

criteria, we would only come up with one, and that would be geology, and they all would have that, they all would have it. They just don't...haven't done as much work as we have to identify. We are like third now in generation. We would maybe tie with everyone else in one of those criteria. So if they would do it again and do it honestly, we would be able to fulfill the prophesy that was stated on this floor over, and over, and over, folks, the chances are 100 in 1 that we'll be the site to this facility, 100 in 1, it will never come here, stated again, and again, and who was telling you that? Who was telling you that? The federal government can state at any time that there is an emergency for the armed services on waste disposal, because it's there and it's there now, and it's in this government report. It's in that article I handed out to you. So if, indeed, we're first, they can say, well there we go, our problem is solved. You want it, you'd like to volunteer for this? No. Okay, thanks, here it is anyway. I'm not saying this will happen, but the probability is there. And people have told you over and over that there was no chance for anything like that. And those are the people that are telling you to support the excess baggage on LB 827.

SPEAKER BAACK: One minute.

SENATOR MORRISSEY: And there's a lot of it, and it is bad. I'd urge you to help Senator Dierks and I delay this bill long enough for us to get our language together to do what's needed to protect the citizens of this state and only what's needed to protect the citizens of this state. I'd ask you to help me with this bracket motion. Thank you.

SPEAKER BAACK: Senator Morrissey, are you asking unanimous consent to bracket till the first?

SENATOR MORRISSEY: Yes.

SPEAKER BAACK: There is an objection, so we will...this is a debatable motion, so we will continue on the motion to bracket. Senator Dierks.

SENATOR DIERKS: Well I support this motion to bracket. I think that we've had some difficulty with the amendments, and I think the people are probably getting a little tired of the debate. And until we get the amendments in the fashion that we're going to be happy with them, why we'll be doing this for ad infinitum.
