

amendments had that been the case. Process was followed. The A bill was for 50 thousand for the first year, 25 the second. I do have amendments that when Revenue Department came in the original numbers were estimated by the Fiscal Office which would change that to a total of 95,000 of appropriation the first...for the 95,500 instead of the 50,000, and the 25,000 for the second year would be 85,800 with a personal service limitation, instead of 15,050, the total cost is...that is requested is \$95,500 as opposed to the 50,000 that was initially put in to the bill. Twenty thousand of that was for administering...

SENATOR MOORE: Okay.

SENATOR WARNER: ..of the...of the fertilizer.

SENATOR MOORE: Thank you, Senator Warner. And so we do know that the A bill, administrative costs of that A bill is going to be about \$95,000. Had it been my bill and the administration would have been hostile, it probably would have been half a million, but that's...Department of Revenue said it's a minimal cost. And obviously not included in that A bill is the fact, I know Senator Cudaback had an amendment filed on local governments, there's not a cent appropriated in the A bill or in the bill and, with the lid provisions on local government there's not a cent to increase enforcement to try and get to that hundred percent compliance that supposedly makes sure the homeowners don't take a hit on this. And so, that's the problem with the administrative problem. I mean, that's fine, we can suspend the rules. We've ignored the rules for some days now on this debate. We'll continue to do it now. I can live with that, but the second problem that, you know, the two amendments I have up there and, once again, the frustration, and I may add and I will commend the Chair on the handling of the cloture rule. I was certainly glad that that rule worked as it should, in my opinion, but unfortunately, with about 30 more minutes, that motion could have been made that the proponents of 1063 did and we could have had a bill that cash flowed. Two of my amendments up there, my understanding, the Cash Reserve Fund transfer, and the occupation tax, I just think it's regretful that the body allowed that to happen. With a little more time, since the amendment process that worked, worked as it did, it could have been done and the bill could have been...with a rule suspension and, as I mentioned, I would have helped on to have made the bill cash flow. Unfortunately, that, as I said, that...I
