LR 53, 65

I am just a little bit amazed that here we come less than three years after the federal government closed and sold the granaries that the ASC office had, sold the granaries and now we find that the farmers have not built their own storage. We find that the railroads are unable to move it, and if they were able to move it and get it out as fast as those big twenty foot combines can pull it in in the fall, there would be no place in the commercial elevators to store it. So it isn't just the simple problem of not selling locomotives to Japan. It has an overall depth and that depth is that the farmers like...like to get two or three trucks, haul their grain to town, and I do the same thing and I am to blame, haul our grain to town and forget that we can store it. We expect somebody else to do it all for us. There is other things to look at besides selling the motors to Japan so that is why I thought I will support the resolution but there are other things, we, as legislators, and we, as farmers, must do for ourselves.
