LB 682, 815, 816

CLERK: 29 ayes, 0 nays, Mr. President, on adoption of the motion to advance LB 815.

PRESIDENT: LB 815 is advanced. LB 816.

CLERK: LB 816, Mr. President, introduced by the Appropriations Committee. (Read title.) The bill was introduced on April 21, referred directly to General File, Mr. President.

PRESIDENT: Senator Warner, please.

SENATOR WARNER: Mr. President and members of the Legislature, LB 816 was a bill brought to us during the appropriation process in the committee by the Fire Marshall's Office in order to provide the funding for inspection as required by statute of underground tanks by the fire...by the Fire Marshall. A portion of the...well, these provisions were, in fact, a part of LB 682 which is still in committee and this portion dealing with the registration fees and where they are to be deposited was...I do not believe was a part of the reason for the bill not being advanced from committee yet but being held for further study. But this portion is necessary in order to provide the funding of...that the Fire...for the Fire Marshall's Office, inspections that they are required to make. Under current law, there are two charges that are made on underground tanks. There is the registration fee which is related to size and it ranges from 7.50 to a maximum of \$15 and in addition there is a current inspection fee of \$15. You add those two together which would be...well, it would be the situation currently why an individual would be paying either 22.50 at a minimum, combination registration and inspection fee, or a maximum of 30, which are two levels of \$15 for the same thing. This makes a single standard fee of \$25 which includes both registration and inspection. It would be, in effect reducing the maximum by \$5 and increasing the minimum by \$2.50, but I assume it's much simpler for administrative purposes in this form. Currently, those funds that are collected from the registration goes to Environmental Control for cleanup. Under LB 816, as I indicated in committee, the funding would have gone to the Fire Marshall for his operations just as is true of LB 816. Federal funds will be used for cleanup and if other provisions come along for funding, those would also be available but the monies from the registration collection fee that is consolidated will go to the Fire Marshall, estimated receipts in the vicinity of \$375,000 for which they will be included in the A bill that follows.
