

here.

SENATOR MOORE: Well, you know, Senator Ashford brings an amendment, you read it, it kind of makes some sense, then you start thinking about it, it really doesn't. I mean, it's the old cart before the horse type of thing where you want to, with only 10 of these in the nation, you'd like to have one of them bring them to Nebraska. Maybe this should be an economic development argument. I mean, maybe that's the way you should do it. Maybe you could do it that way, but, nevertheless, it's one of those things Senator Ashford said, well, you need to have a facility in Nebraska, or you need to make it mandatory they actually are composted. Senator Ashford, would you yield to another question?

SENATOR ASHFORD: Sure.

SENATOR MOORE: You mentioned...how would you make it mandatory they are composted? How would you propose to do that?

SENATOR ASHFORD: My...just say they shall be composted. My point only is that...

SENATOR MOORE: But how, you know, if...to my knowledge...

SENATOR ASHFORD: Well, I don't know, you just say...if you say...and if you provide that they shall be composted, then they shall be composted. Then basically you're telling the people...

SENATOR MOORE: Yes, but how are you going to make me do it, I guess, is my question?

SENATOR ASHFORD: Well, how are we going to make you do anything? I mean, you know...

SENATOR MOORE: Well, but I mean I don't have any children yet and I don't have any diapers that I have to deal with yet, even though my nephews consume a lot of them. I have four nephews that...two of them are in diapers. But how would you...you could say these shall be composted, but how in reality would you ever make that happen?

SENATOR ASHFORD: Well, I think, I think, and that raises a very good point and that is we passed a law that says they must be biodegradable. The manufacturers are now coming in and saying,
