

Senator Lamb?

SENATOR LAMB: Yes.

SENATOR MOORE: Well, to begin with, do you have an idea where the other \$10 million is supposed to come from, or that is our problem?

SENATOR LAMB: That is negotiable.

SENATOR MOORE: You are open to that.

SENATOR LAMB: I am open.

SENATOR MOORE: Then, secondly, the income tax generated, that \$4 million, I mean, I am reminded of the old adage you don't count your chickens before they are hatched. It is not one of those things where it is \$4 million you say is going to come in because we repeal the personal property tax?

SENATOR LAMB: Yes, the thinking is that when you repeal the personal property tax on business equipment, then those people with that equipment will not be able to deduct that property tax from their income tax statement and will be paying more income tax.

SENATOR MOORE: Okay, and the retail collection fee, is that 1.5 they still get to keep?

SENATOR LAMB: That is the same as the Governor's proposal. There is no change in that.

SENATOR MOORE: Now the sales tax on access charges.

SENATOR LAMB: That is new.

SENATOR MOORE: That is new, and telecommunication data?

SENATOR LAMB: That is new.

SENATOR MOORE: And the exemption for repair parts on common carriers, is that...?

SENATOR LAMB: That is new.
