

subject to correction on this, I think to run the program as outlined in this bill would be in the neighborhood of \$300,000. Now if Senator LeCamp would like to change that I would certainly stand corrected because this is a wild guess on my part.

SENATOR KEYES: \$300,000 and how much to implement the program the first year when we are setting up the office and dividing up the state and all of that.

SENATOR NICHOL: On this program or as originally set up?

SENATOR KEYES: What?

SENATOR NICHOL: On this program with the present amendment?

SENATOR KEYES: On this program, yes.

SENATOR NICHOL: I certainly don't know Senator Keyes, I just for the first time today saw the amendment that is in the Journal. I don't see any fiscal notes attached there other than way back so those would not apply, I wouldn't think.

SENATOR KEYES: By somebody that probably knows a little less than I do, and that might be very little, I have been told that the first year our implementing the program would be around \$200,000....two million dollars and then it would be \$300,000-\$400,000 a year. I find out that most programs that we implement for two million cost four million and if they cost \$200,000 or \$300,000 a year that they run a half million a year and at a time when the people are filled up with taxes it seems odd that we...we haven't buried anybody alive yet, and we haven't had any law suits, the insurance companies weren't in asking for this, I can see no reason for the bill whatsoever.

SENATOR NICHOL: I would just like to respond...

SENATOR KEYES: You can finish my ten minutes.

SENATOR NICHOL: All right, I would just like to respond. I really don't think that the program as outlined now would cost anything in the neighborhood of two million dollars to start with. I would like to have Senator DeCamp speak to that if he has further knowledge.

SENATOR KEYES: You have got my permission Johnny to go ahead on my time.

SENATOR DeCAMP: How many more to speak? I will just try to answer these in closing, if that is okay.
