

that you beat Kay Orr over the head with with a two-by-four on a daily basis, sometimes hourly on some given days. You know, if you want to correct all the tax ills of our State of Nebraska with 829, then let's do it, and you've said repeatedly over the years that our income tax system has not been correct. I have an amendment, as with the amendment I already discussed, disgusted, you're disgusted with, that would have helped correct that, would have set it right. And you said, well, this is temporary, we don't want to do this. We are going to try and just temporarily one year raise the tax on people. Now you turn around on this amendment and say, yeah, it is temporary, but you are very clear and you want a super bracket to happen. That is something you have wanted to do for a long time. I am sure Senator Will would always vote for that. As a matter of fact, I remember Vard Johnson, I was a young freshman senator, supple as could be, he talked me into it and I voted for it. (Laughter) Bendable, supple, easily maneuvered, and so if you want a super bracket, there is a time and a place to do it, Senator Hall. Now you agree that my amendment raises the same amount of money, raises money from the same people. But you want to call it a super bracket, that is what you really probably would like to continue permanently at some point in time, and I can understand that, but if we are talking about temporarily raising it one year, this will do it the same way, generate the same amount of money, will not increase the third rate. If you don't want to call it a super bracket, let's just call it a higher bracket for the upper income, higher income corporations. This raises the money from the same people, and it does not put in the statute a higher corporate rate of almost 9 percent to the \$200,000 and above. Now, Senator Hall, I am willing to work with you to do it permanently over the summer, I am going to work with you and I may support that a year from now, as I have in the past. But 829, if it is going to be sold as a temporary solution to our problem, a one-year solution to our problem. If it is going to be sold as something that we are not trying to cure all the tax ills of the State of Nebraska, we are trying to stopgap for one year, you shouldn't make a deviation from that on the corporate income tax and do something people have wanted to do for a long time. Senator Hall, I may be working with you a year from now on this very same thing, but today I differ with you. We can accomplish the same goals, generate the same amount of money with this amendment, and I ask for its adoption.

SENATOR MORRISSEY: Thank you, Senator Moore. You have heard Senator Moore's closing. All in favor of the Moore amendment
