

it's another example of this is not the case, the commission says, ho, we can't get going until we get some money to get started and we don't have any Cash Funds until we do something and we need some seed money now, even though the bill was sold on no General Funds, strictly Cash Funds. Secondly, the second problem I have with it is you're appropriating money for the State Board of Agriculture to the Antique Tractor Commission to renovate a building on the university's East Campus, \$2,000 to build a new door. I don't know what exactly the door needs to be. The way I understand it, this is a building out by the tractor testing lab. I don't know what exactly has to happen there but it's one of those things I find it hard to believe we have to give it to a cousin, give it to a cousin, give it to a cousin and spend \$2,000 out on the East Campus. So, for those reasons, I oppose Senator Schellpeper's amendment.

SPEAKER BARRETT: Senator Korshoj, please.

SENATOR KORSHOJ: Mr. Speaker and members, would Senator Schellpeper answer a couple of questions, please.

SENATOR SCHELLPEPER: Sure, be glad to.

SPEAKER BARRETT: Will you respond?

SENATOR KORSHOJ: Who owns this building? It's a state building. Is this commission or whatever going to rent it, lease it, or what's the arrangement?

SENATOR SCHELLPEPER: The university, Senator, has offered to let this commission use it for nothing if they will put in this door. It's a building that isn't being used at the present time. It's the second building east of the old tractor testing laboratory on the East Campus.

SENATOR KORSHOJ: So how long do we stay in there? Until they kick us out, or is there a lease or what's the rate...

SENATOR SCHELLPEPER: There's no...there's no type lease or anything. They just said you can use it as long as you want to until we tear it down because it isn't being used, I think, is what the problem or what the agreement was.

SENATOR KORSHOJ: And then who owns this equipment we're going to display in there? Is it consigned or is it owned by any
