

CLERK: Mr. President, 1004A by Senator Rogers. (Read title.)

PRESIDENT: Senator Rogers, please.

SENATOR ROGERS: Mr. President, speakers, you've all got a fiscal note, I mean, rather than me trying to read where all this money is going, I mean, I'll just give some of the classification titles of some of the people that the Department of Ag will have to hire. There's an accounting clerk, about three ag inspection specialists in the veterinary field office, and an attorney and an office clerk and a staff assistant. The total A bill is 866,000 for '90-91 and 928,000 for '91-92. Then on the back of the sheet I wish that if some of you would care to, you'd look at that. It gives some of the costs that the producers will bear. Vaccine costs are like 421,000 a year, one herd testing is 1,400,000, feeder pig producers is 265,000, farrow to finish 800,000, seed stock producer inspection, this is money that is in the lost column, you might say, if you looked at it as a producer but, in other words, the producers are funding 4 or \$5 million of this particular bill over a two-year period and I'd ask for its advancement.

PRESIDENT: Thank you. Senator Chambers, please. Okay, the question is the advancement of the bill. All those in favor vote aye, opposed nay. I still need a little help. Record, Mr. Clerk, please.

CLERK: 25 ayes, 0 nays, Mr. President, on the advancement of 1004A.

PRESIDENT: LB 1004A advances. LB 1064A.

CLERK: 1064A, Mr. President, offered by Senator Wesely. (Read title.)

PRESIDENT: Senator Wesely, please.

SENATOR WESELY: Thank you, Mr. President, and members, LB 1064A is that clean-up bill for the Health Department and at this time deals with primarily x-ray regulation. There are fees charged on x-ray operators that cover the cost of administering the program. The A bill is cash funds from those fees. It's about \$143,000, but all that is paid for from the fees that are collected from this program, so I'd move the advancement of the
