

three-year term and have it work out unless you start getting triple membership on those committees. What we neglected to do when we wrote the original bill is provide for staggered elections. So what this provides for is annual elections with some members going off of the advisory committee each year. The third thing we did with 940 is we said our intent was that if school district reorganization, because of the way our equalization formula is written, causes a school district to lose state aid, that we would hold that district harmless for five years. What we said in the bill was if they lose state aid and they reorganize, they are held harmless. So, conceivably, you could have a district that, through reorganization, received a couple more students and another percent or so of their valuation in new land, for some other reason losing state aid, a cut in state aid here in the Legislature, the fact that they got huge new valuation because of some new factories in their district, for a multitude of other reasons totally unrelated to the reorganization that took place, they could lose state aid. What we're saying is the only state aid loss that we want to hold harmless is that that was caused by reorganization. Those are the three changes that are made. If there are any questions, I would be happy to try to answer those. If not, I would urge you to advance LB 190.
