LB 604

could respond. The bill has some new language providing that the Task Force, and I take it this is the 309 Task Force, shall review all contracts for services with private...from private enterprises, that is I guess in certain situations you can contract with private entities to get certain kinds of work done, as I understand it.

SENATOR COPE: Correct.

SENATOR BEUTLER: And my question is simply this, shall review it. Does that mean they have the power to approve or disapprove? Or does that simply mean they have to sign off as having approved, or as having reviewed the proposition?

SENATOR COPE: I am sure it is that they have reviewed the situation, but I will check to be positive of that.

SENATOR BEUTLER: Okay, I would just like clarification on that item.

SENATOR COPE: All right.

SENATOR BEUTLER: Thank you.

SENATOR CLARK: Senator Wesely, your light is on. Senator Rumery's light is on, I am sorry.

SENATOR RUMERY: Mr. President and members of the Legislature, Senator Cope mentioned the Capitol Building is one that has come under the benefit of this effort. The first year I was here I looked up at the south wall and saw the water stains that had been allowed to be generated because of windows leaked. The promenade around the building was leaking and acted as a funnel and poured water in on the offices of the first floor. And Mr. Ken Fugeron, the Building Director, has informed me that as far as they know all leaks in the State Capitol Building have been taken care of and that...I know, they took me up there and I observed several acres of copper roof that had been replaced, and you have noticed, of course, the work that has been done on the outside of the building and we now have a building of which we can be at least partially proud and I think that when we get through, you will be completely proud of it. I urge your support for the bill.

SENATOR CLARK: Senator Vard Johnson. You have got about two minutes.
