LB 595

SENATOR WAGNER: Mr. Speaker and members of the Legislature, I too support Senator Kremer's amendment. I think when you look at who is going to appoint the people to the Public Advisory Board as you have the Natural Resource Commission which is made up of...consists of members throughout the state of Nebraska represent various regions throughout the state, you've got a cross-section from the entire state. It's a good cross-section. I think they're the likely one to appoint the Public Advisory Board and I certainly support Senator Kremer's amendment.

PRESIDENT: Speaker Marvel, we have only a couple minutes left...only a minute or so left, and what is your pleasure as far as, shall we just stop it at this point or...

SPEAKER MARVEL: How many lights do you have on?

PRESIDENT: We have Senator Marsh, Senator Reutzel, and Senator Hefner, and then the lights start coming back on again for the second round.

SPEAKER MARVEL: Well let's try ten more minutes and see if we can't get through with it in that amount of time.

PRESIDENT: Alright, so we'll proceed with the next speakers. The Chair recognizes Senator Marsh.

SENATOR MARSH: Thank you, Mr. President. Senator Merz, may I have your attention? Senator Merz. Senator Merz, if you have specific knowledge of persons dumping either insecticide or fertilizer in wells, I would like to know who and where, and you could perhaps come and tell me that later.

SENATOR MERZ: Yes, I have this...(interruption)

SENATOR MARSH: I happen...just a minute, as a member of the Appropriations Committee I feel that there would be many advantages to having the flexibility of Senator Maurice Kremer's amendment. I think there would be advantages to having more persons serving on this advisory group, and if Senator Lewis, Frank Lewis, who is not in his seat, but if he's within sound of my voice, I'd like to say to him, we are not talking about the membership of the Natural Resources Commission, and that was what he was speaking to, but rather we are speaking to the advisory group. He was complaining about the numbers who are serving on the Natural Resources Commission from the urban areas, and that's not the issue...question. I feel that the water planning process
