LB 612

have heard it discussed, about inflation, the effect of inflation on government. So government is going to enter into gambling. If inflation can push the government into gambling, why would we stand up here and say that very poor people are not going to gamble away money they might need for food. A mother who is on ADC getting not enough sustenance for her children may be taking the small amount she has to try to get several hundred thousand dollars, several thousand dollars, several dollars, even, based on a chimera that is being held out by the State of Nebraska. I think it is wrong and, therefore, the motion is up there to kill it and I hope you will support that motion.

PRESIDENT: Before we go on to the next speaker, the Chair would like to introduce some of Senator Lamb's guests. Under the South balcony we have former Senator Chet Paxton from Thedford. We have Mr. and Mrs. Earl Monahan from Hyannis and Bill Ward from Valentine. Would they stand and be recognized? Welcome to all of you from your Legislature. Now, Senator Simon.

SENATOR SIMON: Mr. President, members of the body, I naturally rise in opposition to the Chambers motion. I am a little disappointed in Senator Chambers. I thought perhaps he might be a bit more eloquent this morning and languish out a bit more on the poor and the oppressed who are going to be victimized by this dastardly bill, who are going to spend their last dollar, which they were going to use for a loaf of bread, and we are going to grab that from them. Let me take some of the points that Senator Chambers has raised and refute them, which I can do by facts rather than emotion, as Senator Chambers is so good at doing, because if you take a look at what Senator Chambers has said, as usual it is merely eloquence. It is not based on any facts. It is not based on any statistics. It is based merely on Senator Chambers' own personal feeling and I respect that, Senator Chambers. However, it doesn't really stand up when it is time to wash. Senator Chambers talks about the start up costs, we are asked to buy a pig in a poke, \$1.2 million. Senator Chambers, no state has ever lost start up cost money. No state has ever lost money on a lottery. They have all made money. So, yes, I am asking for an appropriation of \$1.2 million because you can't run a lottery without start up costs, but to even attempt to infer the state is going to lose money is certainly an insult to the intelligence of every person on the floor here today. The state is going to make money and you and I both know it. Now if you don't like the bill, then let's discuss it on a manner which you have concerns
