

headache in an elephant, I don't know how he knew one had one, by rubbing salt and ice on the shoulders, and he also believed that a soul was infused into a female at a later stage of development than a male and the Catholic Church adopted that as its official position. That was the Catholic Church's official position, and when they learned a little bit more from heathenish scientists, they changed that position. But think of how many good Catholics believed that because the church told them that, thought they'd go to hell or to purgatory if they ate meat on Friday. But they don't have to worry about that anymore because for a convenience and expedience the church changes. St. Augustine talked about the countries you go to where the churches are clothed in gold and the people are clothed in rags and St. Augustine was a Catholic. Old Paul, the imposter, or was it Paul, the possum, who was being judged by a religious court for some comments he made that the religious people didn't like and one of them standing near him got so angry he reached across and backhanded Paul. And Paul was cool because, although they thought he was a Christian, he was probably a heathen also deep down inside because he used to stone Christians and hold the coats of others while they stoned Christians, and then he got weak and changed and became one himself. But at any rate he said, why smitest thou me...why judge me according to the law and smitest me contrary to the law? So this Legislature wants to pass a law and say that these young women have the right to a certain bit of knowledge, then deny, contrary to the spirit of that very law, access to that information. This activity gives me a lot of grist for my mill and it gives me a great deal to talk about when I discuss the Legislature and things that are done. And there are people not sitting in this Legislature who have contempt for what this Legislature does and they know the reality, and it is why when people from this Legislature and places like this Legislature try to talk to young people about their problems, whether it is drugs, sex, gangs or anything else, they know it's a bunch of hypocrisy and these grown people couldn't care less because they create conditions that cause the young people...

SPEAKER BARRETT: One minute.

SENATOR CHAMBERS: ...to run to these very things. So you'll get your bill passed and, remember, it's not the young girl who has to tell her parents, it's the doctor. So he has got to be the snitch, and as I said the other day and I don't use this kind of language, but now she can go home to a father and let
