

CLERK: Madam President, there are. I have a series of amendments. Senators Hall and Will, as co-introducers of the bill, have priority pursuant to the rules. Senator Hall and Will would move to amend, Madam President. Senator, I have your AM1775 pending.

PRESIDENT MOUL: Senator Hall.

CLERK: AM1775, Senator.

SENATOR HALL: Thank you, Madam President, and members, AM1775 is an amendment that's found on the Journal page 2019. It is the amendment that was offered to the same amendment that was going to be offered to LB 320. So to look for this amendment, please turn to page 2019 of the Journal. And you won't find much. You will see 10 lines. It says strike Sections 5 to 30, 34 to 41, and 54 to 82. Hut, hut, hut! It is an amendment that does this. It strikes the entire section dealing with the motor vehicle fees. The question has been raised, or a number of questions, I guess, have been raised dealing with the issue of the motor vehicle fee schedule and the proposal that the Governor has offered. This clearly is not an amendment that has the blessing of the Governor. Please do not misinterpret that. These are amendments that I have offered, along with Senator Will, to the Governor's proposal. The Governor's proposal, as I have introduced, has a fee schedule in there. Make no mistake that the Governor will probably not be very pleased as he is listening to this. But, be that the case, the amendment is here because I question the need to make this change. There is...and I think it's a radical change, if you will, to deal with the problem on a short-term basis. I do not have a problem and I know, I saw Senator Schmit out of the corner of my eye wheeling his chair as I said that because I just gave him his best argument for one of his amendments to follow. But this proposal of the motor vehicle fee schedule impacts everyone in the state. Some people impact better than others and it is, I guess, a short-term solution that I'm not convinced that we need. We deal with motor vehicles...could I get a hammer, Madam President, please. Thank you. Could I get a hammer? Thanks. (Gavel.) Thank you. This provision deals with the issue of the motor vehicle fee schedule. It says that we are going to keep the personal property tax as it's levied on motor vehicles in place. We are not going to make that change. I do not feel that there is a need there because of the distinction that we
