

know what map is going to be the one that's completed, but all AM2186 consists of are these kinds of adjustments and checks. I have another amendment coming up that actually has some substantive changes that people wanted between one district or another with respect to the Senator David Bernard-Stevens' map, as we've gotten to know it, but in this particular amendment that I'd ask you to adopt it's simply the bill drafting and other technical errors that we found as we proceeded through the conversion from the map to the language itself, so I offer that to the body.

PRESIDENT MOUL: Thank you, Senator Conway. Before we proceed, I'd like to call the senators' attention to the area under the north balcony. A special guest of the Legislature today is a former state senator, Don Dworak. Welcome to the Chamber today. Mr. Clerk, do we have an amendment on the desk?

CLERK: Madam President, Senator Conway would move...Senators Conway, Robak, Landis and Lindsay I think, yes, AM2229, Senator. (See AM2229 as found on pages 2730-31 of the Legislative Journal.)

PRESIDENT MOUL: Senator Conway.

SENATOR CONWAY: Thank you, Madam President. The amendment to the amendment that was filed is the one that has, and I'm hoping to amend it into the technical amendments, but it is the one that has three different senators' districts who had previously filed amendments of their own, and I asked them to put them all together and that way we can also make sure that they're technically correct and fit into the scheme the way that it's coming down to join together and that'd be Senator Landis, Senator Lindsay and Senator Robak were, at least to the best of my knowledge, instigators of these and they've joined together into one amendment. What they were is situations where, for whatever reason, and I'm sure there were three different reasons in each case, felt that the way the Bernard-Stevens plan was drawn that they could adjust it a little more closely to their liking or a little more closely to what was natural or something that they knew about personally, to design it in such a way that they were trading between districts. It did not throw them out of the 2 percent variances, and we checked that very closely, but was more compatible with their wishes and they were trading with one another in that regard, so that's what AM2229 is that I'm asking you to support.
