

January 14, 1980

LB 382

down as to whether that is your understanding of the Supreme Court.

SPEAKER MARVEL: Senator Hoagland, you have two minutes, so do you want to pose another question to him?

SENATOR HOAGLAND: Yes, let me pose another question. Now, Senator Venditte, if that is correct that that is what the Supreme Court opinion does, why then it is true that if this bill passes the only laetrile that could be used legally in Nebraska is laetrile that is taken from apricots grown in Nebraska, is that not right?

SENATOR VENDITTE: No, that is not true, Senator Hoagland. I don't think you will find that in the legislation.

SENATOR HOAGLAND: Well, the only way this bill can be consistent with the Rutherford case is for laetrile patients to use only laetrile that is taken from apricots grown in the State of Nebraska. Now my question to you is, do you know if we have any apricot groves in the State of Nebraska sufficient to supply laetrile to the people in Nebraska who might want to use it?

SENATOR VENDITTE: Senator Hoagland, can you pinpoint to me in the decision that you have before you where you are gathering the question that you are asking me? If you can point out to the body the very question that you are asking me in the decision, then I think an appropriate response would be in order.

SENATOR HOAGLAND: All right, now let me ask you one final question. Now isn't it the case, and, Mr. Speaker, this is my last question,....

SENATOR VENDITTE: No, Senator Hoagland, for my benefit and for the benefit of our colleagues.....

SPEAKER MARVEL: I am sorry, Senator Venditte, I am sorry but Senator Hoagland has the floor.

SENATOR HOAGLAND: Let me ask just one final question and I will sit down. Now if it is the case that we don't have sufficient apricot groves in the State of Nebraska to supply laetrile to patients, aren't you by passing this law, Senator Venditte, fostering and encouraging the violation of federal law by encouraging laetrile patients to smuggle laetrile into the state illegally for their use or wouldn't your bill have that consequence?
