not know until next July, almost one year from now, of the money which it will have available to plan for the advancement of its program. If this additional money is provided now it can be mapping a program of research, advertising, personal contact, publicity, and personnel recruitment which will provide for us a running head start on the challenge of the Sixties.

I know that this legislative body could place the Constitutional Amendment upon the ballot by resolution, kill the second Legislative Proposal and adjourn, but I am confident that neither this body, nor any member of the Legislature would expect the voters of Nebraska enthusiastically to endorse the revenue bond proposal, in November, if in August, the Legislature did not consider the matter of industrial expansion for Nebraska to be of sufficient importance to provide an additional \$100,000 for a stepped-up program of industrial activity designed to keep our young people within our state, to provide additional job opportunities for Nebraska workers and to make the maximum use of the great resources which exist within our state today.

Nebraska is desperately in need of the tools with which to combat their surrounding competition. Nebraska must fight on equal terms with our competitive states. These states have the program which I have outlined. They have not found it to be "foreign to the fundamental concepts of our constitutional systems or ultimately destructive to our free enterprise system" as a publication last week implied. Indeed, these have been proven to be the salvation of those states and their people.

MESSAGE FROM THE GOVERNOR

August 1, 1960

Mr. President, Mr. Speaker and
Members of the Legislature
State Capitol
Lincoln, Nebraska.

Gentlemen and Mrs. Orme:

I respectfully ask your permission to introduce a bill calling for the submission to the electors in November 1960 of a constitutional amendment to permit municipal corporations to issue revenue bonds to private enterprise for industrial development purposes.

The bill which I propose is virtually identical to LB 603 adopted by the 1957 session and upon which 23 of the present members of this Body voted favorably when that measure was approved by a vote of 37 ayes, and 4 nays and 2 not voting.

That proposal has been extended, however, to include a provision for the payment of taxes by such private enterprise and to preclude the necessity of a popular vote on each bond issue.

The suggested bill which I forwarded to you this past week would permit the next session to enact implementing legislation without undue constitutional restrictions. However, in view of the 1957 legislative vote on this matter and in order to avoid time-consuming debate on language already found acceptable, I have proposed a bill which uses the wording of LB 603 more extensively but which includes the provision for tax payments.

As I indicated in my address to your Body, 29 different states are participating in 43 different programs of this nature. The small towns, as well as the cities, of Nebraska require this industrial tool if Nebraska is to retain its people and its rightful place in our national economy.

I urge your favorable consideration.

Respectfully submitted,

STATE OF NEBRASKA

BILLS ON FIRST READING

The following bill was read the first time by title:

LEGISLATIVE BILL 1. By Joe T. Vosoba of Legislative District 23 and Arnold Ruhnke of Legislative District 22, upon recommendation of the Governor.

A bill for an act for submission to the electors of an amendment to Article XI of the Constitution of Nebraska, relating to

municipal corporations; to provide for the development of Nebraska agricultural and industrial resources; to provide that the Legislature may authorize municipalities to acquire, own, and lease real and personal property to private enterprises, the cost thereof to be defrayed by revenue bonds secured by a pledge of the lease and revenues therefrom and by mortgage upon such property; to provide that the acquiring, owning, and leasing of any such property shall be deemed a public use; to provide for taxation of the leasehold and other property; to provide for the submission of the proposed amendment to the electors at the general election in November, 1960; to provide for the manner of submission and form of ballot; and to provide the effective date thereof.

MESSAGE FROM THE GOVERNOR

August 1, 1960

Mr. President, Mr. Speaker and
Members of the Legislature
State Capitol, Lincoln, Nebraska

Gentlemen and Mrs. Orme:

I respectfully ask your permission to introduce a bill providing additional funds for the Division of Nebraska Resources.

As I indicated in my address to your Body, Nebraska ranks thirty-fifth in the field of anticipated state agency expenditures for industry and is tied with Rhode Island for forty-sixth place in its over-all state promotional budget. Nebraska has increased its budget 33 per cent in the last eight years while an increase of 131 per cent has occurred throughout the nation during the same period.

We need to begin at once upon a program of research, publicity, prospecting, advertising and programming in accordance with a proposal of the Division of Nebraska Resources involving additional expenditures of \$113,000 for the next twelve months. Assuming the enactment of this legislation, we would concern ourselves with the ten month period beginning September 1 and concluding June 30, 1961 and to require additional funds in the amount of \$94,000.

A failure to provide these funds will mean the loss of a year of effective programming and planning.

I urge your favorable consideration.

Respectfully submitted,

STATE OF NEBRASKA

Mr. Tews raised the question whether confirmation of appointments was a proper subject for the special session in view of the fact that it was not included in the Governor's proclamation.

At the direction of the President, the Clerk read Section 11, Article 4, of the Constitution of Nebraska.

Mr. Syas moved that the Attorney General be contacted regarding whether or not the Legislature should consider appointments made by the Governor, during this special session.

The motion prevailed and the President appointed Messrs. Syas and Tews to contact the Attorney General.

July 25, 1960

Gubernatorial Candidate
John Cooper,
Humboldt, Nebr.

Dear Sir:

You will probably put this letter down to the ignorance of women I am going to vote against it without giving it consideration. And I shall try to be brief as you are a busy man.

Unless Good Government is stressed along with this amendment I am going to vote against it without giving it consideration. The first prerequisite in attracting Industry is good government and I am not in favor of a short-cut or using money as a cure-all. I am not saying that all the towns in the state are poorly run

but I could tell you some surprising things and, I doubt, that every town in the state could pass the test.

If anyone would ask me, "What is the finest thing York has to offer?" — without hesitation I would say, "Its two outstanding Banks." Good government and good Banks will go a long way in attracting Industry.

Perhaps, it is the floods or threat of floods that has caused the loss of population. If the money were used to stop floods — I don't suppose floods can be stopped or they would have been stopped long ago — but something like that I could understand. If this is in the Agriculture Dept. If we want to attract why not make Agriculture attractive? Why help the business-man when the business-man may himself be to blame by allowing poor government? I know — you will put that down to a woman's ignorance so I might as well stop but I will say one thing more.

For over half a century, Fremont has had the reputation of being a clean city. I know because I lived next door for a long, long time. That's my point. Have something to offer. I don't believe money can be used as a cure-all. That brings me back to where I started — Good Government and good Banks in our towns will do much to attract a worthwhile Industry.

Yours sincerely,

(Signed) Mrs. Dora Evans
