

SENATOR MOORE: Those are your words. I'm not denying that.

SENATOR CHAMBERS: Okay. Now, do you support...would you support a method whereby more money could go for the funding of this bill without raising any additional tax than what the bill already states?

SENATOR MOORE: I need you to ask me that one more time so I understand it.

SENATOR CHAMBERS: All right, let me ask it a different way. Would you support a proposal whereby without raising any tax rate more than what the bill already does, but that would make more money available for the funding of this bill?

SENATOR MOORE: I would be interested in that, yes. Let me correct one of my previous answers, Senator. There was a bill introduced to do exactly what this bill does, but...

SENATOR CHAMBERS: But they didn't look for it through this bill?

SENATOR MOORE: No, there was a bill introduced to do that. I spoke incorrectly there. It was 832.

SENATOR CHAMBERS: And that bill, it may not even pass...

SENATOR MOORE: I don't know.

SENATOR CHAMBERS: So this bill, but this bill, as drafted, will give them a windfall through this bill.

SENATOR MOORE: Well, I hesitate to use the words windfall.

SENATOR CHAMBERS: Did those who represent the Highway Trust Fund and the road builders come in and support 1059 because they said it's going to lead to more money for better roads?

SENATOR MOORE: To my knowledge, no.

SENATOR CHAMBERS: Okay, so that's the way I'm dealing with it.

SENATOR MOORE: Okay.
