we can't say that people back home want us to save money.
His poll shows that about two to one were in favor of the
two license plates. I don't know how many of you are aware
that at one time our trucks had only one license plate and
it wasn't too long that the Legislature decided to go back
to two license plates on the trucks. I think we spend a
great portion of our lives in vehicles and it is importnat
that we be able to see who is on the road when we have
somebody crowding the road. I think that it is good to have
a license plate on the front to see who is hogging the road.
Senator Martin Kahle mentioned tailgaters. I think this
is something we encounter once in awhile. Somebody gets to
close behind us for comfort and we like to see who is behind
us tailgating us. Senator Haberman says that the people
in his district go along with him. I think that most of
us find that when we take a stand and are outspoken on an
issue people back home usually don't argue with us.   I
imagine if I would go back and say do you want one or two
plates, they would most likely agree with my stand. You
don't see people usually arguing...taking issue with your
stand. So I move the amendment be adopted.
