college system and they know that part of that support derives from the fact that many people believe that they have poorly coordinated things so now they are going to have this little council which is going to show everybody that they are going to coordinate things and they don't need a state system. Well I don't think they need a state system either but I am sure they don't need a council, so don't vote for the council unless you think it is really going to be effective. Thank you.

SPEAKER MARVEL: Senator Koch, do you want to make a motion? As I understand now, basically we have two subjects. No, that isn't right either because he has asked to divide the question. We have your amendments to the committee amendments that deal with the council and secondly....,

SENATOR KOCH: The committee amendments are really the bill, Senator Marvel, and they are a white copy in your bill book and what I am doing is offering amendments to those committee amendments.

SPEAKER MARVEL: Okay, what we would do is take your amendments up first?

SENATOR KOCH: That is correct.

SPEAKER MARVEL: And your amendments are divided into three parts as far as Senator Cullan is concerned.

SENATOR KOCH: That is basically correct.

SPEAKER MARVEL: Okay, so if we take...and, Senator Cullan, if we take the Koch amendment which is designated as #1, that is the first issue before us and those would be the Koch amendments to the committee amendments designated as #1 which has to do with the council. Now, Senator Koch, do you want to speak to that?

SENATOR KOCH: I would like to speak to Senator Cullan's argument on the council.

SPEAKER MARVEL: I recognize you to speak to your amendment to the committee amendments. That is what we are doing first.

SENATOR KOCH: I will speak to the amendment that deals with the council.
