

that liar's figure and figures lie. And also the figures can be twisted. You take somebody who is smart with figures and they can show you anything they want to. I can take your figures or where you got your information and do a complete turn-around. It can be done and it has been done. Now it seems as though we've had this problem for a while. I think we've had this problem for a while but, all of a sudden, it's mushroomed, it's a big, big, big problem, we've got to take care of it right now. And it's a people problem. However, it seems as though anymore people who have a problem have a reason, it's not their fault that they have a problem. I was abused when I was a child. I grew up in the wrong part of the town. My parents were bad. Now the school I went to wasn't any good. I was sick part of the time or all of the...it seems as though the excuses are never me, it's always somebody else. So now it's being suggested that we take all of these people who have the problem, and there are some, I agree with you, and we're going to have government take care of them. The government is going to take care of everybody so pretty soon we're going to be a country of government. Absolutely, we're going to be a company of government. And this country has never fallen. We're the only country in the world that has had our form of government and have never been defeated in battle or fallen, all the other countries have. But we're going to head that way if we keep on saying the government is going to do this for the people and do that for the people whether the people want it or not. I think Senator mentioned his constituents pay another tax. Somebody mentioned that. I didn't vote for all these tax increases. I understand that the worker pays taxes, sure he pays taxes, he should. He gets the benefit of his taxes. He gets trees, fire protection, police protection, schools, you name it, he gets all those things. Sure, he pays taxes. But what we're trying to say, he's paying too much tax let's tax the man at the top and let's tax the female at the top. Thank you, Senator Bohlke. Thank you, Senator Pirsch. Thank you, Senator Schimek, Senator Nelson. Well I got an applause because I said females, males, females and males, women and men. You know, it's not going to do any good to stand up here and give my opinion or tell you not to vote for the bill because either the votes are there or they aren't. It's just that simple. So somebody mentioned giving a tax credit for family leave or tax credit for daycare centers. Well, you know, I haven't been...I haven't been contacted by any businesses run by men or women asking for tax credit.

SPEAKER BAACK: One minute.
