LB 284

get the money, and then the next question is...I am not acquainted with poundage, in other words, weights that are established here. I don't know whether it is a great big crane or a reasonably small one, or one that would be digging...excavating for houses, or if this weight and poundage would only encompass a very large cranes, and then would this also apply to other vehicles of excavation such as backhose and hydraulically powered vehicles that do the same type of work, and they have these type of cranes now that extend their boom within itself. I have forgotten what they call them but they work similar to a crane but they are not a crane. They don't call them a crane, and I was wondering if it would apply to these kind of vehicles. So those are some of the questions. If you would rather have Senator Stoney, it's fine, Senator Kremer.

SENATOR KREMER: Well, my only comment, Senator Nichol, would be that it specified this as a rubber-tired crane. And, by the way, if anyone wants to know what a rubber-tired crane looks like, go to Barry Reutzel. He drew a sketch of one. He will explain exactly what a rubber-tired crane is.

SENATOR NICHOL: We saw that. Thank you.

PRESIDENT: Mr. Clerk, is there...Senator Stoney, did you want to answer that, or...we have an amendment to the committee amendment first, Senator Stoney. So, Mr. Clerk. will you read the amendment to the committee amendment, Mr. Clerk.

CLERK: Mr. President, Senator Merz moves to amend the committee amendments. (Read the Merz amendment.)

PRESIDENT: Senator Merz.

SENATOR MERZ: Mr. President and members of the body, it was mentioned that just moving these around in the city what if they had to go a hundred miles out of town? At the rate they travel, it is probably ten to fifteen mile an hour, and if they had to go like to Falls City from Lincoln, they would never make it in a day, and I think this should be give them at least four days to make the trip because this I think was something they never thought about. Actually, if you was just going to do it in Omaha that would be different, but I think these cranes are used outside of Omaha too.

PRESIDENT: The Chair recognizes Senator Maresh.
