

better idea yet, let's just do away with the license plates all together, I'm also trying to do away with another program that issues a little sticker that you put in your windshield, they probably have got a whole bunch of those things already printed, so let's just do away with the license plates all together and just use the stickers in the windshield and that is all that we will need. If we are talking about dollars that we are going to save maybe that is what we ought to do. I think that this is ridiculous. I also have a third amendment that I had drafted and this amendment, I think, gets to the nuts and the bolts of the issue. We are talking about how many dollars we are going to save and the press has reported how many dollars the state is going to save by only having one plate, two million dollars, and guess what? When John Q. Public goes to the...to his county treasurer to buy the plates two years from now, what is going to happen? What is going to happen to him? He is going to pay exactly the same amount he's been paying, he is only going to get half as much and yet we are going to tell him that he is saving money. You know that is going to be a little bit difficult for John Q. to understand. It seems to me that I don't. . . I don't think the issue is dollars. I think the issue is ridiculousness. Why...this wasn't even part of the hearing. Normally there are people on this floor that would jump up and say, hey we can't do this because we didn't have a public hearing on this issue, but those same people are supporting it now. I don't believe that the people of this state only want one license plate. If they do want one license plate I think they want to pay half as much for it. That is the only way that I will support this issue. If we are going to do it for dollars then let's put one plate on the back. Let's just paint the blooming thing and let's sell it to them for half price. Otherwise, if we are going to keep their prices the same as they are let's give them both plates. Out in rural Nebraska that back plate gets so bend up, battered up and beat up and not having to go six or seven years to do it either, that maybe the stickers on the windshield would be the best idea in the long run. Thank you, Mr. President.

SENATOR NICHOL: Senator Goll.

SENATOR GOLL: Mr. Speaker, members of the Unicameral, I hope that you are all aware of the fact that I am in the automobile business. If you are not, I would like to call it to your attention. But, for over thirty-one years I have driven cars with only one license plate on them because
