LB 284

about anything while the other side is reaping a harvest and still wants more and I don't know whether Senator Chambers keeps up with what might go on in this Legislature. He spends most of his time up in his office so I am not sure but we have worked and worked and worked on this to try to come up with something that is reasonable and it is not all done here on the floor. I don't think it ever will be. But I would rather wait until doomsday to put this money out if we can't get an equitable formula. It is just not right and I can't go along with it. That is the reason I fought before to get this bill out instead of the one with population in it. Population does absolutely nothing for us but makes it worse. I don't know what we are supposed to be talking about on this issue. I think the issue was to pass over and we haven't passed over so I will quit.
