

engine, you try to get down to the ground or you stall and try to get to the ground. Senator Conway knows if you're in a helicopter and you lose your revs, you better put it down. It's obvious that the people here have decided that they want to charge full speed ahead and do something which is diametrically opposed to the good of the industry. And I apologize, as I have done hundreds of times on this floor, for those whom I have offended but I want to disagree thoroughly with my good friend, Senator Schrock. The best thing that could happen to that fund would be for it to be dissipated because that would mean that we have new production. I have an invitation to speak at Aurora, Nebraska. They want to build a new plant, Senator Rod Johnson, and you're shutting them off. And I will be glad to say that it was Senator Rod Johnson's idea when they invited me out there. And the headline will read in the Aurora Gazette, Rod Johnson shut off the Aurora Co-op. Not just kidding either, Senator. The point is this, I'm going to support the motion to bracket the bill. I'm going to support the motion to bracket because at least we are perpetuating only one sin and that is the sin of reimbursing the existing production, but we still allow...we still allow for the encouragement of new types of construction in this state. Now I'm going to tell you something. The scam that created the \$200 million rip-off of agricultural loans for Nebraska was perpetrated in this state and I was here and helped put NIFA together and we all thought we had proper protection. When the scam was made known, we all said, oh, wasn't that a disaster? Wasn't that terrible? Ladies and gentlemen, 25 of you just voted to continue to provide a rip-off for our Nebraska millionaire of Nebraska taxpayer dollars at the rate of \$300,000 per month to the exact detriment of plants that may come to Wehrbein's district, Robak's district, Rod Johnson's district, several other districts in this state. And I'm telling you that when this is all exposed, and it will be, and you are called upon to explain your vote, I hope you do not need to debate it with me, but worse than that you will say, well, we didn't know. Well, ladies and gentlemen, you will have to then go back and read in the record where I told you and told you and begged you not to continue this kind of sham and scam and rip-off. It is not conducive to the good business of the State of Nebraska. I support the Coordsen proposal and it's a disaster to say we're going to just walk away from this because there are some other parts of that bill we need very badly. But, so help me, I cannot believe what is going on, and I say this literally, behind my back here on this floor today. Are we so intense upon protecting one individual in this state that we throw away the
