

SENATOR NELSON: Um-huh.

SENATOR KRISTENSEN: ...if that's a legitimate problem, that is sure one we ought to look at and do something with it. I'm not sure I'm ready to, without taking a good look at it on Final, I'm not sure I'm ready to do that. No reflection of whether that's good policy or not, just...

SENATOR NELSON: Sure, and no reflection on you. I'm not...I wish that I was more knowledgeable and had all of the particulars right in my mind again, but I simply don't. Maybe I was asleep at the switch when this bill come down the line.

SENATOR KRISTENSEN: Thank you, Mr. Speaker.

SPEAKER BAACK: Thank you, Senator Kristensen. Senator Lamb.

SENATOR LAMB: Well, Mr. President, members, I guess I had the same questions that Senator Kristensen mentioned. Do we have a copy of your amendment on the desk?

SENATOR NELSON: If you...probably...I don't want to hold the bill up. I could go back and make a five minute telephone bill and explain it to you, but I, you know, I don't want to hold up the legislative floor for that reason. And whatever...

SENATOR LAMB: Well, I guess I don't see...I agree, I don't...either those...if I take my car into this place that does not sell new cars or used cars, it has my license plate on it.

SENATOR NELSON: I agree.

SENATOR LAMB: And so they can run it. I just also don't see the problem, that there is either a dealer plate available, or the private individual's plate is on that vehicle, so I just really don't understand the problem.

SENATOR NELSON: They are not dealers. So to me it would seem...

SENATOR LAMB: Well, if they're not dealers,...

SENATOR NELSON: ...as though the private individual's license would be on there.
