

Revenue Department, realizing that it's done good things to give incentive to business, I agree with many of the speakers who have said that. But I do not believe that we should do it at this time. Since I have been listening to many of you during this special session, I have heard you say over and over again we are here to look at the big picture. This is our opportunity to look at the big picture of what we do with the tax situation. And someone would have to answer to me how removing 775 and earth moving equipment is looking at the big picture when I think it's narrowing the scope. I believe, emotional or not, red herring or not, we must consider what is fair and equitable and exempting 775 and earth moving equipment at this time narrows the scope and it is not fair and it is not equitable. I support Senator Chambers' amendment.
