LB 158

goes into a project, a government is going to go into this and a government is going to do this and all of these bad things that he cited happens. The point is LB 158 is not, is not, a government project. LB 158 is a private project, private people building an apartment house in which the government is going to take somebody's home away from them to give that land to somebody to build an apartment house. It is not government. It is one private citizen being robbed of his property, being given as a favor to another citizen. I don't see where that is good for all and I don't see where it is a government project. This is all guaranteed by the private developer. We take the private property, give it to the developer. Prior to Senator Murphy's amendment, even with the public subsidizing the cost of the property. My, this is not a government project. Support the amendment to remove eminent domain from LB 158.

SPEAKER MARVEL: All in favor of the Kelly amendment to the bill vote aye, opposed vote no. Have you all voted? Senator Kelly.
