recognize that they can't have all the money in the world to spend any old way they want. It's the only power this Legislature has to give or to take, and for the last so many years it's been give, give, give, give. The last two years is the first time we've ever kept close to seven percent. Before that the University's budget ran at least more like twelve, fifteen, sixteen, eighteen percent. I remember three years ago when John Cavanaugh cut a million dollars out of the central administration, and they have fired every little tiny dishwasher around, every janitor around they fired, but not any of that money hit the central administration. They spend the money any way they care to, and our only power is to take it away from them. I ask for another token amount, \$136,602 out of an appropriation of a 107 million.
