

defense but not one cent for tribute, and the barbary pirates and those who know what they could in this country said, well, if you want to travel those waters, you're going to pay whatever tribute they charge. And America has never forgiven Libya, because Libya was the country. And now we've got some pirates here saying under the guise of a bill to raise money for education put some in the Highway Trust Fund. I hope the Governor is listening and if not the Governor, somebody who represents her to show that this bill is a sham and I think those who originally started out had a good intention. Just like Jim Jones. You all have heard of Jim Jones. Baron, you've heard of Jim Jones, the man who started out trying to help the poor was going to give an alternative to the established organized religions and he really meant well. But as the poor came in greater numbers, and the money that the poor had, small from each one, began to multiply because of the numbers contributing, the money that came in and the power attendant on that money corrupted the man. And when he lost his mind he had some Kool-Aid prepared and he had all of these people who believed in him and trusted him drink the Kool-Aid, but before they checked out, Senator Smith, by drinking the Kool-Aid, they bumped off a Congressman and some other meddlers. Congressman went there and he's going to straighten everything out and he got bumped off. Now we've got some Jim Joneses on this bill. They started out with high motives, if we accept at face value what was said and we don't have any reason not to, but now that the nature of this bill is becoming clear, what is to be done for the public? They're to be fed the Kool-Aid, Baron Hefner, the poison Kool-Aid. And when it comes to them what has happened they will see the Legislature in general as a bunch of people who misrepresent and trick the public constantly, who will take the most noble concept and taint it, soil it, and use it as a means to trick the people. Nobody who supports this bill has said that one of the hidden purposes is to build better roads. I hope that Senator Smith's amendment is accepted, but if it's not, I hope the Governor accepts this free advice and will point out this aspect of the bill and also point out that it was thoroughly debated on at least two occasions and some of the most senior members of the Legislature said, use the education bill to raise money for the highways.

PRESIDENT: Time.

SENATOR CHAMBERS: Didn't that one fellow who ran circuses say, a sucker is born every...there is one born every second, and the
